CONGRESS SPLITS ON RADIO SO BILLS WAIT

SENATE WANTS COMMISSION; HOUSE DOESN'T

Both Must Give and Take Before Agreement Can Be Reached—Action to Be Pushed

WASHINGTON, D. C.—After philandering with Radio legislation for months the first session of the sixty-ninth congress adjourned without having taken any definite action in spite of a last minute attempt to pass a resolution which was actually passed by both houses of congress but which failed of signature by the president before adjournment and which, therefore, did not become law.

During the closing days of the congress the senate passed the Dill Radio bill with a number of amendments, and inasmuch as the White bill has already passed the house, the bills were sent to conference. The conferees, however, only had twenty-four hours before the final adjournment of congress and they realized the impossibility of bringing out a compromise bill which could be passed. The conferees, therefore, unanimously adopted a joint resolution which was to become law and which they hoped would take care of the situation until the next session of congress in December. This is the resolution which the president failed to sign.

Promise Early Action

The conferees on the part of the senate, who will continue at the next session of congress, include; Senator Watson of Indiana, chairman of the committee on interstate commerce; Senator Cummins of Iowa, and Senator Dill of Washington. The conferees on the part of the house include; Representative Scott of Michigan, chairman of the house committee on merchant marine and fisheries, and Representatives White of Maine, Lehlbach of New Jersey, Lazaro of Louisiana, and Davis of Tennessee.

Representative Scott has announced that the Radio bill will be informally considered by the senate and house conferees during the recess of congress and that there will be a meeting about November 15 to whip a compromise measure into shape for immediate consideration of congress when the December session opens.

"I shall have copies of both the Dill bill, passed by the senate, and the White bill, passed by the house, printed in parallel columns, provision by provision, in a comparative way," said Mr. Scott. "My plan is to send this bill to all the conferees and have them study the provisions of the two bills comparatively so that they will be prepared to meet informally in Washington about November 15 to get together on a measure that will meet the situation adequately and satisfactorily."

Comparison of Bills

The resolution which the conferees hoped to have adopted during the closing hours of the congress, and which was drawn on behalf of the conference by Senator Dill and Representative White, provided that no broadcasting station could be granted a permit for longer periods than ninety days except in cases of commercial stations, which would have been allowed two years. It provides also that applicants for permits would have to sign a waiver of any claim against the United States to any wave length or to the use of the ether in Radio transmission because of a previous license.

Both the Dill and White bills have been explained at some length in Radio Digest from time to time. The White bill passed the house some months ago and differed from the Dill bill in that the latter provided for the administration of the law by a separate commission instead of by the department of commerce which has had jurisdiction since there has been any Radio law.

Dill Bill Provisions

The Dill bill passed the upper house during the two closing days of congress and a number of amendments were made to the original bill. One of these provided for a court review of any decision of the commission, while another reduced the salaries of the commissioners from $12,500 as originally provided for in the bill to $10,000. The salary of the secretary of the commission was also reduced from $7,500 to $5,000.

Another amendment adopted by the senate to the Dill bill provided that any station which permits a political speech shall give equal opportunity to the opponent of such speaker but shall not be liable for an uncensored speech.

A further amendment provided that if it is proposed to erect a station in any state of 5,000 watts or over, that the commission must notify the attorney general of the state and give him a hearing if he desires to protest against a license being issued.

Senate and House Are Divided

The Dill bill, as it finally passed, provides for Radio control in the United States by a commission of five selected from five different "zones" in the country. It was passed by the upper house without a record vote being taken. On the other hand, the White bill passed by the house provided that Radio control should remain in the hands of the department of commerce. The Dill bill strikes out the house bill entirely and inserts the whole new bill. It is this discrepancy that the conferees when they meet at the next session will have to iron out and it is obvious that it will be a give and take proposition.

Of course, a great deal of water will go over the dam before next December but it is understood that Representative White, on the part of the house, does not feel that his body should accept the senate commission bill. On the other hand Senator Dill feels this should be done. As a consequence both houses will have to give up some of their ideas and it is probable that the final legislation will be a mixture of the two bills.

RADIO STAR, HEARD AT WSM, TO OPERA

NASHVILLE, Tenn. — From 450 singers Joseph T. McPherson, of this city, was recently engaged for Metropolitan opera by Giulio Gatti-Casazza, director of that famous organization. Mr. McPherson helped dedicate WSM, the National Life and Accident Insurance company's station, of Nashville, Tenn. He received his graduate training from Signor G. S. De Luca of Nashville. Radio has helped hundreds of artists in America to develop their talents and receive recognition in their particular fields of endeavor. Therefore, WSM is proud of the attainments of this gifted singer.

COOLIDGE VOICE MAY BE WIRED TO DENVER

KOA Plans to Mike President's Message August 3

DENVER, Colo.—It is expected that President Coolidge will deliver a special address through KOA here to Coloradoans Tuesday, August 3, when closing features of Colorado's semi-centennial celebration will be microphoned from the Denver munipical auditorium.

Barring possible changes in present plans, the president's message will be relayed direct to the Denver auditorium by land wires from the Summer White House at White Pine camp in the Adirondacks. The entire celebration scheduled for 12 o'clock noon, Mountain time, will be transmitted by KOA and includes a number of addresses by leading western speakers and musical numbers by Colorado's finest talent.

BEGIN SEARCH ANEW FOR MISS RADIO 1926

PRIZE WOMAN FAN TO BE FETED AND HONORED

New York Radio World's Fair Manager Announces New Hunt for Diana of Broadcasting

NEW YORK.—Owing to the large number of entries and in order that the program for the entertainment of the winner may be worked out well in advance, the competition among the feminine broadcast listeners of the United States to determine who is entitled to the distinction of being named "Miss Radio, 1926-7," will end August 15.

"Miss Radio" will be a guest of honor at the Radio World's Fair and be introduced to the visible and invisible audience at the opening ceremonies on the night of September 13 in New Madison Square Garden. She will also be guest for a week at entertainments, receptions and theater parties arranged by women's clubs, Radio organizations and other associations. All expenses, including transportation to and from New York, will be allowed "Miss Radio," and she will be awarded a loving cup.

The present holder of the title is Rena Jane Frew of Beaver, Pa., who, as a student in Geneva college, won the 1925 contest.

How Winner Is Picked

The winner will be judged on skill in operating a receiving set to bring in long distance stations and for the best essay on "What Radio Is Doing for Women" or a kindred topic. The log will be judged with respect to kind of set used, location and other factors. Women in the Middle West, for instance, send in records that outshine those on the Atlantic and Pacific coasts, and ten tube super-heterodynes naturally bring in more stations than a one tube outfit, although last year an invalid woman reported 250 stations received on a single tube receiver.

Everything will be judged on its merits. Logs and letters, with a photograph, should be sent, preferably immediately, to G. Clayton Irwin, Jr., general manager of the Radio World's Fair, at 1475 Broadway, New York city.

Professionals, by which is meant people who directly or indirectly earn a living from Radio, are barred from the contest.

PILLOW AND COTTON AID TO DX-ER'S WIFE

NEW YORK.—Getting a divorce is not the only or the best method of curing a husband who insists on "DX-ing" during the "wee small hours" of the morning, according to one wife who wrote WEAF last week. Her letter concerned a program broadcast by WEAF but in its course she mentioned her husband's devotion to his receiving set and her method of ignoring the music which pours forth from the loud speaker at hours when all good mortals should be asleep. Here is her method: "When I go to bed now I put one ear on the pillow and a big bunch of cotton in the other one, and believe me, I just sleep fine."

KLZ Gives Housewives New Thing in Morning Concerts

DENVER.—An innovation in local Radio circles has been introduced to Rocky Mountain listeners with the adoption of morning musical programs for housewives, arranged by the city's leading Radio dealers and broadcast by KLZ here. Programs to suit every taste and presenting some of the best musical talent of Denver are featured on these programs which come during the busiest part of the housewife's day, 9 to 11 in the morning. During the summer months this is proving to be one of KLZ's most popular features.

Janet Beaudry's Numerology Talks Interest WGN Women

CHICAGO.—During WGN's Woman's club on Wednesday afternoons Janet Beaudry is offering a series of numerology talks. The Woman's club is on the air between 3 and 3:30 o'clock, Central daylight saving time.

Women listeners are enjoying the talks of Miss Beaudry. They deal with the enjoyable and ancient science whereby one's life is forecast and guided through the medium of numbers. Each Wednesday afternoon a different phase of the science is taken up and explained by Miss Beaudry and suggestions and comments regarding its application to everyday life given to listeners.

Numerous other features of interest are broadcast during the daily Woman's club, including talks by prominent Chicago clubwomen, special programs by women's organizations and music of various kinds.

SHORT WAVES

By Marcella

(Continued from page 2)

But then Quin Ryan of WGN, your other subject, is single. You just had them reversed.

* *

And now to jump back across the continent to WRC, Washington, for the benefit of "Phillis." I hope I won't disappoint you too much by telling you that Edward B. Husing is married, and has been for two years, is 25 years old and the proud father of a 14-month-old daughter. He has been on the air for a little more than a year, having announced first for Station WJZ and later being transferred to Washington where he handles most of the outside events. A picture of Mr. Husing would show you he is tall and slender. He has hazel eyes, chestnut brown hair, and is not at all hard to look at. His habits are football and aviation, and he holds a pilot's license.

* *

When I asked Gayle Grubb of KFAB, Lincoln, Nebr., about Earl Hildebrand, the assistant announcer there, he wrote me the usual comical letter. It is too good to be retouched, so here:

"To begin with, Earl has a voice as pleasing as a bottle of ale. He has more hair than Carter has pills, parts it on the left side, and his eyes are blue except during the hay fever season when they are a distinct red. He is about 5 feet 10 in height, is married and has a small boy. His other official capacity is advertising manager of the Nebraska Buick company, and if he can't sell the company, neither can Wrigley sell gum. I forgot to tell you that he has a growth of luxurious hair on the upper lip which doesn't seem to interfere with his announcing to any great extent. Outside of the studio and in private life he likes to roast wieners in the country, taking along a book on "Farming."

* *

Better late than never, "Jean," so here are the facts about the announcer and engineer at WSUI, Mr. Carl Menzer. Born at Lone Tree, Iowa, 26 years ago, the gentleman is still lone, I mean single. Is chuck full of experience and knowledge concerning building and operating broadcasting stations and has all sorts of degrees in Electrical Engineering. His height is 5 feet 8 inches; weight, 135 pounds; eyes, blue; hair, brown; hobby, Radio in all its forms. Besides his station duties, Mr. Menzer teaches in the Electrical Engineering department of the State University of Iowa. Marcella will vouch for it that he is very good looking, has no mustache, and parts his hair in the middle.

* *

The Record Boys—Frank Kamplain, Al Bernard and Sammy Stept—are taking a good, two month's rest at present but will be back on the air at WJZ shortly after September 1. Besides recuperating for the fall season, they are preparing many surprises, so be there early to tune them in.

* *

In our next edition of our "Blue Book of Broadcasting" I promise faithfully to divulge the characteristics of that idol of KDKA, Announcer Louis L. Kaufman. Stand by.

* *

What deep secret would you like to know about your favorite broadcast star? Drop me a note, girls and boys, and I'll do my best to answer here. MARCELLA.

CLARA HOOVER AT KOA CELEBRATES

Culinary Expert Ends First Year's Service—Has Released Over 600 Recipes

DENVER.—Clara Hoover, culinary expert here, has just celebrated her first anniversay as head of KOA's domestic science department.

In the last year, she has made 160 consecutive microphone appearances at the General Electric broadcasting station and has released more than 600 varied recipes to broadcast listeners—ranch women, society matrons, invalids, children and even men.

Responses to her triweekly discussions have mounted into the thousands, she reveals. Mrs. Hoover, who is widely known also as a food expert of the Solitaire laboratories at Denver, addresses KOA's cooking school every Tuesday, Thursday and Friday afternoon at 4 o'clock, Mountain time.

"My Radio experience proves that women are definitely interested in better housekeeping," she says. "They want to become more efficient as purchasing agents for the home. They welcome suggestions which will be the means of 'getting out of the rut' of everyday plain cooking."

LITTLE SYMPHONY OF CHICAGO DE

HIGH LIGHTS OF THE AIR

H. R. H., Crown Prince Gustaf Adolf, of Sweden, will speak to the people of the western part of the United States from KGO Sunday evening, August 1, between 7:35 and 9 p. m. Pacific time. His Royal Highness will be heard in the San Francisco Municipal Auditorium.

Radio might almost stand for revival because due to Radio so many well known musical comedies have become popular again. One of these favorites is "The Merry Widow." Everyone remembers the famous waltz from this operetta which set two continents to whirling before the war. Tune in KMOX Monday, August 2, for this vivacious music.

Crooning Clowns are a new variety, never seen nor heard before. The only way to find out how and why they croon is to tune in for WHB, Tuesday, August 3. They have specailized in microphone tricks and can make even an invisible audience laugh.

Anyone who has been a camper, tormented by mosquitos or awakened by the chattering of early rising birds, will enjoy the comedy, "A Night With the Campers," by the Symphony players, Wednesday, August 4.

A "Singing Chauffeur" is the latest offering of the microphone and this unique entertainer may be heard Thursday evening, August 5, at WTIC, Hartford. His name is Jack Conlon and his fine baritone voice is popular along the Eastern coast. He specializes in popular songs.

Friday the 13th is not always an unlucky date. Fans who enjoy the fine classical concerts of the Little Symphony of Chicago, which is composed of members of the Chicago Symphony orchestra, will hardly think this is a bad date when they find this group on the air at WLS. These Radio artists are as popular with the fans as the orchestra's concerts are at the Hall and when they are on the air there is not an empty earphone nor a neglected loud speaker to be had.

When you notice that you cannot tune in a favorite station do not become alarmed, stations are taking vacations just the same as other folks. The last two weeks in July, KTHS was resting after a sternuous winter of broadcasting. August finds a Florida station, WCOA, off the air.

LITTLE SYMPHONY OF CHICAGO DEFIES FRIDAY 13TH; APPEARS AT WLS

HIGH LIGHTS OF THE AIR

H. R. H., Crown Prince Gustaf Adolf, of Sweden, will speak to the people of the western part of the United States from KGO Sunday evening, August 1, between 7:35 and 9 p. m. Pacific time. His Royal Highness will be heard in the San Francisco Municipal Auditorium.

Radio might almost stand for revival because due to Radio so many well known musical comedies have become popular again. One of these favorites is "The Merry Widow." Everyone remembers the famous waltz from this operetta which set two continents to whirling before the war. Tune in KMOX Monday, August 2, for this vivacious music.

Crooning Clowns are a new variety, never seen nor heard before. The only way to find out how and why they croon is to tune in for WHB, Tuesday, August 3. They have specialized in microphone tricks and can make even an invisible audience laugh.

Anyone who has been a camper, tormented by mosquitos or awakened by the chattering of early rising birds, will enjoy the comedy, "A Night With the Campers," by the Symphony players, Wednesday, August 4.

A "Singing Chauffeur" is the latest offering of the microphone and this unique entertainer may be heard Thursday evening, August 5, at WTIC, Hartford. His name is Jack Conlon and his fine baritone voice is popular along the Eastern coast. He specializes in popular songs.

Friday the 13th is not always an unlucky date. Fans who enjoy the fine classical concerts of the Little Symphony of Chicago, which is composed of members of the Chicago Symphony orchestra, will hardly think this is a bad date when they find this group on the air at WLS. These Radio artists are as popular with the fans as the orchestra's concerts are at the Hall and when they are on the air there is not an empty earphone nor a neglected loud speaker to be had.

When you notice that you cannot tune in a favorite station do not become alarmed, stations are taking vacations just the same as other folks. The last two weeks in July, KTHS was resting after a strenuous winter of broadcasting. August finds a Florida station, WCOA, off the air.

INTRODUCED to the Radio public by WLW, Cincinnati, Irene Anderson, left, has become one of the favorite artists of the microphone. Cincinnati has known her for some time as the talented contralto soloist of Central Reformed church choir. To the right is Edwin Franko Goldman, conductor of the famous Goldman band whose summer concerts are being broadcast by the WEAF chain every Saturday and Sunday night. Below is a favorite string ensemble of the Pacific coast, the Zoellner string quartet of Los Angeles which plays frequently at KHJ. Each member of this quartet belongs to the Zoellner family.

Sunday, August 1

No. 21 — $45.00

Closed

Five foot air column. Velvet unit with patented double stylus and thinnest diaphragm—won't blast—won't distort—yet supersensitive. No noise.

The New Cone

A splendid new development—It delivers the rich deep bass of the cone with the volume equal to the horn type, *without* distortion.

No. 18
$27.50

The "Jewel Case"---

not merely rare beauty but new acoustic principles!

The "Jewel Case"--- like a rich antique jewel cabinet in outward appearance, with all of the rare tone beauty of an old violin---and like the violin, this speaker uses the whole of the wood in its contour to resonate and reflect the pure vibration of the sound within it. Undreamed of fidelity, and small though it may be, the volume is greater than any speaker yet marketed.

Velvet Speaker Number 21 is startling in its far flung progress toward the ideals of beauty and acoustic perfection. Be first to offer it and reap the sales. The price is reasonable---the quality the highest---and dealer, jobber co-operation unusual. Write today for Velvet franchise.

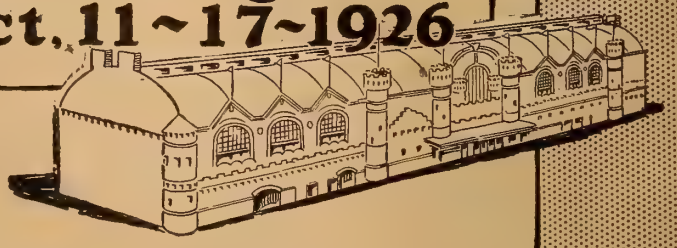
OFFICIAL SHOW
RADIO MANUFACTURERS ASSOCIATION
RMA



The World's Foremost Radio Exhibitions

With its almost daily new distance records, radio is destined to link the world, bringing all nations into one big family.

Whether or not you are a radio fan, you should keep abreast of the latest developments in this marvelous new industry.

At the New York and Chicago shows every representative radio manufacturer will display his new products—a complete showing of everything new in radio.

There are all kinds of shows, but this is the show you can't afford to miss.

"THE FALL GUY"

(Continued from page 6)

ferred to as "Irish stew," and drinking from a huge utensil which resembled nothing so much as an old-fashioned shaving-mug, a concoction that passed as coffee, which could be purchased with a tasteless bit of pastry known as coffee cake, for five cents.

Thus, coffee and cake his breakfast; stew his dinner; lunch was a habit he had deleted of late.

About this time his hopes had risen to sublime heights, when a man with a damage suit against one of the public service corporations had offered him his case. The man was severely injured and any jury would have given him a verdict for a few thousand dollars; but to prosecute the matter Dick would have had to put up money for court costs, and this he did not have. So the man was forced to take his case to another lawyer.

It was then with a crash that Dick reached the bottom of the skid and went down into the morass of uncertainty into which all skids descend. And the humiliation became all the more keen because of Alice Tellyhew. Ambition had always gnawed at Dick; but after he began going with Alice, it no longer gnawed—it bit in great mouthfuls.

HIS interview with Jason Tellyhew was the last straw. Filled with bitter resentment at what he regarded as Tellyhew's unreasonable and unjust treatment, Dick's state of mind grew more and more alarming.

And then, suddenly, came the turn of the tide. The postman left a large official-looking envelope, which, however, gave no indication of whither it had come. But Dick, slitting it open with shaking fingers, found his senses wavering as a package of Amalgamated Steel bonds fell out on the desk.

With it was a typewritten note which read:

"Dear Mr. Standish:

"Please accept these bonds as a retaining fee until I am able to reveal my identity. I shall want you to handle several important legal matters within a short time. Feel no hesitancy about borrowing on them at your bank. Further instructions will follow soon."

The note was unsigned.

"An anonymous communication," mused the delighted Dick. "Well, God bless my mysterious client! These couldn't have come at a better time!"

CHAPTER III

Welcome News

OF course, Alice Tellyhew was the first to hear the good news; and, if possible, she was even more delighted than Dick. She asked numerous questions about the receipt of the bonds, and if he didn't have some idea as to who had sent them. To which Dick responded that he hadn't the slightest suspicion, but that the bonds would be placed "in soak" at the bank at the earliest possible moment.

With such gilt-edged security he had no trouble in borrowing twelve hundred dollars. He laughingly reflected that this was the exact sum he had had when he embarked in business for himself, and wondered if there could be any significance attached to it.

On one thing he was determined—he would stretch this twelve hundred even farther than the first one if necessary.

He surprised his friends by paying all his small loans in full. Several told him by actions if not by words that the repayment was quite a shock; but he observed that all of them were able to survive it.

With a replenished wardrobe and revived spirits, he disregarded Tellyhew's orders and called on Alice. And while he was waiting for her to come down, who should he encounter but Tellyhew himself.

Alice's father not only expressed surprise at Dick's visit, but could not refrain from remarking about his improved appearance.

"That's why I'm here," Dick said with assurance. "I knew your remarks on my last visit were based on my personal appearance and my future prospects. Both have improved so materially that I have indulged myself in the hope that you would reconsider your decision."

"All right; till further notice," snapped Tellyhew, and turned away.

Alice quizzed Dick closely about the bonds; but he had given her all the information he had over the phone.

"I've always said your luck would turn and when it did it would be for something worth while," she told him.

"And judging by his letter—my client's, I mean—there is more to follow. It may be another damage suit for all I know. In the meantime, I am to be allowed the privilege of calling on you—until further notice."

Dick was sitting in his office the next morning awaiting developments when the door was flung wide and Alderman McGuire walked in.

"WELL, young man, you seem to have a little leisure time on your hands, so perhaps you won't mind handling a legal matter for the city of Valley View."

"I'll be delighted, alderman," Dick returned in some surprise, "but I thought the city had an attorney of its own."

McGuire dropped into a chair. "You're right; but he's on leave of absence, and the mayor and commissioners have decided that this is a matter that cannot wait. The matter was placed in my hands for disposition. That's why I'm here.

"The Suburban Traction company, as you probably know, recently obtained a franchise from the city to build a trolley line to our rapidly-growing suburb, Rosehurst. We granted that franchise, Mr. Standish, because we knew the citizens of Rosehurst needed rapid transit. There are over three thousand people out there now, many of them unable to afford automobiles, and it was in the belief that the situation would be immediately relieved that we gave the Suburban people what they asked for.

"Now, it seems, the Suburban has no idea of constructing a line to Rosehurst for at least a year. They won't come boldly out and admit it; but they have found a dozen excuses to delay the work. First the line had to be approved by their board of directors; then a survey of the route was made, in spite of the fact that it had been surveyed before the application for a franchise was presented to the council.

"I have just come from the office of Mr. Jason Tellyhew, chairman of the Suburban road. With his usual diplomacy he put me off; said he would look into the delay and force some action. But I believe that is just another subterfuge to delay the game, so we've decided to throw a scare into them. You are acquainted with Mr. Tellyhew, I presume?"

"Oh, yes; I know him quite well," Dick responded dryly.

"There is no reason why you would not be in a position to vigorously prosecute a case in which he is involved?"

"On the contrary, I should more than welcome such litigation, Mr. McGuire."

"Good. I believe in young blood, and when this matter was placed in my hands I immediately thought of you. I haven't forgotten what you did for me, young man."

"Don't mention that, please, nor feel that you are under the slightest obligation," said Dick earnestly.

"Then let's get down to business. You will first notify Mr. Tellyhew that unless the Suburban Traction company gives concrete evidence of real construction work within ten days, that the city will enter suit for damages in the sum of $50,000."

Dick made a note of these facts. "And if he refuses?"

"Prepare papers and file suit at once. The city of Valley View cannot be bluffed. Here is a copy of the franchise. Please read it thoroughly; become familiar with every phase of it. If we are eventually forced into court it may be that you will be required to help prosecute the suit."

"Trust me to give you everything that's in me, Mr. McGuire. I feel all primed for a legal scrap with someone, and the fact that Mr. Tellyhew is the party most involved makes things just a little more interesting than they ordinarily would be." Then, as McGuire nodded and started out: "Er—pardon me, but the city didn't happen to mail me a package of bonds, did it, alderman?"

"A package of bonds?" queried the other in some surprise. "I don't believe I know what you mean."

"It's quite all right," Dick responded with a grin. "I just wanted to know."

CHAPTER IV

Something Happens

DICK'S letter to the chairman of the Suburban board was a masterpiece; everything the young attorney could think of pertinent to the case went into its composition. And while there was nothing personal in its tone, Jason Tellyhew would be bound to admit—thought Dick—that his would-be son-in-law had taken quite a step forward in the legal world.

So anxious was Dick to have the letter reach its destination that he could not wait for the mails, but dispatched a special messenger, with instructions to give it personally into Mr. Tellyhew's hands, and to telephone him when his mission had been accomplished.

And when, some twenty minutes later, this message came through on the phone, Dick heaved a satisfied sigh and leaned back in his chair to contemplate the future.

He pictured Tellyhew "hitting the sky" when he read the letter, and either coming immediately to see him in person or calling him impatiently on the telephone. And he had his little speech all thought out. He would deliver the city's ultimatum in a forceful and dignified way.

But Mr. Tellyhew failed to respond that day, and when five-thirty came, Dick gave up all hope of immediate developments and left for his room.

After a troubled sleep, during which he dreamed that he had the traction company by the throat—the company in this instance being represented by Jason Tellyhew—he awoke and hurried down to the office an hour earlier than usual, hoping that the morning's mail would bring a communication from Alice's father.

The mail, however, brought nothing; but a rakish-looking speedster brought Alice about ten o'clock.

Dick threw aside the law book he had been reading and greeted her effusively. Then he casually inquired if her father had been home the evening before.

"Why, yes," she replied, rather surprised at the question. "Why do you ask?"

"Oh, no special reason—er—but didn't he tell you something about me?"

"Why, no; he didn't mention your name. Dick! Something has happened. What is it?"

"Just a little suit in prospect against the Suburban Traction company."

"Oh, is that all?"

"Well, isn't that enough?"

"Do you mean that you are suing them?"

"Threatening to; at least, the city is."

"The city? I don't understand."

"I have been employed by the city to sue the traction company for $50,000 unless they commence work on the promised Rosehurst line at once."

"You mean, Dick, that you are suing my father?"

"That's it?"

"Well, I like your nerve!"

"I thought you would."

"The very idea!"

"What's the matter now?"

"Don't you think you are going a little too far—suing my father—your future father-in-law?"

"I thought it was rather neat," Dick confessed. "It never occurred to me that you'd disapprove."

"Well, I do—and I want you to know—"

She was interrupted by loud footsteps in the corridor outside. Then the office door opened and Jason Tellyhew stepped in, followed by a stockily-built man of middle age.

"Daddy!" cried Alice. She would have said more, but Jason Tellyhew held up his hand to silence her.

"Wait!" Alice subsided and her father turned to his companion. "There's your man, officer! Arrest him at once!" he cried, pointing an accusing finger at Dick.

Who stole the bonds and why? Will Dick go to jail and will Alice fail him in his determination to prosecute the suit against her father? Read the sequel to this dramatic situation confronting The Fall Guy in the next issue of Radio Digest.

Improve Your Audio Amplifier

And Get Astonishing Results!

The main point of difference between new sets to be marketed this Fall and sets in use is in greatly improved and refined audio frequency amplifiers.

You can easily improve the audio systems of present sets and bring them up to date. Our book will teach you how.

Four years' research are embodied in our new 40 page book covering all systems of audio frequency amplification. The good and bad points of each system are clearly described and everything is illustrated to help readers bring their sets up to date.

Send 25 cents for new book on Audio Frequency Amplification and bring your set up to date for new tubes.

CHAOS NOT PROBABLE

(Continued from page 3)

tions are under no effective restriction as to wave length or power used. The 1912 act under these various constructions has failed to confer authority for the prevention of interference, which was its obvious intent.

"Persons desiring to construct stations must determine for themselves whether there will be wave lengths available for their use without interference from other stations. They must proceed entirely at their own risk.

"There have always been the most cordial relations between the Radio administrations in Canada and in the United States. The department has refrained from assigning to American stations the wave lengths in use in Canada and the Canadian authorities have reciprocated by avoiding the wave lengths assigned to our stations. A continuance of this policy is a necessity if international confusion is to be avoided. The department most earnestly hopes, whatever may ensue, that the sense of fair play, as well as interest in the protection of the situation as a whole, will prevent any American station from trespassing upon the Canadian assignments.

"The orderly conduct of Radio communication and the interest of the listener in broadcasting, has been possible largely because of voluntary self-regulation by the industry itself, frequently necessitating some individual sacrifice for general good. The department trusts that this spirit will continue in the future as in the past.

"The legislation which has been long sought from congress to perfect the 1912 act reached the stage of passage by both houses, but insufficient time remained in the session in which to compose conflicts between the house and senate bills. The legislation will undoubtedly be perfected early in the session which meets in December.

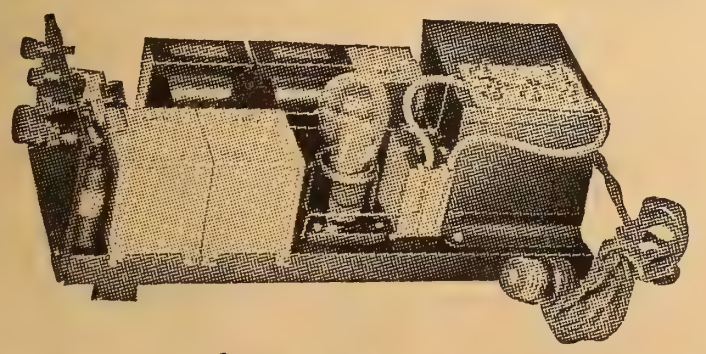
"Both bills, however, carry explicit authority to the government to assign wave lengths, limit power and time, and they both establish in the government the fundamental property in the air channels. These authorities will undoubtedly be confirmed. While any confusion which may arise pending the next session will certainly be eliminated by the passage of legislation, it will be minimized by just as much as broadcasters avoid interference with other stations."

The bureau of navigation of the department of commerce has just issued its new broadcasting license form which is entirely different from the one which has been in use previous to the decision of the attorney general.

Among other things this license specifically states that "the hours for which the station is licensed are not limited." Relative to the use of Radio during times of emergency the license says: "The president of the United States in time of war or public peril or disaster may cause the closing of this station and the removal therefrom of all Radio apparatus, or may authorize the use of control of the station or apparatus by any department of the government, upon just compensation to the owners."

The new license also states that the "operator of the station shall not wilfully or maliciously interfere with any Radio communication from another station," and "all operations of the station shall conform to the laws of the United States, and the provisions of any international treaty or convention to which the United States is a party."

Reserve Power!



THORDARSON
B-ELIMINATOR PARTS

TRANSFORMER
R-195
Price
$7.00

30 HENRY CHOKE
R-196
Price
$5.00

The singer who exerts every last ounce of energy invariably makes his effort manifest in thin, strained tones.

The tubes are the larynx of your radio set. Unless they receive a sufficient and constant supply of energy the set will be faulty in its reproduction.

A B-supply built with Thordarson transfomers and chokes will give you that reserve power so essential to good reproduction. Supplies a constant voltage to the plate regardless of the current drain. Sufficient voltage to operate power tubes UX 112 and 171. Actually eliminates the noises and distortion resulting from faulty B batteries.

Complete assembly instructions furnished with every transformer.

For sale at all good dealers or by mail.

THORDARSON ELECTRIC MANUFACTURING CO.
Transformer specialists since 1895
WORLD'S OLDEST AND LARGEST EXCLUSIVE TRANSFORMER MAKERS
Chicago, U.S.A.

You Can Make a Better Radio Set

Benjamin Radio Products, each in its respective place, will aid greatly to secure all the necessary sensitivity, selectivity, volume and non-noisy operation that are essential to good radio reception.

These Benjamin Radio Products are enthusiastically endorsed by experts and amateurs everywhere. How can you go wrong, when the masters approve?

Send for complete instructions for building the Improved 5-Tube Controllodyne and a Utility 5-Tube Portable and Home Receiver.

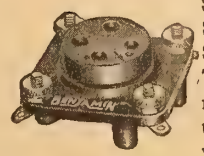
Improved Tuned Radio Frequency Transformers

Space wound; basket weave; cylindrical; highest practical air dielectric. Proved to give the best results in sharpness of tuning, increase in volume and improvement in quality. Authoritative laboratory tests and practical experience of manufacturers and amateurs shows that this type of coil excels in every important characteristic.

2¼" Diameter Transformer
Compact. Especially desirable for crowded assembly. Eliminates interfering "pick-up."
Set of Three, $5.75
Single Transformer, $2.10

3" Diameter Transformer
Capacity coupling reduced to lowest degree. For use with .00035 Mfd. Condensers.
Set of Three, $6.00
Single Transformer, $2.25

Push Type Cle-Ra-Tone Sockets



Spring Supported, Shock Absorbing. Stop Tube noises. The greatest aid to non-noisy operation. Contacts always clean.
75 cents each

"Lekeless" Transformers

Uniform high inductance, low distributed capacity and low resistance. The external field is so slight that it permits placing coils close together without appreciable interaction.
Single Transformer, $2.50

Straight Line Frequency Condensers

Eliminates bunching of stations. Spreads the log evenly over the the dial. Makes tuning easy. Adjustable turning tension. Compact. A beautiful instrument that

not only improves reception, but adds to the good appearance of the set.
.00025 Mfd., $5.00
.00035 Mfd., 5.25
.0005 Mfd., 5.50

Battery Switch

Quick, positive, clean-cut make and break. When it's "in" it's "off," eliminating danger of wasteful use of battery.
30 cents each

Brackets

An aid to simplification in set construction. Supports the sub-panel, with room underneath for accessories and wiring.

70 cents per pair

If your dealer cannot furnish you with Benjamin Radio Products send amount direct to our nearest sales office with his name and we will see that you are promptly supplied.

KGW, Portland Ore. (491.5m-610kc), 6-7 p. m., dinner concert; 10-12, Indian Grill; Punch Green, pianist.

FAME CROWNS TWINS

(Continued from page 4)

"Well, tell them for me I think they are oil right and let's have some more," answered the voice.

A few hours later the first special delivery letter arrived. Then more letters were received. The next day there was a regular avalanche of congratulations for the boys. They were promptly engaged by the station as staff artists. Their fame began to spread abroad and they were invited to sing at other stations.

Now they are touring the United States and singing at broadcasting stations all over the country as representatives of the KOIL station at Council Bluffs. They sang at all the principal stations on the Pacific Coast, meeting many of the celebrated Radio artists and making many new friends, especially with the sopranos and the altos and the contraltos and the bobbed haired bow benders and key trippers for the boys are both good looking, are gentle mannered and neither is permanently attached, it is said.

They swept through Texas where anything with the name of "Oil" attached to it invariably receives the broadest welcome and especially a singing and playing team with the merit of the Iowa Oil Twins. Up through Missouri they sang their way from one big broadcasting station to another, on through Chicago where they sang from several of the larger stations and then to Michigan and Ohio, making a number of phonograph records en route.

And now they are singing their way back to Council Bluffs. Is this not another one of the marvels of Radio—national fame in less than a year?

"BIG BROTHER" EMERY

(Continued from page 5)

department in the feature section for the Big Brother Club activities.

Some day it may happen that the Big Brother Clubs in California, Texas, Colorado, Illinois, Ohio, New York and Massachusetts will get together with such other Radio clubs as may be flourishing and form a great federation with visiting delegates going about to the various stations, building up a strong and powerful unity to consider the truths of government, advanced education, health, food, clothing and other important factors for the welfare of the individual and the nation.

If you could see the twinkle in Brother Bob's eye when he talks about his boys and girls and their elder brothers you might suspect that he has a vision of this sort to be materialized in the future. The WEEI Big Brother Club is a marked success, the ideas and means of achieving it might well be worth considering by broadcasting stations not so endowed but wishing to extend their activities in that direction, declared a well-known Boston newspaper man who corresponds with Radio Digest.

YOUR RADIO TROUBLES

(Continued from page 7)

without repair, and we—poor fools passing through this vale of tears—are keeping many doctors in food and clothing because we break down.

First aids, however, are essential. The following synopsis of the little things which may and do occur within your Radio receiver, together with the probable causes and first aid repair methods, is offered merely as a guide so that the helpless may at times help themselves. One cannot well paste this information in their hat, but all can save this number of Radio Digest. Refer to it the next time you become dissatisfied with your results before you call your Radio dealer or service man and bring him to your house on a false alarm. You may save him time and yourself money.

Bradleystat

PERFECT FILAMENT CONTROL

FOR noiseless filament control and maximum range, ask your dealer for the Bradleystat. This graphite disc rheostat can be used **for all tubes** without change of connections. The bakelite knob is removable if desired. The one-hole mounting and small size make the Bradleystat easily adaptable to any radio set.

Bradleyohm

PERFECT VARIABLE RESISTOR

This ideal variable resistance unit is offered in several ranges as, for instance, from 10,000 to 100,000 ohms. These units are recommended by radio engineers for B-battery eliminators and solve the problem of obtaining variable voltage control from the B-eliminator. For fixed resistance units, always specify the Bradleyunit.

Bradleyleak

THE PERFECT GRID LEAK

The grid circuit is the most sensitive part of your radio set. Get the best results by using the Bradleyleak which has an adjustable range from ¼ to 10 megohms. You can instantly get the best grid leak resistance for any tube by turning the small knob. Ask your dealer about the Bradleyleak, today.

(Note—The second part of the station data list will appear next issue.)

CHALLENGE!

ONE DOLLAR will be paid to the Radio fan submitting the most errors in any one station's listing in this directory. Letters must reach Radio Digest office not later than one week from date of issue corrected. Readers are not limited to correcting one station, but such corrections must be certified by the stations themselves, and NOT by comparison to other so-called accurate broadcasting directors and lists. Readers also must live in same state or province as stations corrected are located. Station verifications must accompany corrections.

That's just how sure Radio Digest is that this broadcasting station directory is correct! To make the challenge fair for everyone, broadcasting stations and their employes are barred from this offer. Why? Because the broadcasters are the source of all the data given herein. They are (or should be) interested enough to answer the inquiry sent them every time data on their station appears. This inquiry contains a proof of their last listing and must either be corrected or O K'd as correct and returned to the Digest. Nevertheless, sometimes the stations are careless and mistakes are made. But Radio Digest is so sure of the exactness of this directory that this challenge is made unconditionally.

With reference to the directory: It appears in six parts, serially continuously; the first four parts are station data listings, arranged alphabetically; the fifth part is a state, city index of stations; the sixth part is a wave length index. The information contained in each station data listing is given in the following order: Call letters, city, state, wave length used, watts antenna input, owner's name, announcer's name, slogan used if any, name of listener in "club," schedule of operating hours, and kind of time used, as "Central," "Mountain," etc.

Six successive issues of Radio Digest will give one the most complete and accurate list of broadcasting stations obtainable. This service is original with this publication, and has been maintained from the start. Right of reproduction without permission of any or all of the data contained herein is forbidden.

World's Greatest Radio!

New and Improved FRESHMAN MASTERPIECE

The ARISTOKRAT

GENUINE MAHOGANY

One of the finest pieces of furniture in which a radio receiver has ever been installed. It is truly an aristocrat with its distinctive, finely proportioned lines and rich lustrous finish.

Equipped with the finest of

LICENSED CONE SPEAKERS

Especially designed to bring forth the full merit of the new construction of the Freshman Masterpiece circuit. This set is designed for the employment of the new Radio Corporation UX-112 Radiotron Power Tube and the necessary "C" battery connection. All metal SHIELDED front and subpanel.

$99.50

Slightly higher Denver and West, and Canada.

In fine genuine mahogany it is model 6-F-9 and the price is ninety-nine dollars and fifty cents.

In beautiful burled walnut it is Model 6-F-10 and the price is one hundred and six dollars and fifty cents.

Sold on Convenient Terms by Authorized FRESHMAN DEALERS Only, who also Install and Service Them

CHAS. FRESHMAN CO., Inc.

LEADERS SPEED UP IN DIGEST CLASSIC

WESTERN ENTRIES HARD PUSHED BY N. Y., MASS.

Gold Cup Derby to Be Hot Finish With Dark Horses Forging to the Front

There they go! There they go!

Keep your eyes on the winners. The Radio Digest Gold Cup derby for the world's most popular announcer is heading for the last lap around.

Anything is likely to happen from now on. Arkansas and Iowa still hold the lead, with Massachusetts and New York close behind.

Gaylord of WTAG, Worcester, nosed out his fellow Easterner, Brokenshire of WJZ, New York, on the last lap, for third place.

Arnoux of Hot Springs made a remarkable spurt on the backstretch and comes around past the grandstand leading by a gain of 35 per cent over his previous standing. But he had to do it. May of KMA, Shenandoah, was crowding him. May jumped more than 12,000 votes over the lead Arnoux had on the last time around. Arnoux snapped ahead with a gain of 16,086 votes. May picked up 10,900 new ones.

Gaylord added 7,258 new votes while his leading competitor, Brokenshire, only gathered 3,633 extras. It's going to be a hot race from now on between these four with the ever constant possibility that any one of the twenty-one other entries may spring a surprise by a grist of bonus votes forcing them ahead of the pacemakers.

Gaylord Dark Horse

Gaylord has been the dark horse from the start. Trotting along in sixteenth place he made a sudden spurt in the tenth lap, passing a whole string of others, so that he swept past the grandstand in sixth place. He then steadied into the leaders' pace but worked gradually ahead to fourth place on the eleventh lap, and now he is into third. Is that his best? The next time around will show Eyes of the East are betting on him strong and are holding Brokenshire in reserve.

Pat Barnes of WHT, Chicago, is considered another mystery candidate and although he seems to have been satisfied with trailing the four horsemen in the lead, some of the fan letters state that they are counting on him for a whirlwind dash at the last quarter-post. He gained 10,030 votes the last time around, which was almost as much as Gaylord and Brokenshire together.

There are very few changes among the trailers. Old King Cole at WHO, discovering that he was at the tail end the last time around, took a fresh breath and scampered up ahead of Sen Kaney and Eugene Konecky. Kaney kept right up close, leaving Konecky to take the dust of the whole field.

How They Stand

Here is the order as the judges called them off on the last lap, with figures in parenthesis indicating the position the previous time around:

1. G. C. Arnoux, KTHS (1).....63,247
2. Earl E. May, KMA (2).....46,365
3. C. Gaylord, WTAG (4).....35,294
4. N. Brokenshire, WJZ (3).....33,091
5. Pat H. Barnes, WHT (5).....28,522
6. A. S. Kyrie, KMMJ (6).....14,563
7. Henry Field, KFNF (7).....13,065
8. The Hired Hand, WBAP (8).12,756
9. Phillips Carlin, WEAF (9).. 8,084
10. Peter MacArthur, WOC (10) 6,789
11. C. R. Randall, WSMB (11).. 5,561
12. Louis J. Johnen, WLW (12) 5,223
13. R. W. Griffin, WHO (14)..... 4,472
14. Gayle V. Grubb, KFAB (13) 4,091
15. Lester Palmer, WOAW (15) 3,825
16. Lambdin Kay, WSB (16)..... 3,146
17. W. G. (Bill) Hay, WGN (17) 2,417
18. Edw. B. Husing, WRC (18).. 2,346
19. J. T. Schilling, WHB (20).... 2,215

(Continued on page 13)

ZIEGFELD GIRL IS ON THIS FRONT COVER

ABOUT as big as a minute but gifted with a voice that has charmed the elite of both visible and invisible audiences the little song bird on the Radio Digest cover this issue found her wings "on the air." She is Miss Olga Steck of New York. She knocked in vain at the doors of the booking offices on Broadway and then found her way into the ears of the theatrical barons by singing over WJZ. Radio fans went wild over her. The magnates sought her out. First she was featured in the "Springtime of Youth," then straight to the Ziegfeld Follies, later starring in "Little Jessie James," then "China Rose," and "The Matinee Girl." But she's still a Radio girl although next season she is to be in grand opera. She walks under a five foot level without stooping and weighs one hundred and nothing.

WQJ Feature Attraction

CHICAGO.—The First National violin quartet are the feature attraction each Tuesday and Wednesday evening on the 10 o'clock program at WQJ, the Calumet Baking Powder and Rainbo Gardens.

Looking Ahead

Romantic America Will Have All Eyes on Atlantic City During the Early Part of September when the annual beauty contest there will determine the fairest of the fair and place the crown "Miss America" on some queenly brow. Station WPG will be a favorite haunt of these exquisite damsels and you will read about it in the next Radio Digest.

New York Recently Celebrated the Second Anniversary of Its Municipal Broadcaster, WNYC, and a story of the remarkable success of this important Radio enterprise will be told in the issue of Radio Digest out August 31.

California Claims to Have the Oldest General Entertainment Broadcasting Station in the world at San Jose. A history and pictures of this interesting pioneer is being prepared for early publication in Radio Digest.

"GOODY GOODY GIRL" Is the Title of a Smart New Serial Written Especially for Radio Digest by Merlin Moore Taylor. It's a romance founded on the experiences of a charming little country girl who was whirled into a dizzy vortex of night life in a big city and it begins in the September 1 issue of Radio Digest.

All the Sham and Bluff Are Torn Away in the Final Chapter of "PRETENSE" by Maurice Coons in the September 1 issue of Radio Digest. The Prince and the Lady and the Million Dollar Hoodlum meet face to face for the final showdown. Get the beginning of the story in this issue.

Watch for Radio Digest Announcement of Its Next "WHO'S WHO IN RADIO."

Wonder What the New Sets Are Like? A review will appear in an early number showing and describing the new and better features embodied by the leading manufacturers in their 1927 model receivers. Every one will want to see this.

Helps for the Beginner—How to Operate Your Set—are topics which the "non-technical branch" of the technical department is preparing to pave the way for your better success in reception. One next issue, out August 31.

Special articles about broadcasting stations and artists, with photographs, and NON-RADIO fiction 5,000, 10,000 and 30,000 words in length are desired. No manuscripts accepted unless typewritten and prepaid, or returned without return postage being inclosed. All manuscripts are sent at owner's risk.

SHORT WAVES

By Marcella
Per O. M. G.

Thunder and tarnation! Goldie Locks has packed up her vanity case and gone fishing, leaving a bulging folder all tied up with pink ribbon for a Mere Man with a low bass voice and black, curly whiskers to play Mrs. Grundy.

Just for that I'll start in on Marcella. I like the kid with her big, baby blue eyes, her fluffy, bronze hair—and, Oh Boy! She wears 'em rolled! Well, girls and boys, she's gone fishin' and all I gotta say is—pity the poor fish. We all kinda miss her with her giggling and good natured jesting and it's so quiet around the office now.

* *

"Brown Eyes," Norwalk, Ia. Lo and behold no sooner had your letter been opened, inquiring about Bobbie Griffin, announcer at WHO, Des Moines, Ia., than in walks the answer in person! He's footloose and fancy-free, too, Brown Eyes. Never been booked by Hymen, has no anticipations, he says. Has a steady, blue-gray eye and blushes furiously if you merely mention girls. He's a real war hero, signed up with his dad who is a doctor. Both served in the ambulance corps. The Heinies nicked him, too. He doesn't care much about dancing but likes to fish when the girls aren't around to rock the boat. No, I didn't tell him your real name.

* *

E. L. Tyson, announcer for WWJ, The Detroit News, has inspired a number of fair letter writers. Miss Polly writes: "I have a wager on him. Is he married and if so, how long? Age, eyes and hair—large or small? Be good and tell us, I am betting on him strong." And "A Good Listener" writes: "Is he married or single and, if married, does he live with his family? What college did he graduate from and did he serve in the war?" These questions were all put to Mr. Tyson and he replied: "Was supposed to be educated at Penn-State College a number of years ago, saw service with the Pennsylvania National Guards (103d Trench Mortar Battery) in France and Belgium. Living happily with wife and the greatest twenty-month old loud speaker in the country." Sorry, girls, but it's best to be perfectly frank. You gotta be square with the missus even if you are a popular announcer or have to sit several hours a day looking at Marcella or some other good looking girl in the office.

* *

"C. C." writes to get a line on Frank Dahm of WGN. "Is he married?" she asks, and goes on: "That seems to be the usual question to ask about one's hero, how old is he, color of his hair, favorite pastimes, how tall and all the rest of the description that goes to make up an 'ether crush.' Does he, or would he correspond with any of his admirers?" Not hard-hearted Frank, "C. C." He just never does write to the girls. He said so himself and he's all wrapped up in Radio; talks to it, on it, of it and in it and nothing else but, so it seems. He lacks an inch and a half of six feet, has brown hair, blue eyes and when I asked him if he was married he positively barked, "NO!" He's the publicity director for that Drake Hotel attic broadcaster. You ask some other questions: Don Bestor and his orchestra are not on the air at present. Jack Chapman's at WMAQ and I couldn't find out about Maurie Blumenthal.

* *

Here is another from Penn-State, Mr. Louis L. Kaufman, announcer at KDKA, Pittsburgh. He specialized in philosophy and they gave him a degree of bachelor of arts. He still is a bachelor, you know what I mean. And that will interest Adoree of Warrington, Fla., and Lucille of Weyer's Cave, Va., who have besought the details from Marcella. "And a perfect gentleman he is," quoth Mr. W. W. Rodgers, station publicity director. "He has a very gracious manner, big soulful brown eyes, brown hair, is of slight build and recently acquired a Chevrolet coupe." And Oh girls, he's 22 and not married! Mr. Rodgers says, "He does not love the great out-of-doors and he does not get lost in a big city. I believe he likes animals but don't know the particulars. He is good to his folks, plays golf, is a student of law, is not a professional alumnus of his alma mater and has the aplomb to be at ease in any company." It seems as though fair-listeners quite dote on Louis. It began with his first appearance in the studio. A woman member of the KDKA staff saw him and heard his voice as he consulted one of her confreres about a matter that had nothing whatever to do with Radio. "That boy has a wonderful Radio voice!" she exclaimed when he had passed out the door. The opinion soon brought Louis back again. He came, he spoke, he conquered.

* *

Winifred T. Barr, pianist, is back at WEAF. I understand she was her husband's (Mr. Howard Hunter) "accompanist" on a recent business trip to the Pacific Coast and Movieland—Oh! You wives! From all accounts there was as much pleasure as business. They climbed mountains, sailed in glass bottom boats, called on Major Mott at Catalina and strayed all the way to San Francisco.

(Continued on page 15)

RADIO IS FILLING ALL CHURCHES

RADIO WORLD'S FAIR STARTS BIG SEASON

ELABORATE AIR TREAT PREPARED FOR FANS

Industry's Chiefs Work Hard to Give Listeners Many Surprises—Listen Sept. 15

By Eric Palmer

NEW YORK.—Radio may annihilate space and nightly assumes a place as a miracle of science, but it takes months of preparation, sometimes, to provide those features which are sent out on the ether for the delight of millions. The human equation figures first of all.

This statement regarding lengthy preliminary activity applies in certain instances to the elaborate programs such as those sponsored by national advertisers.

It pertains more largely, however, to the very important matter of arranging for the feast of the fans that will mark the two biggest Radio weeks of the immediate future—in New York, September 13 to 18, 1926, and in the official Radio Week early next year, when transcontinental tests, if not international experiments, will be tied up with de luxe entertainment from a hundred stations in the United States and Canada.

Already leaders of Radio are busy outlining the plans for the treat in store for the invisible audience.

Plan Biggest Radio Week Ever

At the recent conventions of the Radio Manufacturers' association in Atlantic City and the Radio Apparatus Section of the Associated Manufacturers of Electrical Supplies at Hot Springs, much attention was given to the idea of conducting the biggest Radio Week ever held, although sentiment was divided as to the advisability of again holding transoceanic broadcasting tests.

A special committee has been designated to work out an agenda to be discussed at a meeting of the Radio Week committee soon to be called. Briefly stated, it all means that the fans may await in confident expectancy thrills galore during the period in question.

The most enjoyable of all Radio events last year was the broadcasting of the annual Radio Industries banquet. Within the period of a little over an hour a vast audience — probably 10,000,000 people— were reached with a program that brought the best-known Radio stars before the microphone at one time. There will be another banquet, and a bigger entertainment! Put down September 15 on your calendar and break all other engagements already made if your social activities are planned so far ahead.

Radio World's Fair Plans

Plans are progressing rapidly for live broadcast features to be given from the Radio World's Fair in New Madison Square Garden, where the Radio industry is combining all its exhibits and features, now that the exposition originally set for the Grand Central Palace has been withdrawn. These features will have a national and even international touch, and they will continue for six afternoons and evenings.

Probably rebroadcasting of a European station will be one of these special events. So get ready to dance to a waltz from London or a fox trot from Paris.

A gold medal from England, in addition to the Radio World's Fair medal and other awards, will go to the winner of the international amateur set contest, to be held at the Radio World's Fair.

Sets of exceedingly novel construction and those of proven extraordinary efficiency will be judged in New York. The winning sets in all classes will be given places of honor, too, at the Fifth Annual Radio Show in Chicago.

WGR Gives Original Speech Used to Dedicate DX Phone

BUFFALO.—WGR, Federal Radio corporation here, had the recent honor of broadcasting the original oration, by the original speaker, which was used in the first test of the long distance telephone fifty-two years ago.

F. W. Stuart, now eighty-four years of age, delivered the oration written by Dr. Talmage, entitled "The Carousal in the Palace," which the former personally delivered in the year 1874 during the first test of the telephone line between Brantford and Tutela Heights, Ontario, Canada, a distance of four miles.

Mr. Stuart, a poet and author, was a personal friend of Alexander Graham Bell, inventor of the telephone, and was invited to repeat his oration for a test a few weeks later between Brantford and Paris, Ontario, a distance of seven miles.

FEATHERED ARTISTS INNOCENTLY ON AIR

DENVER. — Feathered virtuosos were given another turn before KOA's microphones here recently when staff members were successful in broadcasting the music of meadow larks during intermissions in Clarence Reynolds' noonday organ concerts. The songsters were perched about the station on nearby telephone poles, unaware of Radio eavesdroppers. By placing a microphone in an open window of one of the studios, the bird signals were picked up without difficulty and flashed widespread to listeners.

HEIRLOOM VIOLIN IS HEARD BY WHN FANS

NEW YORK.—Those who listen to Station WHN have heard the strains of a 200-year-old Seidel violin played by Joseph Richter. Mr. Richter is a native of Bohemia but has lived here for twenty years. He studied under Krakan and Zolynsky in Poland, and for years was concert master in the Austrian army. His violin was passed down to him from ancestors who played it before many members of European royal families. He reveres the instrument as the living soul of his ancestors and plays it so.

PLAYS "HARP DE LOS ANGELES"

"Harp de Los Angeles," is owned and played by the young lady whose picture appears above. She may own and operate the harp of the angels, but she is very much alive and her name is Miss Louise Klos of KFI, Los Angeles.

If Lois Had Only Known——

STORY tellers from the beginning have touched the hearts of men by tales of unsophisticated maidenhood lured into paths of danger by the leopards of society. It's a little different today than the time of "Way Down East" but the characters much the same underneath. Lois Sylvester rebelled against the stern authority of a foster parent, boarded a train and met adventure before she was out of sight of her home town. But she fought through one snare after another until—but let's not tell the story here. Read it in Radio Digest. It's thoroughly modern by an author who has something to say and knows how to say it. GOODY GOODY GIRL by Merlin Moore Taylor starts here September 1. Don't miss a word of it.

FIGURES SHOW BROADCASTING HELPS GOSPEL

Develops New Interest

One Church Dusts 20 Years' Accumulation Off Gallery Pews Result of Being on Air

CHICAGO.—Radio religious programs are filling the churches rather than emptying them. This is the trend indicated by a survey of sacred broadcasting just made by Sears-Roebuck Agricultural Foundation.

Returns show that the church which broadcasts is on its mettle when it knows the world is listening in and puts an added zest into the music and service that brings people into the church instead of encouraging them to take their religion in comfortable doses at home.

One church in New Jersey states that since its services have begun to be sent out on the air, the gallery pews have been opened up and dusted off for the first time in twenty years.

The church that does not broadcast, on the other hand, feels the competition and makes every effort to bring its services and sermon up to the standard of the Radio churches and this, too, is filling up the empty pews.

Survey Reveals Interesting Figures

One hundred and seventy-eight Radio stations from every part of the United States and in Canada, from Saskatchewan to Montreal, participated in this survey. One hundred and three of these stations, or sixty per cent, are giving some sort of religious service or sacred music as a part of their regular programs. Four per cent are considering adding this feature and six per cent have religious observance only on such occasions as Christmas, Easter and Holy Week.

Fourteen of these 103 stations are owned or operated by some church or religious body. The rest simply include these features along with secular programs, because they feel their audiences want and appreciate them.

Sunday is the day that 86 of these stations send out their sacred programs, while 22 are on week-days. The week-day programs consist of sacred music or instructional address. A number have a brief service every morning somewhere between 7 and 8 o'clock. Actual church services are broadcast in 86 instances, while in 22 cases the religious program is prepared especially for the Radio and is sent out direct from the studio.

Ministers Co-Operate

Forty stations report definite cooperation from the ministers, none report antagonism, while the rest did not mention this angle of the situation. One or two replies told of resentment and jealousy on the part of local clergymen who were not broadcasting because their congregations were apt to stay at home to tune in on the big city churches, but these were notable exceptions.

Only two replies said that a decrease in church attendance could be traced to broadcasting, while 27 stated positively an increase. One clergyman wrote, "Since we have been broadcasting our service our church attendance has grown so rapidly that it is a problem to know how to take care of the crowds." Another pastor wrote that forty persons had recently joined his church, a direct result, he believes, from broadcasting.

A Catholic station writes that it has no effect on attendance in Catholic churches, as its members are obliged to attend every Sunday, but that the Radio furnished a means of instruction to their people that could not be given in any better way.

Great Aid to Ill and Shut-Ins

Stations from Texas and Colorado mentioned that the large number of health seekers in these states made Radio religious services a great boon, as hundreds of them could get them in no other way. Listeners are in general composed of the ill, the crippled, the very old and those isolated in rural districts. Besides these are a few whom no amount of persuasion would get into a church-going habit, but who will listen to at least part of a religious broadcast. For the rest there are a large number who both listen in and go to church for worship and for social contact. No one felt that the Radio supplants church attendance, but is an

WFBG "Voice of Alleghenies"

ALTOONA RADIO Station May Be Small But Is Heard from Coast to Coast—a "Wren" Among the Greater Broadcasters. Special Service Following Sporting Events by Remote Control

WERE you ever wakened in the morning by the warbling of a wren outside your bedroom window? And did you ever hear a big, black crow broadcast his dismal caw from the naked tip of a cottonwood in a cornfield.

There are Radio stations like the wren and the crow, little stations with sunshine and cheer in their voices and big stations with monotonous wails generated from limitless lung power.

One little station that might be compared to the wren is WFBG, located at Altoona, Pa. Theoretically it could be little more than a peep in the big broadcast world. It only has 100 watts to carry its voice, but that voice is packed full of good cheer, variety and it is said to carry practically as far as most of the 1,000-watt stations.

Altoona is perched up 1,200 feet above sea level in the Allegheny mountains. WFBG, with its 100 watts, literally is the "voice of the mountains." It sweeps down the East coast of the continent from Labrador to Cuba and wings westward to California and the Pacific.

"The world's champion big little broadcaster," writes Roy F. Thompson, director and announcer, and generally known to listeners as "R. T." Mr. Thompson stepped into the vacancy caused by the sudden death of Walter S. Greevy, who was a director of the National Association of Broadcasters. There are three of the Thompsons, consisting of father, mother and daughter, Miss Alice Mary Thompson, pianist and soloist. They are known as the Thompson Trio.

"I really believe WFBG has been heard a greater distance than any other 100-watt station in the world," continues Mr. Thompson, "for we have received verified proof of reception from Chulia Vista, California listeners, as well as points in southern Florida and at sea, off the Florida coast, aboard the steamship President Polk."

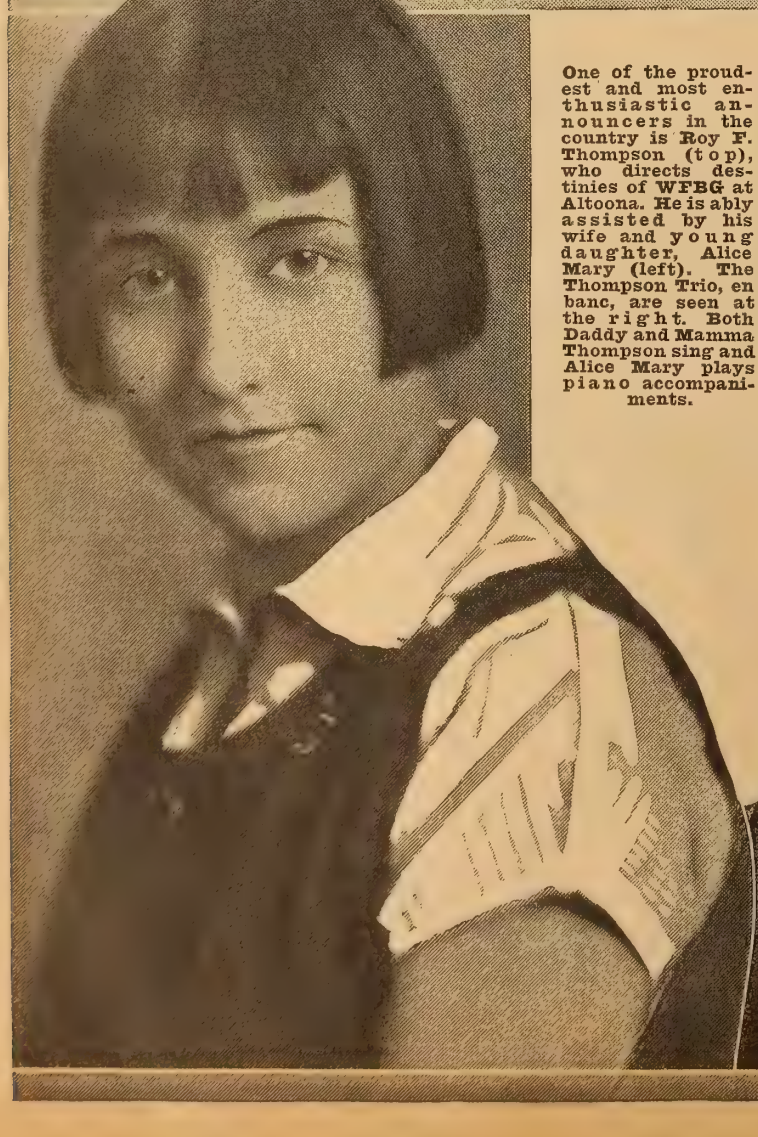
Almost every program brings a surprise of some sort to the listeners of this mountain Radio bird. It seems to waft the breeze and atmosphere of the Allegheny peaks. Perhaps the town is best known to the nation for the big speedway classics. Two great 250-mile motor races each year bring tens of thousands of visitors from all sections of the United States. This important event is graphically broadcast from various points of interest about the course.

"We began our career with the big Labor Day race," said Mr. Thompson, "in 1924, and the announcer was enabled to give an eye-witness account of the tragic finish in which Joe Boyer, apparently the winner, lost his life. We sent out details of the race on a scale that those who listened in understood more of what was going on all the way around the track throughout the progress of the race than those who were actually present and looking on. Since then we have been broadcasting semi-monthly programs by the Speedway orchestra in our Crystal studio.

"Our listeners are always interested in sporting events. We follow the World's Series games and sometimes the most important preliminary games. We also follow the local sporting news. The great championship contests by Pennsylvania railroad employes' field games were broadcast for their fans who were listening in all along the system. We had the microphone placed where we could watch every entrant, name him and announce the winner. We were on the air for eight hours straight on this occasion."

One of the unique musical treats was a band concert from Lakemont park, six miles from the station. The "mike" was placed on a float in the center of the lake, near the island bandstand. Listeners reported that the transmission was the best they had ever heard.

Station WFBG is owned and operated by the William F. Gable company and the Times-Tribune company, publishers of the Altoona Tribune. Robert B. Gable, the principal owner, is given credit by the community for bringing the station to Al- (*Continued on page 30*)



One of the proudest and most enthusiastic announcers in the country is Roy F. Thompson (top), who directs destinies of WFBG at Altoona. He is ably assisted by his wife and young daughter, Alice Mary (left). The Thompson Trio, en banc, are seen at the right. Both Daddy and Mamma Thompson sing and Alice Mary plays piano accompaniments.

Dignity and Jazz at Ohio "U"

WEAO Diversifies Varsity Lectures With Campus Frivolties at Columbus. Oldest Educational Radio Station Expands Usefulness—Complimented as Foremost of Kind by Secretary Hoover

By M. M. CAROTHERS

IT TAKES courage for a broadcasting station to feature educational material consistently and persistently, when, as everyone knows, nine-tenths or more of the listening public wants entertainment and little else. But this is exactly what WEAO, "The Voice of Ohio State University," at Columbus, has been doing for four years.

If educational talks and lectures were all there is to judge by, Ohio listeners probably would vote "thumbs down" on WEAO. However, they have found beyond peradventure that the station adequately represents all the university, taking in its attractive sports schedule, its music and its major campus activities. Nevertheless, the educational features are uppermost.

"We're supported by the state of Ohio, whose tax-payers primarily pay us for helping them, their sons and daughters get an education," reasons Prof. C. A. Wright, head of the electrical engineering department, native of Mississippi and director of WEAO. "Besides, practically all the other 530 stations in this broad land are devoted almost solely to entertainment.

Allen McManigal (left) doubles as member of faculty staff and "Uncle Al" on the Radio. "Midge" helps him entertain little listeners.

"Our status," he continues, "doesn't permit us to hire entertainers. On the other hand, since we serve the public, we cannot reasonably turn down those who offer their entertainment services and are deemed worthy."

SO IT happens that occasionally a snappy jazz band is heard from WEAO, or a group of campus harmonizers singing "That's My Infant," or a merry ensemble staging a piece of campus foolishness. All of which demonstrates that the University spirit is not to be kept quiescent.

The WEAO staff is not a large one, and the devotion to a common ideal has worked wonders. The station began operation in the spring of 1922, and spring of this year it initiated a brand-new transmitter, with 140-foot masts rearing their heads above the campus. Tax-payers and the Ohio legislature have never permitted the station to indulge in luxuries, such as privately-owned stations enjoy, and only through the untiring work of the staff was the new transmitter possible.

The first transmitter was designed and constructed on the university campus. So was the newest. R. C. Higgy, Ohio State alumnus and former editor of the operators' magazine, "Q. S. T.," who has been chief Radio engineer and operator the past two years, designed and built the new outfit with the assistance of M. F. McDowell, his assistant, who is one of the real veteran amateur operators of the United States, and others of the staff.

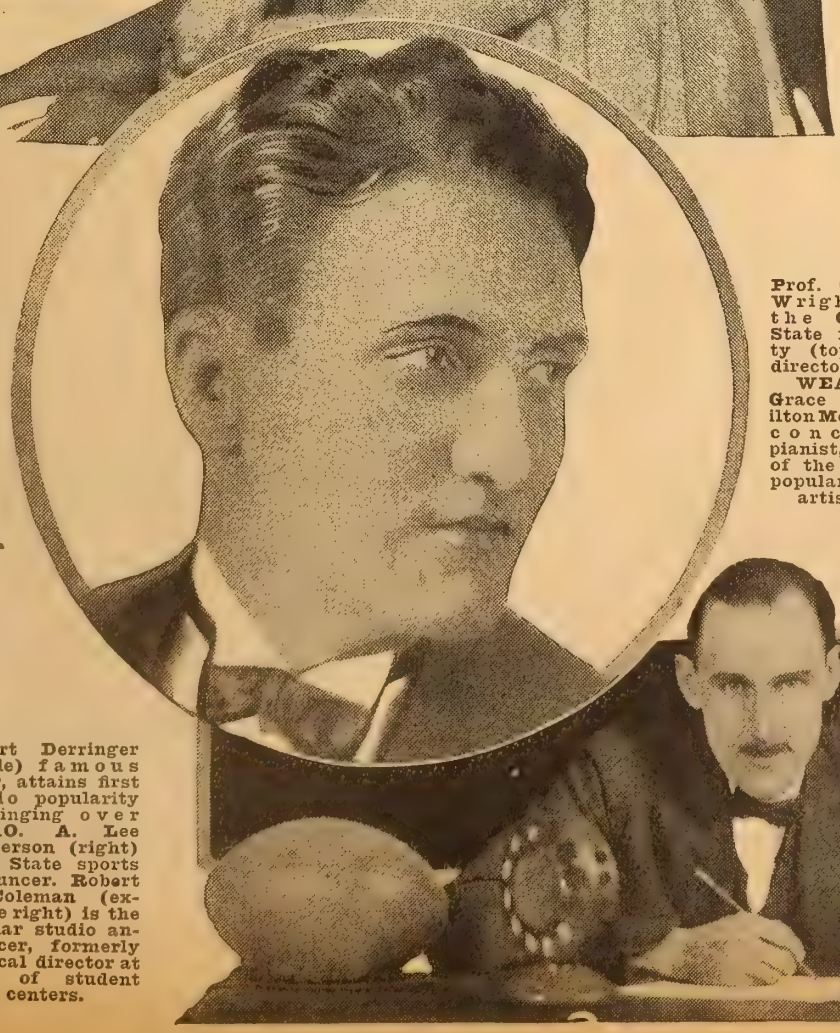
Secretary of Commerce Herbert Hoover recognized the educational work of WEAO last fall at the fourth Radio conference, when he acknowledged it as foremost in this line of activity on a basis of hours devoted to it and the variety of subjects handled. It is that this record has been maintained during the past winter and spring.

Sports broadcasting first was taken up on a considerable scale in the fall of 1924. At that time it was decided to send out a play-by-play report of the football games played in Ohio's magnificent stadium, seating 75,000 persons. A. Lee Henderson, a young instructor in the department of psychology, was pressed into service for announcing. Extra microphones were placed where they could pick up cheers, music and yells.

The first event of this kind was a huge success. Since that date it has been duplicated many times, both from gridiron and basket-ball floor. Henderson's popularity as announcer still increases. A vote taken at the end of the 1924-25 season showed him the most popular sports announcer of the Western Conference schools.

Allen McManigal is another character of note at WEAO. He's an instructor in one of

(*Continued on page 30*)



Robert Derringer (circle) famous tenor, attains first Radio popularity by singing over WEAO. A. Lee Henderson (right) Ohio State sports announcer. Robert J. Coleman (extreme right) is the regular studio announcer, formerly musical director at one of student centers.

Prof. C. A. Wright of the Ohio State faculty (top) is director of WEAO. Grace Hamilton Morrey, concert pianist, one of the most popular staff artists.

PRETENSE

by MAURICE R. COONS

MR. COONS Lifts the Cover from a Spicy Romance in a Fashionable Chicago Supper Club and Discovers Beneath a Frothy Surface True Love and Sacrifice

Illustrations by W. H. WISNER

MANY of those who entered the Club Royale bowed to the tall, distinguished gentleman lounging near the inner doorway. And those who didn't wished they might. Even in these days of rampant democracy Prince Boris Masillof was a sought after personage.

Young enough, handsome, with the unlimited background for interesting conversation which only education and travel can provide, well versed in half a dozen languages—including that of love, a cousin of the ill-fated Czar; he had stormed the American social heights without a struggle or an apparent effort. The Chicago hostesses blessed the fate that had brought him unscathed past the New York lion-hunters and made the most of his presence.

Slender, with an erect, graceful military carriage that was a delight to the eye, a faultless dancer, women went out of their way to gain his regard. Other men openly discounted him but secretly feared him. Yet, even they admitted he was handsome. No one could deny that. His high, wide forehead rose above black eyes that seemed to dare, separated by a thin, straight nose of patrician perfection. A small, carefully clipped black mustache shaded a wide, full-lipped mouth that was cynical or humorous according to his mood. His hands were those of an artist, long, slender, white, graceful, quick, deft, expressive.

An ardent and experienced devotee of those diversions which flourish from midnight till dawn, his preference for the Club Royale, as evidenced by his nightly presence there, had established its position as "the" supper club of the city. Prince Boris seldom missed a dance and he was most democratic in his selection of partners. Women insisted on coming to the Club Royale merely for the possibility of dancing with him.

He stood now close to the inner entrance with nonchalant ease, his left hand in his trousers pocket, lifting one side of his dinner jacket in a graceful fold, a long Russian cigarette drooping carelessly over his lower lip, the grayish smoke curling upward about his face like incense about the impassive countenance of an idol in an Oriental temple; while his eyes wandered over the room. But the doorway was the predominant object of his attention.

HE advanced suddenly and bowed as a girl entered alone, fashionably late. His eyes absorbed her flaxen blonde beauty hungrily. Then he smiled, satisfied.

"I was afraid you weren't coming."

She laughed a trifle nervously.

"Yes, I know I'm late. Somebody wanted to come with me and I had a time getting away."

Prince Boris smiled wisely and one eyebrow lifted quizzically.

"Andy?"

She nodded shortly.

"He insisted on going with me. Made quite a scene about me running around alone at night. But I told him I was perfectly able to take care of myself."

Prince Boris nodded approvingly.

"Quite right. That's one of the reasons American girls interest me. After the petted, helpless women of Europe, their absolute independence is refreshing. It's justified, too. They're wonderfully capable."

He steered the girl gently toward the choice table which was always reserved for him at the edge of the dance floor. Many eyes surveyed them and little conversations, animated but secretive, sprang up here and there. The expressions on the faces of the speakers indicated the tenor of their talk. Some admired. Others were sneeringly cynical. Still others appeared frankly envious. Somehow no amount of money could give one such an unassailable social position as a crest and assassinated relatives.

The girl ordered sparingly but expensively. Prince Boris contented himself with a drink. Then their glances wandered about the crowded supper club. The hysterical round of gayety which would last until dawn was just beginning. People of evident wealth and position swept in through the velvet draped doorway singly and in groups. Elaborately obsequious waiters scurried about with trays of food and accepted whispered orders with impassive faces, returning with suspicious parcels wrapped in napkins.

"I am taking Miss Brent home," he announced.

"Of course you are, Ricardo," assented Evelyn with a scornful glance at Frascita. "Let's go."

FROM a dais at one end of the dance floor a dozen negroes in bizarre uniforms blared forth nerve-shattering jazz, amplifying it with unbelievable contortions suggesting overwhelming syncopation. Between courses the patrons danced; some who already had drunk too much approaching dangerously near the border line of decency. Lights. Noise. Frantic movement. Confusion.

The girl suddenly surveyed Prince Boris with frank curiosity. She noted the dark circles under his eyes; the deepening lines about his mouth.

"You look tired," she judged finally.

"I am," he admitted with a bored sigh. "Somehow I'm getting tired of everything."

"I think you need a wife who'll make you stay home nights," she retorted in mock severity.

"Never." His quick certainty made her wince as though he had slapped her. "I couldn't stand the eternal monotony. It would drive me crazy."

They danced. And more than one spectator remarked how well they danced together. Those who knew them both admitted, some enviously, that it appeared to be an ideal match. Vague rumors said the girl was Evelyn Brent of San Francisco, wealthy and socially prominent in her home city. She was obviously beautiful and charming. And Boris' own good looks and courteous charm were the talk of the town. They should go well together as a permanent arrangement. But, of course, one never could tell. Married life seemed to bring out the very worst in a person, abominable qualities and habits that there was no hint of before.

THE FALL GUY

by JOSE B. & HARRY VAN DEMARK

JASON TELLYHEW Judged the Fall Guy by the Shape of His Nose and the Cut of His Jaw. But Alice Proved the Heart the Best Indicator.

IT was the crisis. Jason Tellyhew gravely closed the door after he had admitted young Standish to his den. He did not lock it. He could not find the key. His daughter Alice had anticipated a necessity for its removal. And when the latch had closed her pretty, blue eye blinked at the keyhole.

At first she heard little of what was being said, but presently their voices became more distinct. The emerald pallor from a lamp seemed to cast a ghastly light over Dick's high cheek bones and polished hair as he stood erect at the end of the long, flat desk. At moments her father's face came into view as he paced back and forth, toward and away from Dick.

"It is no use. You are impossible." Her heart pounded as she caught these words from her parent and dimly saw Dick's eyebrows beetling angrily.

"Because I am not worth a million dollars, or haven't a traction line or two to bargain with, I suppose," he answered sullenly.

"It's not that. You never will have anything. You can't. You aren't built that way. You were doomed at birth to a mediocre existence. Nothing can change that and it would be folly for you to indulge in any false hopes. I know your type. Character simply isn't there. I feel that I must be frank——"

"Obviously, even to my mediocre intelligence. I can't feel convinced, however, that you actually believe all that analysis bosh——"

"It is not bosh. You, yourself, are the living example of the truth of it. What have you to show for this whole year of effort since you finished your law school? Your clothes, look at them, look at yourself——"

"That'll be all, thanks, Mr. Tellyhew. You have gone out of your way to make me the example that you seem to think I am. But one of these days you'll wake up with this nose and this jaw on the other side of counsel's table in a court of justice—then, look out. I'm through with you for the present. Good night."

The eye at the keyhole escaped the hastily opened door just in time.

"Good for you, Dick. You stood up to him fine." Alice pressed his hand understandingly and they parted.

THE Fates do not always work with threads. Sometimes they use grindstones. Dick felt himself being ground on the stone of adversity. Nobody seemed to want to employ his legal advice. Lunchless noons and meager dinners caused him to take up three holes in his belt. Then the Fate that was bearing down must have shifted to another foot. An automobile came tearing down the street just as Alderman McGuire stumbled over a curb in his effort to escape and fell directly in the path. Standish was able to jerk him instantly to safety.

That was the first good thing that had happened to him for months.

"Quick thinking and an alert mind are important essentials to a young lawyer. I think you'll hear from me again," said the alderman as he tucked Dick's card away in a pocket case.

Then came a mysterious parcel in the mail. It contained bonds. "You can borrow on these and I'll call on you in a few days to discuss the matter," said the unsigned letter that accompanied them.

Scarcely had Dick conveyed the good news to Alice than he received a call from Alderman McGuire. Jason Tellyhew's traction system had failed to build a line to Rosehurst according to the provisions of a franchise granted a year ago. Would Mr. Standish start a suit for $50,000? Would he? And did Mr. McGuire know anything about the mysterious bonds? He did not.

It was late in the morning when Dick sat back waiting a call from Mr. Tellyhew in response to his notification of the impending suit. Alice was there when Mr. Tellyhew entered with a burly stranger. Pointing a shaking finger at Dick, he said:

"There's your man, officer. Arrest him at once!"

CHAPTER V

The Bombshell

"WHAT does this mean?" Dick demanded. He wasn't sure whether Tellyhew was in earnest or not.

But he was not left long in doubt. Tellyhew's companion approached him and threw back his coat, displaying a badge pinned to his vest.

"I'm Detective Bryan from headquarters. Will you come quietly?"

"I will if I go at all. First, I want to know what this is all about?"

"A young man of your evident talent in certain directions should have no trouble in making a shrewd guess at this," Tellyhew observed with a sneer.

"I haven't the slightest notion, but I suppose it's some plan of yours for revenge."

"Young man, I never resort to crude methods of revenge. This is a matter of protection—a matter of catching a thief."

"Catching a thief? Do you mean that I——"

"I mean that I have ordered your arrest for the theft of Amalgamated Steel bonds, serial numbers 842 to 858, which are missing from my private vault and which have been traced to the Guarantee Bank & Trust Company."

"What do you think I know of your Amalgamated Steel bonds and your private vault?"

"You must know a great deal since you took the bonds and put them up at the bank as security for a loan."

"I—did—what?" gasped Dick.

UNTIL this moment he had not connected the actions of his mysterious client with Tellyhew's visit. But now—

Tellyhew repeated his statement. "There's no chance for an argument; and no excuses are wanted—unless you wish to confess."

"I have nothing to confess," said Dick proudly. "I haven't yet stooped to thievery. Those bonds that I gave the bank as security came to me in the natural course of events."

"Oh, come, Standish, if you're going to lie, tell a good one!"

"What I say I can prove!" flashed Dick. He dug into a pile of papers on his desk and brought forth the letter that had accompanied the bonds. "Read that."

Tellyhew calmly scanned the note, then smiled as he handed it back. "You're not as clever as I thought," he said. "It seems to me that in concocting such a plan as this you would at least have had the letter written in a strange handwriting, inasmuch as it isn't signed. But to sit down to your typewriter and——"

"Just a moment, Mr. Tellyhew!" Dick's eyes flashed as he confronted the chairman of the Suburban board. "I did not write that letter; I don't know who did; but when the time comes my client will reveal himself, then everything will be explained."

"And in the meantime, I suppose the bonds will remain with the bank and you will live on my money?" returned the traction magnate with biting sarcasm.

"I DON'T like your insinuations, Mr. Tellyhew, and some day I'm going to make you eat them!"

"Well, in the meantime, we'll see what a few days in jail will do for you."

"You mean that you are going to persist in arresting me?"

"I mean just that."

"Oh, now, see here, Mr. Tellyhew——"

"I don't care to argue, I tell you. You have my missing bonds. I don't know how you got them, but my private detective, making the rounds of the banks, found them at the Guarantee, and I have President Stevens' word that you put them up as security for a loan. I'm sorry, Standish; I was beginning to believe that you had something in you after all."

"You know I've got something in me, Mr. Tellyhew," Dick said pointedly. "And you know in your heart that I did not steal your bonds. As a matter of

(Continued on page 10)

Dick submitted to the officer's pressure upon his arm. "Come quietly, young fellow, and I'll not use the bracelets." "You won't need the bracelets," Dick assured him. They were . . . startled by a cry from Alice. "Stop!" The girl evaded her father's outstretched arms. "Just a moment; Mr. Standish is entirely innocent in this matter."

"THE FALL GUY"

(Continued from page 9)

fact, I believe that you mailed me those bonds yourself—and I believe you wrote this letter!"

Tellyhew went red and white by turns, but after a pause regained his composure as he inquired:

"What reason have you for making a statement like that?"

"Because you realize what you're up against in this traction fight with the city—and you want to get me out of the way!"

A far-fetched statement, yes; but Dick was desperate. If he could arouse Tellyhew's sporting blood and induce him to leave the bond matter in abeyance a few days until some logical explanation could be found, it would serve his purpose well. Otherwise, even though he were able to make bond, there would be a certain stigma attached to the affair, and it was doubtful if, under such circumstances, the city would care to let him go on with the traction case.

"THE traction matter hasn't entered into this," returned Tellyhew with a slight show of temper, "and I don't propose that it shall. It's up to you to clear yourself of this charge if you can. You're such a smart lawyer," he added, "there should be little difficulty in that." He nodded to Detective Bryan. "Take your man."

"Can't this matter be arranged here, Mr. Tellyhew?" pleaded Dick. "I am absolutely innocent in this matter. That letter I showed you is genuine. And the bonds were enclosed with it just as I've explained."

"And of course I sent them both in a spirit of revenge," sneered Tellyhew.

"Too thin, Standish," said Detective Bryan.

Tellyhew nodded grimly. "Lock him up," he said.

"You promised to come quietly," the detective reminded Dick.

Dick nodded as he picked up his hat. Then he turned an appealing glance toward Alice, who had withdrawn to one side of the office. There was a suspicious moisture in her eyes as she turned her gaze upon him.

"Don't worry," said Dick; "I'll get out of this all right."

Alice made an instinctive movement toward Dick, but Tellyhew got between them. "None of that, Alice! You probably realize by now that I know what is best for you."

"But, daddy, surely you're not going to lock Dick up!"

"Why not? Isn't he a thief?"

"No!"

"Oh, you're prejudiced! You— Well, we'll attend to your case later." Then to Bryan: "Go on; I'll follow shortly with my daughter."

DICK submitted to the officer's pressure upon his arm.

"Come quietly, young fellow, and I'll not use the bracelets."

"You won't need the bracelets," Dick assured him.

They were in the doorway leading into the corridor when they were startled by a cry from Alice.

"Stop!" The girl evaded her father's outstretched arms and hurried to Dick's side. "Just a moment," she pleaded with Detective Bryan, "Mr. Standish is entirely innocent in this matter." Then, turning defiantly to her father, she exploded the bomb: "I stole those bonds!"

"What!" gasped Jason Tellyhew. "You don't realize what you're saying, Alice!"

"Yes, I realize it. I should have said I borrowed them; and I wrote the letter to Dick on your office typewriter. You and Mr. Kane were out; the vault was open—and I knew Dick needed the money! I—I intended to put them back as soon as Dick got on his feet. That's why I suggested that he borrow on them at his bank. Oh, but I'm glad I didn't tell him to sell them!"

"Alice!" cried Dick, and the girl, with a little sob, sprang into his arms.

"Well, I'll be—" Jason Tellyhew, out of respect for his daughter's presence, did not finish the sentence. Instead, he chewed savagely at the end of his cigar.

"Ain't it funny," grinned Detective Bryan. "You never can tell what a woman will do!"

CHAPTER VI

To Fight or Not to Fight

THE following morning the telephone rang sharply in Dick's office. He picked up the receiver.

"Mr. Tellyhew's office," came brusquely from the other end of the wire. "Kane speaking. Will it be convenient for you to call on Mr. Tellyhew at ten o'clock?"

"I'll make it convenient," Dick returned in a similar tone.

The receiver was snapped up on the other end and Dick sat meditating for the space of several minutes. The voice of Kane if it was in any sense a reflection of Tellyhew's mood this morning, seemed to indicate that Dick was in for an uncomfortable half hour.

That Tellyhew meant to fight he had no doubt. For the chairman of the Suburban board was not given to submission except by force. And the fact that Dick was behind the city's guns in the Rosehurst matter would serve like the proverbial red flag before a bull.

Well, so be it!

At five minutes to ten Dick entered the offices of the traction company, nodded briefly to Kane, and sat down.

Promptly at ten the door of the inner

(Continued on page 29)

"PRETENSE"

(Continued from page 7)

THE evening waned. Entertainers offered skits, songs and dances—**such** skits, songs and dances! The patrons grew hilarious. Laughter became hysterical; voices strident and high-pitched. Men who thought it indecent to appear publicly without a freshly pressed suit each morning wore silly paper hats and sillier grins and made incoherent love to other men's wives. Women flirted outrageously with other women's husbands and shrieked shrilly with merriment over nothing.

"Silly crowd, isn't it?" said Evelyn Brent.

Prince Boris nodded emphatic assent. "And heartless. If any of those people should lose their money and consequently their social position according to the American scheme of things, they would find that not even the 'friends' who have been their expensive guests here would speak to them. They should find themselves total strangers, shunned like a dreaded disease. People would be afraid to recognize them for fear they might presume on the past and ask favors. . . . Poor fools! Look at them! Purchasing what they think is pleasure at the terrible price of money, health, self-respect. They think they're happy. In reality, they're miserable. I've often wondered why they come here."

"Why do you come here, Boris?"

Masillof started and his eyes searched the girl's face with nervous anxiety. But her gaze was level, frank, honestly curious. He looked away and hesitated what seemed a long time, his brow furrowed with thought. His eyes held an inexpressible anguish, like those of a trapped animal. Once he started to speak, then evidently changed his mind, his hands clenching until the knuckles stood out in rigid prominence. At last he smiled, cynically and with obvious effort.

"For the same reason they do, I guess. To escape from myself—from the awful, endless monotony of life." He gazed at her with sudden interest. "Why do **you** come here?"

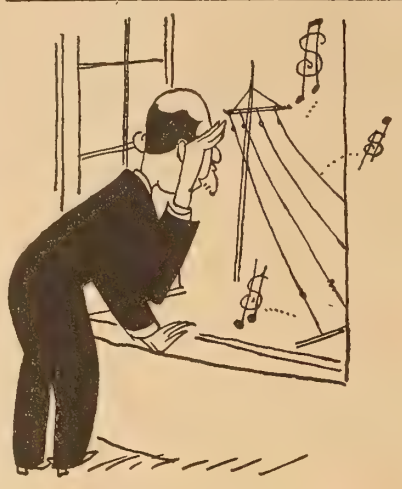
"Your reason goes for me, too."

But her averted eyes, the soft flush in her cheeks, belied her words. Prince Boris smiled wistfully and reached across the table for her hand.

"YOU'RE a wonderful girl, Evelyn," he said irrelevantly. "You'll make a marvelous wife for some man."

"I don't know." Her voice was choked, as though a sob were trying to escape

(Continued on page 14)



There's a golden tinkle in the air—

Does it reach your ears? All you need is a Rectigon to make music sound like money. And to keep your batteries charged up to their ears with pep. Thus you attain best possible reception at lowest possible cost. Your Rectigon pays dividends quickly in money saved from the service station. And you always have a marvelous power reserve to bring in the best your set can get.

and it comes from charging at home with

The Westinghouse Rectigon Battery Charger

©, 1926, W. E. & M. Co.

No noise as it charges—not a bit of fuss. Not even a murmur that would disturb the mildest slumber.

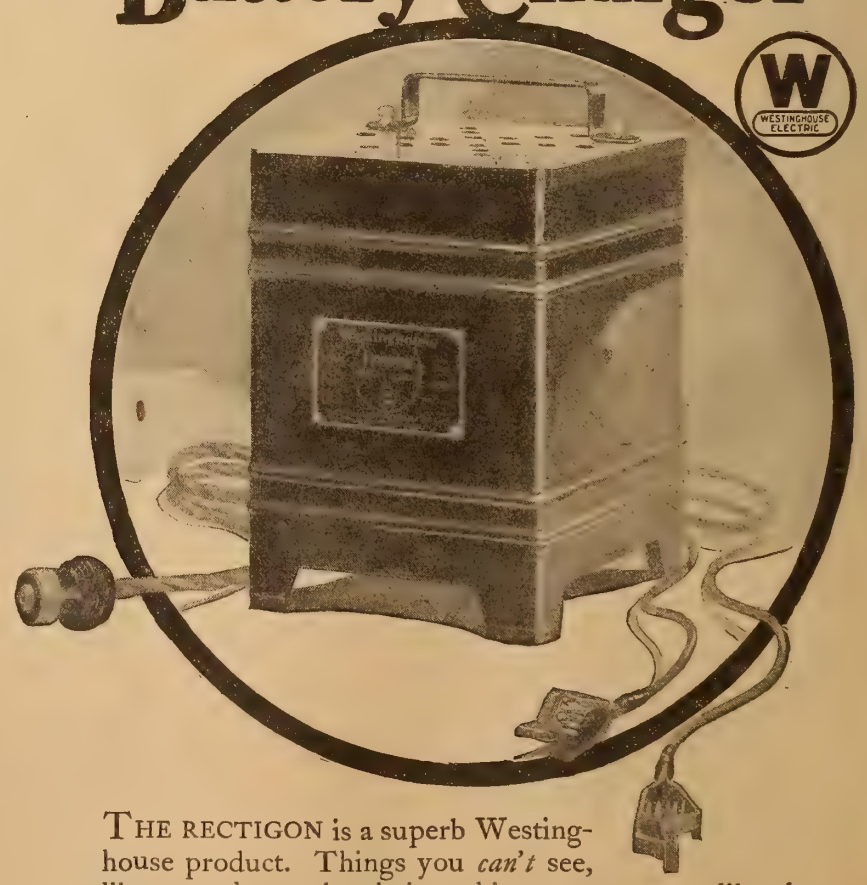
No acids, chemicals—no moving parts—nothing to spill or burn. No muss, nor worry. You'll have no spoiled rugs, ruined clothing.

Snaps on in an instant—just plug into the light socket, snap on the terminals. Saves service station bother. Spares interruptions caused by absent batteries.

Charges both "A" and "B" batteries—Keeps both packed with power. Bulb is used for "B" battery charging and it is enclosed, like all other parts, in metal, safe from accident. (Rectigon charges automobile batteries, too.)

Safety for batteries and set—You'll not wake to find your battery discharged—that can't happen with a Rectigon attached. Should you tune in without detaching the Rectigon from battery, your set won't be harmed.

No Storage Battery Radio is Complete Without a Rectigon



THE RECTIGON is a superb Westinghouse product. Things you *can't* see, like extra heavy insulation, things you *can* see, like the durably enameled case—all are of highest quality. Westinghouse manufactures also a complete line of radio instruments, and Micarta panels and tubes.

Don't Guess; Measure Voltage

"SAVE Your Tubes and Batteries and Save All," Says Technical Editor in Advocating Voltmeters to Conserve Accessories.

By The TECHNICAL EDITOR

"THRICE vain is he who copies, not knowing the reason thereof!"

Which leads one to believe that the only reason why those who "roll their own" always place voltmeters as well as milliammeters on their pet super-heterodynes, because, "all of the pictures of supers show such instruments, so why not mine."

And, with like regularity, each of these items are among those not present upon the remaining mighty good circuits, which the vast majority build.

The answer to such inconsistency appears to be chargeable to the fact that few constructors understand the circuit connections required as applied to single or multiple tube receivers, or have gained the impression that with the exception of the super-heterodyne, a voltmeter only can be catalogued as excess expense.

While a milliammeter is desirable for all Radio circuits using six or more tubes in order that one may avoid excessive plate battery drains, their use upon sets up to six tubes is hardly warranted as it is unlikely that any arrangement of circuits in such receivers will create a battery drain sufficient to warrant correction.

Should Know Voltage

Everyone should, however, be deeply concerned regarding the filament voltage

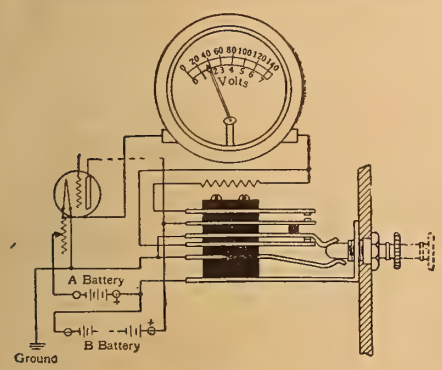

Figure 2

at which the tubes are operating. Filament voltage, irrespective of the number of tubes which your receiver uses, may be considered as the most important measurement, since over voltage upon filaments quickly ruins the thoriated filament tubes. If one would operate his tubes with the end in view of securing the utmost efficiency and longest life, it is then of prime importance that they be operated at a maximum not to exceed that voltage recommended by the manufacturer. Obviously this nicety of adjustment can only be accomplished when an indicating voltmeter is used.

In purchasing instruments of this character those of the cheaper variety should be studiously avoided. A voltmeter at less than five dollars is a bad buy, it being more likely that the correct price in order to insure a dependable instrument will run considerably higher and is well worth the added investment. Several dependable manufacturers, and particularly those of many years experience in the manufacture of electrical measuring instruments, are offering devices of this character which satisfactorily meet the requirements of quality and dependability.

Variety of Voltmeters

Each of these manufacturers offers several ranges of combination voltmeters. They may be had for the reading of the filament voltage only, or in combination for both the filament voltage and that supplied to the plates of the tubes. One of the most recent devices on the market permits, not only a reading of both filament and plate constants, but the C battery as well. The instrument pictured in figure 1 is that known as "triple range" and is operated in combination with a six spring jack and metal plug for the securing of the individual reading desired.

Switching devices are of course essential in order that one may obtain reading from single or collective groups of both A and B batteries. There are a number of inexpensive dial switches on the market suitable for this purpose. In choosing a switch for this use one with sufficient movement of the blades, so that adjacent active contacts will not be short-circuited, should be selected.

If the contact buttons are too close together connections should only be made to every other contact. It will then be apparent that a five position switch may be used to show the voltage of three separate groups of filaments or of one filament, plate and C battery values while a seven contact switch would make possible the taking of four readings in separate groups.

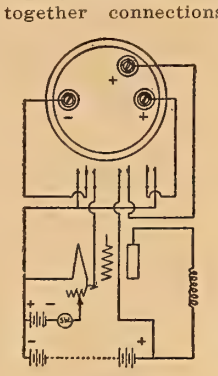

Fig. 6

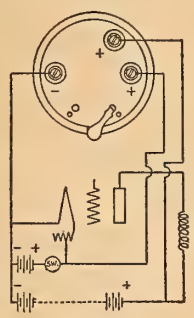

Fig. 7

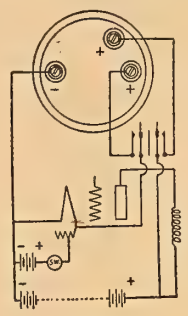

Fig. 8

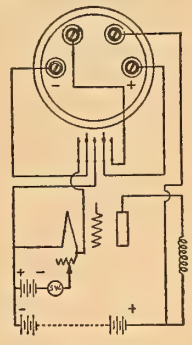

Fig. 9

Watch Connections Closely

It is of great importance that, irrespective of the make of voltmeter used, the minus of the voltmeter must be connected to the minus of the A battery feed to the filaments; and likewise, with practically all makes of voltmeters, the minus B battery should be connected to the minus A battery. In your receiver the minus B may be connected to plus A—watch this point and change it to that mentioned above when hooking up the voltmeter to your receiver. It should be understood that this rule does not apply to each manufacturer's product, but does mean that one should read the instructions accompanying the instrument very carefully and thus avoid an expensive error.

In figure 2 is shown the connections and method employed by a prominent manufacturer using a double range voltmeter in combination with a Radio jack and metal plug. With this arrangement control is offered covering the "On" and "Off" position for the total receiver as well as means for taking both the A and B battery potential readings.

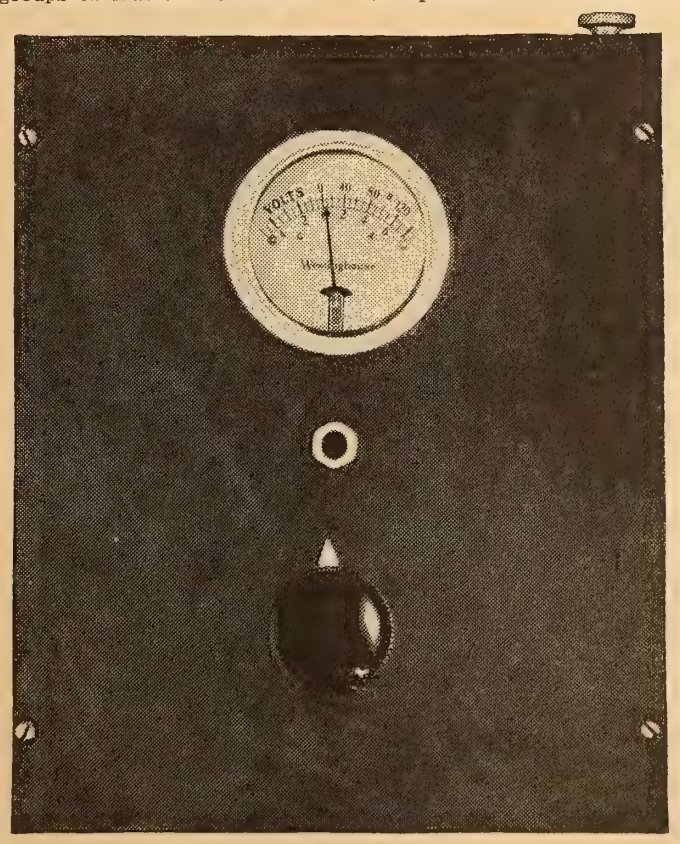

Figure 1

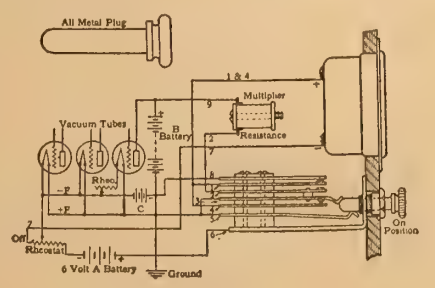

Figure 3

For Separate Rheostat

In this instance if one of your tubes is controlled with a separate rheostat, it is obvious that such rheostat and filament should be in series with each other across the positive and negative bus bars of the main filaments. In this manner the voltage of the individually controlled filament will never be greater than that applied to the main lot, as shown by the voltmeter. It will be noted in this drawing that the frame of the jack is connected to plus A and minus B. The two prongs which usually receive the plug are connected together and to the plus A of all filaments.

The common of the voltmeter is connected to the minus bus bar or minus A, while the ground may be connected to plus A. The contact between the main prongs is connected to the plus terminal of the low range of the voltmeter, the two upper contacts being connected in the high voltage or B circuit with the multiplier resistance between plus and the plus of the low range of the voltmeter.

In operation, when the metal plug is inserted in the jack, the filaments immediately light, provided the rheostats are turned on, and the voltmeter indicates the voltage which is being applied to the filaments. When this metal plug is pressed in a bit further it automatically breaks a circuit between the voltmeter and the plus of the filament through lifting one of the jack springs, which, in turn, returns the pointer to zero of the scale. Pressing the plug a bit further, closes the upper spring contacts and indicates the B battery potential.

Returns to Filament

Releasing the plug pressure causes it to return to the filament reading thus avoiding the danger of exhausting the B battery.

An added ideal arrangement for multitube receivers is shown in figure 3 this scheme giving every combination of voltmeter readings which one might desire.

Still another arrangement which may be made up from standard parts is shown in figure 4, the Frost potentiometer switch No. 620 being nicely adapted for this purpose. In this switch the rotating part is a double blade with its two fingers bridging adjacent contacts. This double blade is connected to one side of a double scale, double range voltmeter. The other side of the voltmeter is connected to the ground to which is also connected the plus side of the A battery, the plus of the filaments and minus of the B (except as previously noted.)

This switch has four possible positions, and five buttons, three of which are active and two dummies. When this switch is in the "Off" position, one of the fingers is in an inactive state, while the other finger is on a button contact leading to the negative side of the filaments.

Bridges Negative Contact

In the next, or "On" position, the fingers bridge the negative or minus button, which connects to the negative side of the filaments through their rheostat to the negative or minus of the A battery. This turns on the filament current and causes the voltmeter to indicate the filament potential.

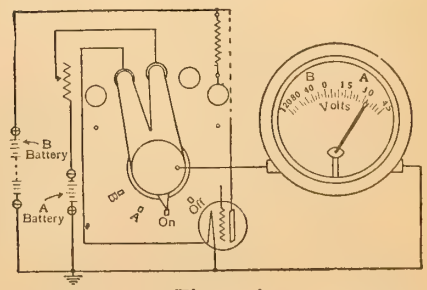

Figure 4

Potential Alone Shown

Following to the next position, the double blade is active only through the rheostat to the A battery, the filament being cut off. Thus at this position the A battery supply potential alone is shown. The drop in the rheostat is of no consequence, while this reading is important toward showing the condition of the A battery as regards the necessity of recharging.

Passing along to the next position of the switch, the blade touches a contact leading through the voltmeter resistor multiplier to the plus of the B battery, causing the pointer to deflect usually in the opposite direction and indicating the B battery potential. One is cautioned not to leave the switch in this position longer than to take the reading, as B batteries are most temperamental when short circuited with even a high resistance. Only the knob and pointer need to be visible upon the face of the panel while the scheme, if provided with suitable markings upon the face of the panel, obviates errors and at the same

Vol. XVIII August 15, 1926 No. 3

Public Opinion Is Radio Law

THIS year, as the 150th anniversary of the signing of the Declaration of Independence is being commemorated, the United States senate and house of representatives have seen fit to differ over a matter which deeply concerns the freedom of speech, a constitutional liberty expressed at the time when this country was founded shortly after the signing of the Declaration of Independence.

The matter referred to is the control of Radio and the restrictions which may be placed upon it. It seems to a non-partisan, unbiased medium such as ourselves, that the injection of politics into the control of Radio is to be deplored. The issue at stake is the freedom of speech of the broadcasting stations of the United States.

Instead of drawing a suitable Radio law, free from political loopholes, devoid of possible log-rolling and the conversion of the microphone to a mouth-piece of the party in power—instead we find congressmen and senators squabbling selfishly over an issue which only should consider the public good, and the principles laid down by our forefathers in that time-honored document, the constitution of the United States of America.

The house passed the White Radio control bill, meant to encourage Radio, but placing it under the direct control of the secretary of commerce, an appointed and therefore usually partisan friend of the party in power. Station licenses of five years' duration would be allowed.

The senate, almost disagreeing entirely with the White bill, drew up the Dill Radio control bill and passed it. The Dill bill, in an evident effort to curb rather than encourage Radio, bristles abundantly with disagreeable hobbling and objectionable clauses. No property rights are allowed stations, and licenses are allowed only for two-year periods. The last named feature of the bill, the two-year license clause, would make broadcasting licenses the footballs of senatorial campaigns, which oddly enough, also occur at two-year intervals. A new license might require special political favor during campaigns. There is no assurance of relicensing of broadcasters on pure merit. The power would be vested in a commission of five members, selected by congress and therefore not essentially non-partisan or unbiased in their decisions.

Radio must not be regulated and shackled to a standstill before it has ever had an opportunity to develop. Why strangle a baby? The Dill bill is almost unadulterated political murder. We cannot say a great deal more for the White bill, although its hobbles are less tight than those in the senate bill, an instrument which in many respects, we believe, can be torn to pieces as unconstitutional.

Further complicating the situation, Herbert Hoover has recently obtained an opinion on the 1912 Radio law from the attorney general of the United States. The decision trims the Radio control power of the secretary of commerce to practically nothing, and means that he must issue licenses to every one applying, that these licensees can use any wave length they choose except those from 600 to 1,600 meters, that any power may be used as long as "malicious" interference is not caused, and finally, that any or all hours can be used for transmission except the first fifteen minutes of certain hours in certain prescribed areas wherein are located naval or military Radio communication stations.

Thinking over that list of 600 waiting applicants for broadcasting licenses, and the above cited opinion of the attorney general, we fearfully hold our breath and wonder what will happen next. Will there be chaos? No, we believe not.

The only restriction on broadcasters at this moment is that historical one which has made so many statesmen, corporations, armies and nations bow to its will—and that is public opinion. The public interest will be served, for broadcasting stations depend upon public good will for their support.

How far a broadcaster can go without becoming intoxicated by imbibing too freely from the wine of freedom, depends alone on the broadcaster and the reaction of his audience.

RADIO INDI-GEST

To a Second-Hand Radio

Old Radio, you're on the bum;
You give me nothing but a hum,
A buzz, a click, a bang and roar,
And that's not what I bought you for.

I paid real coin to be amused,
And by good music be enthused;
But you, old box of tubes and wire,
Do nothing but excite my ire.

I bought you at a bargain sale;
That dealer ought to be in jail.
Tomorrow you go in the trash
And I'll buy one that's worth the cash.

GEORGE

To Which We Take Great Pleasure in Adding the "proven facts" or glossary of terms which the roaming bard, George, lists, evidently after some experience with sets, both new and second-hand. "Vacuum Tubes"—Accessories that cost you two dollars per when you happen to "short" them. "Amplifier"—An attachment to make all unpleasant noises more so. "Static"—A noise like water spilt on a red hot stove. "Battery"—A fitting, which, like many people, receives little attention while alive, but is greatly fussed over when dead.

To the Third Trombone Player
(Other Curious Persons May Read)

Dear Sir: Please accept my most sincere thanks for your kind words of appreciation of my few lines of poetical endeavor in reference to the feminine members of the Digest staff. Please permit us to say that you are both a Gentleman and a Scholar.

You said a mouthful Old Timer in those few words "Whither are we drifting," but you should have seen those few lines of mine before our good friend Indi trimmed it down—to make it more presentable I guess. However, we will not fuss with him about that as we give him credit for knowing his beans, and if he is kind enough to let this get into print we will—as the announcer who wears the necktie, shoes and passionate socks would say—dedicate these few lines to The Third Trombone Player.

Oh who is this party of the Marcel Wave
Who writes the dope for those who rave
Of Announcers young and Announcers Old,
Of Artists timid and Artists bold?

Oh is it a "She" that's young and fair
Who rouges her cheeks and bobs her hair,
Uses a lipstick and powders her nose,
Wears high-heeled shoes and rolls her hose?

Or is it a "He" that's short and fat,
Wears neckties, tan shoes and derby hat,
Chews "Brown's Mule" and smokes a hod,
And writes those lines to hold his job?

Whoever it is means little to us,
You and I, Old Timer, we don't give a cuss.
No doubt they are doing the best that they can,
But it's darn poor stuff for a Radio fan.

OLD KING TUTT (HIMSELF)

Intermission Idiosyncrasies
A. C. S. Announcing

"At 8:45 we will broadcast a short talk on Bone Setting by Dr. Alonzo Crapp, a noted bone setter of San Francisco. Dr. Crapp will give us a short outline on such subjects as, Numerical Propinquity, or in other words, the repeating habitudes of a seven, and an eleven. We understand the doctor recently did some nine hundred dollars worth of bone-setting in a Chicago hotel in one short evening and we hope he has some good news for us." ARTHUR C. STOWELL

Food for Thought

Edator Indi-gest: The funniyest thing abowt humens is that they sure like a grate varieyty. I was down to Chicago won time and in a big hotel they gave me for dinner—

Been Soop.
French Fride potatos.
Pork Shanks and Whipped Creem.
Fride Cat Fish with Cottaige Chease.
Pumkin pye with Pymentoa dressing.
Buttermylk to drink.
Nuts.

They are duing the saim thing with Radio proagramms. Compare one with the above meanyu and see the alikeness—

Melody in F.
Yes Sir thets my baby.
Reeding "The Murderer" by E. Poe.
Piano dooit. The charge of the lite brigaid.
Oh, so low Meyoo.
Buffalo girl, and other old tyme airs.
Speach, "Our National Banks."
Then, More nuts.

Boath of these meanyoos dissagree with the appetight.
KITTLE DRUMMER

An Eastern Watchmaker, at a convention, predicts the passing of the old hand-cranked watch and the coming of a new type that will be kept absolutely accurate from minute to minute by Radio impulses, sent out by the naval observatory. Of course, when we are late at the office we might still say that we were awfully sorry but that the interference from the set of the Jones kid just made our watch run all agog.

FRANQUE'S FILOSOFEE

A DX story a day keeps the neighbors away.

INDI

Current Events

Condensed

BY DIELECTRIC

Speaking of vacations, as we were in the first August issue, it looked for a while as though the dream would come true. If a few more of the stations scattered along the wave bands had climbed up or down, your reviewer would have contributed paragraphical "blahs." As it is, programs were heard in unaccustomed places and might easily have been credited to the wrong broadcaster. Other features came through the ether carrying bits of foreign programs with them and had to be untangled. What joy a reviewer experiences these summer months with Old Man Static rattling eardrums to the breaking point. Yet they sit and listen and—compliment.

Just to prove that last assertion above I call attention to a band concert, one of the most enjoyable heard from a broadcasting station winter or summer. Station WADC, Akron, put this concert over well, so that it is my fault entirely that the name of the band cannot be recorded. The music came through clearly for the most part but the name of the group of players was not distinct, though I listened until the completion of the feature. Every selection played was characteristically band music. Ofttimes bands get into purely orchestral compositions, thereby spoiling much of beautiful effect of the music. Furthermore, they played as a unit.

Variety programs are undoubtedly appealing to Radio audiences in the sweltering midsummer season, at least when they include such highly entertaining features as theatrical reviews afford. Such reviews as are presented from Station KDKA, Pittsburgh, originating in the million dollar grand theater should prove satisfying to the majority. In case they don't, please blame the weather rather than the station, the artists or this enthusiast.

Then there was an especially good piano recital which stood out among other features presented through Station WJAZ, Chicago, and despite the seeming commonplace of such a recital this one was above the average. The artist evidently chose to picture those listening as a cosmopolitan group and suited the numbers to the conclusion. Although some of the selections were of a lighter vein, never once was there evidence of forsaking the high ideals of the performer set forth in the more serious works. On the whole it was something one recalls with a distinct sense of completeness; good music, good taste and musicianship.

Station WLW, Cincinnati, one of the least censureable stations on the air, should have a complete paragraph all to itself with "well merited" recurring in every line. Instead, there can be but a sad confession of missing an evening's enjoyment and noting of features, due to the interference of another station. Someone was playing piano numbers just before they signed off to give listeners an opportunity to get the call of the intruder, but how she played only those in the studio are competent to judge. Has anyone stepped in the way of WJZ? Hardly.

Ordinarily it is anything but thrilling to sit by the hour to listen to a political speech. The thing isn't done, that's all. Yet, my fellow listeners, when CNRO, Ottawa, came through with no other station tagging along, it was so comforting I listened to the very end of an impassioned diatribe directed against one of Canada's prominent political leaders. And they do discover a lot to tell in the dominion with sundry variations. No jazz band could have bought half the time. Incidentally, Canadian politics are less enigmatic. Try the recipe.

WOR TAKES UNUSED TIME HELD BY WJY

HALF WAVE BAND SILENT; BAMBERGER WILL FILL

Newark Station Gives Reasons for Commandeering Periods Left Vacant by R. C. A. Broadcaster

NEWARK, N. J.—The following statement was issued by Alfred J. McCosker, of L. Bamberger & Company's station, WOR, concerning the extension recently of that station's schedule to include late afternoon and evening programs on the 405-meter wave length, formerly occupied by Station WJY, on Tuesday, Thursday, Friday and Sunday of each week, which schedule is in addition to its regular Monday, Wednesday and Saturday afternoon and evening schedule:

"A desire to better serve public interest is responsible for the decision reached by L. Bamberger & Company to extend the broadcasting schedule of Station WOR to provide programs of educational and entertainment value on the 405-meter wave length daily and Sunday instead of adhering to the former schedule of Monday, Wednesday and Saturday afternoon and evening broadcasts. The loss to Radio listeners occasioned by failure of the sponsors of Station WJY to regularly provide programs on the 405-meter wave length for the past five months was pointed out to us by many listeners.

WJY Silent; WOR Goes Ahead

"During April, 1926, we applied to the management of WJY for the time on the 405-meter wave length used by them up to February 6 of the present year and the reply received indicated an early resumption of broadcasting by that station. However, in the weeks that have since elapsed, Station WJY has remained totally silent and it was decided that the best interests of listeners demanded a continuous program on the above wave band.

"WOR is rated a pioneer broadcaster, having supplied programs of highly cultural and better class entertainment to an ever-increasing audience since February 21, 1921, and the present extension of its activities to include a daily and Sunday program will offer additional opportunity to present a practically uninterrupted broadcast."

Accordion Symphony to Be Heard Over WSOE

Fifteen Piano Accordions on Air Monday, August 16

MILWAUKEE.—A rare as well as an attractive concert is to be broadcast from the School of Engineering station here, WSOE, on August 16, 1926 beginning at 9:00 p. m. Central time. This concert will be presented by Prof. Foca Di Leo and his Accordion Symphony orchestra which, as far as can be ascertained, is the only one organization of its kind in the world today.

During the last two years Professor Di Leo organized and perfected this unique orchestra, using fifteen piano accordion instruments. It represents the first successful attempt to draw from such a combination of instruments musical effects heretofore attributed only to the standard symphony.

The repertoire of the orchestra ranges from such classical gems as the "Barber of Seville," "Poet and Peasant," "Light Cavalry" and "Carmen" down to the popular melodies of the present day. In addition there are two young sopranos who appear in solos and duets accompanied in both instances by the orchestra.

Birthday Greetings Flood KPO

SAN FRANCISCO.—KPO has just been swept by its annual flood of birthday greeting cards from the Radio audience. These are addressed to Big Brother (L. R. Tucker) who has been a regular feature of the San Francisco station for more than two years and whose birthday it was. Several thousand cards were received this year, the majority coming from the members of the Big Brother club, which is composed of more than seven thousand juveniles throughout the west.

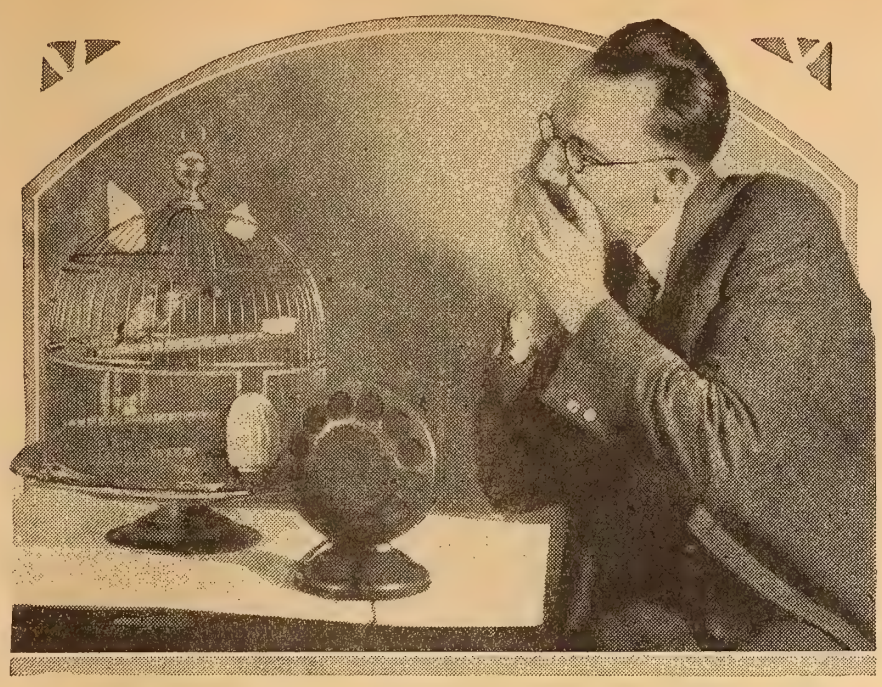
WOK Fans Guess Weather

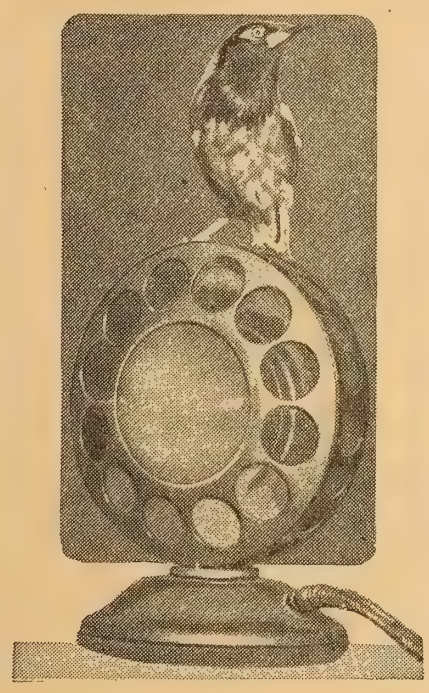
CHICAGO.—Believing that the official weather prophet is a much maligned individual, members of Radio Station WOK's staff recently inaugurated a weather guessing contest in which fans tuning that station were invited to join. The purpose of the contest was to ascertain if the public could outguess the government forecaster.

May, of KMA, Heads Nurserymen

LOUISVILLE, Ky.—Earl E. May of Shenandoah, Iowa, owner and operator of Station KMA, was recently elected president of the American Association of Nurserymen here.

BIRDS WARBLE IN MICROPHONES





It would seem but natural for birds to "go on the air" and so we have Bee Bee of WCCO, Minneapolis, (above) and the Troupial songster of the Amazon perched on the WMCA microphone, New York. Bee Bee sings to the harmonica accompaniment of his master, George B. Ashton, preferring operatic selections exclusively while the Troupial thrush warbles plaintive Spanish airs by himself.

CAN YOU GUESS AGE OF MARY BARBARA?

CINCINNATI. — One of the most mysterious attractions of the Crosley Radio programs is Mary Barbara. She has been entertaining the WLW Radio listeners for many months and her child-like voice has been the means of attracting many inquiries as to her age. When she gives her interesting talks, usually with the aid of one of the announcers, the curtains in the solo studio are drawn so as to hide her from the view of the guests in the auditorium. No one knows her real age and the studio staff is not at liberty to disclose it.

P. A. GREENE TOURING SOUTHLAND STATIONS

Arranges Fall Bridge Series Over Extended Network

CINCINNATI.—Paul A. Greene's native Southland has called and he is on a tour which includes Atlanta, Jacksonville, New Orleans, Houston, Dallas, Memphis, and also Kansas City, Chicago, Des Moines, Omaha, St. Louis and Denver.

Mr. Greene, who has been director of Station WSAI since he installed the United States Playing Card company's station more than three years ago, is combining station business with the pleasure of a well-earned vacation on his tour, for he hasn't had a vacation in two years. He is to renew contracts for the auction bridge series, which was broadcast by a network of twenty-six stations last season.

The new series, which will begin early in the fall, will probably be handled by thirty stations throughout the country, and it is believed Jacksonville, New Orleans, Des Moines, and Omaha will add this popular program schedule. The method of broadcasting the plays will be practically the same as before.

C. N. R. TESTS SIGNAL STRENGTH IN TUNNEL

FINDS LONG WAVES CARRY FARTHER THAN SHORT

Three and One-Half Mile Tunnel Under Mount Royal 600 Feet Deep Used in Tests

MONTREAL, Canada.—Interesting experiments on the transmission of Radio signals through masses of rock have been carried out under Mount Royal here in the tunnel of the Canadian National railways. Generally speaking, it was found that there was a decrease in the strength of signals as the center of the tunnel was approached. The observations, however, were not confined merely to noting whether the signals appeared to get weaker, but definite measurements were made with an audibility meter.

Messages and music were transmitted from Montreal on a wave length of 411 meters. At the center of the tunnel the strength of signal decreased to one-half of one per cent of what it was at the tunnel entrance.

Signals Decrease Going Into Tunnel

Signals were also received from Ottawa. These were transmitted on 1,400-meter wave length. The signal strength decreased to five per cent at the center of the tunnel. Further signals were received from an American army short wave station, WIZ, whose signals were remarkably constant and clear. The messages were heard at the entrance to the tunnel, but were quickly lost on entering the tunnel. On repeatedly tracing the signals, step by step into the tunnel, it was found that the 40-meter signals were reduced to zero on passing only a few hundred yards into the tunnel, so that there were but a few feet (thirty or forty) of material above the car aerial—box type—which was employed in the test.

The tunnel is three and one-half miles in length, and at its center the mountain is between 500 and 600 feet high, composed mainly of essexite and in other places of limestone with volcanic dykes.

Little Rock Stops Short Waves

It is believed that definite measurements of this kind have not previously been undertaken, and the following points may, therefore, be noted. It is practically certain that the signals were not coming along the metal rails of the double-line track, nor along the overhead direct current cable used for power and light in the tunnel.

It is chiefly noteworthy, moreover, that the 40-meter signals were easily reduced or attenuated by a comparatively thin layer of rock. This lends weight to the view that short wave signals pass to the upper atmosphere and are then reflected or bent by the heaviside layer, arriving at their destination by that lofty path and not by waves which follow the surface of the earth, for these, as these experiments have shown, are quickly eliminated.

FARM RADIO YIELDS BIG MONEY RETURN

AG RADIO CHIEF TELLS OF OBSERVATIONS HE MADE

Farmer's Main Objection Is to Loss of Sleep—Pickard Visualizes Great Future

EAST LANSING, Mich.—Radio on the farm is yielding more dollars and cents return on the investment, developing a more prosperous American agriculture and bringing about a better contented, understanding class of farmers than any other single scientific contribution of the age, Sam Pickard, chief of Radio, United States department of agriculture, told the convention of agricultural college editors which recently met here at East Lansing, Michigan.

After visiting the principal stations and approximately 600 farmers on a farm Radio survey tour through twenty agricultural states, Mr. Pickard stated that both college and commercial broadcasters are making an intelligent effort to anticipate the farmer's problems with interesting, helpful programs, and are winning large and faithful audiences of the most enterprising class of farmers.

Lack of Sleep Is Curse

Concrete examples of how practical application of information gained through Radio is helping the farmer's bank balance were cited. In districts sixty miles from a railroad he discovered farmers who had changed their farming to more profitable lines suggested by authoritative Radio talks.

"The farm fan," he said, "has two chief criticisms of Radio. The one most often voiced is the curse of not getting enough sleep. Most of them admit they sit up with their sets late into the night. Many others say that while they like to be neighborly they tire of the entire community dropping in every winter evening and then forgetting to go home."

A plea for the college to dramatize informational programs, injecting into them greater interest and more humor, was made.

Great Field to Develop

"I know of no field into which educational agencies have entered that offers keener competition than that of Radio. The day has passed when the mediocre speaker can hold a Radio audience. The lecture of long difficult words and sentences must give way to the more friendly, natural dialogue presented by effective Radio voices.

"Until educational institutions value the effectiveness of Radio instruction highly enough to finance adequately a competent staff, trained in the technique of broadcasting, they can not expect to utilize successfully this new invention, probably the greatest boon to education since the printing press was invented.

The department of agriculture's new policy of providing a staff of feature writers to weave timely information into dialogue material to be broadcast by trained announcers was commended to the college editors.

Help your favorite announcer win this coveted prize. Remember that with four consecutive ballots turned in at one time you get an extra bonus of four votes. Don't fail your candidate now. Bring him down the home stretch with colors flying.

Vote Bonus Ballots

As a reward for saving consecutively numbered ballots and casting them at one time for the same candidate, a bonus vote, with size depending on the number in consecutive order, is credited to that candidate.

Each of these ballots will count for one vote when sent in separately. You can hold these ballots until you have four that are consecutively numbered and when they are sent in, a bonus of eight votes or total of twelve will be granted.

The larger number of consecutive ballots submitted, the greater is the bonus allowed. Eight consecutive ballots receive a bonus of twenty votes. Twelve consecutive ballots receive a bonus of thirty votes, or a total of forty-two votes. For a complete series of ballots, including one from each issue from March 27 to September 1, a bonus of fifty votes will be allowed.

"PRETENSE"

(Continued from page 10)

with the words. "Most really eligible men these days seem to feel about marriage as you do. They want roses without thorns. A great many are successful in their quest, too."

"Don't be so reproachful, Evelyn. Women today demand so much that few men are able to marry until they reach an age where real romance is a thing of the past. The modern girl expects her young husband who is just embarking upon his life's work to provide her with the same luxuries as her father, who is a success after years of effort. Yet every man must have a certain amount of love with its attendant pleasures. If he can't afford to enjoy it legitimately, he'll have it otherwise."

"Why, Boris! You talk like Dorothy Dix!"

"Perhaps I am moralizing. Yet I've told only the truth. You know it as well as I do."

"But there are exceptions."

"A few. Too few. That's the main trouble with the American people. They're not willing to struggle and sacrifice to endure anything as a means to an end. That is why they've never been able to compete with Europeans in the arts."

"**You**—of all people—to talk about sacrifice and endurance!" exclaimed the girl. "Why, you don't know what the words mean!"

"No?" He gazed at her queerly, his eyes holding a half-quizzical, half-eager light as though he were about to divulge some surprising thing. But the light faded suddenly and his face hardened. "Observation is sometimes almost as revealing as experience."

In the artistically dim illumination an approaching figure threw a shadow across the table. Prince Boris looked up quickly. It was Ricardo, the dancer. Regretfully, annoyance plainly visible on his countenance, Masillof rose and bowed. Without invitation or hesitancy the newcomer sank gracefully into the vacant chair beside the girl.

"Good morning," he greeted pleasantly.

Masillof, occupied with lighting another cigarette, made no answer. But rage welled within him at the girl's cordial response. Despite his brazen daring, Ricardo was seldom rebuffed. He possessed that unique faculty known as "a way with women" and the men, fearful of the accusation of jealousy, rarely revealed their feelings.

Thrice each night Ricardo did exhibition dances with Frascita. The balance

ENGLISH WOMAN IS WCCO STUDIO CHIEF

COMES FROM "VALLEY OF KINGS" TO SAINT PAUL

When Forced to Support Self She Once O. K'd Cattle Loans for National Bank

MINNEAPOLIS.—From the quiet surroundings in the Valley of Kings, where King Tut's tomb has been located, to the busy life of a program director, announcer and accompanist in a modern broadcasting station, is the rather radical change in the mode of existence enjoyed in the last few years by Mrs. Edith M. Stevens, program director of the Saint Paul studios of the Gold Medal station, WCCO, Saint Paul-Minneapolis.

A native of England, and the wife of a British army officer, Mrs. Stevens has traveled all over the world and lived in many parts of it. For several years her husband was stationed in Egypt, and she says that many times has she visited the Valley of Kings and probably rested on the very spot where King Tut was buried, without ever knowing it. At that time she said she had no more idea of what Radio was all about than the long-deceased monarch.

Once O. K'd Cattle Loans

After residing for some time in Gibraltar, Paris, Belgium, and London, Mrs. Stevens, after the loss of her husband, came to the United States in 1916, selecting Saint Paul for her residence. She obtained employment in one of the largest of the national banks there. While in the bank she was given the rather novel assignment for a woman of having charge of all cattle loans. The reason for this, the president of the bank explained, was that in going over the letters from farmers stating their financial conditions, human interest was a more necessary qualification than merely usual business procedure.

Besides being an experienced business woman, Mrs. Stevens is also an accomplished musician, and when the Gold Medal station came into existence in 1924 she was persuaded to take the position of director of the Saint Paul programs.

She also enjoys a very wide acquaintance among the club and professional women of the twin cities. How wide may be judged from the fact that recently she was elected president of the Saint Paul Business and Professional Women's club, and this acquaintance has enabled her to make many excellent contacts for WCCO with the women's organizations.

While Mrs. Stevens is now one of the Northwest's most popular women announcers, when she first began to talk into the microphone, many had difficulty in understanding her distinct English accent. In fact, one of the first days that she announced, an excited subscriber called the Gold Medal station and wanted to know if they were now relaying programs from 2LO at London.

SHORT WAVES

By Marcella

(Continued from page 2)

There Mrs. Hunter discovered a bobber shop. Snip! Snip! And when she came out she belonged to the great army of bobbed-haired ladies. She felt no remorse but straightway accepted an invitation to broadcast a recital from KPO. Los Angeles heard her, was jealous, and she broadcast another recital at KFI. And now her old friends of the WEAF audience have welcomed her home again.

* *

Yoo-Hoo! Betty and Peggy White, Jefferson City, Mo. Si, mio caro Senoritas, el Senor Vincent Lopez uno soltero esto, 32 years old, y, a fe, Espanol, (excuse my Spanish). In other words, Vincent Lopez, one of the prevailing furores of Eastern Radio circles, is single, 32, and, in truth, a Spaniard. At least he comes from a Spanish tree—family tree, of course, and I rather suspect that he is not a blond. My information states that his chief occupation is directing the Casa Lopez orchestra, hosting at his own club on Fifty-seventh street, near Broadway, and playing circles around Brunswick records the while. He is neither a matador nor a toreador but he's a good cazador and all the girlsador—but they say with all this and that he's a busy, busy man.

* *

"As you know about everything please tell me all about the Gold Dust Twins," writes Miss Kathryn Gates of Chester, Ill. That's good, Kathryn, and if Marcella was only here she might be able to do it but all I can get is a whole page of blah without one real hint as to their real names from WEAF. "Goldy," according to Mr. Johnstone, "is the tenor half of the combination and is known under his own name all over the country through phonograph records and personal appearances. Dusty, the baritone twin, has had a wide concert and oratorio experience. A few seasons ago he appeared with the Philharmonic orchestra at the Lewissohn Stadium, New York." Make 'em any color of hair and eyes you want, Kathryn, 'salright with me. That's their and WEAF's secret.

You may have been listening when one of them said, "What faw does dem city ladies go faw a wearin' men's pants?"

"Not so, they's knickers."

"Not what I seed, they's white folks."

And here's a post card from that dear Marcella. It shows her lifting a twig on which are strung two large bass and a trout. Oh Marcella, how could you! But she's not stringing me. I see a small boy with a crooked pole in the background, there's a coin in his hand and a wink in his eye. But, if your letter didn't get answered this time, please be patient, Marcella will take care of it in the next Radio Digest.

* *

Sure, don't mention it. I'm only sorry I couldn't do better for you.

Old Man Grundy.

* *

What deep secret would you like to know about your favorite broadcast star? Drop me a note, girls and boys, and I'll do my best to answer here. MARCELLA.

Women Predict Future Of Radio in Contest

Search for "Miss Radio" Uncovers Interesting Papers

NEW YORK.—Women are not leaving it to scientists to visualize the future of Radio. Many of the feminine fans have decided opinions of their own on this subject. Their views have been expressed in letters sent to the Radio World's Fair management in the annual "Miss Radio" contest, to determine America's leading Radio enthusiast.

"Radio will take the place of all power lines," predicts Mrs. Abba Lindsay McCumber of Cleveland, O.

She speaks with thorough knowledge of Radio, as she was the second and youngest operator of her sex to hold a commercial station, and she has spent many most interesting moments "at the key" in Tacoma, Portland, Seattle, Wenatchee, and other places, while during the war she taught Radio telegraphy to a class of women, after being politely informed that there was no provision for a woman teacher of men in that capacity, at the Naval Training station at Great Lakes.

"I believe it is only a question of time until every home will be equipped with Radio," states Mrs. McCumber. "Our present phone and light lines will be eliminated. Ships will be navigated solely by Radio. There seems to be no end to this wonderful invention. In reality it is only in its infancy now."

WOMANS' PROGRAM INDEX

Monday

Atlantic Eastern Central Mountain Pacific

10:30 a.m. 9:30 8:30 7:30 6:30
WWJ (352.7m-850kc), Tonight's dinner.

KYW (535.4m-560kc), Table talk.

VISIT ATLANTIC CITY BOARD WALK

HIGH LIGHTS OF THE AIR

THAT delightful pair of songbirds, Beulah Lockwood Durfee and J. Otto Jellison of WCCO, are announced for a song cycle, Tuesday, August 17. This soprano and tenor combination come on the air like a high moment from the opera.

Steinmetz, the little giant whose brain unravelled many of the mysteries of modern electricity, is the subject of an interesting series of talks on the Tuesday 6:30 programs at WGY. The story as authoritatively told by John W. Hammond is more than the study of a man, it is a story of American opportunity and achievement.

Providence, R. I., is announced as the sojourn for a day of the Travelers Jongleurs, Wednesday, August 18. The "Unknown Troubadour" of this troupe made his reputation as a star in a barn-storming opera company, singing as a boy soprano and fooling the stage door Johnnies.

Temple Bells and the etherial presence of Oriental song and mysticism will afford an entertaining feature from CNRM, Thursday, August 19, by the Himalayan string quartet.

If you have never visited the famous "Boardwalk of Atlantic City," you may close your eyes Thursday, August 19, and dial for KDKA. Richard Kountz and the Symphony players will bring to your imagination the sound picture of this well known place. Amid the swell of the waves you will hear the music of the orchestras.

The Gondoliers, those popular musicians of WOS, return to this station Wednesday, August 25, bringing their marimbas with them. They have planned a gay program and anyone enjoying this unusual instrumental music should tune in.

Mr. and Mrs. W. J. Whiteman, Paul Whiteman's parents, and Ferne Whiteman Smith, his sister, will appear at KOA, Wednesday, August 25, when the Ohio society of Denver entertains. Nor will Mr. Whiteman's family appear in jazz selections. They will give a variety of semi-classical music.

Although WCAP, Washington, D. C., will cease to go out over the air all the programs originaly given over this station will continue to be broadcast over WRC.

Sunday, August 15

Headliners Today

Atlantic	Eastern	Central	Mountain	Pacific
7:20	6:20	5:20	4:20	3:20

WOAI, San Antonio, Texas (394.5m-760kc), 8:30 p. m., Sunshine Laundry orchestra.

VISIT ATLANTIC CITY BOARD WALK WITH SYMPHONY PLAYERS OF KDKA

HIGH LIGHTS OF THE AIR

THAT delightful pair of song-birds, Beulah Lockwood Durfee and J. Otto Jellison of WCCO, are announced for a song cycle, Tuesday, August 17. This soprano and tenor combination come on the air like a high moment from the opera.

Steinmetz, the little giant whose brain unravelled many of the mysteries of modern electricity, is the subject of an interesting series of talks on the Tuesday 6:30 programs at WGY. The story as authoritatively told by John W. Hammond is more than the study of a man, it is a story of American opportunity and achievement.

Providence, R. I., is announced as the sojourn for a day of the Travelers Jongleurs, Wednesday, August 18. The "Unknown Troubadour" of this troupe made his reputation as a star in a barn-storming opera company, singing as a boy soprano and fooling the stage door Johnnies.

Temple Bells and the etherial presence of Oriental song and mysticism will afford an entertaining feature from CNRM, Thursday, August 19, by the Himalayan string quartet.

If you have never visited the famous "Boardwalk of Atlantic City," you may close your eyes Thursday, August 19, and dial for KDKA. Richard Kountz and the Symphony players will bring to your imagination the sound picture of this well known place. Amid the swell of the waves you will hear the music of the orchestras.

The Gondoliers, those popular musicians of WOS, return to this station Wednesday, August 25, bringing their marimbas with them. They have planned a gay program and anyone enjoying this unusual instrumental music should tune in.

Mr. and Mrs. W. J. Whiteman, Paul Whiteman's parents, and Ferne Whiteman Smith, his sister, will appear at KOA, Wednesday, August 25, when the Ohio society of Denver entertains. Nor will Mr. Whiteman's family appear in jazz selections. They will give a variety of semi-classical music.

Although WCAP, Washington, D. C., will cease to go out over the air all the programs originaly given over this station will continue to be broadcast over WRC.

Sunday, August 15

Monday, silent night for: CKAC, CNRA, CNRC, CNRE, CNRM, CNRO, CNRR, CNRT, CNRV, CNRW, KHJ, KLDS, KPSN, KWSC, KYW, WBBM, WCBD, WEBH, WEBJ, WENR, WGBF, WGBS, WGES, WGN, WGY, WHAS, WHT, WIBO, WIP, WJAZ, WJJD, WLIB, WLS, WMAQ, WMBB, WOC, WOK, WORD, WQJ, WRC, WSAI.

THE Jolly Tars above are members of the Sylvan Beach dance orchestra of which Earl McMahon is the director. This Houston Post Dispatch feature is a weekly entertainment at KPRC during the summer. To the left is Nicolai Berezowski, conductor of the Atwater Kent orchestra which plays every Sunday evening at 9:15 p. m. Atlantic time through WEAF, WGR, WRC, WWJ, WSAI, WGN, WCCO, and KSD. Mr. Berezowski, although only a young director, has shown himself a skilled one. Among the pretty girls appearing before the microphone of WQJ is Vesta Lou Balch, right, and she is a soprano. However, she is an intelligent one and never once has her voice offended the ear of a listener. In fact when she sings the telephone rings incessantly with requests for more.

Atlantic or Eastern Daylight Saving Time Stations

CKNC, Toronto, Can. (356.9m-840kc), 9 p. m., Eveready Salon orchestra; Mrs. Harry Hodgetts, soprano; L. Clare Forster, bass.

Your own radio set becomes a light socket receiver

with Balkite "B" and a Balkite Trickle Charger

To own a light socket radio set you need not buy a new receiver. Nor make any changes in your present set. Merely add Balkite "B" and a Balkite Trickle Charger.

Balkite "B" replaces "B" batteries entirely and supplies "B" current from the light circuit. It is unlike any other "B" device. It will outlive 20 sets of "B" batteries. The Balkite Trickle Charger converts your present "A" battery into a light socket "A" power unit. Once connected it is left on permanent charge. For maximum convenience you may also add a switch to cut out the charger and turn on Balkite "B" during operation.

Both Balkite "B" and the Balkite Trickle Charger are permanent pieces of equipment and entirely noiseless. They have no bulbs, nothing to wear out, break or get out of order. Other than household current their first cost is the last.

This type of installation is the last word in radio convenience. At the turn of a switch you always have full power. And with full power your set will give you consistently better reception. Ask your dealer.

Balkite "B," $35 • Balkite Trickle Charger, $10
Slightly higher west of the Rockies and in Canada

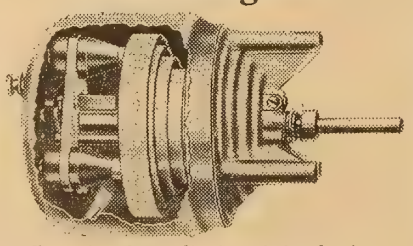
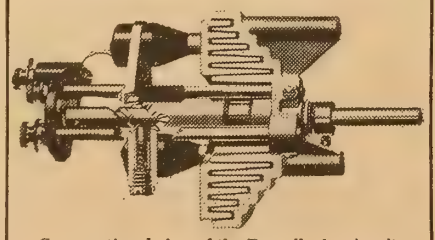
FURNELL

Conceded to Be the Most Practical Straight Line Frequency Condenser Ever Designed!



Illustrating the application of the aluminum electrostatic shield provided for preventing the emanation of stray currents therefrom.



Cross sectional view of the Furnell, showing its mechanical construction, also the tapered concentric rings.

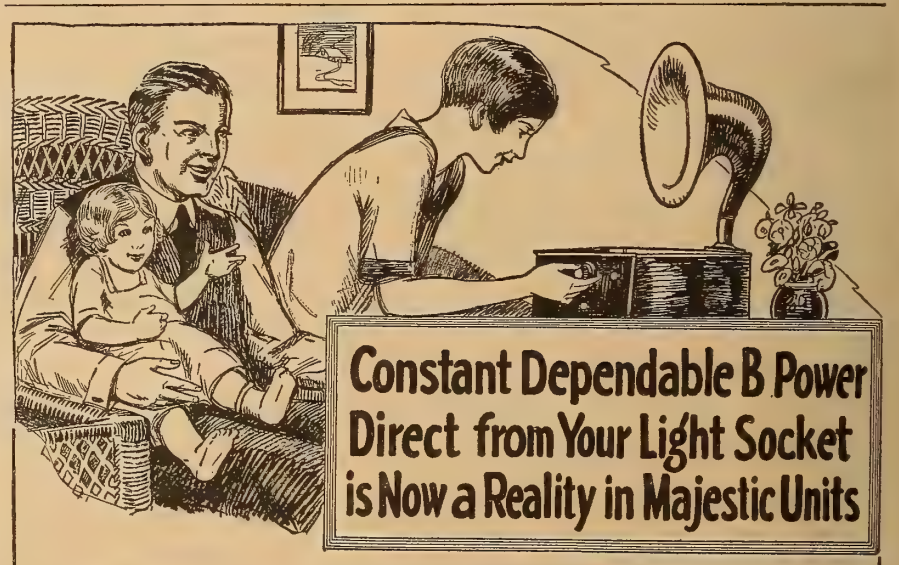
The Furnell spaces the stations equally over 360 degrees of shaft movement, a complete rotation of the dial. No crowding of low wave length stations. No need for a vernier dial.

Radio experts praise the Furnell because it represents the finest condenser workmanship available today. Because it gives to radio reception a degree of tuning perfection heretofore unattainable.

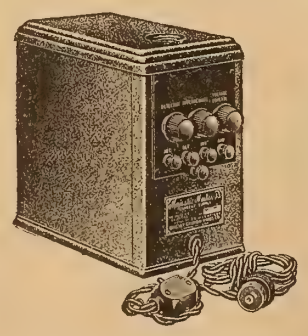
DUST PROOF. DAMAGE PROOF. ELECTRO-STATIC PROOF.

The smooth operation of the shaft and slider affords a degree of accuracy and precision unattainable with the ordinary type of plate condenser.

THE FURNELL MANUFACTURING CORPORATION
24 Scott St., Newark, N. J., U. S. A.



Constant Dependable B Power Direct from Your Light Socket is Now a Reality in Majestic Units



The day of better radio reception is here. Improved tone quality, greater volume, and more reliable all-around service are now made possible by **Majestic** B Power Units. They attach direct to your light socket saving you constant bother and attention. No acids to spill. No "hum." Reliable, unvarying power at an average cost of about one-tenth cent an hour! Economical, powerful—lasts as long as any receiver. Fully guaranteed.

Majestic Standard-B Current Supply
Especially adapted for sets having not more than seven 201-A tubes, or, six 201-A plus one 135-150 volt power tube. Popularly priced for the average set. Improves tone—betters reception.
Price $32.50
West of Rocky Mountains, $35.00

Majestic Super-B Current Supply
Capacity 1 to 12 tubes, including the use of 135-150 volt power tubes. Complete with switch to control current from light socket. Price $35.00
West of Rocky Mountains, $37.50

Majestic Master-B Current Supply
Rating 60 mils at 150 volts. Particularly adapted for Radiola 25, 28 and 30 and superheterodynes. Will operate all power tubes, also the new super power tube UV-171 (180 volts). Unequalled for sets having a very heavy current draw.
Price $42.50
West of Rocky Mountains, $45.00

Majestic "B" Current Supply

delivers pure direct current-From your light socket

Their low purchase cost and the savings they bring to you make them an investment that soon is repaid. Don't delay—see your dealer at once or write for free literature.

DEALERS: If you are not yet equipped to get your share of the Majestic business, see your jobber or write direct giving us his name.

Brings Your Set Up To Date

THE only real advance claimed by the makers of this year's best sets is improvement in tone performance. This improvement can be made in your present set by simply adding the Centralab Modu-Plug. This modernizing device makes your reception equal in tone performance to that of the latest high-priced receivers.

Modu-Plug is warranted by Central Radio Laboratories, makers of variable resistances for sixty-nine manufacturers of leading standard sets.

Centralab Modu-Plug replaces the loud speaker plug. Gives any degree of tone volume from a whisper to maximum by simply turning the small knob on the plug, without adjustments of other controls. Modu-Plug matches the speaker impedance to the output impedance of the set. Reduces interfering noises. Clarity and faithful reproduction equal the latest developments in perfected performance.

$2.50 at your dealer's
or mailed direct on receipt of price.

Central Radio Laboratories
12 Keefe Ave. Milwaukee, Wis.

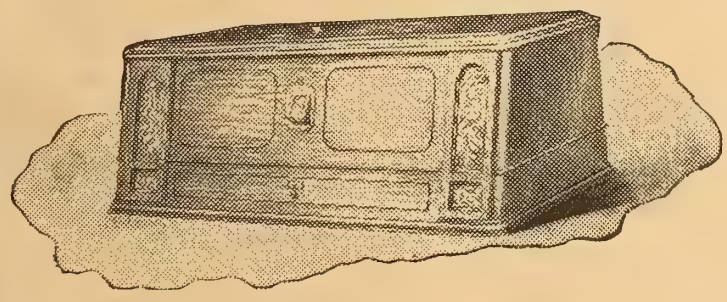
Are You *Thrill*-Proof?

Premer Fully

Have you reached the point where distance, selectivity and tone no longer thrill you? Then listen to a demonstration of the new **COUNTERPHASE-EIGHT.**



You cannot learn about all the features in an ad like this, but write today for special circulars and get the whole story, or arrange with an authorized dealer for a demonstration.

Why Take a Chance?

There is no guess-work with the B-T B-Power Unit. At all times the voltage delivered is known. There are no variable resistances—no knobs to turn or adjust. Simply insert the fixed resistors as shown on chart for the number and type tubes used.

There is no radio product in which the user must place more confidence in the ability and fairness of the manufacturer than in a B-Eliminator. Why take a chance?

If you are thinking of investing in a better Radio Receiver or improving your equipment by the addition of a dependable B-Power Unit, you will be amply repaid for reading the 10th edition "Better Tuning"—Sent postpaid on receipt of 10c in stamps or coin.

Premer Fully

You, too, will marvel at its performance. The new cabinet design is strikingly different—it is an exclusive B-T possession.

You will find selectivity never before equalled even in B-T Receivers. Those who know the record of the Nameless and Counterphase realize what that means.

There is no manual oscillation control, yet this set cannot be made to oscillate or reradiate—and it's "hot" all the way across the scale.

A New and Improved

ARBORPHONE

FEATURING

Unified—Simplified Control and Original Cabinet Design

"Better, by far, than ever before"—"a distinct advancement in radio." Such comments describe the trade's opinion of the 1926-7 Arborphone.

Improved tuning on low wave lengths and greater volume on distant stations have been secured through the use of special dual condensers and a separate oscillation control.

You who demand clear, concise reception on this year's crowded air channels will instantly approve the engineering achievements of Arborphone's remarkable circuit. More power is obtained on long distance work as well by use of a power tube.

$60.00 LIST

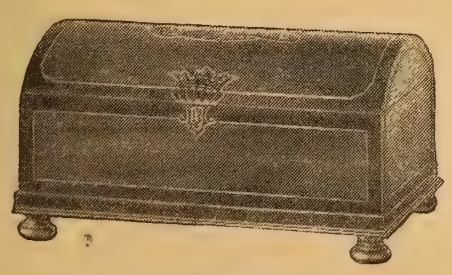
$65.00 in Rocky Mountain and Pacific Coast States.

See it—inspect it closely—at your dealers. Again Arborphone offers outstanding value in fine radio receivers.

DEALERS Arborphone offers just what your customers want. Last year Arborphone dealers were successful dealers. Our new plan of dealer franchise now ready for you. It will pay you to get this information at once, either from your jobber or from us.

PRECISION PRODUCTS CO.

321 SOUTH MAIN ST. ANN ARBOR, MICH.



No. 21 — $45.00

Modeled along the lines of an antique jewel box such as Milady of the Manor used in the Early English or Colonial History.

Now radio is transformed into living beauty—reproduction that makes you feel the actual presence of the artists,—design that blends with the home surroundings and "does not break the spell". Radio at last has shed the trappings of the laboratory and emerged, chrysalis like, into its true external symmetry.

The "Jewel Case"---

not merely rare beauty but new acoustic principles!

The "Jewel Case"--- like a rich antique jewel cabinet in outward appearance, with all of the rare tone beauty of an old violin---and like the violin, this speaker uses the whole of the wood in its contour to resonate and reflect the pure vibration of the sound within it. Undreamed of fidelity, and small though it may be, the volume is greater than any speaker yet marketed.

Velvet Speaker Number 21 is startling in its far flung progress toward the ideals of beauty and acoustic perfection. Be first to offer it and reap the sales. The price is reasonable---the quality the highest---and dealer, jobber co-operation unusual. Write today for Velvet franchise.

The New Cone

A splendid new development—It delivers the rich deep bass of the cone with the volume equal to the horn type, *without* distortion.

No. 18
$27.50

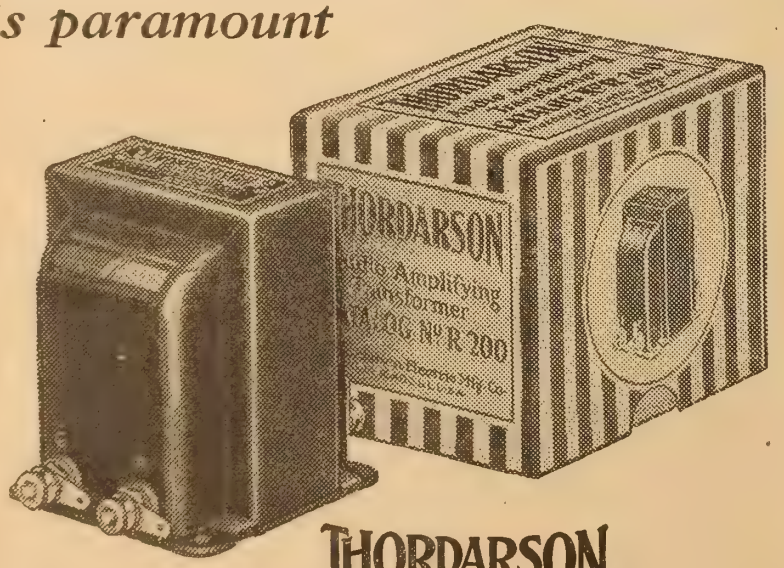
Specified wherever tone quality is paramount



THORDARSON
R-200

The proof of the pudding is in the eating.

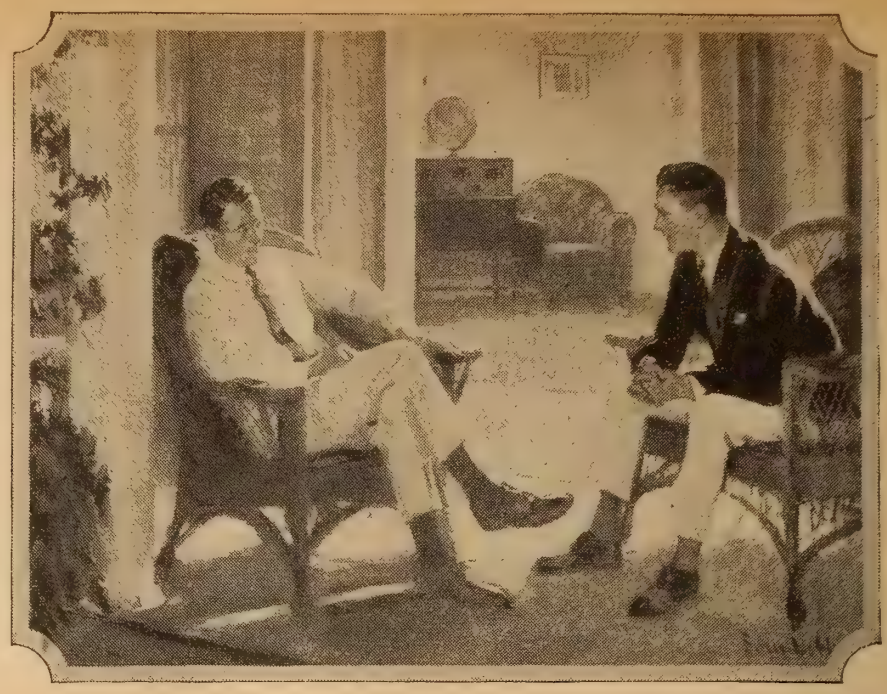
The satisfaction you derive from your radio set depends upon its fidelity of reproduction.

Since the institution of broadcasting, Thordarson transformers have been the great outstanding factor of faithful reproduction in a multitude of receivers.

That is why to-day you find more Thordarson transformers in the receivers of leading manufacturers than all competitive transformers combined.

Thordarson R-200 is available at reliable dealers everywhere at a cost of eight dollars.

THORDARSON ELECTRIC MANUFACTURING CO.
Transformer specialists since 1895
WORLD'S OLDEST AND LARGEST EXCLUSIVE TRANSFORMER MAKERS
Chicago, U.S.A.



"My wife insists on getting a radio set exactly like yours. Where did you get it?"

"THE Radio Shop put it in for me, Jim. I've never had anything that was less trouble or expense, or that gave us all so much pleasure. We don't see how we ever got along without it."

"How about batteries? I've heard you have to give them a lot of attention."

"Not if you get good ones, Jim. The service man from The Radio Shop who installed my set said that the Evereadys he was supplying were exactly the right size for the receiver and should last eight months or longer. I've had the set six months now, and as far as I can tell, the 'B' batteries are as good as new."

That's the experience of those who follow these simple rules in choosing the right "B" batteries for their receivers:

On all but single tube sets—connect a "C" battery. The length of service given below is based on its use.*

On 1 to 3 tubes—Use Eveready No. 772. Listening in on the average of 2 hours daily, it will last a year or more.

On 4 or more tubes—Use the Heavy-Duty "B" Batteries, either No. 770 or the even longer-lived Eveready Layerbilt No. 486. Used on the average of 2 hours daily, these will last 8 months or longer.

Follow these rules and you, too, will find that Eveready Radio Batteries offer a most economical, reliable and satisfactory source of radio power. How long they last, of course, depends on usage; so if you listen less you can count on their lasting longer, and if you listen more, they will not last quite so long.

Send for booklet, "Choosing and Using the Right Radio Batteries," sent free on request. There is an Eveready dealer nearby.

Manufactured and guaranteed by
NATIONAL CARBON CO., Inc.
New York San Francisco
Canadian National Carbon Co., Limited
Toronto, Ontario

*NOTE: A "C" battery greatly increases the life of your "B" batteries and gives a quality of reception unobtainable without it. Radio sets may easily be changed by any competent radio service man to permit the use of a "C" battery.

Tuesday night means Eveready Hour—8 P. M., Eastern Standard Time, through the following stations:

"PRETENSE"

(Continued from page 14)

of the time he devoted himself to the women patrons with appalling success. Tall, slender, lithe, handsome in the dark, Latin way, his appeal was undeniable. He was like a bare flame, a fatal beacon for thoughtless moths. Had he possessed a soul it would have been scarred by innumerable affairs tragic for others. Boris mentally referred to him always as "The Snake."

Masillof looked up now, to find Ricardo gazing straight at him, a devilish, mocking light in his black eyes, his sensuous mouth twisted into a grimace that was more a sneer than a smile.

"Several of your friends are disappointed at your being monopolized tonight," said the dancer suavely. "Especially Jack," he added significantly.

Prince Boris flushed in spite of his effort at self-control. His eyes sparkled angrily. Damn the fellow! How had he found out? Through Jack, of course. But to sit there and mock him before the only person he cared about knowing everything! Masillof's fists clenched until he winced at the pain of the nails biting into his palms. To be ridiculed by such swine! He longed to smash Ricardo's smirking face.

"I shall do as I please!" snapped Prince Boris.

The girl was trying to appear disinterested but she looked askance at the remark. Ricardo smiled as though pleased about something.

WITH a sudden crash the orchestra began a popular number. Evelyn accepted his quick invitation to dance and they whirled away. Masillof gulped the last of his drink and set the glass down with an angry click. He had aged ten years in as many minutes. His face was as impassive as a mask but a network of wrinkles were etched about his eyes. His mind was in a turmoil. He found himself unable to think clearly, to decide what to do. But he must do something. His soul cried out for relief. He couldn't stand this pretense any longer.

"You sure look glum tonight," said a feminine voice at his elbow.

He glanced up into the impish, cynical face of Frascita, the dancer. One of the headliners at the Club Royale, it was her business to be alluringly Latin and exotic. Her clothes were a riot of clashing color; her hair raven black; her complexion a rich warm olive. She played her part to the complete satisfaction of all but a few. Prince Boris was one of the doubters. He possessed only a working knowledge of Spanish, yet her accent was not as good as his own. And she spoke English too well—especially slang. Without make-up her complexion was anything but a rich warm olive. And her eyes were blue. He had his suspicions that she was Irish. She impressed him as the type whose relatives would be bartenders, washerwomen and prize-fighters. But he knew that the general public could not conceive of an alluring Irish dancer, so she was Spanish with the romantic name of Frascita. That infernal pretense again! How he hated it!

She dropped into the vacant chair beside him with cool assurance and lighted a cigarette with practiced dexterity, inhaling the smoke easily with evident relish. Then she surveyed him deliberately, her eyes half-closing to guard against the up-curling smoke. Finally she gave him a half contemptuous smile.

"You look like the last rose of summer."

"I'm tired," he admitted without looking at her, his slender fingers toying with the silver.

"Tired of what?"

He stared at her suddenly, anxiously.

"Just tired, that's all," he snapped.

EVELYN and Ricardo returned, the girl smiling and prettily flushed, the man calm and debonair as usual, not even a single hair disturbed in the glossy black sheath that topped his well-shaped head. That hair always irritated Masillof. Long sideburns dripped from either side and it descended so far in the back that, with the shaved neck, it made one think of a wig.

Ricardo ordered drinks. He and Frascita sipped theirs slowly. Boris drained his glass in a gulp. Evelyn frowned and left hers untouched. She objected to alcohol in large quantities. Masillof realized that he shouldn't have taken that last drink. He had had enough already. But

Howard Radio Co. — Guaranteed Howard Products — Chicago, U.S.A. — Reg. U.S. Patent Office

New!

COMPLETELY SHIELDED

SEVEN TUBES

A Neutrodyne Radio Receiver new in principle—new in design—**entirely loop operated and completely shielded.**

Another Karas Surprise!

First there was Harmonik
—the original high-quality transformer

Then Karas presented Orthometric
—the straight frequency line condenser

It's last triumph was Micrometric
—the vernier dial without back-lash

NOW Karas announces Equamatic
—the perfect system of broadcast reception and oscillation control

1. **The Equamatic System gives maximum and equal sensitivity and amplification on any wavelength—long, short or intermediate.**
2. It develops the greatest possible selectivity without distortion or loss of harmonics.
3. It assures perfect balance on all wavelengths without employing "losser" methods of any kind.
4. It conserves the life of "A" and "B" batteries.
5. It simplifies operation of all sets by perfect synchronization of the first dial with the others.
6. It eliminates fundamental wavelength antenna absorption.
7. It provides simple adjustment to meet varying conditions, permitting perfect balance of tubes, antenna, and associated apparatus.

The essential parts for the building of an Equamatic Receiver are made by Karas. Complete instructions for assembly and wiring, including drilling layouts, will shortly be ready. Mail the coupon for the Equamatic booklet fully explaining this system for which the Radio world has so long waited.

his nerves begged for a bracer. His head persisted in whirling round in the most absurd fashion. He trembled with excitement and anger. He was furious at Ricardo, at himself, at everybody. But especially at Frascita. The dancer was devoting herself whole-heartedly to him and he could see growing disapproval in Evelyn's face.

The conversation turned to love. All present had interesting experiences to relate and ideas to advance.

"Prince Boris is my idea of a perfect lover," said Frascita with an arch glance at Masilloff.

Evelyn stared. Her eyes held a dangerous light.

"Is that just an opinion or—" she demanded with deadly calm, then paused, unable to finish. But the sudden flush in her cheeks indicated her feeling.

Frascita shrugged and smiled provokingly at Masilloff in a way to give the inference that her remark was prompted by much more than mere opinion.

"Thanks for the compliment," retorted Boris with a mechanical smile. "But it is entirely unjustified."

He glanced meaningly at Evelyn. She tossed her head and looked away. Under the polished, unperturbed exterior, he was aflame with rage. Frascita seemed to be deliberately hinting that he had been intimate with her. He had never been more than civil. And no one knew it any better than she did. What could be her purpose?

Ricardo extended his cigarette case to Evelyn.

"Won't you have one of my special blend?" he invited.

Boris looked up quickly, his face crying an awful warning. He knew the dancer's system—develop future customers by giving them three or four of his "special" blend. Then when the person's shocked nerves craved the so-called "special blend" Ricardo sold the cigarettes for five dollars each. Another victim in the clutches of a soul-shattering habit.

BUT the girl disregarded his inarticulate warning, accepting one of the little white rolls. Masilloff fumed inwardly. He knew why she had done that. Defiance was visible in her eyes. She was piqued at him and Frascita. He wanted to strangle the woman dancer. But she was so smoothly persistent. She seemed to be in love with him. Or was she in love with the beautiful jewels which he sometimes exhibited to his friends? More likely the latter.

It was immediately evident that Ricardo called his blend "special" with justification. The odor of the cigarette was peculiar. Even the color of its smoke seemed different. And the effect on Evelyn was striking. She paled. The pupils of her eyes dilated. Her smile became wide and set; her breathing quick and shallow. Her voice rose and grew shrill. She laughed hysterically without cause.

Boris raged inwardly. He was afraid, too—for Evelyn. She would be sucked under by this mad vortex of heedless night life if she hadn't the power or the desire to resist it. The rocks were so perilously close and so appallingly easy to reach. And Ricardo! Boris choked with wrath as he thought of the dancer.

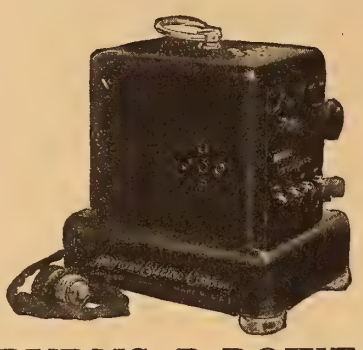
The night's revelry had passed the peak of hilarity and was rapidly descending into sodden stupidity when Evelyn announced her intention of going home. Prince Boris rose with calm assurance. But like the sudden releasing of a coil of steel wire Ricardo leaped to his feet, one slim, crooked-fingered hand resting on the girl's arm, gently but unmistakably possessive. The sight of those smooth brown fingers against the bare white flesh fired Masilloff's soul like a match held to gunpowder. His heart raced. The blood pounded in his temples. For the first time in years emotion mastered him. His arm shot forward and knocked Ricardo's hand away. He noted with delight the blood that rushed into the dancer's swarthy cheeks, giving the face a swollen, threatening look, and hoped the fellow would offer opportunity for further hostilities.

But Ricardo's methods were less direct. His flexible upper lip slowly lifted in a cynical snarl, baring his teeth as does a cornered animal before its superior. His eyes remained cold and deadly, riveted to Masilloff's face, and the fires of the devil smoldered in their inky depths. But his hand returned to the girl's arm.

"I am taking Miss Brent home," he announced.

"Of course you are, Ricardo," assented Evelyn with a scornful glance at Frascita. "Let's go."

Ricardo with his deadly cigarette and the ominous presence of hired gunmen bring out the man beneath the mask of the prince in Masiloff—and you'll be interested to see what happens to Evelyn in the final chapter of this fascinating story of "Pretense," in Radio Digest, September 1.



BURNS B-POWER

The Eliminator you have been waiting for. Delivers always the same correct plate voltage. Operates from house lighting current—No hum, no acids. Small neat case. Complete with Raytheon tube..... **$45.00**

Kingston

B BATTERY ELIMINATOR

DO AWAY with troublesome, expensive, bulky batteries, with acid, with stained carpets, with a dead radio just when you want it most. Install the KINGSTON B Battery Eliminator, and forget your battery troubles forever.

The Kingston Eliminator is compact, trim, handsomely finished in black and nickel, and guaranteed not only to remove the battery nuisance, but to deliver clearer tone and increased volume. A trial will convince you.

With the Kingston three different voltages are obtainable at the same time, each tap adjustable over a wide range making any desired voltage from 5 to 150 possible and harmonizing perfectly with your own set. The Raytheon tube is used as a rectifier. The Eliminator operates without noise or vibration and will not heat, contains no acid or solution, is no trouble to operate and the operation cost is so low as to be negligible. It will not get out of order.

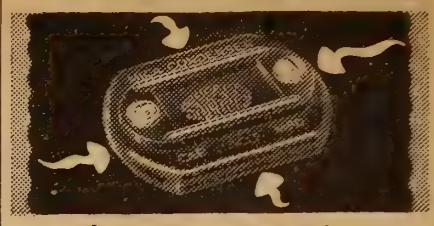
THESE EDGES



won't admit moisture

THE leaky spot in ordinary mica condensers is the exposed edge. That is where moisture slyly creeps in—atmospheric moisture, salt air, steam from radiators, and acid fumes that corrode, create resistance and cause a condenser to change its capacity.

SANGAMO
Mica Condensers

have no exposed edges. The delicate parts inside are protected by an armor as hard and impermeable as marble.

Use them anywhere—and anyhow—expose them to acid fumes, boil them, freeze them, drop them on the floor, solder wires to the terminals—and you will still have accurate condensers.

They cost little—and make a world of difference in tone, accuracy and range. Recommended by every nationally known radio laboratory and by professional set builders.

"THE FALL GUY"

(Continued from page 10)

office opened and several men came out. Dick recognized three of them as traction directors. They were talking in low tones as they passed out into the corridor.

"MR. TELLYHEW will see you now," said Kane.

"Thank you," responded Dick politely as he entered the lion's den.

Tellyhew was pacing up and down the room. Dick stood for a moment unnoticed. Then, as Tellyhew saw him, he stopped short.

"Good morning, Standish," he said, rather grimly. "Sit down."

"After you," responded Dick with a slight nod.

"No; you sit. I can talk better when I walk. I want to tell you our side of this matter, and then you will be at liberty to take such action as you see fit." Dick slipped easily into a chair and waited. Tellyhew continued:

"We were surprised at receiving your communication. We believe the city of Valley View is taking an unreasonable attitude with reference to this Rosehurst matter, but—well, we'll let that pass. Most people seem to think that a corporation has no heart—that it is operated on cold-blooded business lines that spread out like the tentacles of some gigantic octopus, seeking to crush everything within its grasp.

"Well, I'll have you understand, Standish, the Suburban Traction company has a heart and a big one. We admit that the Rosehurst people have a just complaint." He stopped in front of Dick. "You can go back and tell your mayor and city commissioners that we will start work on the Rosehurst line at once."

Dick sprang to his feet. "Do you mean that, Mr. Tellyhew?"

"Every word of it."

"Then I want to say that you're my kind of a man. Will you take my hand?"

"Take it?" cried Tellyhew, with more enthusiasm than Dick had ever seen him display before. "I should say I will." And he did. "And now that the traction business is out of the way, let me tell you that Alice took all the wind out of my sails with her manipulation of those bonds. I had to tell Stevens the whole thing and get him to agree to hush it up."

He laid both hands on Dick's shoulders and looked him squarely in the eyes. "We tried to make you the fall guy, young man, but you came through! Alice is a great girl; please be good to her for my sake."

"Good to her," Dick replied: "I'll be the best husband she's ever had!"

THE END.

DON'T GUESS; MEASURE VOLTAGE

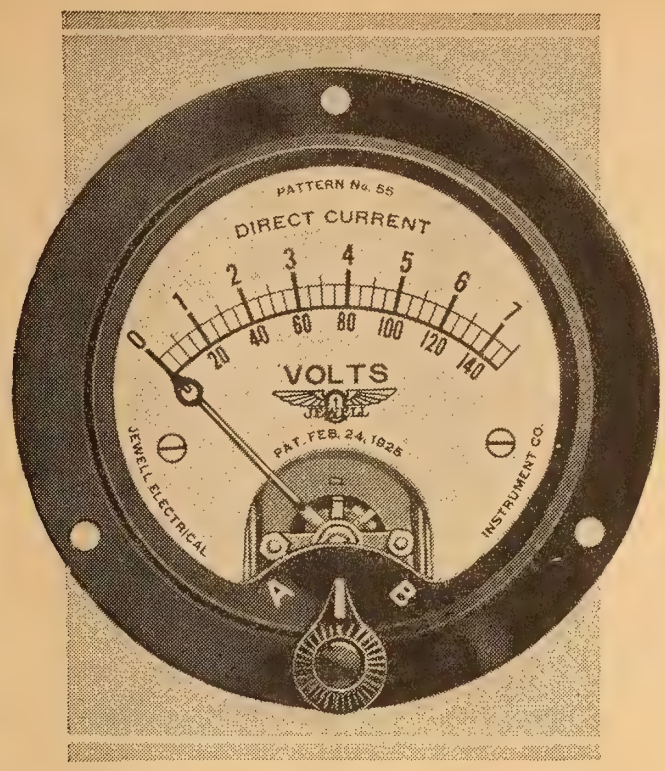

Figure 5

WATCH THE VOLTMETER

(Continued from page 11)

time acts as a control for the "Off" and "On" control of the receiver.

Figure 5 is the front view of a combination voltmeter capable of taking readings for both A and B batteries, which is finding much favor owing to its simplicity of operation. In this device a small knob with pointer is an integral part of the voltmeter. In taking readings, either the A battery or B battery indication is secured through merely setting the pointer through its actuating knob to the type of voltage one desires to read. It is imperative with this particular make that minus B and minus A be connected together in the receiver wiring.

Figure 7 is a rear view of this device together with the essential wiring diagram.

Figures 6, 8 and 9 indicate wiring diagrams of voltmeter connections for both three and four stud instruments, with and without jacks. The four stud instrument being identical with that of the three stud with the exception that the four stud instrument incorporates a separate resistance for the high readings.

Guess-work is always penalized by guess results, one cannot tell whether "cherry red" represents 5 volts or three. Taking the guess-work out of filament temperatures, and the voltage of B batteries is well worth the small expenditure. Standard voltmeters will do this for you and are entitled to a place of prominence in every Radio receiver.

"VOICE OF MOUNTAINS"

(Continued from page 4)

toona as a public enterprise. He is a veteran enthusiast and is considered one of the best informed amateurs in the country. He maintains a completely equipped Radio laboratory in his palatial home at Ant Hills. He has applied his personal engineering skill to the work of the regular station personnel in making this 100-watter 100 per cent efficient. Other members of the staff are M. G. McCormick, assistant announcer; Byron C. Miller, program director; Wm. K. Aughenbaugh, chief operator, and Lester Davis, assistant operator. Theodore Arter, Jr., is vice-chairman of the board of directors.

A full schedule is maintained. Monday is the only silent day. There are thirty-two programs each week. Special studios are maintained in all the principal public buildings and hotels in Altoona. There are also special broadcasting facilities in the First Methodist, First Baptist, St. Luke's, Christ Reformed and St. Mary's German Catholic churches.

WEAO, OHIO STATE "U"

(Continued from page 5)

the departments. He opens the principal evening program of each week with chimes music, played at Orton hall, and then hurries over to the studio to tell a story to the children. Thousands of Ohio boys and girls know him as "Uncle Al."

Robert Coleman joined the staff as studio announcer after having had considerable experience as musical director and organizer at one of the student centers near the Ohio State campus.

Radio was an important medium for the development of Robert E. Derringer, whose clear tenor voice is heard on the Fort Hayes hotel hour every Thursday night from WEAO. This hour is the oldest of the regular programs of the station, and Derringer probably is the most popular singer of the many individuals heard frequently. Among women singers, Dorothy Stevens Humphrey, who is known alike to Central Ohio and the Chicago district, where she appeared in concerts extensively and sang from WIBO, probably is first choice.

Mrs. Ann Charles has had the assignment of carrying out WEAO's policies for more than two years. She plans her programs, lectures, plays, etc., well ahead, listing in the fall the schedule of educational material for the whole winter. During the past season the variety of subjects covered would have given a liberal education to anyone following them, and the indications are that hundreds or thousands in Ohio do so.

The list included eye conservation talks, Radio, household economics, dairy and livestock talks, sports discussions, golf talks by one of the leading golfers of the country; psychology in business, child training and education; elementary points of law, market trends, sanitation and health matters, practical science and chemistry, veterinary medicine, gardening and landscape, architecture, art, journalism, finance, income taxes, physical training, electrical engineering—in fact, lectures and talks representing almost every department of every college on the campus. In addition the station has sent out addresses on special subjects by many noted educators, scientists and visiting celebrities.

RADIO FILLS CHURCHES

(Continued from page 3)

addition to it, or a substitute where actual attendance is impossible.

A large number of the stations not owned or operated by religious bodies have the Sunday service in charge of various local churches in rotation, a plan which seems satisfactory to all of them. Well-known hymns are the most popular parts of the program and many letters are received asking for this or that particular old favorite. Prayers are avoided by some ministers as not being suitable for this purpose. Most of them try to keep away from specific doctrines and to avoid anything that might be offensive to a listener of another faith.

Collections Are Growing

In fact, it is the fostering of this spirit of broadmindedness and tolerance that several writers gave as being the great contribution of Radio to religion. Stations giving violent and radical religious expression are most apt to be tuned out, while the service run on the strictly humanitarian and undenominational lines, like the Little Brown Church of WLS, offends no one, whatever his belief.

The size of Radio church audiences cannot be computed. Most of the stations in the survey admit frankly they do not know, while some make qualified estimates of 1,000 up to 200,000, but no satisfactory means of counting Radio audiences has been determined.

One feature of growing importance in church Radio is the collection. This is particularly significant, as it must be purely voluntary and straight from the heart. One church writes that in three years their Radio gifts have reached $8,000 without any appeal for funds. The Y. M. C. A. of one town received $400 in one season, also without any solicitation.

One writer comments that the man who is not ashamed to slip a dime in the collection box in church does not hesitate to slip a dollar bill into an envelope in gratitude for some Radio service which he finds particularly inspiring.

CLASSIFIED ADVERTISEMENTS

How about that new set you want to buy? What are you going to do with the old one? A Radio Digest classified advertisement will sell it for you.

Rates are twenty cents a word for each insertion. Five per cent discount for four insertions, 10 per cent discount for six insertions, 15 per cent discount for twelve insertions, 20 per cent discount for twenty-four insertions (each issue for 1 year). Same Day shipments. B. Hawley Smith, 817 Washington Ave., Danbury, Conn.

Radiophone Broadcasting Stations

Corrected Every Issue—Part II

ONE DOLLAR will be paid to the Radio fan reader of Radio Digest submitting the most errors in any one station's listing in the Directory of Radiophone Stations, which appears in six parts, serially continuously on the next to last page. Letters must reach Radio Digest's office not later than one week from date of issue corrected. Readers are not limited to correcting one station, but such corrections must be verified by the stations themselves, and NOT by comparison to other so-called accurate Radio directories or lists. Verifications must accompany corrections. Turn in corrections for as many stations as you can find—if you can find errors! Use separate sheet of paper for each station submitted and place name and address on each sheet. In case of tie, duplicate awards will be made. Until wave lengths become stable again, we will not be able to count these in the challenge.

United States (Cont'd)

(Note—The second part of the schedule list appears below. The first appeared last issue.)

KMTR, Los Angeles, Calif. 238m-1260kc. 500 watts. Echophone Mfg. Co.

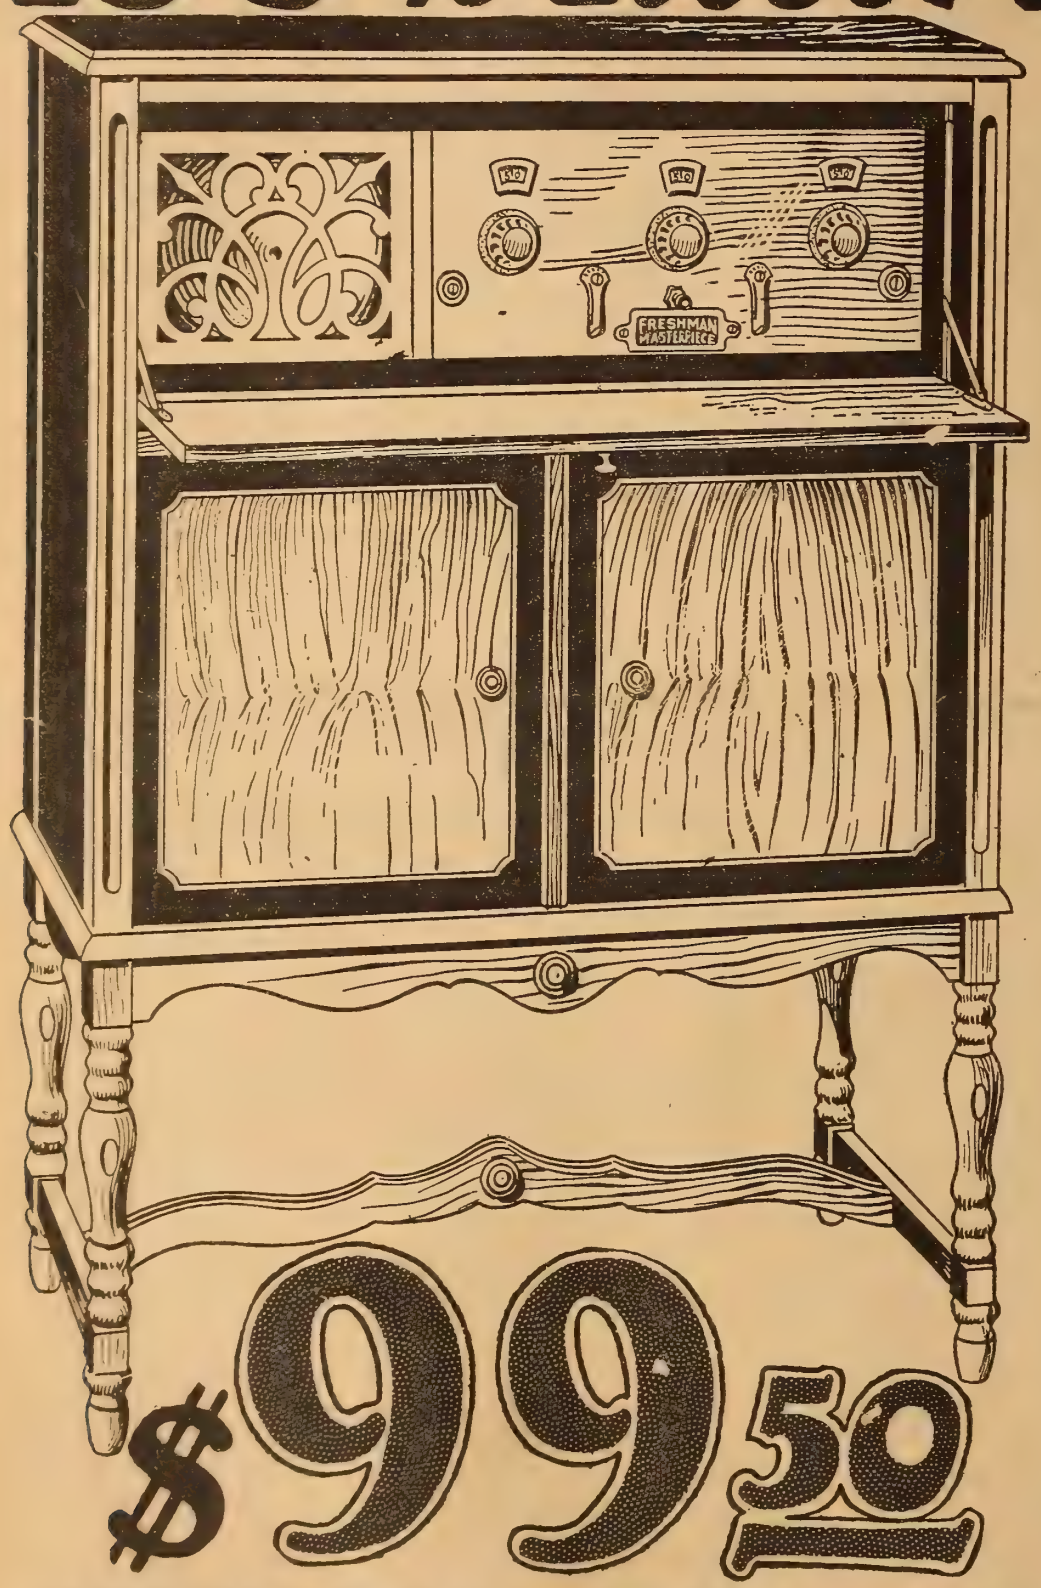
QUALITY *with* 100% Reserve Power



New and Improved FRESHMAN MASTERPIECE

"THE ARISTOKRAT"

A one-piece Console
of finely selected

Genuine Mahogany

One of the finest pieces of furniture in which a radio receiving set has ever been installed. It is truly an aristocrat with its distinctive, finely proportioned lines and rich lustrous finish.

Equipped with the finest of CONE SPEAKERS

especially designed to bring forth the full merit of the new construction of the Freshman Masterpiece circuit. Designed for the employment of the new UX-112 Radiotron Power Tube and the necessary "C" battery connection—all metal SHIELDED front and sub-panel.

Sold on easy terms by Authorized Freshman Dealers, who also install and service them

CHAS. FRESHMAN CO., INC.,
FRESHMAN BUILDING, NEW YORK

$99.50

GENUINE RCA RADIOTRONS
are shipped with Freshman Masterpiece Receivers—matched and tested for each individual set. Price with this equipment [one UX 112 Power Tube; one UX 200A Detector Tube; three UX 201A Amplifying Tubes] $117

MAIL VOTES QUICKLY FOR FAVORITE VOICE

WORLD'S BEST ANNOUNCER SOON WILL BE KNOWN

September 4 Closes Third Annual Radio Digest Competition—Shows But Little Change

Here it is—the first of September—and with this issue appears the fourteenth and last ballot in the 1926 Radio Digest Gold Cup Award competition for the selection of the world's most popular Radio announcer! This means one thing—time to mail in all the ballots you have been saving for your favorite voice of the air. Don't lose time by sending the ballots to the stations, but mail them DIRECT to the Gold Cup Award Editor of Radio Digest at 510 N. Dearborn St., Chicago.

No ballots mailed with postmark later than midnight of Saturday, September 4, 1926, will be tabulated in the final count. Therefore, hurry to the post office before it is too late.

Since last announcement of standing but little change has occurred. The most portentous leaders and aspirants to the golden cup and honor have for the main held their places and added votes.

Hired Hand Takes Jump

Arnoux of KTHS, leader, added 15,000 votes, and so did May of KMA, who is second. They are, therefore, still the same distance apart. Gaylord of WTAG remains in third. His increase was 14,000 votes. Brokenshire of WJZ, like Gaylord a hope of the East, stayed fourth with an increase of 5,000. Barnes of WHT is still fifth. His increase was 3,000.

Other gains were relatively unimportant, except that of the Hired Hand of WBAP, who sprung a surprise by adding 3,000 votes and from eight to sixth place over the heads of Kyne of KMMJ and Field of KFNF. Another worthy increase was that of Carlin of WEAF, who likewise improved his total by 3,000, although it did not change his position.

The Present Standing

The next to last lap brought the leading candidates around in the following order. The figures in parentheses indicate the order the last time published:

1. G. C. Arnoux, KTHS (1).....78,746
2. Earl E. May, KMA (2).....61,261
3. C. Gaylord, WTAG (3).....49,325
4. N. Brokenshire, WJZ (4).....38,826
5. Pat H. Barnes, WHT (5).....31,694
6. The Hired Hand, WBAP (8)..15,206
7. A. S. Kyne, KMMJ (6).....14,725
8. Henry Field, KFNF (7).....13,487
9. Phillips Carlin, WEAF (9)....11,682
10. Peter MacArthur, WOC (10) 7,112
11. Louis J. Johnen, WLW (12).. 6,928
12. C. R. Randall, WSMB (11).... 6,004
13. R. W. Griffin, WHO (13)..... 5,243
14. Gayle V. Grubb, KFAB (14) 4,746
15. Lester Palmer, WOAW (15) 4,355
16. Lambdin Kay, WSB (16)..... 3,419
17. W. G. (Bill) Hay, WGN (17) 2,856
18. J. T. Schilling, WHB (19).... 2,655
19. E. L. Tyson, WWJ (20)..... 2,514
20. Edw. B. Husing, WRC (18).. 2,346
21. N. Dean Cole, WHO (23)..... 2,265
22. Paul Johnson, WCCO (22).... 2,173
23. Jerry Sullivan, WQJ (21)..... 1,971
24. Sen Kaney, KYW (24)..... 1,899
25. E. Konecky, WOAW (25)..... 1,872

Canada Awakens

Out of a clear sky the Canadian supporters of the aspirants for the special Canadian silver cup trophy have unloaded a number of votes on Hooper and Fricker, holders of second and third places, respectively, to date. The lassitude shown almost since the beginning in the Canada race seems to have broken down, and it looks as if Miss Lillian Shaw of CKY would have to work to end at the top. Her two closest rivals gained over 500 votes apiece, while her increase was but thirty. The standing is:

1. Lillian Shaw, CKY (1).....4,712
2. Bert Hooper, CKCK (2).....2,055
3. H. C. Fricker, CKCL (3).....1,214
4. Robt. W. Combs, CKNC (4)..... 560
5. Geo. A. Wright, CNRV (5)..... 396
6. Jacques Cartier, CKAC (6)..... 307
7. C. W. Darling, CFCF (7)..... 104

Who will win? The announcement will be made as soon as possible in Radio Digest. It is hoped to carry this information, or at least a flash on it in the September 15 issue, on the newsstands September 14, but in the event this is impossible owing to a staggering final vote, readers may count upon learning this information in detail in the October 1 number.

A gold cup, shaped similar to a microphone, will go to the American announcer heading the list, and his runner-up will receive a silver cup. The Canadian winner will likewise be awarded a silver cup which will be a duplicate of that presented to the American announcer ending second.

Watch for the September 15 issue!

COVER GIRL IS WEAF STAFF ACCOMPANIST

YOU only hear her artistry, not her voice—the girl on the front cover of this number. Her name is Mathilde Harding, and she plays the piano in special concerts, besides being a regular staff accompanist for WEAF. Pretty girl, isn't she, and brilliant too. She recently won a scholarship of the Juillard Musical Foundation. She has been on the staff of WEAF for six months, and was formerly accompanist to Ethel Hayden, the famous concert singer.

Film of Broadcaster Makes It Seem Almost Television

CINCINNATI.—It isn't television, but it's a close second to it for Radio Personalities, a New York motion picture company has filmed announcers and artists at Station WSAI, of the United States Playing Card company here, and will present the picture from the leading film houses of the country. Radio fans thus will have the opportunity of seeing the persons whom they have heard over the air "in action." Views were taken of the studios, the announcers, Paul A. Greene, director of the station reading an auction bridge game, the Bicycle sextet, the "Four Queens," and other artists. The movie is to be released this month.

Looking Ahead

Thinking of Buying a New Set? Or perhaps you are wondering what the improvements are in the 1926-7 designs? If so you will want to see the next issue of Radio Digest, on the news stands September 14, which will contain many advertisements of new models and an article picturing and discussing the new receivers and their better points. Don't miss this—the Chicago Radio show number.

She Has Left the Roof That Has Sheltered Her All Her Life. What will become of her, this "Goody Goody Girl" who is pictured so masterly by Merlin Moore Taylor. Follow her adventures in the September 15 issue.

KYW Was the First Station in Chicago and, in fact, the pioneer broadcaster of the middle west. When it started on the air phonograph records were the chief program requisite, and what is funnier—the listeners LIKED them. Read and see more about KYW in the next number of Radio Digest.

"Common Sense" Hints on Operating Your Receiver are coming. No matter who you are, or what walk of life claims you, you absolutely should read this article. Everyone should understand what it contains—and it is written in an enjoyable fashion that you can understand.

Special articles about broadcasting stations and artists, with photographs, and NON-RADIO fiction 5,000, 10,000 and 30,000 words in length are desired. No manuscripts accepted unless typewritten and prepaid, or returned without return postage being inclosed. All manuscripts are sent at owner's risk.

SHORT WAVES

By Marcella

"Goldie Locks" sorrowfully but dutifully returns from her perfectly wonderful vacation spent fishing aomng the truly "vast open spaces" of Lake Vermillion in the Arrowhead country of Minnesota, her "bronze" hair more bronzed, her complexion considerably darkened and her fingers ready and willing to tell all inquirers everything she knows about the studio folk. To appreciate the foregoing, of course, one must have read the last column of "Short Waves" which was written during my absence by "Old Man Grundy," the adorable dear! But he is mean to infer I bought those fish, for I really caught them, and they tussled determinedly before my dial calloused fingers succeeded in landing them. Just to show you how much "Mr. Grundy" knew about it, those weren't two bass and a trout at all. They were two immense wall-eyed pike and a huge great northern pickerel—lots larger than the big one President Coolidge caught. So, there!

* *

Nola, Lilac, Thelma, Cherry, Sally, Colleen, Babe, Sylvia, Vivian, Coneuela, Constance and Mary—all twelve of them—ask the intimate details concerning almost as many Radio favorites. The first, of course, is Jack Little.

Jack is married a year now, 5 feet 3 inches down, little in weight and nom de Radio, good looking, almost if not 26 years old, and was born at Waterloo, Iowa. Just to answer Betty at the same time, I will add that Jack was never the regular announcer at WDAF, the Kansas City Star, but he may have done some announcing while appearing there. Not touring now, he is spending his time building his repertoire for the fall and making Chicago his headquarters. He will roam again in October. Don't know what his wife's name was, or whether or not she is a musician. She is, however, a good manager, isn't she Jack? Try writing care of James Leonard, of Waterloo, Iowa, as a permanent address.

Eddie Loftus is next. Took Lee Sims' place with Charles Erbstein before WTAS was but a memory. Then I believe he ambled over to WSBC to "pet the elephant tusks." Will give him further investigation and report again.

Rans Sherman. Liable to break out any minute again with his "Applesauce Club" at KYW. The Gloom Chasers are getting together again. Plays a "sax" when someone is listening—just when he shouldn't. Sandy haired, with a good head and a big body, solidly built, and weighing about 175 pounds, Rans is very serious looking. From his expression you wouldn't guess he was a star Radio humorist. Sells insurance for his bread and butter, and I believe he is married, but won't swear to it.

Eddie Harper—ahhh—is a handsome and winsome sheik, tall, single etc. Just the type. Keeps busy most of the time announcing what is going on at the Chicago American studio of KYW. Tune in Eddie's Movie club on Friday evening at 7 p. m. Central daylight saving time some week, and hear him describe the screen beauties clustered about him—then guess who they are. When not in the studio, Mr. Harper prefers to push a little white ball around the broad green acres. You should see him all dressed up in his kilts (Isn't that what they wear for golf?), according to E. E. Mattson, the irrepressible press representative of KYW.

We are making progress. And now, George Givot, a pioneer who worked over KYW when Radio still was Radio, according to the Third Trombone player. Then George decided to shift about at motion picture and vaudeville houses and finally booked with Paul Ash while this bushy-haired showman and Radio favorite was at McVickers, Chicago. As a star of the terpsichore, especially the Charleston, Mr. Givot is now delighting the audiences of various Balaban and Katz theaters every week.

And Charlie Schultz, the 85-pound tenor, according to Sen Kaney, who carries the other 200 pounds on his back. Charlie is dark skinned, has black, curly hair and brown eyes. Good natured like all—shall I say fat?—"large" men, he must be married, for all fat men are married. Don't you love him when he sings a sobbing blues song?

Next is Bert Davis, the "Clown of the Air," who lives up to his name so well. I should rate Bert at about 35 years. He is rather medium or short in height, and weighs about 135 pounds. I can't say where this wandering minstrel is just now, but imagine we shall hear from him shortly with the full programs of the fall. Yes, I am almost sure he is a bachelor.

Getting near to the end at last. Jerry Sullivan is in line. Jerry is married and I think he has several children. He is not regularly on the air since leaving WQJ, and, for the benefit of E. V. A., I will add that he and Hal Lansing are resting until some time this month when they plan to make a vaudeville tour.

And finally—Correll and Gosden—the famous Sam 'n' Henry of WGN and WLIB fame. Correll is six inches shorter than the blond, curly-haired, handsome Mr.

(Continued on page 10)

WORLD'S BEST PROGRAM SEPT. 15

NOW THAT THEY ARE FREE—WHAT TO DO?

STATIONS STANDING PAT; FEARED CHAOS "ISN'T"

Broadcasters Show A-1 Cooperation —Situation May Cause Selection of Judge Landis of Radio

The story is told of the so-well trained husband, who, when given a night off when his wife was away, knew not what to do, and felt so miserable that he went home, cooked his dinner, put on his slippers, read the paper and went to bed. He had thought he would have a wild time, but——

Radio broadcasting in the United States is today in exactly the same position as the well-trained husband. Now that stations which felt they were "oppressed" have their freedom, now that 600 waiting applicants for licenses have their chance to get them—they have gone home and felt perfectly miserable. The established stations, better than nine cases out of ten, are staying "put" on their waves. The wating applicants, at least about 595 of them, are still waiting—afraid that public opinion or retroactive legislation in the future may "get" them.

Excellent Cooperation But No Chaos

A splendid spirit of cooperation is on the air today, but no chaos, such as feared by Secretary of Commerce Herbert Hoover, has shown signs of appearing. True, many misled newspapers and broadcast listeners' organizations followed the lead of Mr. Hoover and for a time cried, "Wolf, Wolf," but the general public has refused to be aroused, and the feared chaos has not, as Radio Digest promised it would not, become a factor to be reckoned with.

Over 200 leading stations have pledged the National Association of Broadcasters to continue to operate under the assignments made by the department of commerce prior to the law's breakdown, and many of these 200 are doing so at the sacrifice of their individual interests which are born of deep convictions.

Advice to Waiting Applicants

Waiting applicants are advised not to build their stations. They may be shut out by the pending legislation. There positively is not room for 600 more broadcasters, costing from $50,000 upwards, on the but 89 available ether channels or wave lengths. Even with equal division of time on the air, these stations could not obtain a fair return on the minimum investment. It would be the wildest kind of speculation to build, the N. A. B. points out.

And Powel Crosley says, "I firmly believe that the prospectors of the air, the pioneer broadcasters, have a common law right to their wave lengths which the courts will uphold, and which entitles them to the unhampered use of the wave lengths they have pionered and popularized. But at the same time, there is an essential need for legislation."

May Yield Judge Landis of Radio

The Radio Manufacturers' association, N. A. B., Radio Apparatus Section of the A. M. E. S., and the A. R. R. L. have been talking over the situation, and as this number of Radio Digest goes to press, are working together on a plan which may yield a popularly selected "High Commissioner of Broadcasting" whose word in Radio will be as all powerful as that of Judge Landis in baseball or Will Hays in motion pictures.

In closing this discussion of the present Radio situation, let us quote the latest Washington dispatch and laugh:

"Officials of the department of commerce say that applications for new broadcasting licenses and changes in wave length are not coming in as fast as they were. They are 'just dribbling in' now, the officials report."

Powel Crosley Orders Big Duplicate of WJZ

WLW Will Have Sending Power of 50,000 Watts

CINCINNATI.—Powel Crosley, Jr., president of the Crosley Radio corporation, has placed an order for the first fifty-kilowatt (50,000-watt) broadcasting equipment which Western Electric plans to manufacture for a few concerns.

This is the first order placed and bears out the prediction made by Mr. Crosley at the Hoover Radio conference a few years ago, that broadcasting stations must increase their power and equipment to keep abreast of the broadcasting art. This new transmitter will cost, with the new special fireproof building to be erected near the present WLW transmitting station near Harrison, Ohio, about $250,000.

It's All in a Day's Work, Says WRVA Official, Discussing Queer Requests

By E. G. Hoelzle

A PECULIAR conception of how a broadcast station is run is noted in a nine page letter which was received at Station WRVA, Larus and Brothers Co., Richmond, Va., from a listener who mapped out an entire evening's program selecting the orchestra and the numbers that they were to play, the soloists with their selections, and asked that the program be on a certain evening. This particular lady further stated that it would suit her if at certain times we would hold up the program so that she could have some recitations and take up a silver offering for some charitable affair in which she was interested.

On one occasion an urgent telephone call received at the broadcast office carried the request that on Thursday evening prompt at nine o'clock we should have our orchestra play "Mendelssohn's Wedding March," as a wedding rehearsal was being held in this lady's home at that time and she also desired that there be a pause followed by a sweet voice singing "Moonlight and Roses."

Capping the climax, however, was the telephone call by a third lady asking if she might bring her infant child to the broadcast station and have it cry so that its grandmother in a distant city might hear its melodious voice.

It's all in a day's work!

OLD QUEEN AT WPG TO BOW TO NEW

"Miss America," Fay Lanphier of California, has come to the World's Play Ground to attend the 1926 Annual Atlantic City Pageant, September 7 to 11. Miss America is making the WPG Marine Studio on the ocean end of the Steel Pier her headquarters, and Radio friends all over the United States again have an opportunity to enjoy her Radio chats. Last year her advice on fashion, beauty and charm was appreciated by thousands of listeners.

News Briefs

Pikes Peak Hill Climb on KOA

DENVER.—Automobile racing fans will greet with pleasure the announcement that KOA here will broadcast the Eighth Annual Pikes Peak Hill-Climbing dash on Labor Day, September 6, by direct wire from the scene of action.

Prize for Naming WOOD Transmitter

GRAND RAPIDS, Mich.—Name Station WOOD's new transmitting bungalow and its surrounding acreage, located ten miles west of Grand Rapids, and you may win a five tube receiver complete with all accessories. The name should not contain more than three syllables, and should have something to do with broadcasting and reflect the fact that Grand Rapids is the furniture capital of America. The contest closes September 15.

WOAW Influences Local Politics

OMAHA, Neb.—The influence of Radio in politics was strikingly demonstrated here recently when Lester Palmer, WOAW announcer, a candidate in the primaries for municipal judge, was nominated for the November finals. He ran fourth in a field of thirteen candidates. Mr. Palmer, still in his twenties, just recently began the practice of law, and was opposed by older and more experienced politicians.

First Canadian Church Broadcast

WINNIPEG, Man.—Following the recent publication in Radio Digest of an article describing a tablet at the Fort Rouge United church of Winnipeg, upon which was inscribed that the first church broadcast in Canada was made from this church through CKY April 1, 1923, considerable argument has developed among the provinces. The final decision seems to be that the first church service broadcast in Canada was that of Carmichael church, Regina, Sask., on February 11, 1923, through CKCK; the honor of second goes to Bloor Street Baptist church, Toronto, Ont., which on March 18, 1923, was on the air via CFCA; and third place is relegated to the Winnipeg church.

WQJ Engineer Follows Musical Score

CHICAGO.—Few broadcasting station engineers would go to the trouble to follow the musical score of a broadcast so as to control the modulation properly just in advance of the crescendos, dimmuendos, pianissimos, fortes, etc., but here is one who did. Chief Engineer Robert Engler of WQJ has a reputation as a meticulously careful and dependable operator. When the North Shore quartet recently broadcast from WQJ the song cycle "Floriana" by Whiting, Mr. Engler had a complete score before him and controlled the transmitter perfectly by means of reading the musical expression marks ahead of the quartet.

Tell Steinmetz Life at WGY

SCHENECTADY.—The life and contributions to science of the late Dr. Charles Proteus Steinmetz are being related over WGY in a series of talks being given every Tuesday evening. They are prepared by John Winthrop Hammond.

WLW Gives "Encyclopedia of Music"

CINCINNATI.—A musically worth while feature originated at Crosley WLW station by William C. Stoess is the "Encyclopedia of Music," a series given by the Formica orchestra on Tuesday evenings. Each week selections from the works of a new group of famous composers, in alphabetical order, are broadcast.

Paulist Choristers Return to Air

NEW YORK.—The famous Paulist Choristers, heard last year from WLWL, New

(Continued on page 20)

LINK 33 STATIONS TO ENTERTAIN COUNTRY

15,000,000 PEOPLE WILL HEAR GREAT BANQUET

Radio Industries Feast to Mark Opening of New Season—Famous Stars to Entertain

NEW YORK.—Fifteen million people are expected to listen to the broadcasting of the best program ever produced on the occasion of the Third Annual Radio Industries banquet Wednesday, September 15, when the Radio industry gathers to open the Radio season for 1926-27.

Coming during the week of the New York Radio show, this banquet will see Radio manufacturers, jobbers, dealers, broadcasters and artists gathered from every state in the Union at the Astor hotel grand ball room, while millions of listeners will enjoy the program which will be broadcast by a record-breaking link of at least thirty-three stations covering the entire east and midwest.

More than two hundred artists will comprise the talent for the show which carries Mary Lewis and Reinald Werrenrath, America's own opera soprano and baritone, as headliners with five orchestras and the WEAF grand opera troupe, the WEAF light opera troupe and the WEAF musical comedy company presenting every variety of entertainment. The broadcasting will begin at 7 p. m. Eastern daylight saving time, which is 5 p. m. Central standard time.

Program Crowded With Favorites

Among the other artists who will appear on the bill will be: The Victor Revelers, the Capitol Family, the Eveready mixed quartet, Premier male quartet, Vaughn De Leath, Phil Cook, Ernie Golden, Royal Typewriter Salon orchestra and singers, Ipana Troubadours, Victor Salon orchestra, Markel's Society orchestra.

Other additions to the cast are expected each week as a large number of stars have been under consideration by the committee, which included leaders in the Radio talent field.

Paul B. Klugh, executive chairman of the National Association of Broadcasters will appear as toastmaster again this year, as in the past, and Major J. Andrew White, pioneer Radio announcer, will act again as master of ceremonies.

Stations Assured to Date

Practically every broadcasting station in greater New York will join in carrying this program to their listeners on the banquet evening. Stations booked to handle the broadcast to date include:

In New York: WEAF, WJZ, WLWL, WRNY, WMCA, WFBH, WHN, WAHG, WBOQ, WNYC, and WOR.

Out-of-town stations carrying the program will include: WBZ, Springfield, Mass.; WGY, Schenectady, N. Y.; WNAC, Boston; WNAB, Boston; WEAN, Providence, R. I.; WODA, Paterson, N. J.; WEEI, Boston; WJAR, Providence, R. I.; WGR, Buffalo; WRC, Washington, D. C.; WCSH, Portland, Me.; WTAM, Cleveland; WWJ, Detroit; WOO, Philadelphia; KSD, St. Louis; WTAG, Worcester, Mass.; WCAE, Pittsburgh; WCCO, Minneapolis; WOC, Davenport, Iowa; WTIC, Hartford, Conn.; WGN, Chicago, and WLW, Cincinnati.

Sixteen Radio trade organizations join in the sponsorship of the banquet which is conducted by a general committee of nearly a hundred leaders in the Radio industry representing every phase of Radio activity.

Close Schedule Is Followed

The 1926 banquet is the third annual affair of this character held under similar auspices. The attendance last year was in excess of fourteen hundred and over two thousand people are expected to be present this year.

The Radio Industries banquet represents probably the only banquet where every speaker and performer is required to follow a schedule to the minute. The speakers and artists will adhere strictly to the schedule which is devised to resemble the style of a broadcasting station program, with announcements timed and arranged so that the entertainment portion of the program will close sharply at 11:45 p. m. Eastern daylight time or 9:45 p. m. Central Standard time, when an hour of dance music will follow.

GOODY GOODY GIRL

CHAPTER I

The Lie

THE SHARP click of the latch on the front gate came to Lois Sylvester's ears through the open windows. She straightened up beside the table she had been dusting with a curious feeling that all morning she had been tuning her ears to catch the sound. A moment later the gate slammed back into place and she stole to a window for a peep from behind the curtains.

Just as she had suspected would be the case, angular Miss Ada Wexby was marching up the front walk, prim and stiff in her Sunday best and bearing in her hands that which Lois had come to regard as the Ancient Mariner must have regarded the dead albatross about his neck.

Lois sighed and moved toward the door. The long-smoldering rebellion flamed up within her and she felt a great temptation to tiptoe through the house and out the back door, letting Miss Wexby's imperious ring at the doorbell go unanswered. There would be some satisfaction in knowing that it would irritate the vinegary spinster to be compelled to ring again. In the end, of course, it would do no good. Miss Wexby would open the door and walk in, deposit that which she carried on a table and walk out.

It was not that, but Lois' personal code, which banished the temptation almost as soon as it appeared. In her eyes it would savor of dishonesty not to go to the door and open it just because the caller was someone she disliked. Laying a hand on the door-knob, however, she made a sudden resolution.

"Good morning," she said, her tones neither friendly nor hostile.

Miss Wexby made to enter the house. "Morning. I'm going visiting and I've brought Primus, Quintus and Octavus—" She broke off abruptly as she found the doorway blocked by the girl's slender body. "Here, you take them."

LOIS eyed with distaste the cheap glass bowl and three swimming goldfish thrust toward her. "I can't take care of them for you this time, Miss Wexby," she said firmly.

The spinster started so violently that the bowl almost went to the floor. "Can't take care of them?" she echoed. "You always have when I've been away before."

"Yes. Dozens of times and before she died it was my mother you imposed upon, but—"

"Imposed upon!" Miss Wexby's voice was almost a shriek. "Imposed upon! I like that. Why, your mother loved my little darlings. She was always glad—"

"No. Not glad, but too easy-going to tell you the truth. She loathed them just as much as I loathe them. Satisfied little idiots. Content, day after day, to do nothing but swim around and around that bowl, bumping their silly noses against its side—"

"Well, I never!" Miss Wexby, sniffing indignantly, set the bowl upon the porch floor and, arms akimbo, faced the girl. "I believe you've taken leave of your senses, Lois Sylvester."

"I've just come to them. Why should I have your nasty little goldfish that I despise wished upon me for days at a time every few weeks, whenever you choose to go gadding, imposing upon your relatives, too—"

Miss Wexby's sharp features became mottled with rage. "That's enough. I'll see Phineas Blair about this. I'll see if he'll stand for your insulting a decent, respectable, God-fearing woman—"

"You'll find him at the plantation."

"I'll go right out there, then. Such impudence I never did see. Of course if you want to change your mind, apologize—"

"Never."

"You'll sing a different tune after I've seen Phineas. He'll make you."

"I'M EIGHTEEN now, you know."

"Meaning you're of age? What difference do you think that will make to Phineas so long as you're in his house, eating his bread and butter, dependent on his charity?"

All very true, Lois realized with sinking heart. Her stepfather was, indeed, master in his own house. Whatever he decreed, she must do. He had no liking for Miss Wexby and her ridiculous airing of her knowledge of Latin by naming her goldfish Primus, Secundus, Tertius, and so on to designate the order in which they had come into her hands. What would he say, however, when she told him in her own highly-colored way the story of what had just occurred? For all he prided himself on his sense of justice, his anxiety to appease Miss Wexby and get rid of her quickly might lead him to grant what she demanded. A scolding she could stand, but to take in those goldfish now after she had refused—never.

One way out suggested itself and desperately she took it.

"He can't make me do things when I'm not here and I'm going away," she said. Instantly she was horrified. She had uttered a deliberate untruth; she who refrained even from such conventional white lies as saying "I'm glad to see you" to someone if she was not glad. Why had she told Miss Wexby that? Certainly she had no intention of going away. Where would she go?

She stole a look at the spinster's face again. The gloating over an anticipated victory that she had seen there but a moment before had vanished and been succeeded by amazement and frank incredulity.

"Going away? You? How absurd!" Acid fairly dripped from Miss Wexby's tongue.

Lois shut her lips tightly, fought down and conquered the impulse to admit that

"No!" The word fairly exploded from between his lips. "No! You are asking me to compound a lie so you may seem truthful. I won't do it. There wasn't any need to lie in the first place. . . ."

FACING a Threat of Instant Death

Prince Masillof Dares All to Warn the Girl He Loves—And the Second Episode of This Amazing Romance Comes to a Surprising End

Illustrations by W. H. WISNER

TO spend an evening at the Club Royale was to swagger in the presence of the elite. It was exclusive because only the really rich could afford to pay the price. But there was something more than the ticket of affluence to lend an atmosphere to the place. Old World royalty seemed to find it a congenial rendezvous. Conspicuous among those present night after night was His Royal Highness Prince Boris Masillof, bereaved cousin of the late Czar of Russia.

Gloating American dowagers sought him out to present their daughters. They thrilled at his dignified bow of recognition. But there was one who warmed his heart, who met him glance for glance and piqued his inner consciousness and made him wish that he was more than he felt himself to be.

He met her as she appeared alone at the entrance of this gorgeous supper club—Miss Brent, Miss Evelyn Brent, said to be a wealthy San Francisco girl and socially prominent there. They sat at the table always reserved for His Royal Highness and the girl was the envy of all those others of her sex who were in the room.

She ordered expensively but sparingly and later they danced.

A feeling of boredom and disgust at the licentious liberties displayed between the guests as they ogled and flirted without regard for marital ties and the other established codes of decorum in a public place.

"Silly crowd, isn't it," mused Evelyn, toying with a tiny champagne glass as the Russian placed a fresh charge in his lengthy cigarette holder.

"Fools," answered the Prince in a velvety undertone. "They imagine they are enjoying themselves. And they are utterly heartless." He touched the flaming match to the tip of the cigarette.

"Why do you come here?" The girl turned a side-long glance and fancied that the question had struck a hidden spring that caused a faint flush to redden the prominent high cheek bones of his face. His hands clenched perceptibly. But when he spoke it was with the old nonchalance.

"For the same reason they do, I suppose. And you, may I ask?"

"That goes for me, too."

"You're a wonderful girl, Evelyn. . ."

A shadow fell over their table. They looked up to the leering smile of Ricardo, the Latin dancer, disolute but cruelly fascinating to women.

NEAR him hovered Frascita, his partner. They assumed a strange familiarity toward the nobleman. Ricardo frankly intimated that the prince was being monopolized to the chagrin and disappointment of the other guests. Frascita cast knowing glances in his direction.

"A perfect lover," she commented with a wise wink to the others at the table. Evelyn was shocked. Ricardo offered her his arm. They danced away together. When they returned the prince was in a seething rage. He prepared to take her home but Ricardo intervened, offering Evelyn one of his "special brand" cigarettes.

"Please don't smoke that! Don't!" Massilof pleaded without success and Evelyn, blowing a yellowish cloud from her lips, leaned on Ricardo's arm, a glassy light in her eyes.

She giggled hysterically and they swept away, the dancer bestowing on the furious Boris a triumphant, taunting glance that was oil on a raging flame. Masillof's eyes followed them feverishly. His hands clenched until his taut muscles trembled from the strain. Then he saw people staring at him in wonderment and his innate pride rushed over him in an abruptly cooling shower. His jaw set resolutely and he sank into his chair, fumbling uncertainly for his cigarette case.

Frascita laughed. He whirled on her, his eyes wild with fury, his mouth tight and merciless. He realized how terribly close to the surface was the brute in man. An almost uncontrollable impulse assailed him, a desire to strike her, to erase with a single blow the half-leering, wholly satisfied expression on her insolent face.

"You're the cause of this!" he gritted savagely, struggling to keep rage from raising his voice to an unrestrained shout. "You've put jealousy in that girl's heart and sent her off with that snake."

Frascita preened herself like a bird that realizes the beauty of its plumage. And her lips remained curled in that provoking smile that was calmly assured almost to the point of defiant impudence.

"What of it?" she demanded at last. "If she can't take care of herself she has no business here. But you see she doesn't really care for you. And I do, Boris. I——"

Prince Boris summoned all his strength and rose. As straight and dignified as a lighthouse he stood with lifted chin and steady eyes, waiting, waiting. He would have a soldier's death.

"SHUT UP!" snapped Masillof. "You're nothing but a common woman. If you say another word I'll choke you. And never come to my table again."

The woman flushed; her eyes widened and glittered; her lips tightened until even the heavy rouge could not hide their whiteness. Her whole body trembled with the awful rage of a woman scorned.

"You!" she gasped hoarsely. "You—"

She choked and a hand leaped to her throat. She tried again to speak but it ended in a gurgle and she rushed away from the table. Many curious glances followed her whirlwind progress through the crowded night club. Boris's among them, flashing bright with anger. Then his gaze cooled and grew somber. Now that the tempest was over he felt wrung dry of energy, of emotion, even of thought. Disgust welled up within him, at Frascita, at Ricardo, most of all at himself. For he who hated the very word pretense and all it signified was a living disciple of it.

"Pardon, your highness," said a suave voice at his elbow. "But Mr. Kelly would appreciate your stepping up to his office for a moment."

(Continued on page 6)

Unconsciously Boris' lips curled into a sneer. Mr. Kelly indeed; Then a haunting fear crept into his countenance. He hoped the waiter hadn't seen the sneer. Remembrance flooded over him and the fear in his face fled before defiance.

Outwardly calm, he affixed his careless signature to the check with a crested gold pencil and followed the waiter to Mr. Kelley's office.

BORIS hesitated a moment like an athlete gathering all his force for a powerful effort, then opened the door swiftly and entered. A man entrenched behind a heavy, carved desk in the center of the expensive Oriental rug looked up. Boris paused, chilled from the mere glance. He always felt chilled in the presence of the Club Royale's owner. A product of the west side slums, tempered to steel-like strength and hardness in the neighborhood of Madison and Halsted streets, Jack Kelly had risen to affluence and some political power through bootlegging and other nefarious practices.

His was the sort of face that one would expect to find in a rogues' gallery—a square face, bluntly hewn with no effort for beauty or symmetry, with a wide, underslung jaw, crooked mouth that had frozen in a perpetual sneer, close-set, small gray eyes of an unsmiling, gimlet-like, piercing hardness, low-hanging brows with two deep lines carved between them by an unending frown, and a wide forehead that was terminated abruptly halfway up by heavy black hair as coarse and stiff as a bear's coat. When he smiled on rare occasions it was only a mechanical motion of the lower half of his face.

"You sent for me?" inquired Masillof with all the coolness he could muster.

"I sure did," snapped Kelly. His voice was always quick and harsh. He mistook abrupt, overbearing insolence for decisive authority. "I want to know what your idea is in spending the whole night with that girl."

"I thought I was hired to make myself agreeable to the women who come here."

"You are. But not just to one of them. The others'll get mad and quit coming."

"Don't you presume upon my attractions?"

"No," retorted Kelly bluntly. "You've got a way with women. There's no doubt about that. I wish I could get 'em as easy as you do. But I could, of course, if I was a duke or something," he added hastily, sorry that he had admitted envy for another man. "They fall for that nobility stuff. That's the reason you're eating three squares a day."

PRINCE BORIS winced under that last thrust. It stabbed his pride to the quick. He, Prince Boris Masillof, of the Russian royal household, dependent on such scum as he now faced. Anger surged over him in a blinding flood, brightened his eyes, reddened his cheeks, clenched his fists.

"You've taunted me long enough about being dependent on you, Kelly," he cried furiously. **"I'm through!"**

"What?"

"You heard me. I'm through. I've stayed here for weeks as the lure for people to come here and spend money in your place. Oh how I've hated the pretense of it! I did it only because I was broke and needed the miserable salary you've paid me out of the thousands I have made for you. But I'm done right now. There must be something that a man can do in a great city like this to make an honest living. The first thing I shall do is see Evelyn Brent and tell her the truth about everything."

Kelly half rose from his chair, fear and anger struggling for supremacy of his countenance.

"You don't dare!"

Masillof laughed harshly.

"Don't I? Wait and see! I've stood this deception as long as I can. That girl comes here to see me. And your hellish place is going to drag her down to destruction just as it has many others if I don't stop it."

Kelly sank back into his chair. His lips were grim and white with rage. But his eyes were narrowed craftily.

"Take it easy," he said soothingly. "You're wrought up about something and you don't realize what you're saying. Sit down and let's talk this over."

"No, I won't sit down," retorted Masillof defiantly, his voice vibrant with rage. "There's nothing to talk over. Ricardo gave this girl one of his doped cigarettes tonight. Before long he'll have her in the habit and she'll be a slave to it. It'll be my fault because she comes here to see me. I feel responsible for her. And I won't have a scar like that on my soul. I won't, I tell you. I'm through."

"DON'T be foolish, Masillof," said Kelly, and his voice had an edge like a Damascus blade. "You know you need the money I'm paying you and there's no reason why you shouldn't have it. A fellow has to look out for himself these days. I'll raise your salary a hundred. You'd better think twice before you throw away six hundred dollars a week."

"No," answered Boris decidedly. "I've just realized tonight what I've been doing. And I won't do it any longer, not for any amount of money. To me, being a nobleman means more than having a title and a crest. It means nobility, not only of outward rank but of mind and soul and purpose. I should dishonor my rank and ancestry by remaining here longer. Good night!"

He turned to go. Kelly sprang to his feet. His face was purple with rage. His eyes snapped savagely with the cold deadly purpose of a rattlesnake about to strike. In his right hand was a black, ugly automatic.

"Stop!" The word shot forth and transfixed Prince Boris in his tracks. There was an unmistakable ring of command in it. He turned, defiance in the tilt of his head. Then his eyes widened as he saw the gun.

"You're not going to leave here!" snapped Kelly. "And you're not going to say a word to anybody about this place or your connection with it. Do you think for a minute that I'd let you wreck a graft like I've got here? Not a chance. You're in this, now, and you'll stay in. And you'll keep your mouth shut or end up in the Chicago river some nice dark night. You wouldn't be the first one. Get me?"

Masillof smiled coldly.

"You can't bluff me."

"I'm not bluffing," burst out Kelly. "I've got plenty of drag around here. I hope I won't have to show you." He paused to let the threat penetrate. "Now go ahead, 'tend to your own business and do your work and everything will be all right. **But keep your mouth shut!** You'll be watched day and night from now on and if you make one single crack—good night! There's plenty of men in this town who will do anything for a price and I've got the price," he ended ominously.

Masillof stood silent, paralyzed by the other's deadly threats. From what he had read and heard he believed that for once Kelly was telling the truth.

"I—I'll think it over," he muttered and stumbled out of the room.

AFTER the clammy warmth of the night club the cold, biting wind sweeping across Grant Park onto the boulevard from Lake Michigan was invigorating. It cleared his head and brought back to him some of the joy of life. He decided to walk to the Drake, where he had a suite.

Almost subconsciously he noted the huge clock at the pinnacle of the light-bathed marble-white shaft that was the Wrigley building tower. Four-thirty! Michigan boulevard at that hour presented a strange contrast to the jammed traffic artery of the day and evening. It was deserted save for a few belated pedestrians like himself, a sprinkling of private cars and taxicabs with their tire chains roaring and rattling against the snow-covered pavement.

He crossed the heavy concrete boulevard bridge. The Chicago river, forbiddingly dark and silent, flowed to either side. The remembrance of Kelly's threat made him shiver slightly. He burrowed deeped into his fur coat and swung on up the avenue.

It seemed hours before he slept. The events of the night churned over and over in his mind in an interminable turmoil. Not since the rise of the Bolsheviki in his native Russia and the resultant loss of his vast estates had anything upset him so completely as the thought of Evelyn Brent's being engulfed by the vast city's night life. He loved the girl. He hadn't realized it until he saw her depart with another. But he knew it now. The bare thought of the insolent, rascally Ricardo made him shiver with rage.

He wanted to marry Evelyn. He wondered if her mention of marriage had been meant as an encouraging hint. One moment he devoutly hoped so. The next, he hoped not. His brusque rejection of it had sprung not from his lack of desire for marriage but from his realization of his ability to achieve it. That is, to achieve it and retain his self-respect.

He knew many women, wealthy women, who would be glad to marry him and support him in elegance the balance of his life. He held no illusions about his attractions. They bred within him not the slightest feeling of egotism. The world contained many handsome men. Yet he realized that he possessed every attribute for a successful international marriage. There were few women who would not enjoy registering at fashionable hotels as the "Princess Masillof" and being addressed as "your highness." Especially when, the man who accompanied the title was entirely desirable. He could sell himself and his title for millions, for lifelong luxury. But the mere thought of such a parasitic existence was repugnant to him. In a condition like that he should be unable to face himself in a mirror.

MIDNIGHT found him in his accustomed place near the inner doorway of the Club Royale, bowing and smiling with all the cordiality he could summon to the patrons as they streamed in through the velvet-draped opening. He had not weakened in his decision to leave the place. But two more nights remained of the present week and he would need that six hundred dollars to live while he hunted another job. But he was firmly resolved to tell Evelyn everything at the first opportunity and to plead with her to forsake the Club Royale forever.

He saw Kelly staring down at him from the balcony and sneered inwardly as he saw the manager turn away. Undoubtedly the fellow thought his threats of violence had turned the trick. Funny how people who thought only in terms of might and ruled only by force could not realize the power of mind and spirit.

The girl came in late. And the high color in her cheeks indicated racing thoughts. Perhaps emotions. Masillof bowed uncertainly, doubtful of her reaction. But she was friendly, almost effusive. No trace of her black mood of the previous night remained. He led her to his accustomed table with masked face and grim lips.

"I'm glad you came tonight," he said gravely. "I have something important to tell you."

"And I have something to tell you. A great deal. First, I'm sorry for the way I acted last night. When I think over it now I realize I must have made a show of myself. But I was furious at Frascita."

"So was I," he assented quietly.

"I think that cigarette must have had something to do with it. I felt awfully strange when I left here. And Ricardo was perfectly terrible."

"I knew he would be. He's like that."

"I had to threaten to call a policeman before he would let me out of the car."

"I'm not surprised. And now—" he paused and looked up as a waiter approached and handed him a note. There was a visible concern in Masillof's face as he unfolded it. "Pardon me," he muttered.

HIS eyes swept over the tiny sheet, then his fingers crushed it and he looked up with a quick, indrawn breath that whistled noisily through his clenched teeth. The words had burned themselves into his brain. He could see them standing out before him in lines of fire: **If you tell anything you will not live to finish it.** The handwriting was Kelly's.

"What's the matter, Boris?" demanded the girl anxiously.

The question surprised Masillof. He did not realize that his agitation had penetrated through to the outside, that his face had grown gray and lined, that his eyes were wide and with haunting fear in their depths.

"Nothing," he grunted and attempted to smile.

With a trembling hand he dropped the note into his pocket. His gaze roved about the room, searching for the spy or spies. He gasped as his eyes riveted to a table twenty feet away. Two men alone, obviously uncomfortable in rusty, soup-spotted dinner coats. Lean, hard faces. Grim, ruthless mouths. Penetrating eyes. And one of them gazed into his lap where his fingers were examining a black, murderous automatic. The man dropped the gun into his coat pocket and stared hard at Masillof. And the nobleman chilled under the gaze. His own wavered, then shifted to the girl. Those men must be Kelly's henchmen, his murderers if need be.

His heart was racing so that it almost strangled him. And his mind raced in unison with it. A thousand thoughts, ideas, memories, rushed through his brain as though it were a sieve. He had heard that people drowning experienced such a sensation.

Then a single thought emerged from the mass, growing until it obscured all the others and held sway alone. He must tell in spite of everything. He was through with pretense. The strain had become intolerable. He must relieve it or crack. His head went up and his face cleared. Better men than he had died for principle.

"I have something very important to tell you," he said lightly but in an abnormally low tone. He laughed aloud and the girl gazed at him in wonderment. "I've been threatened with death if I told you this. There are armed men here now watching me. But if I seem very gay they may not suspect . . . Don't look frightened that way. Smile. Be merry. Let's see how good an actress you are."

"I—I'll do my best," stammered the girl. "But what could it be so important as that? Can't we talk someplace else—some other time?"

"NO. I'm going to tell you now." He laughed again, that strained, mirthless laugh that set the girl's nerves on edge and made her want to scream. "I'm a fraud."

"A fraud!" The girl's voice held a breathless catch that made his heart leap. "You're not Prince Masillof?"

"Oh, I'm Prince Masillof all right. But I'm working here, selling my rank and position for enough to live on. I'm paid to be here every night to add 'class' to the place so that the better people will come here."

"You've succeeded!" she breathed.

"Yes. But at the cost of my self-respect. I can't stand this pretense. I couldn't sail under false colors any longer. I had to tell you the truth."

He paused, his mouth twisted into a mechanical, tight-lipped smile, inexpressible agony in his eyes, awaiting censure, ridicule, perhaps vehement condemnation. But the girl's reaction was none of these. Her face indicated how deeply his remarks had struck. She seemed shocked, unbelieving.

"Oh!" she gasped at last. "I'm sorry."

"You were right about that cigarette having an effect," continued Prince Boris. He fought to keep his eyes on the girl opposite, but they wandered to the two men at the nearby table. Both were staring at him with terrible intensity. But he rushed on, headlong, frantic to finish before anything should happen. "Ricardo is a dope peddler. For Kelly." He spat out the manager's name like a mouthful of spoiled food. "They're terrible men, Evelyn. I'm no angel myself, but I'm ashamed to admit having been connected even remotely with them and their doings. This is no place for you, dear girl. It'll get you in the end. Promise me for your own sake that you'll never come here again."

He finished with a breathless rush of words that left him panting and trembling, and looked at the two men. They were rising, in the right hand of each an ominous black shape that held death. On the other side of the room stood Ricardo, his handsome face disfigured by that insolent, despicable smirk that he thought was a smile. At the moment it seemed to hold contempt and triumph.

PRINCE BORIS summoned all his strength and rose. As straight and dignified as a lighthouse at sea he stood with lifted chin and steady eyes, waiting, waiting. He would have a soldier's death. They couldn't deprive him of that.

But the two men hurried past. Amazed, he followed them with his eyes. Ricardo was extending his cigarette case to a brazen flapper with wild hair and sheer, abbreviated dress. The strangers closed in on him, seizing him by either arm, and rushed him out of the supper club before enough people realized what was happening to cause a commotion.

Prince Boris sank into his chair, panting from the strain and mopped his beaded forehead.

"Officers!" he gasped. "After Ricardo." He laughed hysterically at the horrible quarter of an hour they had given him.

"Serves him right!" snapped the girl. She looked at him archly, dimpled chin cupped in her two lovely pink palms. "To resume our conversation: I will promise to stay away from here on one condition—that you give me your **real** reason for your request."

"There is only one," answered Masillof. His voice was still shaky; his face pale. The girl, of course, did not realize what a soul-torturing ordeal he had just gone through. "For your own good."

She pouted disappointedly.

"You're a lovely girl, Evelyn," continued Prince Boris gravely. "Very lovely indeed. But you won't keep your loveliness long here. Somehow places like this are ruthless thieves, of beauty, of mind, of soul. You don't belong here, dear girl. It's no place for respectable people who wish to remain so. And I believe you do. You're to wonderful not to. A beautiful woman who is bad is one of the greatest tragedies to be found in the world. Go back to Andy and live happily ever after."

"No." There was unexpected firmness in the small voice; tremendous decision in the firm chin. "When one has tasted champagne, water won't do."

"What do you mean?"

"What I said. I could never be happy with Andy. He's a nice boy and all that but he wouldn't do for me—now. I've met another—" she caught herself and the color flooded into her cheeks—"other men so much more wonderful."

Masillof could feel the blood pounding in his temples. His breath was coming in short quick gasps that did not satisfy. But somehow he could not force it deeper. An idea was battering at his reason with restraint-shattering blows. He trembled on the brink of the greatest conscious moment in a man's life. Could she mean—

"I love you, Evelyn!" he exclaimed suddenly. His emotions had escaped his control. "Have for a long time. I've wanted to propose to you. But I realized how impossible it was. It still is. I have nothing to offer a wife but a title and love. I don't even know that I could make a decent living for her. Of course, you have money. But I won't live on my wife. I couldn't, and keep my self-respect. So I can't propose marriage to you. I'm sorry. But I wanted you to know that I will always love you."

The girl sat silent a long time, her eyes luminous with tears. Then she blinked and sighed heavily.

"I appreciate that. Now I'm going to tell you something. And I am going to be as frank as you have been. I'm not an heiress. Almost every cent I possess is on my back this very minute. These jewels are all paste, like yours. A symbol of pretense. I'm an actress but I couldn't convince the managers of it. I got tired of it all and decided to get married. I've been coming here in the hope of meeting an eligible husband. One that I could love. And I have. You're it," she finished bluntly.

Her flaxen blonde beauty dazzled him across the table. Surely she could never be his.

"You would marry me when I have nothing to offer but love?"

"Yes. That's all I have to offer, too. But with only that we can help each other and make a go of it like the good sports I believe we both are."

THE END

WNYC Answers O. Henry's Quiz

NEW YORK'S Municipal Broadcasting Station Is "Voice of the City," Which Famous Author Sought in Vain

O. HENRY, master of the American short story, knew his New York as well as he did his Heart of the West. He carried his reader into the mansions of the rich and the slums of the poor. He gave New York a personality and once he set out to find the Voice of the City—an articulate, positive note to voice the tongue of New York.

He died too soon to fulfill literally that mission. Today the Voice of the City has become a recognized actuality. It has become physically, orally, officially vocalized. The Voice greets the world through the Municipal Radio Broadcasting Station, WNYC, on the roof of the Municipal Building, New York city.

There O. Henry's search would end. The sophisticated newsboy, pausing in the boisterous purveying of his wares, would answer the inquiring Mr. Henry by a definite gesture of his dirty finger:

"Voice of the City, yuh mean WNYC? Yeah, right across duh square on duh Municipal Building. Pape, mister, pape-alla-bout-duh-Mills-moiduh, pape?"

Cutting through the little park of the old city hall the inquirer would cross over to the building indicated and ascend to the twenty-sixth floor.

As a typical visitors' day it may have been the occasion of the second anniversary of the station, last July eighth. If you remember the story, O. Henry telling it in the first person, had left the beautiful Aurelia on the top step of the boarding house with the moonlight flickering over her nose through the ivy vines. He put the question to the newsboy, the policeman, the poet, and others as he sauntered along on the strange assignment.

"What is the Voice of the City?"

Now, stepping out of the elevator on the twenty-sixth floor of the Municipal building he would have been greeted by Mr. R. Bruce Lum, the program director of WNYC.

"Come right in and we'll show you the vocal chords at work. We are broadcasting tonight from our out-door studio," explaining as he led the way through the regular studio out under the veritable stars of heaven and to a stage decorated with the flags of various nations, palms and potted plants of all kinds.

"You are now listening to the Voice of New York as it comes from the snowy throat of that exquisite little lady with the moon-kissed hair. She is Miss Gertrude Lang. You probably have seen her in the stage play, 'Blossom Time.' She was one of the stars. The little lady who sits next to the big Boston fern is her companion artist, Miss Hollis Devanney, also of 'Blossom Time'."

"Ah! So the Voice of the City is soprano?"

"For the moment, yes, but you will now hear New York's Voice in a different key. That gentleman with the bit of kerchief showing in his breast pocket and the oversize trousers is Mr. Albert Goldman, commissioner of the department of Plants and Structures. By virtue of his office he is supervisor of the municipal Radio station. Notice his square-cut jaw, his calm gray eyes—is he not the personification of the city as he speaks with its voice?"

(*Continued on page 22*)

Above is the exquisite "Blossom Time" maiden, Miss Gertrude Lang, who helped WNYC celebrate its second birthday. At the left is the Aida Brass Quartette, which added a thrilling note to the "Voice of the City." Below, Mr. Albert Goldman, one of the city commissioners, speaks for New York to Radio listeners and tells of the station's plans.

There Is No Chaos

THE Editor's desk has been heaped full of all sorts of propaganda during the past month dealing with the "free wave length" situation. Some stories are obviously written under the pressure of pink-tea-addicted brains by bemuddled press agents and frightened persons. Others bear some weight.

So far as we can determine, there is no chaos in broadcasting. Confusion, where it has arisen, has been stamped out by offended listeners. Stations have learned that it pays to prevent chaos. In other words, business is going on as usual.

Some few "jumpers" have taken wave lengths which give them increased audiences and cause less interference than their former waves, assigned by the department of commerce. Other stations confiscated waves which caused heterodyning and interference, but in nearly every case these broadcasters have used good judgment enough to rectify their mistakes either by going back to their old channels or selecting more suitable ones.

There is little, if any, interference. There is no chaos. Letters from readers all over this country and Canada bear out this statement.

"The talk of chaotic conditions among broadcasting stations has no basis in fact," said A. T. Haugh, president of the Radio Manufacturers association after a meeting of the board of directors of the association recently at Cleveland. He said further:

"This association which is representative of the leading manufacturers of Radio apparatus in the United States believes that the future of the Radio industry is entirely in the hands of the listening public. Recent attempts to gain publicity by scarehead articles regarding 'chaotic conditions' are wholly unwarranted. There is only one thing in which the listening public is interested and that is what they get over the air. Everyone knows that the programs have been increasingly good and those who are conversant with the plans for fall and winter know that broadcasting instead of being less interesting, will be very much more so. The talk of chaos among broadcasting stations has no basis in fact.

"Practically all of the stations have agreed to 'stay put' until such time as suitable regulation has been provided. As a matter of fact the need of regulation is more theoretical than actual for the simple reason that the natural forces which are at work in the situation will automatically govern every broadcasting station for its own best interests."

A Good Creed for Stations

WE ARE in receipt of a list of microphone instructions which is given to all artists and performers who appear at KOA, General Electric station at Denver, before they are permitted to go on the air. Other broadcasters, some of them, have similar instruction sheets. All should have. The list follows:

"Programs start on the minute.

"Coughing, sneezing, clearing the throat, scraping the feet and other disturbances in the studios are annoying to listeners. The microphone is so sensitive that the slightest commotion may be transmitted to the unseen audience. Therefore, when the announcer calls, 'Quiet everybody,' kindly comply.

"Do not begin singing or playing until the announcer gives the signal.

"Unless you have memorized your music, be prepared with an extra copy, as you do not stand near the piano when singing.

"Do not get perturbed if the announcer motions for you to move nearer the microphone or withdraw, while singing.

"Very loud singing or playing is objectionable, as it detracts from successful broadcasting, often producing a shattered effect. The best choral effects are obtained when each person sings in a subdued manner.

"To pianists: Too much loud pedal spoils the rendition. The top of the piano should be left down, as the best broadcasting is accomplished when the instrument is closed."

RADIO INDI-GEST

The Commissary Clerk

The commissary camp clerk leads a Nomad sort of life;
He has to be a single man, he can't drag 'round a wife.
When one part of the country on his view begins to pall
He tells the firm about it and they move him, that is all.

He may be in the frozen North when winter hits amain,
And wish to go far southward in the sun to bask again;
Or if far South in summer, when the air is hot as Sheol
He wants to go up North again, a cooling breeze to feel.

In either case his wish is law, the firm to it attends.
They send his transportation, and his onward way he wends.
A hobo of the De Luxe kind, he rides the cushioned cars,
And will ride the Ether Liners when they open camps on Mars.

GEORGE
"One of Them"

In the second post, we find George has been busy manufacturing "anagrams." You see, a commissary clerk has lots of time on his hands between Radio programs and sales of Climax cut plug. The idea of an anagram is to take a perfectly good word or phrase, chop it up into letters, and then assemble it into other almost perfectly good words or phrases. Let's quote George:

"I find on transposing the letters of the name 'The Radio Digest' that they give us the information that it is either 'The Air Tides God' or 'The Air Tides Dog,' but as the same letters also tell us the 'Editor Hides Gat,' it might be well to use the first anagram for safety's sake. As for 'Dielectric' the best we can do for him, 'though the spelling may be not according to Webster, is to call him 'Criticel Ed,' which fits perfectly.

"But wait—turning to 'Radio Indi-Gest' we find in transposing the letters of its heading that it is made up of 'Idiot Readings,' so Mr. Indi-Gest conductor, just try to laugh that off."

Out of Season

A Spring Poem Written in the Fall

O Glorious Spring—'tis here, 'tis here.
In the Good Old Days 'twould mean—Buck Beer.
But now we must sit on the Orchard gate,
And wait 'till fall to percolate.
Till the cider gets hard and our voice gets strong,
Raring to sing—"The Winter Song"
In all probability you'll want to know,
What all this has to do—with Radio.
Now our answer to you we'll sweetly sing,
Nothin' a-tall, not a gol darn thing.

OLD KING TUTT (Hiz self)

FRANQUE'S FILOSOFEE

Blessed are the Radio artists for they shall get the air.

The Decline of Radio

My dear Old King Tutt (Himself): Thank you for dedicating a poem to me—it's the first time in my life such an honor was bestowed on me. And as for your grief about she-male Radio articles, I bear with you—There, there, pull yourself together—the salty tears will spoil the varnish on your Radio.

Do you remember the good old days when we snuck up in the attic and put the first set together? It had one tube and plenty of regeneration. Remember when we drilled the panel with an ice pick and what a horrible smell it made? And finally, when the last connection was soldered, we hitched it to the 300-foot aerial, extra long to be sure to catch the weak waves, and in the wee small hours, after much squawking, we heard—MUSIC—then a long agonizing silence—and then, heavenly bliss, a voice from far, far away, say, "Ki-Dee-Ki-Ay, PITTSBURGH testing." Then a terrible roar of static burst forth, and that was all we heard that night, but what a night, WHAT a night! And then we changed a few wires around and suddenly there was a supernatural brightness from the precious tube and zowie, $9.50 had gone up in smoke. Next morning, or rather that same morning, we hied to the Radio store, brushed aside a dozen clamoring customers and for cash on the counter received another tube, the last one in stock. Didn't hurt a bit, either, to part with the lucre. Do you remember? You tell 'em!

AND NOW! "What deep secret would you like to know about your favorite broadcast star?" "Is she a blonde?" "Does she Charleston?" "I think she has a darling voice—I bet she is little Goldie Locks from Red Bank, I recognize her adenoids." "The next program will be under the auspices of the National Compact Company—a beautiful furlined powder puff will be given to the first gentleman telling us what Slicko has done for his hair." "Are you in love? Then listen in on Aunt Sniffly's Heart Talks to Girls."

Enough of this. "The stars are setting and the caravan starts for the dawn of nothing." Let's go, OLD KING TUTT, we're done!

THE THIRD TROMBONE PLAYER.

Sure, Talk Is Cheap

Dear Indi: I note with national pride and satisfaction that some of the world's best Radio announcers are of Scotch extraction, for example, Bill Hay of WGN and WLIB, Pete MacArthur of WOC, Graham McNamee of WEAF, and Edward Davies of WIP. HOOT MON

Modern life has its complexities. Take for instance the case of Chief Whitecloud, full-blooded Cherokee from Oklahoma, who at WHN recently broadcast "Eli Eli" as a saxophone solo. ***INDI***

The Angelus

Condensed

BY DIELECTRIC

At last we broke through the interference to catch something of the program features presented from Station WTAM, Cleveland, a thing attempted many times before during the past few weeks to no avail. The Collegian Serenaders are quite capable of providing entertainment calculated to take some of the frost out of the air these bitter cold evenings. You almost forgot to curse static and open pores while these songsters are performing. Then the Euclid Beach Park orchestra does its best (which is a good deal) to keep your dials steady until they complete their share of the Willard broadcasting schedule.

Station WEAF, New York, and the "chain gang" allied with it on Sunday evenings, carry the sweet tenor voice of Allen McQuhae—familiar to thousands of Radio listeners—in songs made popular years ago. It is not difficult to understand why the Radio public have formed an attachment for Mr. McQuhae, for not only has he the art to produce tones of rare charm, but so much expression accompanies them as to give life to the words of the songs. This regular feature during the summer months is maintaining great goodwill toward Mr. Atwater Kent, the sponsor of these and the regular winter concerts.

Station WJJD, Mooseheart, Ill., apparently has lost none of the goodwill earned by this station during the time it has been on the air. Its programs have had an appeal outside of the members of the order of Moose (by which it is owned) to an extent probably equal to that enjoyed by Station WOAW, operated by the order of Woodmen. I have found in most of their programs features worthy of favorable comment and only recently listened to a tenor soloist presenting a group of well-chosen songs pleasingly rendered. It is the season for leniency with announcers. They have a difficult job at all times and especially when the mercury is awaiting the zero hour to go over the top. When fall comes there will be a few darts scattered in this column.

There is nothing in the programs broadcast from Station WEBH, Chicago, to cause undue strain on the mental faculties of anyone; there is much to relieve tired nerves and fagged brains. This station should carry to distant points even through the season's barriers with its entertainment from the Uptown theater, popular artists' programs and the zestful frolic hour of a late evening schedule. There was something of a more definite nature I had prepared to state with reference to this station but that has perspired away forever.

Two features from Station WLW, Cincinnati, fixed themselves for a showy entrance on this page and must be given space right here. One of these is the concerts given by the Formica symphony orchestra, an organization receiving considerable notice in these columns in months past due to the distinctly favorable impressions made on this reviewer. The other is the organ recitals given Sunday evenings.

Then, too, it is a real pleasure for me to draw attention to the well-planned series of all-star artist concerts coming from Station WLS, Chicago. Don't have any hesitancy in tuning to this station during the hours when these features are on the air, because the old trite saying revives meaning and you will feel you lost much through hesitating. To date the artists have measured up to a high standard of excellence and no one listening to the little symphony orchestra can refrain from unstinted praise of that body of musicians.

DAMROSCH IN SERIES ON 13-STATION CHAIN

SYMPHONY LEADER UNDER AUSPICES OF FANSTEEL

Balkite Makers Provide Concerts to Be Given Saturday Nights Beginning October 23

NEW YORK.—Walter Damrosch is to be on the air regularly over the WEAF chain!

The Fansteel Products company, manufacturers of Balkite Radio power units have just completed arrangements for this great event in the history of broadcasting. Beginning on October 23 they have arranged for Mr. Damrosch and the New York Symphony to broadcast a regular series of concerts over thirteen stations in the chain of stations of the Broadcasting Company of America.

These concerts will be given every Saturday night at 9 p. m., Eastern time, over Stations WEAF, New York; WEEI, Boston; WGR, Buffalo; WFI, Philadelphia; WCAE, Pittsburgh; WSAI, Cincinnati; WTAM, Cleveland; WWJ, Detroit; WGN, Chicago; WCCO, Minneapolis-St. Paul; KSD, St. Louis; WDAF, Kansas City, and WOC, Davenport.

First Series of A-1 Symphonies

While Mr. Damrosch and his orchestra have been on the air before, this is the first time that any attempt has been made to broadcast a regular series of symphony concerts. The program is one of the most ambitious ever attempted by any broadcaster, and in effect makes available to any owner of a Radio set a symphony season in his own home.

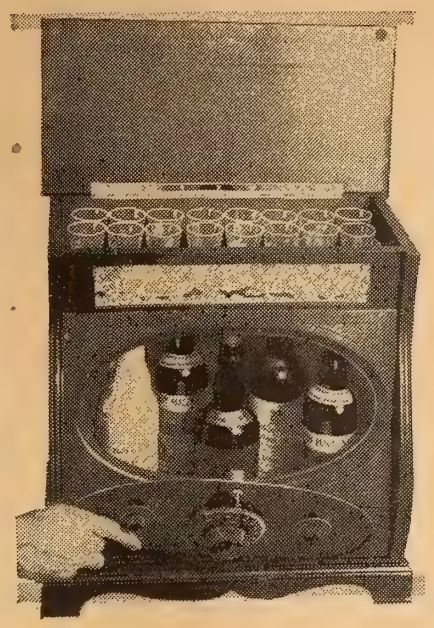
The first concert will be a full symphony program by Mr. Damrosch and the orchestra. Thereafter the concerts will be arranged as far as possible in pairs. Each symphony program will be preceded by a piano recital by Mr. Damrosch alone.

Will Have Educational Value

In these recitals he will discuss, explain and play important parts of the programs of the following week. By this method it is expected that the programs can be made not only of the greatest entertainment value, but be made to constitute a liberal education in music as well.

Mr. Damrosch is too well known to require comment. It is not surprising that he should be the pioneer in symphonic broadcasting, for he was one of the pioneer orchestra leaders in the country. Perhaps no other person has done as much as he in the development of music in America. He grew up with American music, and to many his name is synonymous with its growth. Today he is one of the most popular and best known of conductors.

For Wet Waves



An interior view of F. R. Hoyt's "Wet Wave Receiver" divulges its innermost secrets. He built the pseudo Radio set for a friend of his who wanted a receiver with a "kick in it." His order was filled.

KPO Duplicates Famous Chimes

SAN FRANCISCO.—A set of chimes, duplicates in tone of the famous Westminster Chimes of London, have been added to the equipment of Station KPO. The chimes will be rung three times each day, at 8 a. m., 6 p. m., and 8 p. m., Pacific time, on week days and at 6, 8 and 10 p. m. on Sundays.

Famous Oriole Returns To Ether and Friends

Russo-Fiorito Orchestra on WIBO with New Contract

CHICAGO.—They're back on the air! Have you heard them yet? Who—don't you know? Why the Oriole orchestra, of course! Yes, Dan Russo and Ted Fiorito's Oriole is back on the air exclusively through WIBO, broadcasting nightly by remote control from the new Aragon ballroom, the most wonderful and costly ballroom in the world.

WEBH listeners regretted recently when they heard the Oriole was leaving them, but they are now happy to learn that the Russo-Fiorito organization, manufacturers of tones and harmony sublime, can be heard simply by tuning to WIBO.

The contract signed by the Oriole to play at the Aragon is reported to be of a record-breaking amount.

Six microphones, to pick up each group of instruments correctly, and a special speech amplifier tended by an operator always on duty, are employed at the Aragon ballroom. WIBO is owned jointly incidentally, by Nelson Brothers and the Russo-Fiorito Orchestral exchange, so that the Oriole is really on the air from its own station.

STAGE SET FOR RADIO WORLD'S FAIR AT N.Y.

Half Million Attendance by Public Is Expected

NEW YORK.—Radio as an industry will demonstrate its rightful assumption of a place of prominence in American "Big Business" in connection with the Radio World's Fair during the week of September 13. With every inch of space sold, for the greatest showing of new Radio receivers and accessories ever held under a single roof, the Radio World's Fair will not be simply the most impressive Radio exposition ever held, but it is confidently believed that it will be the largest and finest industrial show ever conducted in the United States.

Madison Square Garden will be a gala scene as the doors are opened.

Exhibits and their decorative settings will represent an outlay of $1,000,000. They will be seen by an estimated 500,000.

DECLARE AMERICAN SOCIETY NOT TRUST

DEPT. OF JUSTICE GRANTS MUSIC MEN CLEAN BILL

But, Regardless, Broadcasters Won't Like Any Better to Be Squeezed for Millions

By L. M. Lamm

WASHINGTON, D. C.—An investigation has been made by the department of justice into the activities of the American Society of Composers, Authors and Publishers, which came into considerable prominence during the past session of congress in connection with copyrighting music over the Radio. The department has the following to say in connection with the investigation:

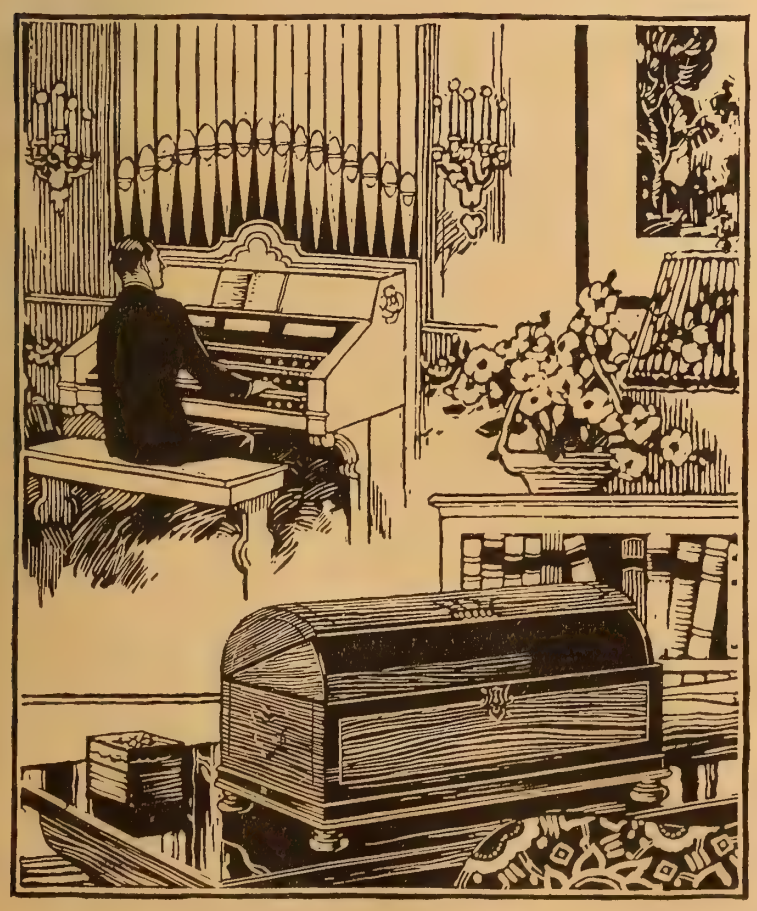
"As the result of a large number of complaints which were received by the department of justice with reference to the so-called music tax collected by the American Society of Composers, Authors and Publishers from the owners of motion picture houses and of other public places of entertainment where popular music is played, a thorough and comprehensive investigation was made of the organization and operations of that society. Several special agents of the bureau of investigation were engaged almost continuously for a period of about two years.

"After all the facts elicited by the department's investigation had been very carefully considered by the department, the society has been advised that the department saw no reason for proceeding against it under the antitrust laws on account of its operations.

Lady Likes KGW Concert So Well She Sends $25 Check

PORTLAND, Ore.—No ordinary sense of appreciation prompted an enthusiastic listener to express her gratitude for a recent KGW entertainment by enclosing a check for $25 to be used, at her special request, for a dinner for the artists and announcer responsible for the program.

Hundreds of letters and post cards recording the applause of the listeners for programs which they adjudged exceptionally good are received, but this is the first case that the listener actually attempted to say it with dollars.



The Spell of Radio Magic Unbroken!

HERE is the Radio Sensation of years—the Velvet "Jewel Case". Its grace of contour and quiet finish naturally blend into the most tasteful surroundings and reproduction is so complete and natural that you lend yourself to the full enjoyment of the melody *"just as if you were there!"* Sales will reach unprecedented volume—for the public wants it! Write or wire for dealer or jobber franchise quick!

SHORT WAVES

By Marcella

(Continued from page 2)

Gosden, but then the shorter member of the duo makes up for this deficiency by added avoirdupois and a talent for playing the violin. Charlie Correll started off in life at Peoria, Ill., and Freeman Gosden cried out for the first time in Hatteras, N. C. They eat, sleep and live music, are both about 30 years of age, very sentimental and single. But which will you pick?

* *

My, that was a large order for one just back from her vacation. Now, I'll have to be brief to cover the many inquiries which have piled up in my absence. A moment ago I spoke of Jerry Sullivan and his fall plans. Hary Geise, our inimitable Harry, has been put at the helm of the Rainbo-Calumet station, WQJ, and a very good broadcaster he is making of it. One of his favorite teams at the present time is that of Paul Small and Joe Verges, a more or less recent harmony combination. Both are composers of song hits of renown, and Paul, it will be remembered, was the partner several years ago of Jack Little. The Small-Verges act can be heard Tuesday, Thursday and Saturday evenings on the late WQJ program.

* *

Frank, from New England, wants to know if Nell Cantor, who sings over WEEI, lives up to his expectations. My friend Lewis Whitcomb of WEEI maintains that should any gentleman see Nell, he surely would never be satisfied until he had her telephone number and home address. She is a Boston girl, born about 22 years ago in the Dorchester section not far from her present address on Hollander street. Now, Frank see if you can find her. Naturally musically inclined and possessing a rich contralto voice, she studied the piano. About five years ago while playing at clubs, parties and entertainments, Nell met an accomplished girl by the name of May Allen. Soon thereafter "Allen and Cantor" were billed on the eastern vaudeville circuits as a singing act. For about the same time Miss Cantor has been the main support of her parents, and nowadays she finds herself a busy girl with broadcasting at WEEI and all. She is a favorite accompanist for such celebrities as Irving Berlin and Pat Rooney when they appear at the Boston Edison station. To describe her, I shall say that she is an attractive little brunette, about 5 feet 4 inches tall, with a dark complexion, dark brown eyes and very

(Continued on page 11)

Radically new Circuit greatly increases Power and enhances tone Quality

The Chelsea Truphonic Six utilizes an entirely new and different system of audio amplification — a system as far in advance of that heretofore employed as the orthophonic principle in talking machines is superior to former phonograph reproduction A power tube may be used in the last stage, thus obtaining tremendous amplification. Tone quality is stabilized while the whole tone range is increased to its full limits, enabling you to enjoy the maximum capabilities of the best loudspeaker.

MISS RADIO FOR 1926 PROVES A "MISSUS"

RADIO WORLD'S FAIR PICKS BEST LADY LISTENERS

Mrs. O. B. Harrauff of Princeton, Ill., Wins—Flossie Erickson of Bloomington, Ill., Again Second

NEW YORK.—America's "Queen of Radio" for 1926-7, is Mrs. Lotta Harrauff of Princeton, Ill.

Announcement of the winner in the annual "Miss Radio" contest was made by G. Clayton Irwin, Jr., General Manager of the Radio World's Fair, at which she will be guest of honor, September 13-18. Not alone was her DX record considered, but likewise an essay.

"Miss Radio," or rather "Mrs. Radio," is the wife of O. B. Harrauff, general agent of the Franklin Life Insurance company and postmaster at Princeton for ten years.

Mrs. Harrauff has tuned in stations in 125 American and 12 Canadian cities, and has also European, Cuban, Mexican, and Porto Rican stations to her credit. Mrs. Harrauff used a five tube receiver and explains her success by stating:

"We are careful to keep all batteries fully charged at all times, believing that the best results will come only from full batteries. We find that some of the so-called static is low batteries or corrosion."

She has best results on low wave stations by using a buried antenna seventy-five feet long.

Flossie Erickson Second Again

Mrs. Flossie E. Erickson of Bloomington, Ill., is awarded second prize again, thus defending her honors of last year. She will receive a special silver loving cup. Caroline Lee, of Clearwater, Fla., wins third prize, which also carries with it a silver cup.

Honorable mention for extraordinary records of reception and good essays submitted is given Mrs. J. Nelson Barger of Albany, N. Y., Edith Amelia Smith of Baltimore, Md., Mrs. Joe Foster of Hammond, Ind., Helen Cheeseman of Clarkston, Mich., Viola Statler of Brooklyn, N. Y., and Mrs. Abba Lindsay McCumber of Cleveland, O.

YOUNG WOMAN RISES TO BIG KOA POSITION

Margaret L. Bonar

DENVER.—Margaret L. Bonar, widely known in newspaper and advertising circles and formerly advertising manager of one of Denver's largest retail department stores, has been appointed to head the News Bureau at KOA, General Electric station here.

Before joining the ranks of Radio, Miss Bonar, who won her degree at the University of Chicago, was said to be the youngest advertising manager in the West. She chose a publicity career before reaching her teens while managing the advertising for a chain of music stores in the East, operated by her father. Book reviews, newspaper and magazine stories and special advertising campaigns, during the summer months, were her principal sources of revenue while in college.

Foremost of her hobbies are ice-hockey, deep-sea fishing and cultivating roses.

Miss Bonar succeeds Frank J. McEniry, who has resigned to re-enter the newspaper field.

SHORT WAVES

By Marcella

(Continued from page 10)

black hair cut with a beautiful boyish bob.

* *

Completing my answer to E. V. A., I do not know where Clem Dacy is, nor where Clyde Hager has gone since his departure from KFQZ, Hollywood. As for the Cotton Pickin' Twins, formerly of WSMB, I can't say whether you will hear them soon again or not from the Saenger-Maisson Blanche station. Both are poor lads who took up broadcasting for a pastime. Dominick Barocco, the banjoist, is about 25 years old, married, and a telegraph operator. Billy Christen, the accordion player, is about 55 years old, married, and a truck driver.

* *

No, J. M. R., Harry Snodgrass is not behind the bars, but still behind the footlights. He was in Chicago several months ago doing the local theaters. Queer how rumors start.

* *

Jean, Louella et al., here's all the very most recent about Lew Farris, the "Eiffel Tower of Radio," who is only 6 feet 8 inches tall, is just finishing a month's visit to "I-o-way" where he and his wife have been staying at her parents' farm. Having been a native son of California, Lew's great height was against him, so when he married the second time he chose a nice Iowa girl with a farm where he could go out and stand up in the corn fields and not feel lonely. He is slender, but there is lots of him; he is long featured, has brown eyes hidden behind huge tortoise shell rimmed spectacles, and possesses some dark brown hair. He is only 35 years old, so this ballad singer will no doubt be huge by the time he grows up. Hobbies and habits: loves sit around and gossip, likes to smoke, admits he is quite a "home man." He is making records under contract for Pathe, and when on the air he travels under the auspices of the Ted Browne Music company, 218 S. Wabash Ave., Chicago.

* *

Sue and Margie, both of Milwaukee, your favorite, Edwin Kemp has been acting as studio director of WSWS, Chicago, during the summer months. I think he will return to WHT in the fall. Henry Kays of WHT? I think you are wrong about the name, Sue. WHT has never heard of him.

* *

That howling noise you hear on the late WGY programs is not in the transmitter. It's simply Kolin D. Hager, studio manager and chief announcer, training his two recently presented twin baby girls for a sister act. Mrs. Hager is doing well.

* *

F. L. J.: Chubby Parker, who is often heard playing the banjo and singing negro songs on Saturday evenings from WLS, is middle aged, short, and has gray hair. He is accompanied at the piano by his daughter, who is about 17 years old, rather plump, and has blonde hair and blue eyes. Kern Aylward, of WSAI, is a very good looking Irish boy with a charming personality and a wife. Works in front of a mike just as if it were an audience. Represents Irving Berlin in Cincinnati.

* *

Irene: I told so much about everyone at WHT in our July 1 issue, that I hate to repeat so soon. No, neither Jean nor Al are married. We agree with you that both are peaches.

* *

Jane: Look for the MacDowell sisters soon at WFAA. Both are married. Yes, I think they do compose some. No, "Roses of Picardy" is by Hayden-Wood and "To a Wild Rose" is by Macdowell, but note the difference in spelling.

* *

"Skinney": Herb Feierman, of WOAW note, is 30 years old, good looking, an excellent pianist, and married of course. Arthur Randall, likewise of WOAW, is about 32 or 33, and handsome. As to his being married or single, I'll report later. Val McLaughlin was last heard from WLS, Chicago. I'll tell you some day where Gene Rouse is. So you would like to know who I am, too? Really—well, I must disappoint you. Sorry.

* *

Repeat numbers next time will include Norman Brokenshire of WJZ, Mac Ohman of many places, Ford and Glenn, also Nubs Allen of WLS, George Hay of WSM, and John Schilling of WHB. I couldn't cover the ground this time.

* *

What deep secret would you like to know about your favorite broadcast star? Drop me a note, girls and boys, and I'll do my best to answer here. MARCELLA.

WOMANS' PROGRAM INDEX

Monday

Atlantic	Eastern	Central	Mountain	Pacific	
10:30 a.m.	9:30	8:30	7:30	6:30	WWJ (352.7m-850kc), Tonight's dinner.
10:45	9:45	8:45	7:45	6:45	WTAG (545.1m-550kc), Marjorie Woodman, nurse.

KOA BROADCASTS THRILLING HIL

HIGH LIGHTS OF THE AIR

SAN FRANCISCO'S municipal organist and official organist of Station KPO, Uda Waldrop, has returned from a successful tour of European Radio stations. He studied particularly broadcasters of London, Paris and Rome. A special program of Mr. Waldrop's own compositions was given by the artist and his wife, Marguerite Raas Waldrop, soprano, over 2LO.

The prize Radio drama, "The Night Herd," will go out over the ether again Saturday, September 4, from KMOX. The invisible curtain rises at 9 p. m. Central Standard time. Not only is the play very much worth hearing but the KMOX players have developed perfect harmony of movement and good Radio technique.

Around hairpin curves with steep drops automobiles will dash in the hill-climbing races up Pikes Peak, Labor day, September 6. Tune in at 10:30 a. m., Mountain time, for KOA, Denver. Complete reports will be relayed from the summit to Denver.

Four Monday evening recitals by Joseph F. Whittemore, Golden Voiced Tenor from the Southland will be featured by WRVA during the month of September. Mr. Whittemore has a remarkable voice and is a splendid musician. He is already a favorite with the Virginian Radio audiences.

Wednesday evenings at WGN, the boy, Aladdin, rubs his magic lamp and through the medium of music the listener is transported to far-off lands. One moment he is dreaming with Schubert of his "Unfinished Symphony," or he treks across the sands to the tune of "The Caravan." The work of preparing these programs falls on the capable shoulders of Henry Selinger.

The buzz-z-z-z of the bee may well be taken for static in the air, but those who will listen for a minute will find it is only the beginning of one of WTIC's newest mystery features broadcasting Fridays at 7:15 p. m., Eastern Standard time. "Fiddle an' Bee" has made a big hit with the Travelers Radio fans, who eagerly await the weekly return of this gifted violinist.

Otto Rindlisbacher, Swiss accordionist of Rice Lake, Wis., and W. W. Wait, old time fiddler, of Dallas, Wis., will visit WCCO and give an old fashioned concert Saturday, September 11. Staff artists will help to give the atmosphere of an early American party.

Monday, the 13th, marks the fourth anniversary of Station WHAZ. The Domino Club orchestra and features will give the birthday features. A memorial tribute will go over the ether to the late Col. Washington A. Roebling, famous as the builder of the Brooklyn bridge, who was the donor of the Radio equipment of this station.

The regular weekly broadcast at KHJ of Queen Titanis and the Sandman on Tuesday, September 14, marks the beginning of the fourth year of this continuity. As a result of this broadcast work little Queen Titania is now being starred in a series of motion picture productions. The fairyland continuities are all written by Queen Titania's father, who also takes the part of the Sandman in the script. Uncle John Daggett is the aerial observer.

KOA BROADCASTS THRILLING HILL-CLIMBING RACES ON PIKES PEAK

HIGH LIGHTS OF THE AIR

SAN FRANCISCO'S municipal organist and official organist of Station KPO, Uda Waldrop, has returned from a successful tour of European Radio stations. He studied particularly broadcasters of London, Paris and Rome. A special program of Mr. Waldrop's own compositions was given by the artist and his wife, Marguerite Raas Waldrop, soprano, over 2LO.

The prize Radio drama, "The Night Herd," will go out over the ether again Saturday, September 4, from KMOX. The invisible curtain rises at 9 p. m. Central Standard time. Not only is the play very much worth hearing but the KMOX players have developed perfect harmony of movement and good Radio technique.

Around hairpin curves with steep drops automobiles will dash in the hill-climbing races up Pikes Peak, Labor day, September 6. Tune in at 10:30 a. m., Mountain time, for KOA, Denver. Complete reports will be relayed from the summit to Denver.

Four Monday evening recitals by Joseph F. Whittemore, Golden Voiced Tenor from the Southland will be featured by WRVA during the month of September. Mr. Whittemore has a remarkable voice and is a splendid musician. He is already a favorite with the Virginian Radio audiences.

Wednesday evenings at WGN, the boy, Aladdin, rubs his magic lamp and through the medium of music the listener is transported to far-off lands. One moment he is dreaming with Schubert of his "Unfinished Symphony," or he treks across the sands to the tune of "The Caravan." The work of preparing these programs falls on the capable shoulders of Henry Selinger.

The buzz-z-z-z of the bee may well be taken for static in the air, but those who will listen for a minute will find it is only the beginning of one of WTIC's newest mystery features broadcasting Fridays at 7:15 p. m., Eastern Standard time. "Fiddle an' Bee" has made a big hit with the Travelers Radio fans, who eagerly await the weekly return of this gifted violinist.

Otto Rindlisbacher, Swiss accordionist of Rice Lake, Wis., and W. W. Wait, old time fiddler, of Dallas, Wis., will visit WCCO and give an old fashioned concert Saturday, September 11. Staff artists will help to give the atmosphere of an early American party.

Monday, the 13th, marks the fourth anniversary of Station WHAZ. The Domino Club orchestra and features will give the birthday features. A memorial tribute will go over the ether to the late Col. Washington A. Roebling, famous as the builder of the Brooklyn bridge, who was the donor of the Radio equipment of this station.

The regular weekly broadcast at KHJ of Queen Titania and the Sandman on Tuesday, September 14, marks the beginning of the fourth year of this continuity. As a result of this broadcast work little Queen Titania is now being starred in a series of motion picture productions. The fairyland continuities are all written by Queen Titania's father, who also takes the part of the Sandman in the script. Uncle John Daggett is the aerial observer.

YOUNGEST theater orchestra leader in the country is David Miller, left, who is only 21. This enterprising young man is also a graduate of the University of Wisconsin. When he finished college he took his orchestra on a tour of the Orient. Now directs the new Tower theater orchestra heard regularly over Station WHAD, Milwaukee. Two roof garden favorites of the McAlpin hotel are Norma Leyland and Alma Keller, below. Their voices harmonize so well together they are often chosen to entertain over the microphone of this hotel, WMCA. To the right is Pattison Coates, originally a popular Radio star of New York city where he sang over WEAF and WJZ. At the present his baritone voice is charming midwest listeners.

FARMERS' PROGRAM INDEX

The new Tower cone

—majestically sweet

$9.50

LIKE the grand cathedral organ—mighty monarch of all musical instruments—the new Tower Cone runs the entire gamut of tone, bringing to you each note, majestically sweet and clear—with the variety of color and shading demanded by the real musical critic.

Due to the exclusive direct-drive unit with its eight points of contact from unit to cone, the new Tower Cone gives not only a complete range of tone, but a beauty of "voicing", and a *responsiveness* to changes of tempo, long sought but never until now achieved.

Your Dealer Will Be Glad to Demonstrate

22½ Volt un-acid everlasting rechargeable **"B" STORAGE BATTERY** **$2.95** Includes Chemical

45 volts, $5.25; 90 volts, $10.00; 112½ volts, $12.50; 135 volts, $14.75; 157½ volts, $16.80. Truly the biggest buy today. Easily charged on any current including 32-volt systems. Any special detector plate voltage had. Tested and approved by leading authorities such as Popular Radio laboratories. Over 3 years sold on a non-red tape 30-day trial offer with complete refund if not thoroughly satisfied. Further guaranteed 2 years. Knockdown kits at great savings. Complete "Hawley" "B" battery charger, $2.75. Sampel cell, 35c. Order direct—send no money—simply pay the expressman cost on delivery. Or write for my free literature, testimonials and guarantee. Same Day shipments. B. Hawley Smith, 817 Washington Ave., Danbury, Conn.

FRED W. STEIN

Steinite AERIELIMINATOR

Eliminates Outside Aerial

New principle does away with the troublesome outside antenna. Better, clearer reception, especially for summertime. Reduces static and outside noises. Improves reception of any tube or crystal set. If you don't find it improves your set wonderfully, get refund at once.

$1 Postpaid Anywhere **10-Day Free Trial Money-Back Guarantee**

No More Outside Aerial, Once You Install It

No more corrosion from the weather. Free from nearness of neighboring aerials and breakdowns that stop reception. No tools needed, no extra ground or tube—takes the place of your present aerial. Nothing to get out of order. No need now to delay owning a radio, because of aerial trouble. Operate set in any room wired for lights. Attach and turn on—uses no current. Guaranteed not to use any amount of electricity. Two big banks say we are reliable. Order today on money-back guarantee, if not delighted. Dollar bill will do. ORDER TODAY. Ask for radio literature.

Order Yours Today

Attaches to light socket — uses no current. Make comparison now with your present aerial at my risk.

STEINITE LABORATORIES
Desk 261 Atchison, Kansas

Perhaps you, too, can cut your "B" battery costs in half. Just follow the chart. It gives you the secret of "B" battery economy.

THOUSANDS of people have made the discovery that Eveready "B" Batteries, when used in the proper size, and on sets equipped with a "C" battery*, are a most economical, reliable and satisfactory source of radio current.

Here is the secret of "B" battery economy, reliability and satisfaction:

On all but single tube sets —Connect a "C" battery. The length of service given below is based on its use.*

On 1 to 3 tubes—Use Eveready No. 772. Listening in on the average of 2 hours daily, it will last a year or more.

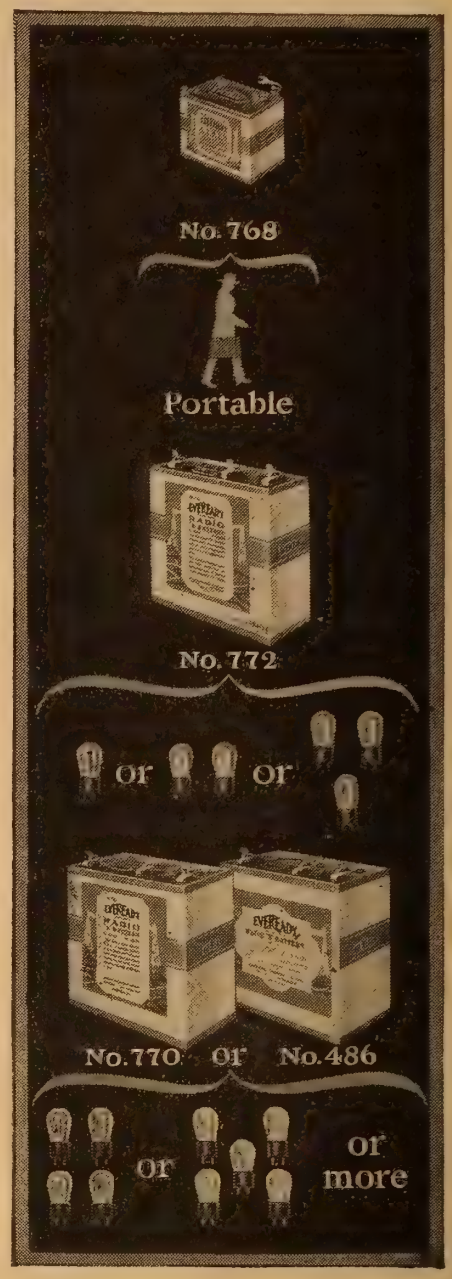
On 4 or more tubes—Use the Heavy-Duty "B" Batteries, either No. 770 or the even longer-lived Eveready Layerbilt No. 486. Used on the average of 2 hours daily, these will last 8 months or longer.

These figures are based on the average use of receivers, which a country-wide survey has shown to be two hours daily throughout the year. If you listen longer, of course, your batteries will have a somewhat shorter life, and if you listen less, they will last longer.

Eveready's give you their remarkable service to the full only when they are correctly matched in capacity to the demands made upon them by your receiver. It is wasteful to buy batteries that are too small. Follow the chart.

*NOTE: A "C" battery greatly increases the life of your "B" batteries and gives a quality of reception unobtainable without it. Radio sets may easily be changed by any competent radio service man to permit the use of a "C" battery.

EVEREADY Radio Batteries *-they last longer*



In addition to the batteries illustrated, which fit practically all the receivers in use, we also make a number of other types for special purposes. There is an Eveready Radio Battery for every radio use. To learn more about the entire Eveready line, write for the booklet, "Choosing and Using the Right Radio Batteries," which we will be glad to send you on request. There is an Eveready dealer nearby.

Capacity—50 milliamperes 210 volts
WILL OPERATE ANY RADIO SET UP TO 12 TUBES

A Radigon Message

To the purchaser who puts quality and performance before price. To the one who must think twice and figure closely NOW IS YOUR OPPORTUNITY TO BUY A RADIGON B ELIMINATOR DIRECT FROM THE MANUFACTURER AT THE JOBBER'S COST.

Satisfactory B current supply units can only be made in a factory having adequate laboratory facilities. Research is necessary and in the RADIGON laboratories Radigons are made with clock like precision. Chokes, condensers and transformers are made in such a way as to insure the output current constant and the reception clear and with ABSOLUTELY NO HUM.

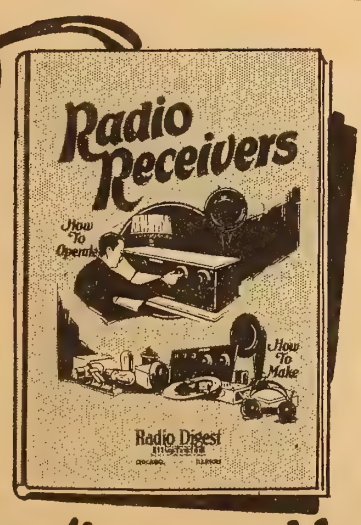
From the Manufacturer to You, $18, with Raytheon Tube

F. O. B., Chicago

Send your order now enclosing a money order for $18.00 or if you wish you may send half ($9.00) and pay the balance of $9.00 on delivery. If not satisfied with the Radigon within five days you are at liberty to return it at our expense and your money will be refunded immediately. YOUR OPPORTUNITY TO ACT IS **NOW.**

American Radigon Laboratories
559-561 W. Monroe St., CHICAGO, ILL.

The new Radio Book



How to ≈ *understand radio, assemble circuits, improve reception, operate sets, and is your Radio reference book.*

The greatest assemblage of facts and hints, from actual everyday practice, ever gotten together. Edited by the technical staff of Radio Digest, it supplies the demand for a book covering every phase of Radio. Starts at the beginning with simple explanation of Radio reception, with technical explanations of the different parts and leads right on to the more advanced instruction. A complete handbook serving as a ready reference in the Radio field. It gives suggestions on parts and sets which will prove to be a money saver. The full size template and working instructions for an efficient 7-tube super-het are essentially an important part of this book. Special chapter is devoted on "How to Operate," which gives detailed information on the operation of many well-known sets.

News Briefs

(Continued from page 3)

York, will be heard beginning early in September from not alone WLWL, but WNAC of Boston and WEAN of Providence as well.

Old Cow Bell Rings in WJAG-ites

NORFOLK, Neb.—A Vermont cow bell reputed to be over a century old and presented to WJAG here by admiring listeners, is now used to "ring in" new babies born in the family of WJAG. A list of from ten to twenty babies' names is read from the station every day.

Tampa Links With Winter Park, Fla.

WINTER PARK, Fla.—The Central Florida Broadcasting Station, Inc., operators of WDBO at Rollins college, on September 15 are taking over the operation as well of WDAE, the Tampa Times station, whose power will then be raised to 1,000 watts. A wire link is planned to exchange programs between the two. William Fay, musical director and announcer at WGY, has been engaged to manage WDAE.

* *

Since the recent linking by leased wire of the Georgia State College of Agriculture at Athens, Ga., with WSB, the Atlanta Journal station, talks for farmers by agricultural experts are now being broadcast daily.

* *

The Oriole orchestra, under the direction of Dan Russo and Ted Fiorito, with special symphonic arrangement by Victor Young, is now broadcasting a special dinner concert program every Friday evening from 6 to 8, central daylight saving time, from Station WIBO, Chicago.

* *

WBBM, the Stewart-Warner Air theater, Chicago, has announced its plan behind alterations now being made to increase the station's power from 1,500 to 10,000 watts. The added power, according to Leroy Clausing, will be used chiefly in added modulation to make the quality of transmission more perfect.

* *

The long arm of WBZ, Boston, was instrumental, it has just been learned, in saving the lives last winter of several hunters and trappers isolated without food on Southampton Island at the extreme northern end of Hudson Bay. Another Hudson Bay Company post heard the appeal broadcast and rushed food to the men.

* *

"Fifteen Minutes With Stamp Collectors" is being broadcast weekly on Thursdays by Norman Shepard over KTAB, Oakland, Calif. The talks begin at 9 p. m. Pacific time.

Farm News Digest on WTIC

HARTFORD, Conn.—Farmers of all kinds, dairy, poultry, truck, etc., will be pleased to hear that the Farm News Digest, prepared by the U. S. department of agriculture, is being broadcast from WTIC every Thursday at 6:30 p. m. Eastern time.

WBBM's Mr. X Proves To Be Famous Lee Sims

And 2,004 Out of 2,037 Listeners Guess Right

CHICAGO.—"Mr. X" is Lee Sims, pianist, an air artist of national reputation. This announcement by WBBM, the Stewart-Warner Air theater brings to a conclusion a personality test conducted by the station, the results of which have amazed the members of the staff. When Mr. Sims signed a year's contract ten days ago, his identity was concealed from the listeners and they were asked to send in guesses. Out of 2,037 replies received by telegram, mail and telephone, 2,004 were correct.

The test was conducted in an effort to determine whether it is possible for a Radio artist to "get over" his personality, handicapped as he is by the fact that he is invisible to his audience. It has been contended that Radio artists cannot become as well known as players on the stage and screen because of this fact.

THORDARSON

B-ELIMINATOR PARTS

The singer who exerts every last ounce of energy invariably makes his effort manifest in thin, strained tones.

The tubes are the larynx of your radio set. Unless they receive a sufficient and constant supply of energy the set will be faulty in its reproduction.

A B-supply built with Thordarson transfomers and chokes will give you that reserve power so essential to good reproduction. Supplies a constant voltage to the plate regardless of the current drain. Sufficient voltage to operate power tubes UX 112 and 171. Actually eliminates the noises and distortion resulting from faulty B batteries.

Complete assembly instructions furnished with every transformer.

For sale at all good dealers or by mail.

$50 to $250 a Week In Work that is Almost Romance!

Get this Free Radio BOOK

Now it's easy to hold down the good jobs of Radio—by these new tested methods I train you just as employers would have you trained. If you're earning a penny less than $50 a week, clip coupon now! Send for AMAZING FREE BOOK telling all about the great new BIG-PAY industry, Radio. Thousands of openings, good positions everywhere **Free Book gives all the facts.** Learn to be a Radio Expert, and draw down big pay for the easiest and most fascinating work in the world.

J. E. Smith, Pres.

I'll Train You Quickly At Home To Be A Radio Expert

Stay home and hold your job—I'll bring your training to you. You learn quickly and easily in your spare time without leaving home. **I guarantee** to train you successfully or refund your money under the terms of a guarantee bond I give you upon enrollment. I supply you free of extra cost with all needed apparatus and receiving sets for practical work while learning, so you can master Radio quickly, easily, at home.

Big Demand For Trained Men In Radio

Every day N. R. I.-trained men taking good places in the Radio field! Thousands of openings now awaiting the trained man in this new profession. FREE EMPLOYMENT SERVICE WHEN YOU GRADUATE. Many other big features. Don't go along at $25 or $35 or $45 a week when as a Radio Expert you could be pulling down real money for the same six days. Get the Facts—CLIP COUPON NOW.

Age or Lack of Experience No Drawback

You don't need high school training to learn by my methods—common schooling is enough. Lack of experience or education need not hold you back. My training is thorough and complete, but at the same time it's practical, simple, and clear. Young and old alike have won success in Radio through my help. Send coupon below for FREE Book—"Rich Rewards in Radio." Read for yourself. My offer of receiving sets and practice instruments given with course soon to be withdrawn—WRITE NOW. Coupon will bring book and full details of big special outfit offer.

J. E. Smith, President
National Radio Institute
Dept. KU9 Washington, D. C.

You Get ~
Receiving Sets and Practice Instruments With Course.

FIVE BIG OUTFITS
(1) Modern Single Control Thousand Mile Vacuum Tube Set.
(2) Simple receiving equipment for practice work.
(3) Advanced receiving equipment for practice work.
(4) World-famous Natrometer, patent of National Radio Institute.
(5) Practice set and buzzer outfit.

Special Book & Outfit COUPON

National Radio Institute
Dept. KU9 Washington, D. C.

"GOODY GOODY GIRL"

(Continued from page 4)

it was absurd, that she was not going away, but had been goaded into the lie.

"Where would you be going, I'd like to know?" the other persisted.

"THAT," said Lois, "is none of your busines."

Then she stepped back, slammed the door in Miss Wexby's face and turned the key in the lock. A smile, a rather uncertain and mirthless smile, rose to her lips as the outraged spinster's heels beat an angry tattoo upon the boarded walk and the gate was slammed shut with a violence that testified that Miss Wexby had vented her white-hot displeasure upon it.

Lois sank to the floor in the fierce grip of apprehension. What a mess she had gotten herself into! For the rather dubious satisfaction of scoring over Miss Wexby momentarily and seeing her bumptiousness pricked she had resorted to a lie. The consequences, if she were any judge, were likely to be far-reaching.

Everything hinged upon how Phineas Blair reacted to what she had done. He was a hard man, stern and exacting, with a code as unyielding as the rock-ribbed New England coast from which he had sprung. Not even the gentle, soft-spoken, little Southern woman who had loved, and been loved by, him had escaped rigid adherence to it. Her daughter could hope for no better.

If only Blair possessed imagination. If only he could be made to see how Primus, Quintus and Octavus, pursuing their endless way around the bowl, had become to her symbolical of her own drudging, loveless life. If that could miraculously be brought about he might understand how sight of them today had acted upon her like match touched to gunpowder.

A heavy step upon the porch intruded on her thoughts. Blair's. He had come home in the middle of the day instead of remaining at the plantation beyond the town limits until sundown. Had Miss Wexby already seen him? No, she wouldn't have had time. Something else had brought him.

LOIS scrambled to her feet and unlocked the door. It was his hand, though, that twisted the knob and threw it open. He bulked large in the opening, standing on the threshold and surveying the disarray within with displeased eyes.

"Why haven't you finished this room and why did you have the door locked?" he demanded.

"Miss Wexby was here. She's going away. She brought the goldfish again and —. No," as his eyes sought the table where the bowl so frequently rested, "I didn't let her leave them. I made her take them away again and I slammed the door in her face and locked it."

His eyes registered bewilderment. "How on earth—"

"I lied to her."

"Lied?" he said in a tone like thunder. Then his teeth clicked shut, a tiny frown made its appearance between his thick brows and little flashes of lightning flickered in the depths of his hard gray eyes.

"Yes, I lied," she hurried on. "I told her I was going away. I don't know why I did it except that she goaded me so, made me frantic because she was so cocksure she was going to have her way—oh, please," as he cleared his throat with an ominous sound, "please don't say anything until you've heard me out."

He glanced at his watch, then stalked across the room, passing by a couple of easy chairs to lower his bulk upon a hard, straight-backed one. Then he consulted his watch again.

"I'll give you ten minutes, no more, Lois."

She glanced at him sitting there, feet planted solidly upon the floor, his body stiffly erect, his mien stern and unbending. So, she fancied, his Puritan forebears must have sat when passing judgment upon their fellows, so must they have looked. They had not been merciful then. Phineas Blair would not be merciful now.

SHE DISCARDED any idea of trying to make him see any simile between Miss Wexby's goldfish bowl and her own circumscribed life. If ever he could be made to understand now was not the time. Swiftly, then, she rushed into the story of what had occurred between her and Miss Wexby.

"And what do you expect me to do about it?" he asked when she signified that she had told all.

"Let me go away for a few days. I could visit—"

"No!" The word fairly exploded from between his lips. "No! You are asking me to compound a lie so you may seem truthful. I won't do it. There wasn't any need to lie in the first place. I haven't any more love for Miss Wexby's goldfish than you, or for her, either. She's a snoopy, domineering, sharp-tongued old maid. If you'd run her off with a broom, dumped her goldfish in the yard, smashed her bowl with a rock—I could have understood that. But lying to her—a lie's a lie, no matter who it's told to. I don't countenance lying. When Miss Wexby gets

A&B Battery Charger ONLY $2

SATISFACTION GUARANTEED

Charges any type of storage A or B battery, using a few cents worth of ordinary house current, either alternating or direct. Cannot injure battery. Complete directions enclosed. Anyone can operate. No expensive "extras" to buy.

Why pay $10.00 to $15.00 for a charger when you can get this splendid GUARANTEED R.B. Charger by mailing us two dollars (bills, money-order, check or stamps) plus ten cents in stamps or coin to pay mailing costs. Charger will be sent postpaid. If not satisfied return within five days and we will refund your money. Order at once—TODAY.

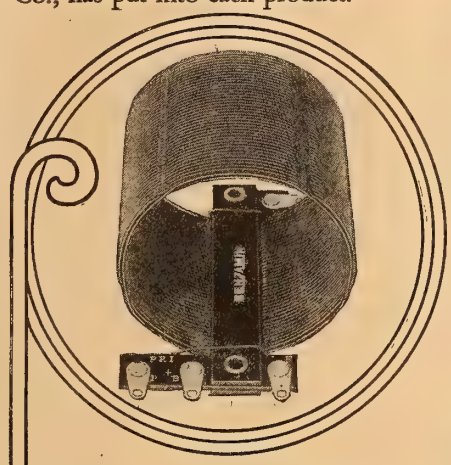
Only the Best Radio Parts are good enough for a Good Set

All Benjamin Radio Products are of the same high standard as the far-famed Cle-Ra-Tone Sockets—

Quality in every part of a radio set is depended upon for true-to-life reproduction of radio. There dare not be a flaw anywhere. And all the parts must synchronize.

Each Benjamin Radio Product fits in perfectly with the power and conditions of the set and contributes greatly to its sensitivity, selectivity, volume and quietness.

The use of Benjamin Radio Products in every part of the world—by authorities and amateurs—endorses the quality and effort that the Benjamin Electric Mfg. Co., has put into each product.



Improved Tuned Radio Frequency Transformers

Proved through exhaustive and comparative tests to be the most efficient coil for modern radio sets. Better in all important features and characteristics. Space wound. Basket weave. Cylindrical. Highest practical air dielectric. Gives wonderful sharpness in tuning, better volume and purer tone quality.

2¼" Diameter Transformer

Compact. Especially desirable for crowded assembly. Eliminates interfering "pick-up." Set of three, $5.75—Single Transformer, $2.10.

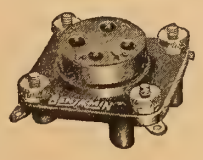
3" Diameter Transformer

Capacity coupling reduced to lowest degree. For use with .00035 Mfd. Condensers. Set of three, $6.00—Single Transformer, $2.25.

"Lekeless" Transformers

Uniform high inductance, low distributed capacity and low resistance. The external field is so slight that it permits placing coils close together without appreciable interaction. Single Transformer, $2.50.

Push Type Cle-Ra-Tone Sockets



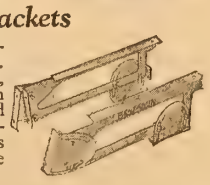
Spring Supported, Shock Absorbing. Stop Tube noises. Greatest aid to non-noisy operation. Contacts always clean. 75 cts. each.

Battery Switch

Quick, positive, clean-cut make and break. When it's "in" it's "off," eliminating danger of wasteful use of battery. 30 cents each.

Brackets

An aid to simplification inset construction. Support sub-panel, with room underneath for accessories and wiring. Plain and adjustable. Plain 70 cents per pair; adjustable $1.25 per pair.



Straight Line Frequency Condensers

No crowding of Stations. The broadcast range is spread evenly over the complete dial. Stations come in without interference, and tuning is much easier. An instrument made with the precision and compactness of a watch. Adjustable turning tension.

.00025 Mfd., $5.00 .00035 Mfd., $5.25
.0005 Mfd., $5.50

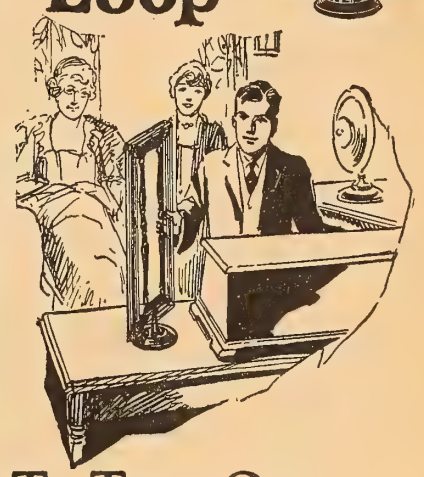
Manufactured in Canada by the Benjamin Electric Mfg. Co. of Canada, Ltd., Toronto, Ontario

Use the Handsome Bodine De Luxe Loop

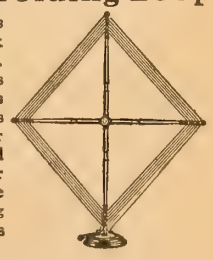


To Tune Out Interference

The artistically balanced, hand rubbed, solid walnut frame and lustrous silk winding of this beautiful loop harmonize with the finest furniture. It is very compact, yet highly efficient for its size. Equipped with jack which may be mounted in top of cabinet, to eliminate all exposed connecting wires.

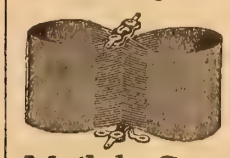
Improves tone quality by tuning out interfering stations. Designed for regular loop sets, but can be used with many aerial sets with slight changes. Write for directions for converting aerial sets into loop sets. Ask your dealer to show you the beautiful Bodine DeLuxe Loop.

Bodine Basket-Weave Folding Loop



Very popular because of its remarkable ability to pick up long distance signals. Specially designed wires do not sag. Loop holds its shape in service. Folds very compactly—ideal for camping. Calibrated dial permits logging. Ask your dealer about the Bodine Basket-Weave Folding Loop, the loop that is different.

Bodine Twin-Eight R.F. Transformer



The dream of set builders. Readily improves tuned radio frequency circuits. Makes them sensitive and selective. Improves tone quality. Write for data on Bodine Twin-Eight Hookup which utilizes Twin-Eight coils.

back you'll tell her what you've done and beg her pardon. After that I don't care if you never speak to her again." He got up, glanced at his watch again. "I'm going to Clermont after some machinery parts, but I'll be back for supper."

After he had gone she stood there, fighting down the thoroughly feminine impulse to burst into tears. Suddenly her dark head went up, her brown eyes took on a look of determination and her red lips became a firm, straight line.

"I'll not let him bend me to his will," she said half aloud, beating into her palm one clenched little fist. "I'm not going to let Phineas Blair or anyone else run my life for me ever again."

WHEN she again fell to sweeping and dusting she was humming a tune, a defiant militant tune, through her teeth.

Victory over Miss Wexby had affected her like a heady drink. It had given her a taste of the delights of exercising her free will and aroused in her a desire for more. It gave her the strength now to pit that will against the will of Phineas Blair, to defy his ukase that she must stay at home.

Grace Hughes, a schoolmate who had moved to Kanesville, a hundred miles away, often urged her to come for a visit. Blair invariably had repulsed her timorous efforts to obtain his permission. Now she was going without his permission. It would serve notice upon him of her newly-found independence and pave the way for a readjustment of her life along lines she herself desired.

It would be no easy task, she realized. Blair would be furious, but she believed that if he detected in her no signs of yielding he would come around in the end.

Her housework completed, she went upstairs to her room and began packing an old suitcase that had belonged to her mother. She put into it only those things she would need for a week or so. A five-mile walk lay before her and the suitcase, no matter how light, would grow heavy in time. Then she laid out her best dress and a coat and counted out into her purse the sixty dollars she had been saving dollar by dollar for several months.

Just before she went down to start supper she wrote a short note which she proposed to leave for Blair, telling him she was going, but would be back. She did not mention her destination.

Blair was not flying storm signals when he came home and he did not mention the matter of Miss Wexby. Characteristically, he regarded that as settled for everyone else because it was settled for himself. When he had eaten he went upstairs and presently gentle snores told Lois that he was asleep.

Within fifteen minutes she was dressed and had left the house.

Don't miss a word of the exciting adventures of Lois Sylvester as she boards the train at Paradise and is swept away like a gay bubble on a swiftly moving current that carries her close to the treacherous brink of despair and ruin. See Radio Digest of September 15.

WNYC "VOICE OF CITY"

(Continued from page 7)

And Mr. Goldman, in a moderate voice, talked to the world at large in a general way but particularly to the people of the great metropolis.

"Through this station you will hear your city speaking," he said. "You will hear more and more of what is being done for you as a city; of the great plans for the future and the big ambitions of those who serve you. The educational forces will talk to you from this point. You will hear the best that is in music and benefit from the cultural influences that will come to you through WNYC."

To disillusion those who might assume that oratory would be the only offering of officialdom, James J. Byrne, commissioner of public works in Brooklyn, submitted an excellent baritone solo as a sample of the artistic.

Back to the bright lights and light hearts, the Aida Brass Quartette poured its contribution into the funnel mouth of the microphone. As Mr. Henry, the first inquiring reporter, found a hint of love from every person questioned, even to the copper who had to take a moment to run to the curb to kiss his bride, so he would have found this same touch at WNYC, for Herman Neuman, the staff pianist, and his bride Dorianne Bawn blended their respective talents into life's eternal romance as they, too, became a part of the Voice of the City.

Club life added a note to the great ensemble through the Elks Entertainers from Elks Lode No. 22 of Brooklyn. Helen White Ruoss keyed up the dignity and majesty with her harp. From the theater came Grant Mitchell and Kenneth Webb, author of "One of the Family." Irma De Baun and Virginia Choate Pinner brought offerings from the opera.

It is more than likely that, by the time the great story teller returned to his dear Aurelia, he would have heard from open windows and screened porches along the way the Voice of the City issuing from a thousand loud speakers. And when he sat on the step beside her, his hand slyly touching and then enclosing hers, he would have answered her murmured question as to the reason for his silence by saying, "I was waiting for WNYC to announce Miss Lang, singing 'Love's Old Sweet Song'."

MAKES TUNING EASY

RADEX Tuning Charts show wave length your set is tuned to as dials are turned, show where to set dials for every station in America and identify programs received without announcement.

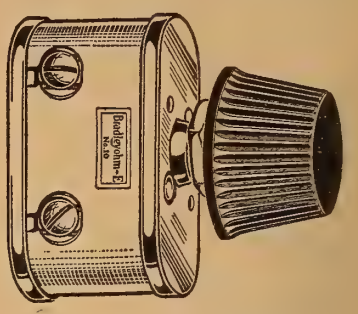
A NEW and BIGGER Bradleyohm for B-Eliminators



Announcing the Bradleyohm-E

Perfect Adjustable Resistor for B-Eliminators

THE rapid development of B-Eliminators for radio receivers has created a growing demand for an adjustable resistor of high resistance to regulate the plate voltages to the radio set.

Bradleyohm-E is a new, large size Bradleyohm of increased capacity and ample range for B-Eliminator service. It is made in several ranges for various types of circuits.

If you are building a B-Eliminator, be sure to ask your dealer for Bradleyohm-E of correct range and you will be assured of complete satisfaction regardless of the length of time your B-Eliminator is in service.

Radiophone Broadcasting Stations

Corrected Every Issue—Part III—Sept. 1, 1926

ONE DOLLAR will be paid to the Radio fan reader of Radio Digest submitting the most errors in any one station's listing in the Directory of Radiophone Stations, which appears in six parts, serially continuously on the next to last page. Letters must reach Radio Digest's office not later than one week from date of issue corrected. Readers are not limited to correcting one station, but such corrections must be verified by the stations themselves, and NOT by comparison to other so-called accurate Radio directories or lists. Verifications must accompany corrections. Turn in corrections for as many stations as you can find—if you can find errors! Use separate sheet of paper for each station submitted and place name and address on each sheet. In case of tie, duplicate awards will be made. Until wave lengths become stable again, we will not be able to count these in the challenge.

GOLD CUP'S WINNER REMAINS UNKNOWN

MAIL MAN IS STILL BRINGING BIG BAGS OF VOTES

Pat Barnes of WHT Makes Sensational Gain—Competitors Close Behind —Finish Next Issue

As this issue of Radio Digest goes to press, the fate of the 1926 Gold Cup to be awarded by this publication to the world's most popular Radio announcer, remains still a conjecture.

All ballots mailed on or before midnight of Saturday, September 4, are being received and counted in the final tabulation. As a result it will probably be several weeks after that date, or just about the time this number passes into the reader's hands, before the winner can safely be declared.

Everyone, of course, is anxiously interested in knowing what the final vote is showing. However, every mail changes the aspect, and at this time but few things can be said.

Pat Barnes Makes Great Jump

One of the somewhat expected surprises has been the great number of complete sets of votes sent in for Patrick Henry Barnes, announcer at WHT, Chicago. Many of Mr. Barnes' friends have been working from morning to night to win the contest for him. It would not be ethical to say what his gain so far is, but it is very large, and places him in the lead at this moment.

How many final counters will be marked up for his close competitors, G. C. Arnoux of KTHS, Earl E. May of KMA, Chester Gaylord of WTAG, and Norman Brokenshire of WJZ, is still unknown. Several of the above are very close to Barnes as this goes to press, and the end cannot be predicted.

Finish to Be Told Next Issue

In Canada Lillian Shaw of CKY is still leading.

What will be the outcome? Who will win the gold and silver cups for first and second places in the main competition, and what Canadian announcer will take home the special silver cup offered for Canada's most popular voice?

Read full and complete details of the finish and winners in the next issue of Radio Digest, dated October 1, and on the newsstands September 30.

Kolster Radio Compass Will Be Rene Fonck's Gas Savior

NEW YORK.—Because unfavorable weather delayed testing the Sikorsky bi-plane in which Capt. Rene Fonck was scheduled to attempt to fly from New York to Paris, the date of the hop-off was advanced to September 10, instead of September 1, as was at first planned.

Whenever the weather conditions are favorable after that date (which may have happened before this reaches the reader), the French flying ace will be ready to take to the air.

"I am depending upon the Kolster Radio compass to keep us on our course during the periods of low visibility we are bound to encounter," said Capt. Jack Irwin, who probably will be the Radio operator on the trip. "We have only about 500 miles of leeway on our course because of fuel limitations, so the Radio compasses will be of major importance during the 35 hours we expect to be in the air."

Lady Astor Makes Only One Speech, But Broadcasts It

NEW YORK.—Viscountess Astor, the leading British stateswoman and member of parliament, who is now on a brief visit to America, made only one public speech and its distribution to the public was handled by Stations WJZ, WRC and WGY.

The sole speech of Lady Astor in America was made before the dinner tendered in her honor by the National and the New York State League of Women Voters at the Hotel Waldorf Astoria.

HARRIET LEE, COVER LADY, REGAL QUEEN

IF EVER a queen were to the manner born then such a queen would be Miss Harriet Lee, the regal lady who adorns Radio Digest cover this issue. The WOK studio staff members at the Chicago Beach hotel, Chicago, almost curtsey and bow in her stately presence simply because it just naturally seems her due. However, Miss Lee is a very democratic queen and when she sings her Radio audience feels that she is singing a personal message to each and every listener. Her voice thrills with personality. and sympathy. Look at her again. Wouldn't you kneel and kiss her hand? No you wouldn't, old chap, not if her husband saw you try it. He claims that privilege exclusively for himself.

Sopranos Are All Right, Los Angeles Broadcasting Station Chiefs Declare

Naylor Rogers, of KNX, Champions Cause of Sopranos Who Can Sing and Decries Act of Charlie Garland of WBBM in Barring Ladies

By G. L. King

OTHER cities and other stations may bar sopranos from the microphone if they like, but not Los Angeles. A canvas of managers of Los Angeles and Hollywood stations revealed the fact that good Radio soprano voices are in demand, possibly because they are hard to find.

"We do not agree with Charlie Garland of WBBM and others that a soprano voice should not be allowed over the air," said Naylor Rogers, manager of KNX, one of southern California's most popular stations. "The trouble with sopranos and Radio is partly technical but not wholly. It is true that some broadcast stations transmit soprano voices badly and a great many receivers reproduce the higher notes very poorly."

Looks to Future Demand.

"But it is a fact," he continued, "that Radio receivers are improving rapidly and may soon approach reproduction as perfect as good transmission. We are looking to the future. Therefore, we put every good soprano we can find on our programs. It is true, of course, that we find more poor soprano voices than any other, but then almost every woman tries to sing soprano. If every male thought he was a Caruso, the percentage of good tenors would be about the same."

Mr. Rogers further stated that Los Angeles and Hollywood stations probably had more exceptionally good Radio sopranos at their disposal than any other city or section in the country. Some of them, such as Virginia Flohri of KFI and Elsa Zelinda Foley are known almost wholly for their Radio work, which has been accorded praise from California music critics, while others such as Raquel Nieto, coloratura soprano of the Mexican grand opera, and Margaret Messer-Morris, who is soloist with the Los Angeles Philharmonica and Symphonic orchestras, are known for concert work as well as Radio.

An Ideal Soprano

Raquel Nieto (picture on page 27), the Mexican coloratura, is the technician's delight. Although possessed with a voice of remarkable range on the higher register, the broadcast station operator is never worried about his "gain control" while she is on the air. Something unexplainable, some little crook in her throat or the roof of her mouth, make it possible for her to sing arias before a microphone that cannot be attempted by any other soprano.

"Summing it all up," concluded Mr. Rogers, "so long as the concert and operatic stages find a demand for soprano voices, why shouldn't we broadcast them? If there is trouble in transmitting or receiving the soprano voice then it is up to the technician to improve his apparatus, but so long as a broadcasting station is an entertainment factor we must use everything that anyone else uses—and more, too."

Looking Ahead

WPG, Making a Name for Itself with Its New Type 5,000-Watt Transmitter, will be described and featured in the next issue of Radio Digest, on the newsstands September 30. Long promised, the story of the "World's Play Ground" broadcaster is worth awaiting.

By the Time You Have Finished the Current Installment of "Goody Goody Girl" in this issue of Radio Digest you will be more than eager to see what happens to Lois when she reaches the Big City. This very modern tale is about the best thing Mr. Merlin Moore Taylor ever wrote. More adventures of Lois in the October 1 issue.

Like the Interview with the Radio Service Manager This Issue? It's on page nine and marks an effort to present the technical side of Radio in a very non-technical but interesting fashion. More on operating and trouble shooting is coming, and in an early issue, something distinct in set construction is promised

Are Movie Actors Real People? Do They Get Nervous and falter before the mysterious and unresponsive microphone? How do they feel at their first experiences? Personal interviews with some of the most famous screen celebreties in Radio Digest soon.

Imagine Yourself Holding Your Sweetie's Hand while waiting for a certain song to come over the air from a little town in Missouri, knowing if you did hear it you were to propose and if you didn't hear it you were to wait until some other indefinite time. Read about it, for it is a true story in a forthcoming Radio Digest.

Special articles about broadcasting stations and artists, with photographs, and NON-RADIO fiction 5,000, 10,000 and 30,000 words in length are desired. No manuscripts accepted unless typewritten and prepaid, or returned without return postage being inclosed. All manuscripts are sent at owner's risk.

SHORT WAVES

By Marcella

Have promised a number of request "repeats" this time. Among them are Norman Brokenshire, Mac Ohman, Ford and Glenn, John T. Schilling and George Hay. Toot-toot, here goes the Short Waves Limited!

* *

J. H. M. and R. O. D.: Norman Brokenshire rightfully keeps many maidens' hearts aflutter, for he is single and good looking. To think! Someone told J. H. M. that Norman was married and had nineteen children. I don't know where he has been hiding his score of family all these years from his good friends, Marcella. Born in Murchison, Ont., Canada, 28 years ago; migrated to Cambridge, Mass., in early youth; was once a draftsman at Pittsfield, Mass.; later wore a doughboy suit in the World War; honorably discharged and became a salesman in New York; answered an ad for a Radio announcer in the classified section of one of the New York newspapers one day, and finally was selected as the man for the position from a field of 500 applicants. After a long service at WJZ, he was transferred to WRC, Washington, for nearly a year, and then was recalled to WJZ when they opened up with superpower. He is slightly under six feet tall, weighs about 165 pounds, wears a cute little black mustache, and has romantic, curly dark brown hair. I will add that he is a type which I think would make good in motion pictures.

* *

Ida: Mac Ohman is another one of those Scotchmen whom Radio and golf have made popular. Called the "sartorial treat" by one of his good announcer friends, Mac is a travelling balladist. In fact, he has been heard from practically every station in the Middle West. He has lived in Omaha, Nebr., nearly all the 26 years of his life because the city's name so nearly approaches his. Before Radio he sold insurance, but he has discontinued this now, so you may approach him with safety. Mac is very good looking, dresses perfectly, although inclined to yellow spats, stands 5 feet 7 inches up from the studio floor, and is full of effervescing youth and ambition. Rumor has recorded his marriage. "Maytime and You" and "Thinking" are two of his published compositions.

* *

"New Reader": Yes, George Hay, the famous "Solemn Old Judge" of WSM, is married and has two children—both girls, I believe. His favorite sport is golf, and he devotes considerable time to writing. He has just sent me an autographed copy of his "Howdy, Judge," published by the McQuiddy Press of Nashville, Tenn. The book is intensely interesting, packed with laughs, and marks Mr. Hay as a born humorist and strong contender for the honors of Irwin Cobb. Of course, you all know he won the Radio Digest gold cup in 1924 as world's champion Radio announcer.

* *

Nell: Yes, Ford and Glenn have recently recorded "Valencia" for Columbia. To repeat their history and descriptions, both are married, drive cars and each has a boy about 8 years old. Edgar Bill, WLS director, was responsible for pairing them into a team. When the two met through Mr. Bill they were suprised, for it turned out to be a reunion—Ford and Glenn having known one another some years prior in St. Louis. "Big" Ford Rush was born in New Orleans and his age is 32, weight 175 pounds, height 6 feet. "Little" Glenn Rowell was born in Pontiac, Ill., and his age is 28, weight 218 pounds, height 5 feet 8 inches, and likes pie and cake.

* *

"Anxious": Sure, "Nubs" Allen is still appearing now and then at WLS. Looks? A pretty, petite brunette, with brown hair and a husband—unfortunately for you. She specializes in popular songs. The Lucus Sisters? No one knows anything about them.

* *

And now, my friends, hold on to your hats and don't stand up 'til the car stops moving—for Eddie Squires is married! It happened last Friday, the thirteenth, to this formerly impregnable bachelor who probably has acted as announcer at more stations than there are at present licensed in the United States. Right now, of course, he is doing it at WJAX, Jacksonville, Fla., where the "globe-trotter" is less likely to depart burdened as he is with the responsibilities of a benedict. The girl was Miss Thyra Everett and her former home was White Springs, N. Y. "Eddie" gave his name at the license bureau as Edwin B. Squires, age 34, and residence, Connecticut. This last bit of information may be very valuable to the many fans who have failed to keep track of him during his wanderings microphone bound. In honor of the ceremony, Walter Tison, director announcer of WGHB, Clearwater, Fla., dedicated a special number to "Eddie" called "The Prisoner's Song." A Florida moonlight night, and a silent one for WJAX, are said to have made the romance "take."

(Continued on page 20)

FANS WILL HEAR DEMPSEY FIGHT

DAWES SPEAKER AT GREAT RADIO FEAST

OVER 200 PICKED ARTISTS FOR 33-STATION BILL

Wednesday, September 15, Date of Banquet and Festivities Officially Opening New Radio Season

NEW YORK.—Vice-President Charles G. Dawes will be the speaker at the Third Annual Radio Industries banquet on Wednesday evening, September 15, according to announcement by Herbert H. Frost, chairman of the speaker's committee for the banquet.

When the vice-president faces the thirty-three microphones on the speaker's table at the annual banquet in New York city, his voice will be carried to an audidience of listeners that will undoubtedly be the largest ever reached by an official of the United States or any other individual. On the occasion of the inaugural of President Coolidge, a record number of twenty-seven broadcasting stations participated in the transmission of the program. When the vice-president begins his address the hook-up will have at least six more stations and perhaps others, as additions to the list of stations participating are continually being made.

Two Hundred Artists on Bill

Over two hundred artists, the pick of the land, will entertain at the banquet and hence over the chain of stations. Mary Lewis and Reinald Werrenrath are headliners on the program which will begin at 7 p. m., Eastern daylight saving time, which is 6 p. m. Eastern Standard time or Central daylight saving time, and 5 p. m. Central Standard time.

Paul Klugh, executive chairman of the National Association of Broadcasters and chairman of the banquet committee, will appear as toastmaster again this year as in the past two years, and Major J. Andrew White, pioneer Radio announcer, will act once more as master of ceremonies.

DISTANT ANNOUNCER GETS FAN IN WRONG

NEW YORK.—One of WEAF's announcers put a gentleman in bad with one of his neighbors recently, The evening being hot and the front porch the place of refuge, the loud speaker was brought out to entertain the family. A lively banjo selection came over the air. A woman passing by stopped to listen. Soon came the name of the selection—"Keep Moving." With a voice ringing with scorn, she shouted, "Mind your own business," in the general direction of the front porch and strutted away haughtily from the front of the house.

KINDLY OLD LADIES ARE TRICKED AGAIN

LONDON.—Davy Burnaby and Melville Gideon, members of a famous London revue company, were broadcasting from 2LO recently, and at the close Davy said, "If any lady or gentleman would like to hear their favorite song, Mr. Gideon will sing it. You have only to speak the title into your loud speaker!" A moment later he said, "A lady has asked for 'Crinoline Gown.' Mr. Gideon will sing it." He did. And the next day Burnaby received four letters of thanks from old ladies who said they had asked for it!

CHARMING MICROPHONE BEAUTIES

Up and down the Pacific coast you won't find a more popular pair of singers than Gypsy and Marta, above, of San Francisco. If you like hoop skirts, you should see Leona Hogarth (at right) don them in "Black Velvet" at the Playhouse, Chicago. Her stage popularity was equalled by Radio when she appeared recently over WQJ and WHT. An artist of rare ability is Madame M. H. Goldschein, left, whose dramatic soprano voice has interpreted many arias from opera for the audience of WSM, Nashville.

ASSOCIATED PRESS DONATES FACILITIES

OVER 100 STATIONS WILL CARRY RUNNING STORY

Will Tell Blow-by-Blow Details of Champion's Meeting with Gene Tunney September 23

PHILADELPHIA.—When Jack Dempsey hands Gene Tunney the finish punch during the late afternoon of Thursday, September 23, at the Sesquicentennial grounds here, or perhaps when Gene lands a left hook under Jack's chin for a knockout, the whole world of sporting Radio listeners will know of it less than a second after the actual happening.

Through the courtesy of The Associated Press, the world-renowned news gathering organization employed by thousands of newspapers, the story of the fight blow-by-blow will be broadcast by over one hundred broadcasting stations located from coast to coast and from Hudson's Bay to the Gulf of Mexico.

Chains Also to Handle

Associated Press newspapers owning broadcasting equipment and several score of stations which cooperate with Associated Press newspapers, will handle the fight. In addition, part of the WEAF and WJZ chains, it is reported, will carry independent running stories of the momentous pugilistic encounter for the world's heavyweight championship.

The big fight will be on the air sometime around 4 p. m. Eastern daylight saving time, which is 3 p. m. Eastern standard or Central daylight saving time, 2 p. m. Central standard time, 1 p. m. Mountain standard time, and noon Pacific time.

Major Herbert H. Frost Is Tendered Farewell Banquet

CHICAGO.—More than 400 members of the Radio industry, friends of Major Herbert H. Frost, ex-president of the Radio Manufacturers' association, gathered to do him honor at a farewell banquet recently given him at the Palmer house here prior to his departure for New York city where he will direct the sales policies of the E. T. Cunningham company.

Addresses were made by A. J. Carter, president of the Carter Radio company of Chicago; Col. A. T. Clifton, Harold J. Wrape, president of the Federated Radio Trade associations; Frank Watts of New York, and Curt Wessel.

Speaking for members of the Radio industry Mr. Carter presented a magnificant loving cup to Major Frost, while Col. Clifton in the name of the officers of the United States Signal Corps Reserve presented Major Frost with a handsome sabre. Paul B. Klugh, executive chairman of the National Association of Broadcasters, acted as toastmaster.

New Studio for WJAG, Norfolk

NORFOLK, Neb.—Plans for an elaborate new studio are included in the construction of a new $500,000 hotel at Norfolk. Concert programs will be broadcast by remote control from WJAG, The Norfolk Daily News station.

WGBF APPARATUS ROLE PLAYS HERO

Amplifiers Pick up Signs of Life When Six Miners Are Entombed

SALEM, Ky.—Few broadcast listeners know that when five miners were entombed for six days recently in the Hudson mine near here, Station WGBF, of Evansville, Ind., played an important part in their rescue.

Almost when hope for their lives had been despaired, amplifying equipment and microphones were rushed by airplane from the Finke Furniture company broadcaster at Evansville. Carl Waddell placed the microphones in the mine shaft near the cave-in where the trapped men were believed to be, and Operator Martell Montgomery of WGBF adjusted his instruments and listened.

Distinct tappings and the ring of a miner's pick were heard. The Radio amplifier, multiplying the sounds 10,000 times, heard what the ears of men unaided could not. Rescue efforts were doubled, and the next day the five men were saved, little worse for their six days of imprisonment.

Does Radio Have Its "Dead" Night? WOK Would Know

CHICAGO.—In an effort to ascertain if Radio has its "dead night" each week like the theater, fans who tune Station WOK are being asked by Announcer George W. Allen to write to the studio telling which nights of the week they devote to Radio and what night, if any, they do not care for it.

Mysterious Automaton Answers Fans' Queries

Crosley Booth Attracts Many at New York Show

NEW YORK.—If there is still any mystery left in Radio, it will be found in the marvelous automaton on display at the Crosley booth in the third annual Radio World's Fair now being held in Madison Square garden, New York city. This mechanical figure, six feet tall, with the body of a man and the head made of a grotesquely-painted Musicone loud speaker, is attracting the attention of the scientific world and Radio listeners through its mysterious answering of questions which show visitors compound.

The giant figure, which might well be called the "answer man," was developed in the Crosley engineering laboratories in Cincinnati for the special amusement of exposition visitors. Its mechanical construction is so arranged that people can whisper near the figure and immediately they hear a mysterious voice talking to them or answering their queries.

Youngstown, O., Plans for First Radio Show Sept. 30

YOUNGSTOWN, Ohio.—The first annual Radio show ever held in this city will be put on in the magnificant new Fitch garage here September 30 and October 1 and 2. Thirty of the leading Radio dealers of the city have signed for space and the show has the endorsement of the Mahoning Valley Amateur Radio association and the Youngstown Radio Dealers' association.

Arrangements have been made to have a temporary station erected to broadcast musical programs during the show.

CALL FOR BLOOD GETS IT AND SAVES WOMAN

WRVA, Richmond, Broadcast Wins Fifty Volunteers

RICHMOND, Va.—Elmer G. Hoelzle, studio director at Station WRVA, Richmond, Va., sent out a call for blood and got it, thereby rendering a service in life saving probably never attempted before in broadcasting.

A few days ago a woman patient in the Johnston-Wills hospital, Richmond, reached a crisis from pernicious anaemia, and death stalked in the shadows. Dr. W. R. Graham called upon WRVA, which was in the midst of its evening program, to broadcast for volunteers for a blood transfusion. Fifty persons immediately responded. Tests were made for the precise No. 2 quality of blood required and Manley Betts, one of the WRVA artists, was selected for the operation.

The transfusion proved a success and the life of the woman patient was saved.

KWKH Becomes KSBA

SHREVEPORT, La.—W. K. Henderson, millionaire sponser of Station KWKH here, has sold his interest in the enterprise to W. G. Patterson who has been associated with broadcasting since 1921 and who originally was sole owner of the station. Mr. Patterson will head the new Shreveport Broadcasting association, which will operate the station, and the call will hereafter be KSBA.

Two Great Receivers

that cover the full range of radio broadcasting

from 10 to 200 meters

THE Grebe CR-18 is an exceptional receiver for high radio frequency reception. It employs a coupled regenerative circuit adapted for a frequency range of from 1500 to 30,000 kilocycles (10 to 200 meters) and is especially designed to meet all amateur requirements and radio frequency assignments of the U.S. Department of Commerce.

There are seven outstanding features that make the CR-18 especially efficient.

Write for charts and folder describing these features.

from 150 to 550 meters

THE extreme efficiency of the Synchrophase is due to several exclusive Grebe developments, especially the *Binocular Coils* which provide exceptional selective sensitivity; *Colortone* which gives control over tone quality; *S-L-F Condensers* which make accurate tuning easy; and *Low-Wave Extension Circuits* which give a tuning range of from 550 down to 150 meters, covering over 100 stations not reached by other sets.

Write for Booklet RD. Then ask your dealer to demonstrate.

The GREBE

CR-18

Air Confetti at KYW Carnival

Fannie and Eddie Cavanaugh, the "Gaelic Twins," (left) and Fannie in the picture above.

MERRY ENTERTAINERS

Carry Glee and City Night Life to Listeners Scattered Through Country and Small Towns. Gaelic Twin Ticklers Propound Cocoanut Problem and Add Adipose Tissue.

By MARSHAL Z. TAYLOR

On the air (mail)—Listener's (P.O.) Station USM, Green Bay, Wis.

"JUST what good are cocoanuts? You should have heard my mother, nigh onto 70 years old and 330 pounds weight, as you sang it. Think over the words of the song and then you will know why she is laughing yet. Thanks for the program. From Grandma McHugh and myself."

YOU have been listening, ladies and gentlemen, to Mr. David McHugh, applausecasting from his home at 901 E. Walnut St., Green Bay, Wis., in appreciation—What's that? No! No, dear friends, not "applesaucecasting," I said "a-p-p-l-a-u-s-e-c-a-s-t-i-n-g," — sure, thats it, sending his little message of appreciation to the KYW Congress Hotel Carnival, Chicago.

And he is just one of ten thousand or more other constant listeners who announce by card and letter their enjoyment of this frolicsome program that filters through the Great Lakes Region every Tuesday and Thursday during the pre-midnight hour.

If you have not already dialed in this Big Show it's right this way to the Main Tent!

Listen! Get that 535.4 wave! Hear the dancing, singing Cavanaughs! Fannie and Eddie, the celebrated Gaelic Twins and their funny Cocoanut song! Hear Art Linick, the jovial announcer! Hear dainty Grace Wilson, the girl with the melting, tenor voice! Hear the great Z. Earl Meeker, the wonder baritone of the opera!

And the price of admission, ladies and gentlemen, is just a turn of the wrist to 535.4 meters. Right this way!

The carnival at KYW serves as the champagne for the evening's Radio banquet. From the first popping of corks at 10:30 the ether sparkles with snappy singing, playing and interchange of chit-chat between announcer and entertainers. It's a dizzy whirl with lively guests bobbing in and out and contributing to aerial confetti and general merriment. The listener has no trouble imagining himself or herself a member of the jolly party. It is all so "Artfully informal."

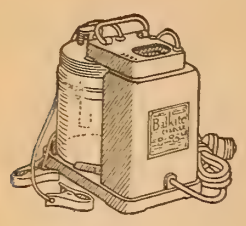
"Two days is not enough for our carnival," declared Mr. E. E. Mattson, who relays to the press vital statistics and other important matters appertaining to the Radio activities of the Westinghouse station. "This carnival is doing more to build up the nation than all the delicatessen stores in the country. No wonder the lady weighs over 300 pounds and is laughing yet. Look at me. I'm still a little over 200 and I refrain from eating entirely on Tuesdays and Thursdays. I did weigh over 250, but by cutting out potatoes when I eat meat and meat when I eat potatoes and laying off eats altogether carnival nights I have managed to cut it down. But I wouldn't miss the carnival if I have to laugh myself to a ton.

"And it's getting better all the time—better and better every day—poor Coue! You know the Cavanaughs, the Gaelic Twin Ticklers. They sing that breeze about the questionable utility of cocoanuts in general. They have some other good ones about the 'Little German Band,' 'Under the Summer Sausage Tree,' 'Hinky Dinky Parlay Voo,' 'Nice People' and 'Baloney.'

"Eddie and Fannie are old-timers as entertainers. They were headliners in vaudeville when we booked them for the second program KYW ever put on the air and you will remember that we were the first of the thirty-five Chicago broadcasters. Eddie was in the war, a doughboy. He carried on with his nonsense Over There, making the boys hold their sides from laughing when they all knew that the next minute they might be holding their hides together from German bullet holes.

"When Charlie Erbstein com- (*Continued on page 38*)

Grace Wilson, the girl with the tenor voice (lower left). Art Linick, the Dutch announcer of the KYW Carnival (below). Z. Earl Meeker, opera baritone from Pacific Coast, who helps KYW program.

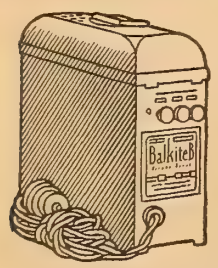


The New Balkite Charger

MODEL J. Has two charging rates. A low trickle charge rate and a high rate for rapid charging. Can thus be used either as a trickle or as a high rate charger. Noiseless. Large water capacity. Rates: with 6-volt battery, 2.5 and .5 amperes: with 4-volt battery, .8 and .2 amperes. Special model for 25-40 cycles. Price $19.50. West of Rockies $20.

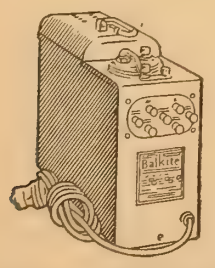
Balkite Trickle Charger

MODEL K. With 6-volt "A" batteries can be left on continuous or trickle charge thus automatically keeping the battery at full power. With 4-volt batteries can be used as an intermittent charger. Or as a trickle charger if a resistance is added. Charging rate about .5 amperes. Over 200,000 in use. Price $10. West of Rockies $10.50.



A New Balkite "B" at $27.50

Balkite "B" eliminates "B" batteries and supplies "B" current from the light socket. Noiseless. Permanent. Employs no tubes and requires no replacements. Three new models. Balkite "B"-W at $27.50 for sets of 5 tubes or less requiring 67 to 90 volts. Balbite "B"-X for sets of 8 tubes or less; capacity 30 milliamperes at 135 volts—$42. Balkite "B"-Y, for any radio set; capacity 40 milliamperes at 150 volts—$69.



Balkite Combination

When connected to your "A" battery supplies automatic power to both "A" and "B" circuits. Controlled by the filament switch on your set. Entirely automatic in operation. Can be put either near the set or in a remote location. Will serve any set now using either 4 or 6-volt "A" batteries and requiring not more than 30 milliamperes at 135 volts of "B" current—practically all sets of up to 8 tubes. Price $59.50.

All Balkite Radio Power Units operate from 110-120 volt AC current with models for both 60 and 50 cycles. Prices are higher in Canada.

Announcing the new Balkite Light Socket Radio Power Units

A new Balkite Charger with both trickle and high charging rates. Three new Balkite "B's" including the new popular priced Balkite "B"-W at $27.50. The new Balkite Combination—with the "A" battery it furnishes automatic power to both circuits.

Now you can operate your radio set from the light socket. Merely by adding the new Balkite Radio Power Units—either by adding a Balkite Charger and Balkite "B," or by adding the new Balkite Combination Radio Power Unit.

In either case the result is the same—light socket operation, maximum convenience, and smooth silent power.

Balkite Light Socket Power is noiseless. There is no hum. It is never low and never runs down, but is always exactly what is required by the set. It is permanent. Balkite Radio Power Units are permanent pieces of equipment. They employ no bulbs, and have nothing to replace or renew. They cannot deteriorate from either use or disuse. Other than a negligible amount of household current their first cost is the last. With sets of high current requirements their use is highly desirable for the saving alone. They require no changes in your set.

Over 600,000 radio receivers—one of every ten—are already Balkite equipped. Equip yours with Balkite and convert it into a light socket receiver. Know the pleasure of owning a set always ready to operate at full power.

GOODY GOODY GIRL

"Hush!" She rose to her feet alarmed by his vehemence. "I won't hush!" He, too, got up and she backed away when he made as if to take her into his arms. "I love you. . . ."

By MERLIN MOORE TAYLOR

Illustrations by W. H. WISNER

LOIS Scarcely Had Trudged from Sight of the Old Homestead When Adventure No. 1 Overtook Her

REBELLION surged through the soul of Lois Sylvester when she opened the door to little, old Miss Wexby and her bowl of goldfish.

"I'm sorry, Miss Wexby," she said, "but I'm afraid I won't be able to take care of your goldfish this time. I'm going away."

"You goin' away? Where you goin'?"

"That's none of your affair. I'll not keep you waiting. Good-bye." She shut the door in the face of the self-important old lady who had for years been accustomed to leave her goldfish at the Sylvester home while going away for visits.

Lois shuddered. She was not going away. What could she tell her hard-shelled Yankee step-father? He would not condone the lie, she knew that. But she would have to tell him. It would mean a crisis. She would ask his permission to let her visit a school girl friend at Kaneville to make her story to Miss Wexby good.

Then Phineas Blair, stern and uncompromising, came in from the fields. Lois told him what had occured.

"But I won't permit you to go. That would be helping you to tell a lie. You will have to go to Miss Wexby and apologize, although I'll admit I don't care any more for her than you do."

His decision was final. He allowed of no argument in his household. He put on his coat and departed for the hardware store for parts to his cultivator, the errand that had brought him home almost in time to be a witness to the incident that had so much to do with Lois' great decision.

But the girl felt a brimming consciousness of her newly arrived eighteen years and the surge of rebellion grew stronger and stronger.

Blair retired early and slept soundly. Lois packed her suitcase and stole quietly out the door, half-afraid and yet eager to demonstrate the independence of her proud Southern ancestry.

CHAPTER II

Escape

ITS SETTLERS in the early days of the republic had named Lois Sylvester's home town Paradise. An absurd name it seemed more than a century later and one that brought chuckles from the city folks who passed through and derisively referred to it as a cross-roads village.

Paradise really was just that. It still boasted only a few hundreds of population. There was no railroad or anything like paved streets, electric lights, waterworks and so on which railroads bring in their wake. Those had gone to Clermont, the county seat, five miles away.

Modernity had touched Paradise but lightly. It was on a branch telephone wire out of Clermont. It had a tiny movie house where twice a week films were shown near the close of their careers. A handfull of automobiles, flivvers for the most part, were to be seen on its streets and there were at least a dozen Radio sets in its homes.

Paradise, like scores of similar little communities throughout the country, continued to exist because it lay in a rich farming community and the farmers—they clung largely to the colonial name of planter themselves—found it convenient to do their ordinary trading there in preference to spending the time on the road to and from Clermont.

Lois' great-grandfather had been one of those original settlers of Paradise. The village touched the edge of his plantation, for the Sylvesters were well-to-do in those days and owned many broad acres and the slaves to work

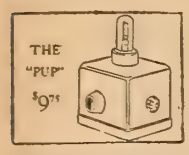
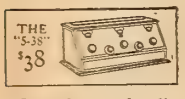
CROSLEY RADIO INSTRUMENTS
Each item the utmost in radio at its price. All prices slightly higher west of the Rocky Mts.



This little double-circuit one-tube set has brought happiness to thousands and made records for long distance receiving.

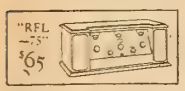
A 4-tube receiver of amazing efficiency, Crescendon equipped! Everywhere considered marvelous at its price.

The 4-29 in portable form handy, compact, efficient.



A five-tube tuned radio frequency set, with two stages of non-oscillating radio frequency amplification. Crescendon control, two stages of audio frequency amplification.

5-tube, single drum station selector, acuminators, Crescendon, power tube adaptability, all-metal shielded chassis.



5-tubes. True-cascade amplification; non-oscillating, non-radiating even under any mishandling. Its perfect balancing achieved by Wheatstone bridge in each stage of amplification. Exceptional selectivity and tone.

Beautiful solid mahogany console finished in two tones. Embodies the 5-tube $50 instrument with single dial control. Crosley Musicone speaker and ample compartment for batteries. Stands 41 inches high.

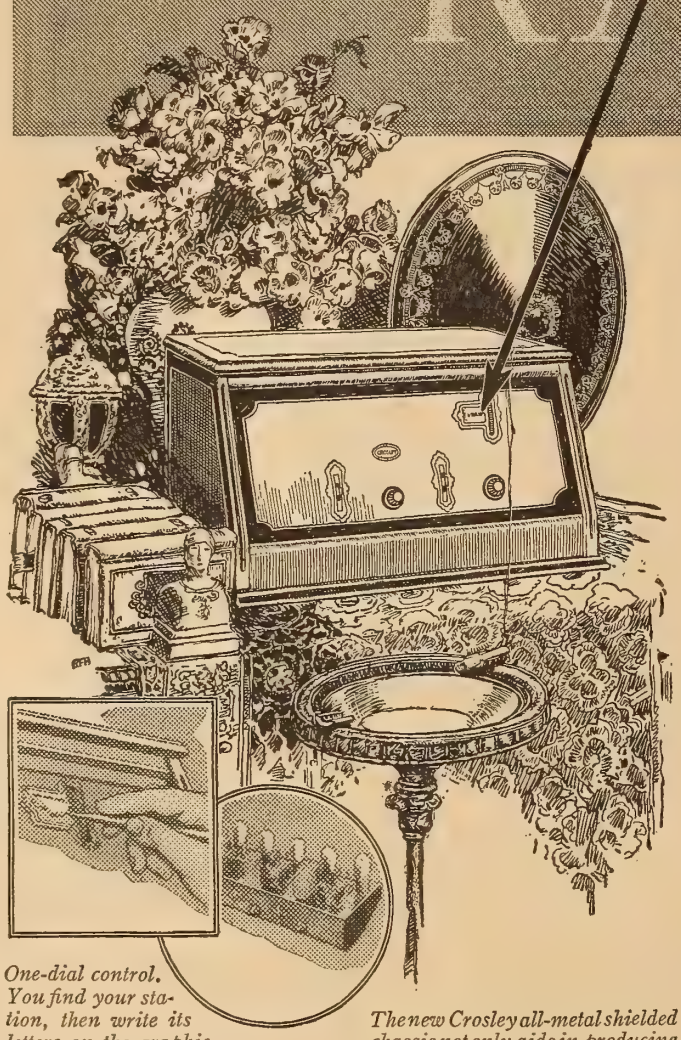
Introducing the double drum station selector! Includes Musicone in exquisite console. Room for batteries and all accessories. 41 inches high, 30½ inches wide.

Regular 12-inch size, $12.50. Super Musicone, with still finer volume and tone, $14.75. Musicone Deluxe in mahogany "clockcase," $23.50.

Embodies the Musicone in a beautiful console of two-tone mahogany finish and provides room for batteries and accessories. 24½ inches long inside.

CROSLEY RADIO

BETTER—COSTS—LESS



One-dial control. You find your station, then write its letters on the graphic dial, locating it once and for all, to turn to whenever your fancy dictates.

The new Crosley all-metal shielded chassis not only aids in producing astounding selectivity, but standardizes manufacture and helps make possible the price of $50.

One-Dial Control!

. . . *in this amazing 5-tube set at $50*

Already the new 5-tube Crosley set, at $50, has met such a tremendous demand as to confirm the prediction that it will replace thousands upon thousands of sets now in use.

Confronted by high prices, many people who desired to replace their old sets have hitherto hesitated to do so. Now . . . in the new Crosley "50" . . . they find the features and qualities they desire, formerly exclusive to very high-priced sets . . . available at small investment.

The incomparable joys of Single-Dial Control! Uncanny selectivity, resulting from its metal-shielded chassis and the surpassing efficiency of the Crosley circuit's advanced design! Exquisite volume, thanks to the matchless Crescendon! Crosley Acuminators, power tube adaptability . . . all the attributes of radio at its best . . . for $50!

In all the Crosley line no instrument represents a greater triumph than this wonderful 5-tube set. Examine the line in full, as illustrated in the marginal column at the left . . . each item a victory for *mass production* in reducing radio prices. Then see the Crosley line at Crosley dealers . . . including the new "50" . . . now on display!

See it . . hear it. View the refreshing beauty of its solid mahogany cabinet. Operate it yourself. Watch the stations, written in on the graphic dial, parade before you and usher in their programs with unerring accuracy. Sharpen the selection with the Crosley Acuminators. Release inspiring volume by means of the Crescendon.

Know what heights . . . in tone, volume, selectivity and sensitivity . . . radio of moderate price has reached!

$50

Slightly higher west of the Rockies. Never before, at anywhere near this price, has a radio set possessed all these advantages: 1. Single-dial control with graphic station selector. 2. Metal-shielded chassis, contributing to amazing selectivity and reducing cost. 3. Crescendon control, producing exquisite volume from distant stations. 4. Crosley Acuminators, which sharpen tuning and increase selectivity. 5. Power tube adaptability. 6. Beautiful, solid mahogany cabinet of distinguished design and exquisite two-tone finish.

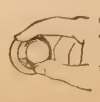
THE CROSLEY RADIO CORPORATION, CINCINNATI—POWEL CROSLEY, Jr., President

Crosley manufactures radio receiving sets, which are licensed under Armstrong U.S. Patent No. 1,113,149 or under patent applications of Radio Frequency Laboratories, Inc., and other patents issued and pending. Owning and operating station WLW, first remote control super-power station in America. All prices without accessories.

For Catalogue write Dept. 49

OUTSTANDING FEATURES OF CROSLEY RADIO DEVELOPED BY POWEL CROSLEY, Jr.

THE "CRESCENDON"



When, on ordinary radios, ears must strain to catch a station miles away, a turn of the Crescendon on Crosley radios instantly swells reception to room-filling volume. An exclusive Crosley feature.

ALL-METAL SHIELDED CHASSIS

This truly great radio achievement, found in several Crosley sets, furnishes a substantial frame for mounting elements, produces excellent alignment of condensers, shields the units from each other, prevents interstage, improves the stability of the circuit, increases selectivity and saves costs by standardizing this phase of manufacture.

THE SINGLE-DIAL STATION SELECTOR

Nothing in radio equals the joy or the convenience of single dial control. Crosley single drum control enables you to find the stations sought without log book or "tuning."

THE "ACUMINATORS"

Crosley Acuminators provide sharp tuning where reception spreads broadly over dial, easily tune out local and bring in far stations. Ordinarily, once adjusted and they need not be touched again.

USE OF POWER TUBE

Power tube adaptability marks the Crosley "5-50", "5-75" and "RFL" sets. This feature typifies Crosley provision for best radio reception at moderate cost.

QUALITY AND BEAUTY IN CABINETS AND CONSOLES

"My Radio Set Don't Work"

THERE Are Three Classes of Listeners, According to the Chief Service Man of a Large Radio Store. Sixty Per Cent Are "Bad". If You Are in This Group, Read Below and Repent Your Sins. Anyway, Here's a Lot of Common Sense Free of Charge.

By EVANS E. PLUMMER

DING-a-ling-a-ling! The telephone bell in the Radio service department of a large Radio dealer rang. The tired manager answered. The caller's first question was characteristic.

"Do you know anything about Radio?" was the needless interrogation of the fan in the desire of service. After being assured that he did, the manager was greeted with this:

"Well, why couldn't I hear any long distance stations last night?"

The service manager was accustomed to this. He had the patience of Jove. He explained that last night was a "bad" Radio night. Weather and atmospheric conditions were far from satisfactory for reception. Was this the first night the fan's set had shown symptoms of falling down? Try it again and see how it works. Whereupon the fan replied:

"That may be true, but I don't think you know what you are talking about." Crash went the fan's receiver.

Radio Receiver Is No Miracle

Unbelieving readers, this is just how you act, or I should say the majority of you act. The article which you are reading is based upon an interview with the Radio service manager of a store employing from eight service men in the summer to sixteen men in the winter. His troubles are many. The majority of listeners, he has observed, believe that Radio is such a miracle that their receivers must go on performing miracles night after night without ever receiving the least bit of attention. Or, when there is a bad Radio night, as explained above, most listeners do not know that weather and atmospheric conditions play an important part in their success at receiving distant stations, and even hearing local broadcast programs without static or the crackles and noises of nature's electricity in the air.

You don't expect it of your automobile, do you? You never look forward to hearing the engine run when your gasoline tank is empty. You know the consequences of driving without having sufficient oil. Ten thousand miles and the average tire is ready for replacement.

Give the Set Some Attention

But—Radio is a "miracle," and because it seems mysterious to you, the excellent directions of the dealer who sold you your installation are disregarded until it is too late.

Write this in your hat, or better, paste it under the lid of the receiver:

"RADIO IS NOT A MIRACLE. A RADIO RECEIVER REQUIRES JUST A LITTLE BIT OF ATTENTION NOW AND THEN."

I am asking you to believe this. I am further asking you to believe in the service men. Don't think that your scattered Radio knowledge is superior to his. He is just a human being trying to make your receiver do the best it can.

The service manager told me many interesting things. One was the chief reasons for trouble calls. He ranked them in the following order:

When Trouble Calls Come In

1. Failure to get distant stations, or fading of stations. "Fading" is not the fault of a receiver. It is caused through some phenomena of nature and happens in the intervening space between the station and your receiver. Probably all the receivers in town will be troubled by the fading of the same particular station at the same time. This should prove to you that fading is a general Radio "disease," a cure for which has not yet been discovered, and for which you cannot justly blame your receiver.
2. Battery or tube troubles. These will be discussed later.
3. Loose connections to the set or power supply.
4. Poor aerial or ground.
5. Trouble inside the set other than that caused by defective tubes. Note that the service manager finds but few calls which may be classified under this heading.

There they are—all five of them generalized. Of course, there is one other, and although it is not classified, we shall describe it here as "dumb foolishness." In this category falls the man who called the service manager and for thirty minutes outguessed all questions of diagnosis, until finally the service manager asked him, "Did you plug in your loud speaker?"

"By golly, I forgot all about that," came the fan's embarrassed reply.

That is not far fetched. Listen to this.

"One of the best ones, though," said the service manager, "was on a middle-aged gentleman of rather pugnacious temperament, who tongue-lashed me to a fare-you-well. I finally sent my best man out to his house. Evidently the set did not require much work for he was back in a hurry.

"'What was the trouble?' I asked him.

"'Hah! That's the best yet. It cost me one minute's work and the old duffer just $1.50 because he forgot to turn on the battery switch.'"

"Who cause the most trouble calls, men or women?" I asked. The service manager thought a minute.

Men Cause the Most Trouble

"Women call more often than men, probably because their husbands ask them to take care of this detail. But I think men cause the most trouble by meddling with parts of their sets they know little or nothing about. Most men, I have found, overestimate their technical knowledge.

"On the other hand, we have customers who admit knowing nothing about Radio receiver maintenance and do not want to know anything more. In this class are found wealthy persons who hire chauffeurs to drive and keep up their cars. These people want their sets kept in the pink of condition at all times and are perfectly willing to pay our service charge of $1.50 every two or three weeks just to have the service man inspect their receivers and keep them in good condition."

What Most Common Troubles Are

"What are the most common troubles your men find when they make an inspection on the average service call," I asked. The manager's answer was a gem. Every set owner should read it carefully and impress upon his mind the valuable knowledge which it contains.

"Most troubles come from the listeners who never bother to charge their storage A or perhaps B batteries, or both. As a general rule, batteries cause the most grief. People think dry A, B and C batteries last forever. Some of them have an idea storage batteries contain an infinite supply of electricity.

"Dry A batteries last only from three to six weeks when coupled to a superheterodyne. Then they must be replaced.

"Dry B batteries have a longer life. It may run from three to six months—sometimes, but not often, longer. When a 45-volt block of dry B battery registers less than 34 volts on a fairly accurate voltmeter, the block should be replaced. Further use often causes noisy reception, and the tuning in of long distance stations is practically impossible. Voltmeters that are too cheap should not be purchased. They will not register accurately, and more than likely they will be of a 'low resistance' type which will drain the valuable life from the B block.

Tap Water Not Distilled Water

"Wet or storage A batteries should be charged whenever a hydrometer reading shows lower than 1200. The charging can be stopped when minute bubbles, like pinheads, are observed through the filler holes at the top of the solution. Or, if the hydrometer reading rises to 1250 or 1300, one may assume that the battery is fully charged. A charged six volt storage battery should read 6.6 volts or more on a 0 to 10 or 0 to 15 scale voltmeter.

"Distilled water should be added to the cells through the filler holes whenever the plates begin to show above the surface of the solution. The plates should always be just covered. We find that many people never look into their batteries, or if they do think to add water once a month, they add drinking water, thinking it will do. It will NOT!

Ever Clean Your Batteries?

"What has been said for storage A batteries applies also to storage B blocks. Many people forget that either a different charger or different connections on the same charger are required for A and B storage cells. Much noise in reception is traced to dirty tops on storage A or B batteries. These should be cleaned off periodically with a damp rag, which should be thrown away after use.

"Dead C batteries cause some but not much trouble. The average life of a dry C battery is six months. Then they should be tested.

"Very little trouble is found in either A, B, or trickle chargers, or B eliminators. Many people are mystified by the trickle charger and forget to add distilled water to their storage battery. They forget that the water evaporates just as rapidly from a storage A battery equipped with a trickle charger as from an unequipped storage A."

The service manager paused for breath. I asked him about tube troubles. He replied:

Common Troubles of Tubes

"The chief troubles reported on tubes are first, burn outs, second, low filament emission, and third, shorted elements inside the tube—a fault usually caused by an inquisitive man or child handling or shaking the tube. Burn outs are unavoidable. Filaments may last a thousand hours, and again they may not. Much depends on the careful treatment which the listener accords his tubes.

"Low filament emission is a common fault with 199 and 299 type tubes. This is usually caused by the listener 'forcing' his tubes, or in definite terms, applying more than three volts to their filaments. That is why we recommend the use of a voltmeter on receivers equipped with 199 tubes. Low emission is also caused by tubes becoming worn out. The 199 or 299 type tube six months old will often have this trouble. In either case, the process known as 'rejuvenation' often returns the tube to usefulness. Rejuvenation should not be practiced too frequently. Twice in the life of a tube is about all that will do any good. After that it harms, if anything."

The "Champion" Rejuvenator

Right here, I interpolate the service manager's discussion with a note. One of my friends is an enthusiastic listener. He owns a super-heterodyne using 199 tubes. To make sure his tubes would always be "up to snuff" he purchased a rejuvenator and rejuvenated his tubes every night for a week. By that time his set was beginning to do worse instead of better. He asked me what to do. I told him to store his rejuvenator where he could not get at it more often than once every three to six months, and then purchase a new set of tubes. The service manager continued:

"Very little filament emission trouble is reported on 201A, 301A or power tubes. Burn outs or rough handling usually end their careers."

Aerial and Ground Weak Spots

"What aerial or ground troubles and repairs within the sets themselves do you find most often?" I asked.

"Aerials are often too long, making the set tune broadly. In this case we shorten them to fifty feet or less. Then again they may be very dirty, their insulators dirty or cracked, or on flat buildings we many times find aerials crossing one another and making contact at the crossing. Sometimes they are loose and sagging. We tighten them.

"The all-important ground connection is sadly neglected in nearly every case where the fan makes the installation himself. Listeners should realize that a perfect ground connection means the difference between good selective reception, the hearing of distant stations, and not having either.

"Loop aerial connections are sometimes broken, short-circuited or loose. One man thought because his loop was inserted in a socket which revolved, that he should oil it. He did. When we called we cleaned out the oil and the set worked once more.

Set Itself Gives Least Trouble

"The set itself gives the least trouble of all, if you do not count tube trouble as set trouble, which you should not. Now and then we trace the trouble to a 'resin' joint in the set's wiring, or to wiring that has broken at some point through shipment or rough handling. A touch of solder and this is overcome. Often so-called set troubles are found merely to be loose connections at the binding posts of the set. The listener always feels foolish when he pays $1.50 to learn this simple thing.

"We always give two months of free service to everyone buying a receiver through our store. When that period is over we charge a fee of $1.50 for each

(Continued on page 38)

We Are Like That!

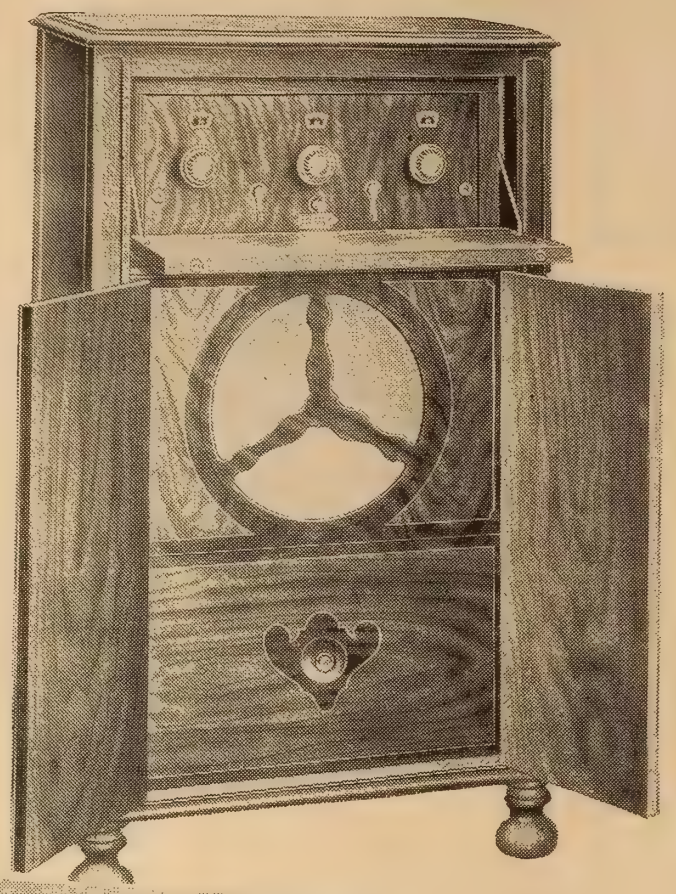
WHEN a middle-aged gentleman of rather pugnacious temperament tongue-lashed the service manager of a large Radio store, he finally sent one of his best trouble shooters to the man's house. Evidently the set did not require much work, for the repair man was back in a hurry. "What was the trouble?" the service manager inquired.

"Hah! That's the best one yet," the trouble shooter replied. "It cost me one minute's work and the old duffer just $1.50 because he forgot to turn on the battery switch."

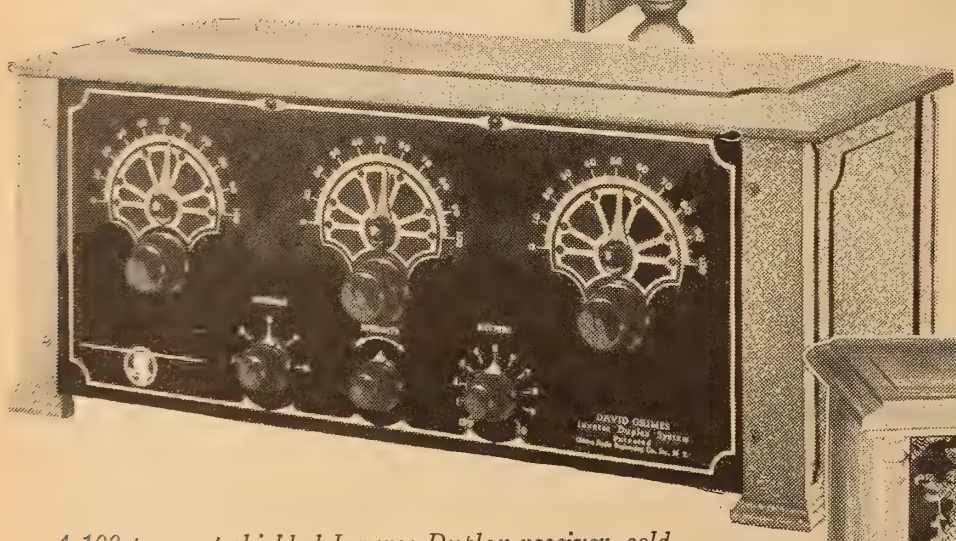
You would be surprised to know the number of foolish calls for service made upon the average Radio dealer. The article herewith describes some of the most frequent troubles of average broadcast listeners. The majority of legitimate troubles are caused by run-down batteries or defective tubes. Read this and save yourself and others "grief."

Season's New Models Please

WITH the Radio shows and expositions of the fall comes a most pretentious array of 1927 model receivers and accessories. On this and the facing page are described some of the outstanding designs which have been prepared to attract the broadcast listener's attention. No doubt, many persons will replace their receivers this year with sets containing advantages to be had in this season's designs. Principal improvements observed this fall are simplification of control, more beautiful and artistic cabinets, mechanical refinements in the interior construction, perfection of audio frequency amplification to yield almost life-like reproduction, increased selectivity, and the shielding of tuning units or entire cabinets. Further details, including prices, of any of the receivers shown may be had merely by writing a letter to RADIO DIGEST

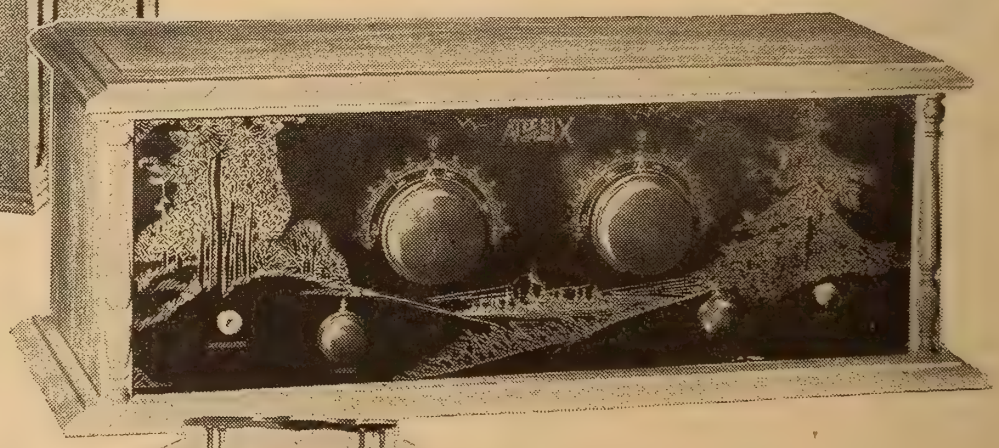


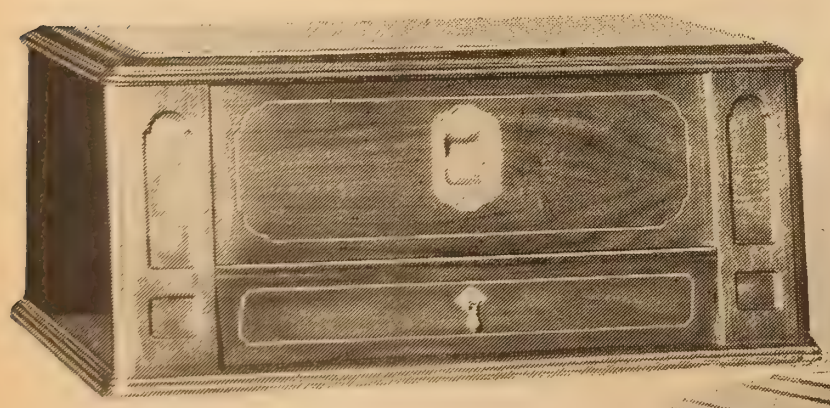
The distinctly beautiful Freshman console on the left, known as the 6-F-11, is the captivating product of this well-known manufacturer. Built in a rich-grained mahogany cabinet having a soft and alluring finish and equipped with a licensed cone type speaker designed especially to reproduce the exceptional quality and volume of the new and improved Freshman Masterpiece receiver, this exquisite creation has been named "The Masterpiece of Masterpieces." The receiver itself has been designed to employ the new power tubes with the result that great volume with wonderful clarity are the outstanding features. In conjunction with the "A-B-C" power supply unit which the Freshman company manufactures, the console can be operated entirely from the light socket. The mellowness of tone is really surprising, the lower notes being brought out with utmost fidelity. The new receiver is Freshman's supreme work.



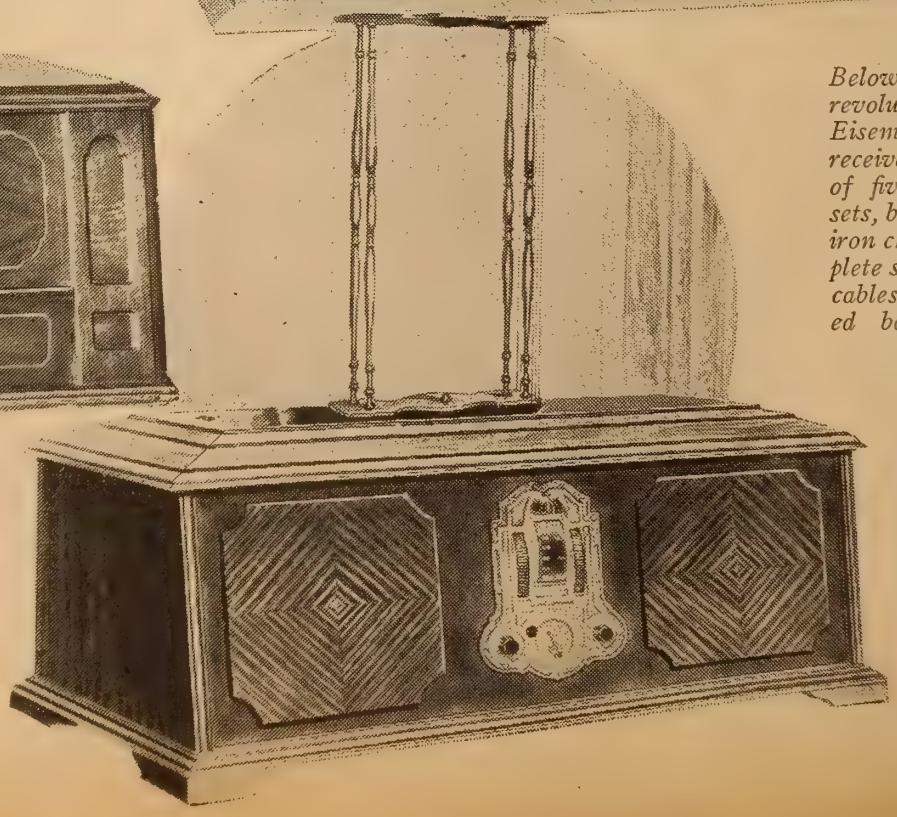
A 100 per cent shielded Inverse Duplex receiver, sold in kit form in two models, a four dry cell tube and a five storage battery tube style, are the first products of the reorganized Grimes Radio Engineering Co. Above shows one assembled. All three dials are operated from one central knob, or individually.

A beautified front panel, graven in gold, is the pleasing contribution of the Atec receivers, the six tube T. R. F. model of which is shown below. There are but two dials to tune, and these are made conveniently large. A five tube T. R. F. model is also made by the Able Tool and Engineering company. Both cabinets are walnut finished.





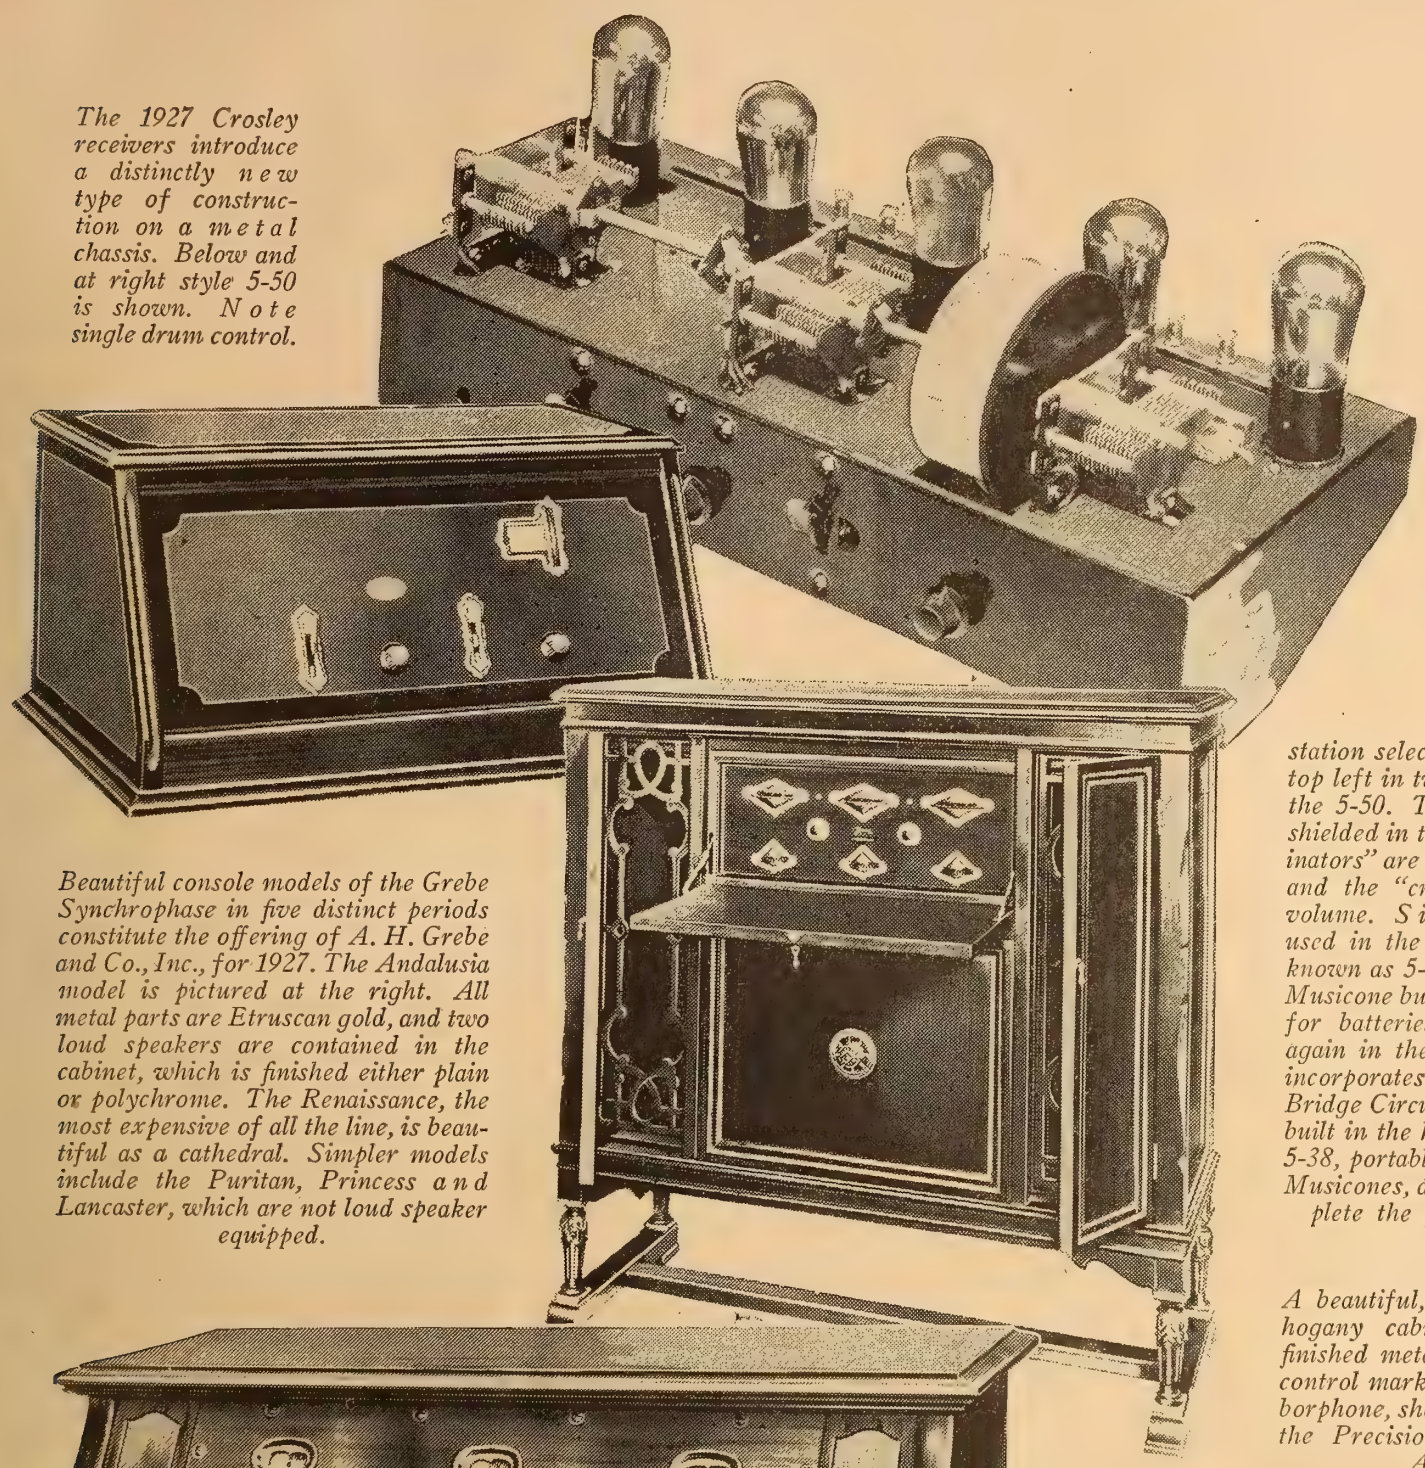
"Are You Thrill-Proof?" asks the Bremer-Tully Mfg. Co., in advertising their new Counterphase-Eight, shown above. And it is a real thriller too, with four stages of tuned radio frequency operated with but one control. Perfect reproduction, a different cabinet, total individual shielding, metal chassis, and good design feature this 1927 receiver.



Below at left is the revolutionary Freed-Eisemann model 800 receiver, one of a line of five to eight tube sets, built on an angle-iron chassis with complete shielding, battery cables, wave-calibrated barrel dial, and voltmeter.

Show Desirable Refinements

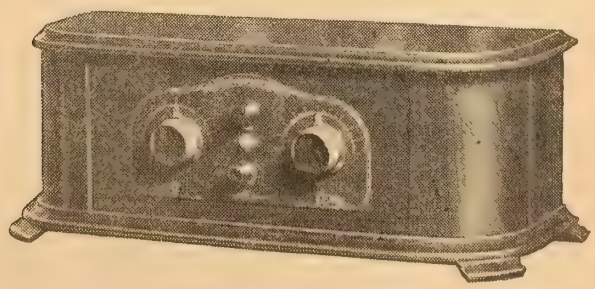
The 1927 Crosley receivers introduce a distinctly new type of construction on a metal chassis. Below and at right style 5-50 is shown. Note single drum control.



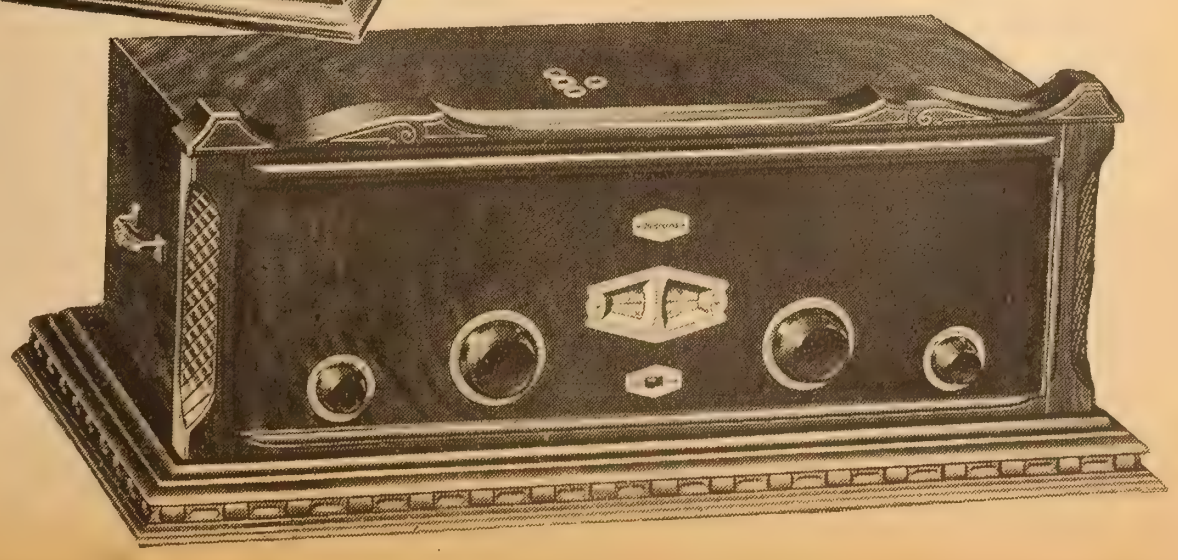
Several new developments in Radio set construction for the coming season have been announced by Powel Crosley, Jr., president of the Crosley Radio corporation of Cincinnati. Some of the 1927 models include a method of using single dial control without loss of selectivity, all-metal chassis for mounting the parts and many other new features, such as the built-in Musicone speaker. The most outstanding of the new receivers is the five tube, single control, graphic station selector model, shown at the top left in two views, and known as the 5-50. The set parts are totally shielded in the metal chassis, "acuminators" are provided for fine tuning, and the "crescendon" controls the volume. Similar construction is used in the high console model, known as 5-75, with the Crosley Musicone built in and space provided for batteries or eliminators, and again in the RFL-90 model which incorporates the famous R. F. L. Bridge Circuit. The RFL-90 is also built in the high console. The 4-29, 5-38, portable, "Pup," four types of Musicones, and a Musiconsole, complete the popular Crosley line.

Beautiful console models of the Grebe Synchrophase in five distinct periods constitute the offering of A. H. Grebe and Co., Inc., for 1927. The Andalusia model is pictured at the right. All metal parts are Etruscan gold, and two loud speakers are contained in the cabinet, which is finished either plain or polychrome. The Renaissance, the most expensive of all the line, is beautiful as a cathedral. Simpler models include the Puritan, Princess and Lancaster, which are not loud speaker equipped.

A beautiful, distinctive brown mahogany cabinet, small and well-finished metal panel, and simplified control mark the 1927 five tube Arborphone, shown below and made by the Precision Products Co., Ann Arbor, Mich.



Above is the new Chelsea Truphonic-Six, utilizing an entirely new system of quality audio frequency amplification, and encased in a two-tone mahogany finished cabinet with dial window indicators. Six tubes are employed. It's made by the Chelsea Radio Co.



There is hardly sufficient space to tell the many interesting and new things in the Howard S-7 seven tube, loop operated neutrodyne. It's completely shielded, dual controlled by calibrated and illuminated dials, and is housed in a cabinet worthy of a place in any parlor.

ANNOUNCE MANY BIG FEATURES FOR WEAF

INCLUDE CHAIN STATIONS IN AMBITIOUS EFFORTS

Atwater Kent Hour Becomes Full Hour October 3—Balkite Hour with Damrosch Begins Oct. 23

NEW YORK.—A veritable host of exceptional events to be found on WEAF's programs during the coming weeks has just been announced.

First of all, the Atwater Kent hour, shortened to a half hour during the warmer months, will again go on its hour schedule beginning on Sunday evening, October 3, at 9:15 o'clock Eastern Standard time. The chain carrying the feature will be extended to include WEAF, WEEI, WJAR, WTAG, WGR, WRC, WCAE, WTAM, WWJ, WSAI, WGN, KSD, WOC and WCCO. A galaxy of noted soloists and grand opera performers will be featured again in this weekly Sunday program.

The "Vikings" will return to the air on Tuesday evening, October 5, at 8 o'clock and will be heard each Tuesday at the same time for forty-five minutes. The same chain as above, with the exception of WRC and WGN and the addition of WFI and WCSH, will carry this feature.

Balkite Damrosch Hour Starts

On Thursday, October 7, at 8:30 p. m. a new program, that of the Schickerling quartet, will be heard through WEAF, WEEI, WJAR and WFI. This will be a regular Thursday program.

The programs of the Balkite hour have their inception on Saturday evening, October 23, and will probably be among the most ambitious ever attempted by any broadcaster. They are now being carefully arranged by Walter Damrosch, the noted leader of the New York Symphony orchestra. The first concert will be a full symphony program by Mr. Damrosch and the orchestra. Thereafter the concerts will be arranged as far as possible in pairs each being preceded by a piano recital by Walter Damrosch. In these recitals, for which he is famous, Mr. Damrosch will discuss, explain and play important parts of the program to be sent out on the air the following week. By this method it is expected that the program will not only be of the greatest entertainment value but a liberal musical education as well. These concerts will be given every Saturday night at 9 p. m., Eastern time, over Stations WEAF, WEEI, WGR, WFI, WCAE, WSAI, WTAM, WWJ, WGN, WCCO, KSD, WDAF and WOC.

"Billy" Jones and "Ernie" Hare Return

"Billy" Jones and "Ernie" Hare have returned to WEAF's microphone and will be heard regularly now on Friday evenings at 8 o'clock with their popular programs. Their repertoire of jokes, stories and experiences has grown much larger during their vacation, and should be more attractive than ever before.

The La France orchestra, recently added to WEAF's program, will continue to be heard Friday evenings at 9 o'clock. Stringed instruments predominate in this unusual orchestra. "The Mysterious Baritone" is another feature of the La France half hour. The program is broadcast through WEAF, WEEI, WGR and WOO.

Lady Fan Asks Artist To Signal Love State

Would Have KFI Star Say It With Code of Songs

LOS ANGELES—"It's one if by land and two if by sea," said Paul Revere, before he started on his famous ride, but Paul Roberts, KFI tenor, finds that his signals are not so simple.

In his fan mail recently he found a letter from an admiring woman which asked many personal questions, among which were whether he were married, or single, young, or old, thin, or fat; whether he felt a pang of love for the unknown writer, or was he quite heartless?

Inasmuch as the type of letter practically forebade an address and a name, Mr. Roberts found it impossible to answer the questions.

A few days later another letter arrived containing the glowing idea that he should answer her secretly by Radio through a code of songs.

"If you are single," the unknown wrote, "then sing, 'All Alone'; but if you are married, sing 'The Battle Hymn of the Republic'; if you are young, sing 'At Dawning'; if you are old, sing 'Darling, I Am Growing Old'; if you want my love and want to meet me, sing 'The Hand of You' between 8 and 9 next Wednesday."

Roberts went before the microphone the following Wednesday night and sang all of the songs in one group except "The Hand of You," which he swears he will never sing again.

TRAMP CAT ALMOST MURDERS WGY STAR

SCHENECTADY, N. Y.—One of WGY's popular entertainers lingered between life and death for a few days recently, as a result of a murderous attack by a marauding cat.

Pete Van Curler is probably the youngest and the smallest Radio performer appearing regularly on a program. He has appeared as concert artist with the Hotel Van Curler orchestra every Thursday afternoon and many letters have been sent him by appreciative listeners. He is a Hartz mountain canary with a throat that emits golden music. Pete's cage is placed along side of Porter Potts, the director of the orchestra, and when the violin begins to sigh Pete just lets go with everything he has.

A few weeks ago, while Pete was perched high for the night, a tramp cat, one of the kind that nobody loves, sprang at the cage and before anyone could intervene he had reached through the wires and had dealt Pete one wicked blow with his clawed paw. Pete was in a pretty sorry state for days and it was thought he might lose at least an eye, if not his life.

However, Pete is getting better and has thrilled his friends by chirping brightly when he hears the distant music of the orchestra. He hasn't sung yet but in a few days his cage will be carried to its place beside the orchestra and he will be invited to take part again in the program.

WAVE PIONEERS MAY SOON BLOCK JUMPER

COMMERCE DEPARTMENT EXPECTS TROUBLE YET

Cooler Months Are Anticipated to Bring Fan Complaints—Little Power Required to Interfere

WASHINGTON, D. C.—Reports are current here that some of the broadcasting stations with long wave lengths will probably go into court this winter to see if they can obtain injunctions against those stations which have "jumped" their wave lengths. No such cases have yet been filed according to the information available here.

Officials of the department of commerce who are watching the Radio situation are of the opinion that the coming autumn and winter will bring considerable in the way of "kicks" from Radio listeners, because of this duplication of wave lengths. Not so many complaints have been received during the summer months, but this is believed to be because the signal strength of all stations is somewhat reduced during the summer.

Little Power Needed to Interfere

According to Dr. George C. Southworth, who has calculated the signal strength broadcast by a station and the power required to give a fairly loud signal with the ordinary receiving set, the energy of the ether waves flowing through every square meter of a place perpendicular to a line to the station, is about a quarter of a microwatt (millionth of a watt).

This energy would have to be multiplied 160 million times if it were to be sufficient to light an ordinary 40-watt electric lamp.

Even though Dr. Southworth might have erred considerably in his calculations, it does not take a great deal of imagination to understand how delicate a Radio broadcast wave really is. No wonder we have "interference" with these delicate waves.

Tune in WGY Sept. 18 and Tell Which Set Sends Best

SCHENECTADY, N. Y.—Propagation tests on two of its three transmitters will be continued by WGY, of Schenectady, on Saturday night, September 18, on 379.5 meters. Engineers of the General Electric company are endeavoring to give Radio listeners the very best possible transmission and the cooperation of listeners is necessary.

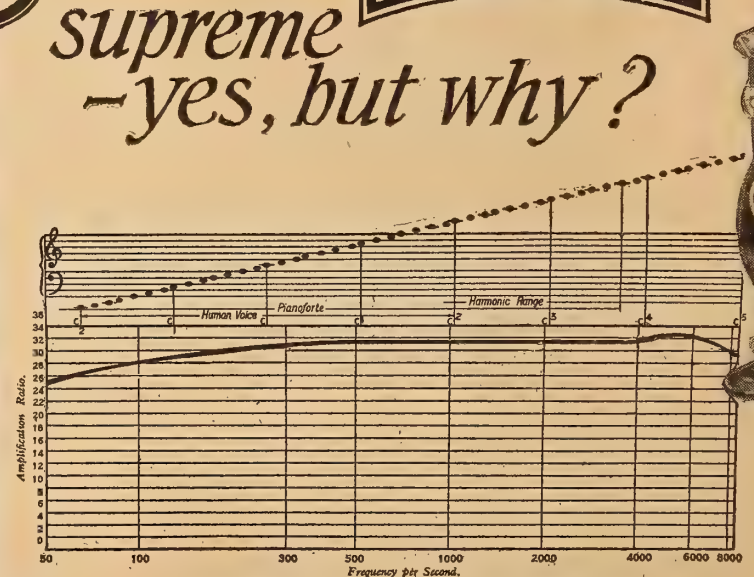
The transmitters used are known as No. 2 and No. 3 The former will be used until 9:30 p. m., Eastern Standard time, at which time No. 3 transmitter will be operated for a half hour period. At 10:00 No. 2 will be put in commission until 10:30, when No. 3 will go on the air for a period of a half hour.

The listeners are asked to compare the signal strength of the two receivers and to give their opinion of the relative reliability of the output. Listeners are also asked to indicate their preference.

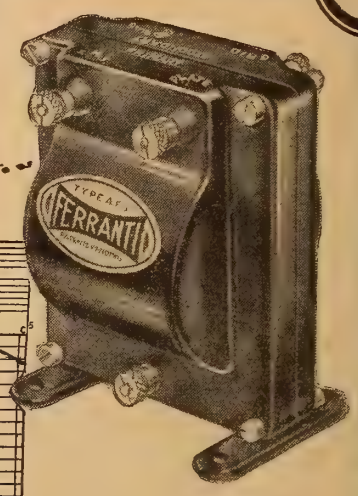
THE NEARLY PERFECT TRANSFORMER

FERRANTI

supreme —yes, but why?



AMPLIFICATION CURVES. (BASED ON A MUSICAL SCALE.)



Audio Frequency Transformer A.F. 3 $12

THIS graph is drawn on the musical scale—the only accurate way of showing the full value of each tone which your set receives. Note that the evenness and fullness of amplification extends throughout the range of the organ, the cello, and the human voice.

Analize these facts about the

FERRANTI TRANSFORMER

AFTER all is said, what is the truth about this transformer question? Is it important to you to get merely mediocre reception from your set, or do you value getting the very best from it that you possibly can?

The Ferranti Transformer is the Nearly Perfect transformer—nearly perfect because its amplification curve is almost a straight line. No other transformer approximates this degree of perfection.

And when you consider the fact that the scale of measurement is based on the musical scale, showing as it does true transformer value as applied to any tone which you can possibly receive in your set, you will appreciate that this is the only fair method of testing transformer performance.

The Ferranti Transformer does more than act as a superior transformer. It is designed to produce that depth of tone quality which is lacking without a worthy transformer. From the low notes of the organ and the kettle drum to the high pitch of the flute and the human voice, Ferranti Transformers "carry on" faithfully.

We welcome inquiries from responsible dealers and jobbers

THE NEARLY PERFECT TRANSFORMER

"GOODY GOODY GIRL"

(Continued from page 7)

them. His day had marked the climax of the family fortunes, however. By the time Lois was born they had dwindled to mere ownership of part of the original lands and these her dreamy, inefficient father had heavily mortgaged in preference to working them that he might have the more leisure for the books in the library of the old colonial house. He had left even less for his widow and daughter.

PHINEAS BLAIR with his Yankee shrewdness, his northern push and drive, had come along and married Mrs. Sylvester just in time to save the lands from passing out of her hands altogether and into the hands of those who held the mortgages. He had promptly moved his newly-acquired family out of the old home into a smaller house in Paradise. An indefatigable worker himself, he had demanded work from all those about him. Even his gentle little wife, reared to be a so-called lady, did not escape. She did her own housework and continued to do it long after the necessity for it had passed, because with affluence Phineas Blair continued tight-fisted. Under a law written in the days when the man owned everything and his wife nothing, he got ownership of the plantation when his wife died. Lois got only the burden of her mother.

She was only slightly better equipped to bear it than her mother had been. That mother had secretly hoped that the girl would fare better than she in the end. She had succeeded in getting her almost through the high school in Clermont, had managed to have her voice—it had been discovered she had one—trained to some extent, had brought into her life as many outside influences as she could before she died.

All that had come to an end when she no longer was there to stand between Lois and Phineas Blair. He turned the sixteen-year old girl into his housekeeper, drudge rather, and set his heavy foot down upon everything else. He had put her through high school, he said. That was enough education for any woman. He could not see why she wanted further training in music. She sang better than any girl he knew; she was a member of the church choir and had all the solo parts at entertainments. He had money, yes, but he had earned it and he proposed to keep it just as the law allowed. She would be sheltered, clothed and fed while he lived and in his will he would not forget her. But as for the rest—

The rest was what Lois was striking for when she stole away from his house in the night and took the road to Clermont. Neither the night nor the road held any terrors for her. Even if she had not been country born and raised the buoyancy inspired by the first real freedom in all her life would have kept her unafraid.

SHE HAD expected to walk the entire five miles, with frequent rests to ease the burden of the suitcase, but two miles away from home she heard the distant throb of a motor behind her and twin beams of light suddenly flooded the road. Her heart leaped into her throat. Had Phineas Blair discovered her absence already and was he pursuing her?

A frightened glance over her shoulder showed her the car was still some distance away. She did not believe she had been seen. She scrambled down into the ditch beside the road and took refuge among the tall and dusty weeds which lined it.

The car kept on coming but it seemed to her that it had slowed down. She was sure of it a moment later when a spotlight suddenly sprang into life and began to search out the sides of the road. Looking for her? Had she been seen? Was it Blair? Was her bid for freedom from his shackles to end in being caught and dragged ignominiously back to them? She crouched deeper among the weeds.

Almost opposite her the car came to a stop. It wasn't Blair's roadster, she saw, but a touring car.

"Hello," a voice suddenly called, a youthful sort of a voice that she thought held something familiar but could not place. She did not reply and a moment later the hail was repeated. Then the spotlight came into play again, searching her immediate vicinity. Her already quick-beating heart began to race and she sought to shrink still closer to the ground. The shaking weeds betrayed her and abruptly the light picked her out.

THE DRIVER of the car left the light upon her, got out and came over to the edge of the ditch.

"I knew I'd seen a girl walking along ahead of me. What did you want to hide for?"

She rose to her feet but made no move to quit the ditch, although he bent over and stretched out his hand.

"Because I wanted you to pass on," she said, answering his question. "There's nothing to keep you from doing it now, is there?"

"Only you. It doesn't seem hardly fair to drive away, leaving a lady standing alone in a ditch in the middle of the night. You're going to Clermont, aren't you?"

"Yes."

"Here's where you ride the rest of the way. Give us your hand. Pass up the suitcase first."

"I'd much prefer to have you go on about your business and let me walk."

"Not much. Where would our well-known Southern chivalry be then? Pass up the suitcase."

She hesitated but a moment. He spoke like a gentleman and of chivalry. Surely there'd be no danger. She held the suitcase up to him, felt it taken from her and her hand grasped in the same moment and was drawn up the bank full into the glare of the spotlight. She bent her head to keep the light from her eyes.

"Here, here. No fair." His hand touched her under the chin, pressed her head upward. "Oh!" A new note, of respect it seemed to her, came into his tones. "It's Lois Sylvester, isn't it? You know me. Herbie Coles."

THAT accounted for the familiar something in his voice. She did know him, had been a schoolmate of his for one term at the high school. The fact that it was he disturbed her. The Coles' lived over beyond Clermont, had plenty of money, but, in the language of the negroes, were not "quality folks." Herbie, she had heard, was "wild."

He tossed the suitcase in the tonneau, helped her into the seat beside the driver's and got in himself.

"Running way?" he asked presently.

"Oh, no. Just going away for a few days on a visit."

He laughed shortly. "I wouldn't have guessed it, your walking to town, carrying your things, when Phineas Blair has a car and money besides. I'll bet he doesn't know you're going."

She did not answer.

"There, I knew it," he said triumphantly. "You are running away. Going off on your own, aren't you?"

"On my own, yes, but not running away. I'm of age and free to do as I like, I believe."

"You'll find it involves paying as you go."

"Paying?"

"Yes. This ride, for instance."

"Oh, you want me to pay for it?"

"Absolutely. I'm saving you a long walk. Three miles, anyhow, and hauling your suitcase besides. But I'll let you off easy. One little kiss and we're square."

She drew away from him toward the side of the car.

"COME on, girlie. What's a kiss between old friends, schoolmates and all that? Absolutely nothing. Pucker up your lips."

"No."

Suddenly he threw out the clutch, guided the car to the side of the road and brought it to a stop.

"Do I get that kiss?" he demanded.

"Certainly not."

"I'm going to take it, anyhow." His arms suddenly went about her shoulders and drew her to him. His other hand caught the back of her head and held it while he pressed his own burning lips to hers. She began to struggle, to hammer him with her little clenched fists. One of them caught him flush in the mouth so that he released her and before he could seize her again she had opened the door and left the car.

Her toe came in contact with a large stone and she bent quickly and picked it up.

"Drop that!" commanded Herbie Coles sharply.

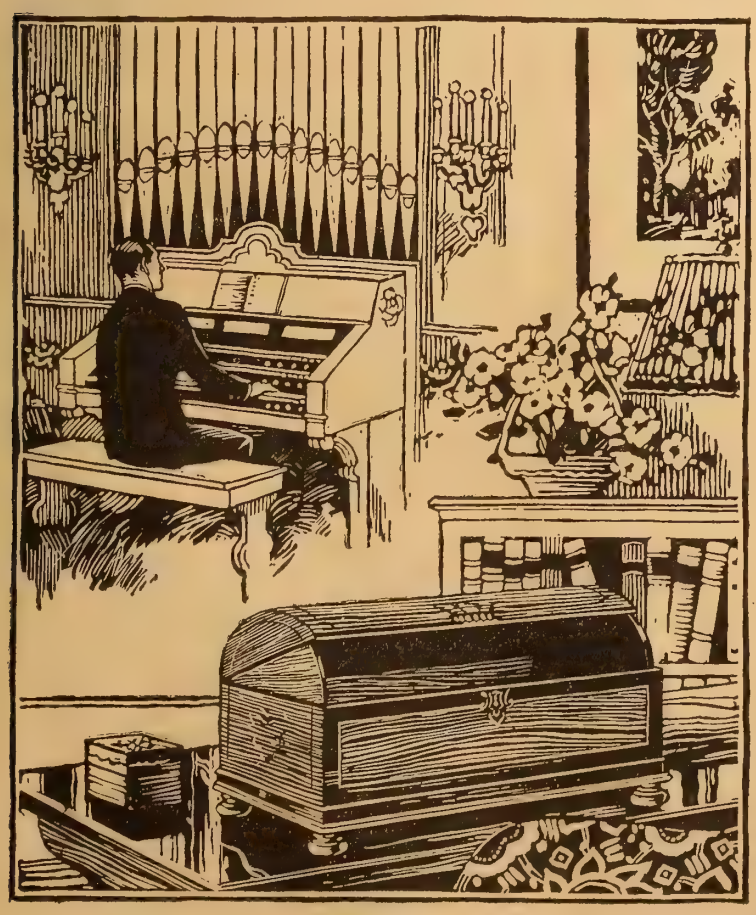
Instead she drew back her arm. "If you get out of that car I'll smash your face with it," she threatened.

Evidently he was convinced that she meant it. He dived into the tonneau and hurled her suitcase out into the road. "Now you can walk, you damned little goody-goody," he said venomously and threw the car into gear.

Lois made a little face toward the swirl of dust which marked his retreat. "You had a nerve to boast of Southern chivalry," she said half-aloud. "But then, you're only trash, after all."

Before she picked up the suitcase and trudged off in the direction of Clermont again she got out a handkerchief and scrubbed her lips. His had not been the first kiss she ever had received from the opposite sex, but it was the first of its kind. The others had been chaste salutes implanted upon her lips at parties or the like and had meant nothing. His had burned her, had been shot through and through with an implication of something behind it. She had not realized that so much could be conveyed by the touching of lips.

THE ENCOUNTER had not frightened her. Her feeling, rather, was one of indignation that Herbie Coles, nobody in particular for all that his folks had money, had dared to affront her. She was a Sylvester, for all that she was little more than a servant in the house of Phineas Blair. One did not paw a Sylvester or kiss her against her will. Other boys always had treated her with



The Spell of Radio Magic Unbroken!

HERE is the Radio Sensation of years—the Velvet "Jewel Case". the respect amounting almost to awe that is accorded the first families of the South. Something of the same had crept into Herbie Coles' voice when he had discovered her identity. Later, of course, he had grown bold, taken advantage of what he believed to be her helplessness, but—

"I showed him I knew how to take care of myself," she said proudly.

Leisurely as was the pace which she set herself, she came into the outskirts of Clermont before dawn. Occupants of the frame houses she passed were still wrapped in slumber as she walked along a tree-shadowed street that eventually brought her out upon the public square about the court house.

The lights of a little all-night restaurant beckoned her. It was deserted save for a combination cook-waiter with a funny little white cap askew on his head who dozed behind the counter. He came wide-awake with a start and gaped at her as if unwilling to believe what he saw. Then he became bustlingly active, and having taken her order and filled it sought to start small talk.

FATIGUE was beginning to creep upon her so she sought to discourage him by short replies. No whit discouraged, he rattled on and to get away from him she hurriedly finished the meal, paid her bill and, the suitcase grown heavy at last, went across the street and sat down upon a wooden bench on the court house lawn. She propped her elbow upon the suitcase, cradled her cheek in her palm and drifted into sleep.

She awoke with a start some time later. People were astir in the streets, business was coming to life about the square. Hurriedly she got up and found a place where she could catch a glimpse of the big-faced clock in the court house tower. Eight o'clock. Her train was due in fifteen minutes and the station was at the foot of one of the streets running into the square. Four blocks, but, thank goodness, it was down-hill.

She was still a good half-block away when a locomotive whistled and she broke into a run. To miss the train now— A moment later a line of passenger coaches slid into view, crossing the end of the street down by the station. They were going in the wrong direction, however, so that she knew it must be the north-bound express. It would meet the local she intended to take, no doubt. She left off running but continued to walk fast, her ears tuned to catch another whistle.

It had not sounded when she set foot upon the end of the wooden platform of the station and set down the suitcase to arrange her dishevelled self and catch her breath before proceeding to the station itself to buy her ticket for Kaneville.

Then she chanced to look up and what she saw made her look wildly around her for a way of escape. Not more than fifty yards away Phineas Blair was stalking along the platform toward her.

CHAPTER III

Rescue

WHITE-FACED and trembling, as incapable of movement as if she had been turned to stone, Lois watched her step-father's long strides eat up the distance between them. The set of his shoulders, the way he moved his heavy feet down upon the platform, spoke of an attitude as inexorable as doom itself. What would he say, what do, when they came face to face?

Suddenly he turned off into the station house. A great sigh of relief welled up between her lips. He had not seen her, evidently. Now, if ever, was her chance to foil him. The paralysis induced by the shock of discovering that he had trailed her vanished as instantaneously as it had come. She glanced swiftly about her.

The observation car of the express had come to a stop just opposite where she stood. She seized the suitcase, jumped off the platform, fled across the rails and darted around the end of the car. It's heavy trucks seemed to offer a screen from those on the platform and she halted beside them. For the moment she was safe. If Blair did not find her before the local arrived she could board it from the off-side, between it and the express, and proceed to Kaneville. Not seeing her get on, he wouldn't be likely to search it.

Two cars ahead a bare-headed young man stood beside the express, chucking stones at a telegraph pole on the edge of the right-of-way. Suddenly he desisted, stared a moment in her direction, then came toward her. As he approached he opened his mouth as if to speak but closed it again when she laid a finger across her lips and flashed him a look of pleading. He nodded and went on past her around the end of the car.

Ec-centric!

the new SAAL CONE *gives scientific reproduction of* ALL *tones*

Your radio set gets all the sound waves now. But does your speaker reproduce all—or only part of them?

Cones—the latest development in speakers—have large conical parchment diaphragms. Hitherto, these diaphragms have been Concentric, with the stylus or actuating unit at the center.

Now the first scientifically built cone—the new Saal Cone—is *Ec-centric.* The center—literally "off center." This new construction is based on known musical laws. Note the adjoining diagram—the Saal in comparison with that most melodious of instruments—the harp. In the harp [as in the piano] long strings produce deep low vibrations. High notes require small space, short strings. *Similarly in sound reproduction high notes require less space for expression than deep low tones.*

These exact relative proportions of vibrating area, definitely fixed by scientific principles, are now provided for the first time by the Saal Ec-centric Cone. Balanced reproduction without unnecessary size.

Performance? *All* the music—much of which you are now missing. Operates perfectly with or without a power amplifier. Its tone is not surpassed by any speaker in the world. Completely eliminating drum or barrel effect. And at a price never before offered in a quality speaker

A highly decorative instrument with artistic scrollwork medallion and border design in gold.

A demonstration will convince you. If at all interested in radio, you will want to investigate this new principle. Write for descriptive literature. Saal Cones are fully protected by patents.

WORLD FAMOUS MAKERS OF HORNS · CONES · PEDESTALS

AT ONCE a voice hailed him from the platform: "See anything of a young woman around on that side, mister?"

"A woman? What kind of a woman?" countered the man off the train.

"A two-legged woman, with two eyes, two ears, one nose—"

"Funny, aren't you?" interrupted the other. "You ought to go on the stage."

"Now, you listen, young feller—"

"All right, you're forgiven. But tell me, what would a woman be doing around there, officer?"

Officer! Lois' heart skipped a beat. Blair had invoked the aid of the law. How could he? What had she done?

"Thought maybe she might be hiding, waiting for the local, figuring she's board it from the far side."

"I see. What's she done?" The man so cleverly evading the questions of the man he had called officer had put the one she wanted answered.

"That's none of your business," broke in Phineas Blair's voice. "What she's done makes no difference so long as she isn't around there. We'll have to search the train, Jed."

"Now, what good would that do? You ain't got no legal right to stop her and you know it. And I won't search no train. I told you I'd see if she got on from the far side and that's what I'll do and no more."

Lois picked up her suitcase and began edging away. When the express pulled out she would hide at the foot of the embankment until everything was quiet about the station, then—

The open vestibule by which the young man had descended gave her a new idea. Why not board the express, ride to the junction down the line and take the late afternoon train back to Kaneville?

SHE WAS struggling to throw the suitcase into the vestibule when the young man came back on a run. He took it from her and tossed it up the steps.

"Hurry, we're about to pull out," he said, put his hands under her arms and boosted her on. Then he swung aboard himself as the wheels began to move.

"Close work," he said with a laugh. "Now that you're aboard, what next?"

She explained that she intended to ride to the junction.

"You won't if the conductor sees you. This train isn't supposed to pick up passengers like this, you know. Some kind of fool interstate law. This conductor of ours is a crab. It would be like him to stop the train, put you off—"

"Oh!" Tears welled up into her eyes. The physical and mental strain she had undergone were telling on her.

"Here, here, don't start crying," he begged hastily. "I imagine I can fix things if—how game are you?"

"I'm beginning to get desperate."

"In that case—come along. Better cross your fingers, though—for luck. If we're caught—"

He picked up the suitcase and led the way into the Pullman. Not without trepidation she followed past the curtained door of the smoking room to the end of the narrow passageway into car proper. He took quick survey of the high-backed seats, then quickly opened a door marked "Drawing Room A" and motioned her to enter. When he had followed he closed the door and threw the catch that locked it.

SHE CLUTCHED at his arm. "Why did you do that?"

"To keep out intruders," he explained. "Neither the conductor nor the porter is at all likely to come, but I've friends on the train who might take it into their heads to drop in. If the door is locked they'll go away again."

"I see. It's very kind of you and I'm deeply grateful."

"Please! It's nothing at all and I'm glad to have you here, even if it's only as far as the junction. I knew this was to be my lucky day. Back there when I got off to stretch a bit before breakfast I found a four-leaf clover."

"It's good luck seems to extend to me as well," she replied entering into his whimsicality. Then she sobered: "Do you know, I don't feel quite right about this—riding without paying my fare, I mean. It seems like stealing, and only last night"—she frowned at the recollection—"I was told that being on my own I must expect to pay my way."

"Not this time. You needn't worry about defrauding the company, either. To get this drawing room I had to buy two full tickets. You're merely riding part of the distance that the unused one calls for. But—ethics are boresome subjects. Let's talk about the most interesting thing in the world—ourselves. To begin with, I'm Raymond Lancaster and my home's in Chicago."

"And I am Lois Sylvester from Paradise."

"I believe it; the Paradise part. Small town, I suppose? Sylvester means 'born in the country.' And Lois—'good,' 'de-

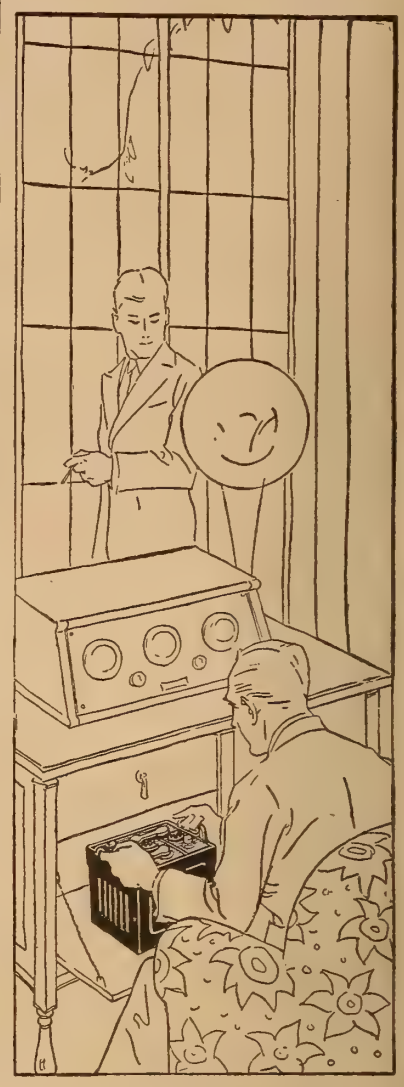
"26 Years Making Good Instruments"

Radio batteries
with a name and a reputation

THERE is one safe guide to follow in buying radio storage "A" and "B" batteries—the name of the battery and the reputation of the manufacturer. Neither the appearance nor the size of a battery can be used as an indication of the radio service that is locked up in these black boxes and glass jars.

More than twenty years ago, Prest-O-Lite gave the motor-car its first really dependable light, and since that time Prest-O-Lite has more than kept pace with the ever-changing motor industry.

When the miracle of radio came, it was only natural that Prest-O-Lite should make batteries especially for this new industry; batteries which because of their unexcelled quality have added to the reputation and prestige of the name Prest-O-Lite.



These batteries were perfected in the world's largest electro-chemical research laboratories. They are made of the finest materials. Every user of a radio can depend upon Prest-O-Lite Radio Batteries to deliver their rated ampere-hour capacities and to insure good clear reception.

Prest-O-Lite Batteries are attractively priced from $4.75 up. It is unwise to take a chance on batteries of unknown make. Ask for Prest-O-Lite.

STORAGE BATTERIES FOR MOTOR-CARS AND RADIO

DON'T THROW AWAY YOUR RECEIVER YET

"EVERYTHING'S GOING TO BE ALL RIGHT" IN 1933

Dr. J. H. Dellinger Tells About Sun Spots and How They Spot Up Reception

WASHINGTON.—Cheer up! From 1928 to 1933 Radio reception conditions should improve, reaching their best in the latter year.

So speaks the bard of the bureau of standards, Dr. J. H. Dellinger, in explaining to the layman the sun-spot Radio interference theory, which observations have practically proved correct.

During the first part of 1926 experienced listeners will recall that reception conditions were below par and quite freakish. Dr. Dellinger explains as follows:

"Sun spots throw out enormous eruptions of electrons and other electrical particles some of which reach the earth's atmosphere. When the sun spots are particularly intense, Radio reception is apt to be disturbed and poor. This has not been conclusively proved, but seems to be indicated by such observations as have been made.

From Bad to Worse, Then Good

"The sun spot cycle is eleven years, that is, there is a minimum of spots on the sun for a time, after which they gradually increase and pass through a maximum and return to a minimum, the whole occupying eleven years. The last sun spot minimum was in 1922 and it would be inferred, therefore, that Radio reception at its best in 1922, should be progressively worse to 1928, and that in succeeding years reception conditions should improve and be at their best again in 1933.

"It will be interesting to see whether this occurs and whether future observations on sun spots will show a closer correlationship with Radio reception conditions."

Musicians Operate WLWL

NEW YORK.—Every member of the staff of Station WLWL of New York who has any monitoring of programs to attend to is a trained and accomplished musician.

IMPERIAL IMPS TRY TO BECOME ANGELS

NEW YORK.—The Radio adudience nearly lost two of their favorite entertainers in a recent railroad catastrophe in New Jersey. The Imperial Imps, featured Wednesday nights at WJZ, were seated in one of the cars of a train which met with an accident, but in spite of the fact that they were severely shaken up and sustained minor cuts and bruises, they escaped serious injury.

Snappy "Air Copy" Is Promised

WASHINGTON, D. C.—Sam Pickard, chief of the Radio bureau of the United States department of agriculture, has added two new trained writers to his editorial staff. They are Miss Josephine Hemphill of Kansas and Solon R. Barber of Utah. Both have had practical experience in writing for metropolitan and rural readers. Samples of their products are to be distributed to the broadcasting stations within the next few days.

Greenwich Village Is Invaded by Radio Men

Promoter Irwin Buys "Club Circus" and Re-Opens

NEW YORK.—Greenwich Village has been invaded by the Radio industry. G. Clayton Irwin, Jr., has purchased the Club Circus, 160 W. Fourth street, at the corner of Sixth avenue.

Mr. Irwin will conduct the Club Circus on a more lavish and impressive scale, and alterations will be made to enhance the exterior as well as the interior. The dance floor is the largest in Greenwich Village. The finest artists will furnish entertainment every evening. The Club Circus will become the New York entertainment headquarters of the Radio industry.

Mr. Irwin is general manager of the Radio World's Fair, now on in New York city, and of the Chicago Radio show—the principal expositions conducted officially on behalf of the Radio industry by Mr. Irwin in partnership with U. J. Herrmann, New York and Chicago showman.

WOK AMBITIOUS; GETS SUPERPOWER STATION

20,000 Watts Power and Improved Antenna Are Added

CHICAGO.—After broadcasting a year on 5,000 watts power, Station WOK of Homewood, near here, will step into the real superpower class within the next few weeks, according to Norman E. Wunderlich, chief engineer.

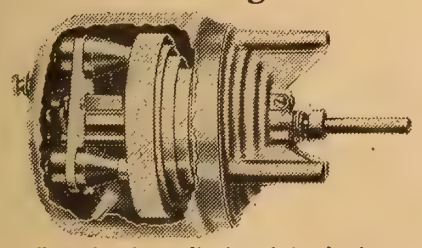
This will be done by installing a 20,000-watt transmitter, more than doubling the height of the antenna towers, and using a new type of antenna designed to greatly increase signal strength. The new towers will be 200 feet high.

In addition, WOK has just completed the installation of an 8,000-watt transmitter, which will be used for experimental purposes and in emergencies.

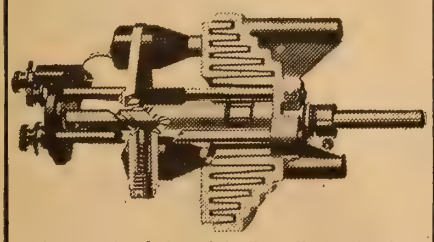
The new antenna will be in the form of an inverted cone. This antenna was designed by Prof. J. T. Tykociner of the University of Illinois, who declares that experiments have demonstrated that this cone type of antenna will improve radiation efficiency about fifty per cent.

FURNELL

Conceded to Be the Most Practical Straight Line Frequency Condenser Ever Designed!



Illustrating the application of the aluminum electrostatic shield provided for preventing the emanation of stray currents therefrom.



Cross sectional view of the Furnell, showing its mechanical construction, also the tapered concentric rings.

The Furnell spaces the stations equally over 360 degrees of shaft movement, a complete rotation of the dial. No crowding of low wave length stations. No need for a vernier dial.

Radio experts praise the Furnell because it represents the finest condenser workmanship available today. Because it gives to radio reception a degree of tuning perfection heretofore unattainable.

DUST PROOF. DAMAGE PROOF. ELECTRO-STATIC PROOF.

The smooth operation of the shaft and slider affords a degree of accuracy and precision unattainable with the ordinary type of plate condenser.

THE FURNELL MANUFACTURING CORPORATION

24 Scott St., Newark, N. J., U. S. A.

From "Consort" to Symphony —from Radio to Thorola Art

The first known representation of an Orchestra dates from about the year 1000 A. D.

The first crude orchestras were described as mere "consorts of flutes and viols". Compare this with the limitless tone effects of the modern symphony orchestra. A great advancement of course. Yet we truly believe you are bound to discover just such advancement in Thorola radio.

Thorola clearly marks the end of those days when the scientific wonder of radio could excuse artistic compromise. The flawless reception of pure, unblemished music and distinct, natural speech is the greater wonder of Thorola instruments.

Relentlessly all the old radio "disturbances" have been downed. As the pioneer American builders of long-distance acoustic apparatus we were ideally equipped for the task. We were able to originate Thorola Low-Loss Doughnut Coils making selectivity *positive*—concentrating full power on the wanted station only—and eliminating internal interference and circuit confusion, so that the remaining difficulties revealed themselves and could be methodically conquered.

We also created Thorola Golden Tone transformers, balanced and sensitive to a degree never before considered commercially feasible. It was one more example of the attainments to be expected from an establishment which was one huge acoustics laboratory long before radio began!

And we already had the loud speakers whose brilliant clarity and fidelity, at any volume, admittedly improved all receiver performance.

Yet all of our highest technical achievements—so far ahead scientifically—should not mean as much as your ear in selecting radio! Unless you go and hear 1927 Thorola models you run the risk of owning radio that is already outdated. Whatever style you desire—console, cabinet, cone speaker, or horn speaker—the Thorola representative has it. He welcomes the most critical consideration. He will show you the first radio receivers with provable upkeep economy!

REICHMANN COMPANY, Chicago, Member R.M.A.

Thorola

(Western and Canadian prices slightly higher)

MODEL 57 CABINET . . . $60

Thorola radio at such a price seems unbelievable. Antique, Highlight Walnut finish and charming proportions distinguish this cabinet. It gives you the genuine Thorola 5-tube circuit, whose many special features insure performance which cannot be measured by any previous standards of power or hook-up.

MODEL 59 DE LUXE CONSOLE (*Illustrated*) $185 MODEL 58 $125

A receiver with two speakers—the Thorola Cone and the Thorola Horn type! Perfect reproduction facilities for every radio impulse. Of course the 5-tube Thorola Circuit brings them all in clearly, with its exclusive Doughnut Coils, Golden Tone Transformers, Duo-Dial Control, Power Tube, and other great advancements. Their advantages make it literally impossible to judge Thorola receivers by the old formula of power-ratings. In fact, Thorola developments mean more power, and more operating economy as well!

The cabinet, in Antique, Highlighted Walnut, is a furniture masterpiece: comparing only with the rich artistry of Thorola reception.

Full Thorola performance and economy characteristics are offered at a moderate price in Model 58. The Console is of Antique Highlighted Walnut, as in the most luxurious Thorola models. All the Thorola circuit and speaker features assure unsurpassed radio.

MODEL 9, CONE SPEAKER $20

With its Dual Range diaphragm, the Thorola Cone Speaker is the first of its type to cover the entire range of reproduction without compromise at either the high or the low end. Never has a speaker of this *style* had tone of this *character*. Luxuriously finished in Walnut and Old Gold, with Carved Ornamentation, this speaker delights the eye as well as the ear.

MODEL 4, HORN SPEAKER $25

The Controlled Mica Diaphragm of this speaker, with its exclusive Separix, brought out the artistic possibilities of radio, by reproducing even the musical overtones. Always known as perhaps the steadiest seller in radio history, Thorola 4 deservedly retains its rank—*in appearance, too!* The beauteous Bakelite Bell, smart Golden Throat Band, and Classic Base adorn any room.

THOROLA, JR. SPEAKER $12

Matchless Thorola tone quality, and graceful appearance are obtainable in a horn speaker of more moderate size, the Thorola Junior. It improves the operation of any receiver in a way which is out of all proportion to the price.

"GOODY GOODY GIRL"

(Continued from page 16)

sirable.' I think you live up to it; the desirable part, at least."

Under his quizzical eyes she flushed. "I'm good, too," she said quickly, then hurried on: "Your name, what does it mean?"

"Raymond means 'wise protector.' Haven't I lived up to it? Didn't I protect you back there from the yokel with the pirate mustaches and the big tin star—"

"THAT would be the constable, Sim Pruitt," she chuckled, recognizing the description. "The other was my step-father."

"Who had no legal right to stop you but was going to, anyhow, eh? He looked about as amiable as a hungry crocodile. I suppose you're running away from his brutalities, or is it that you're going to meet a man?"

"Neither. I have no sweetheart and Phineas wouldn't dare to beat me. I'm a Sylvester, you know—of the Sylvesters," as if that explained everything. "And I'm not exactly running away, either, just asserting my independence by going off on a visit to a girl I used to sit with in school. I'm coming back in a few days. Phineas told me I couldn't, so last night as soon as he went to sleep I slipped away, walked to Clermont, back there where I got on—"

"Good Lord! You've been up all night? Why, you must be dead on your feet. No breakfast, either, I suspect—"

"Oh, yes, in a restaurant when I got to town, but," she smiled wanly, conscious of her weariness, "I am tired."

"Look here," he said, getting to his feet, "why don't you go in there," indicating the washroom, "bathe your face and hands, change your things if you wish, then lie down here on the lounge? I'll run along to the diner, have my breakfast and come back in time to see you off at the junction. How's that?"

"Fine," she assented. "A wash and a brush-up, to say nothing of a chance to stretch out for even a little while—"

"I'm off, then. You'd best get over there, out of sight, while I open the door. No one's likely to disturb you. Ah, coast's clear. So long."

He slid through the half-opened door and she threw the catch.

"WHAT a gentleman he is," she mused as she ran water into the washroom basin. "Not like Herbie Coles at all."

Raymond Lancaster, she guessed, was somewhere in his early thirties. Well-to-do, if she was any judge. His neat, well cut clothing was expensive, though quiet. There was something, too, about his clear cut features, the eager blue eyes, the way he carried his head, that spoke of birth and breeding. She didn't feel in the least frightened with him, for all she was doing a most unconventional thing and one that would have shocked folks back in Paradise—Miss Wexby, for example—within an inch of their lives.

"I don't suppose I'll ever see him again after I get off at the junction," she said as she lay down upon the lounge and was conscious of a tinge of regret that it was to be so. She sighed with comfort, relaxed and closed her eyes, listening to the clickety-clack of the wheels on the rails.

"My God, wake up—quick!" she heard a voice saying in her ear, but a moment later it seemed. She opened her eyes to find Lancaster bent over her, his hand on her shoulder.

"I must have fallen asleep," she said smiling brightly at him.

"Asleep! God! I thought you were dead. You'd locked the door . . . I tried to arouse you without letting everyone in the car know . . . I was almost frantic . . . finally bribed the porter to use his key—"

SHE SAT up quickly, wide-awake now, and his white face aroused a pang in her. "Oh, I'm sorry," she said contritely. "I had no idea of falling asleep, but I was so tired. Are we near the junction?"

"The junction!" he almost shouted. "Don't you realize you've been asleep for hours? We passed the junction a hundred miles back and now—"

She gave a little cry of dismay and one hand fluttered to her breast. "What a lot of trouble and worry I've caused you."

"You don't know the half of it. The worst is yet to come. You can't get off this train until we cross the state line into Illinois. Quarantine. There was an outbreak of yellow fever, almost an epidemic, down in New Orleans. That's why the train is so crowded. Everybody running away. This state has quarantined against everybody coming from down that way. Nobody can leave the train. Can't even have the windows up. Men with rifles and shotguns at every station—look here, is there anybody back home to be alarmed or worry or start a search—"

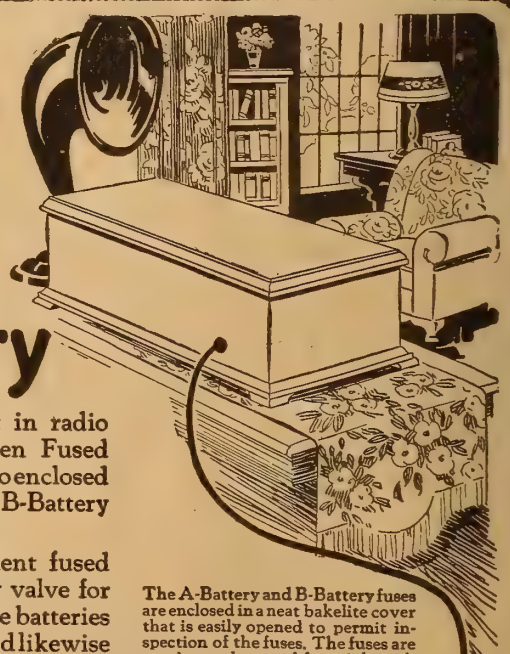
A New and Essential Radio Accessory



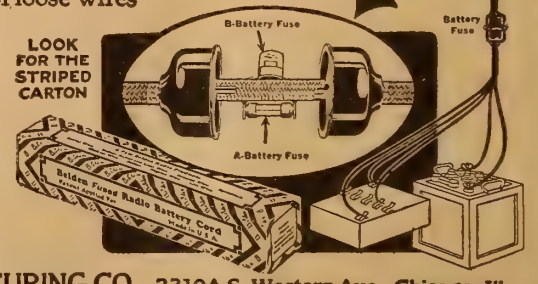
THE latest development in radio accessories is the Belden Fused Radio Battery Cord, with two enclosed fuses to protect the A and B-Battery circuits.

This remarkable and efficient fused battery cord acts as a safety valve for your radio set; it protects the batteries from accidental discharge, and likewise eliminates the fire hazard from crossed wires.

The Belden Fused Radio Battery Cord makes a neat installation by dispensing with the usual array of loose wires behind the set, and it protects tubes from burn outs.

Ask your nearest radio dealer today for a Belden Fused Radio Battery Cord, sold only in the Belden striped orange and black carton. Your set is not complete without the protection of this essential battery cord. It is inexpensive insurance against fire hazard and costly short circuits.

The A-Battery and B-Battery fuses are enclosed in a neat bakelite cover that is easily opened to permit inspection of the fuses. The fuses are not interchangeable with each other, nor with automobile fuses, so wrong fuses cannot be used accidentally. New fuses can be obtained from your dealer.



BELDEN MANUFACTURING CO., 2310A S. Western Ave., Chicago, Ill.

Belden Fused Radio Battery Cord

SONG CENSUS TELLS FAVORITE NUMBERS

McQUHAE REQUESTS SHOW LIKES OF LISTENERS

Irish Tenor Builds Programs to Please —Finds Old Sentimental Compositions Most Popular

NEW YORK.—A national census of songs that live is being made by Allen McQuhae, Irish tenor, who conducts the Sunday evening Atwater Kent Radio concerts this summer. The songs of the series are chosen from requests from listeners. The census is expected to reveal not the "hits" of the day, which, after a wave of popularity die out, but the songs that live through the years.

Mr. McQuhae's list of songs requested already runs far above five hundred. To sing all of them he estimates it would take him more than six months in half hour weekly concerts. He selects those, however, for which he receives the greatest number of requests each week and places them on his Sunday evening program.

For example, Mr. McQuhae says no one has yet asked him to sing "Yes, We Have No Bananas," while hundreds have requested such fine old favorites as "Silver Threads Among the Gold," "When You and I Were Young, Maggie," and "Believe Me If All Those Endearing Young Charms."

Sentiment Is Popular Motive

Requests for the songs popular during the late war are not numerous and as yet only one man has asked Mr. McQuhae to sing "The Star Spangled Banner."

Mr. McQuhae's census is expected to be an excellent guide for ambitious song writers as to theme and character. Sentiment is shown to be the prevailing motive in the songs most called for, with the themes of lost sweethearts, mothers who have gone and inspiring songs of religious character predominating.

"Danny Boy" led in popularity for the concert sung by McQuhae August 22. "The Last Rose of Summer" led in popularity for the concert August 29, followed closely by "Killarney" and "Duna," with "Because" and "Then You'll Remember Me" sharing honors for third place in the esteem of listeners.

HERE'S LATEST ONE ON COWS AND MUSIC

LONDON, England.—Recently a small Cheshire farmer, who kept a herd of Jerseys, made the discovery that the cows both yielded better and were more easily handled when they were milked to music. Prior to the introduction of music he had noticed that at milking time they had frequently been awkward to handle. A phonograph has since been replaced by a Radio installation which has been found equally if not more effective.

Probe Alleged Radio Monopoly

WASHINGTON, D. C.—Officials of the Federal Trade Commission will proceed with the taking of testimony in the so-called Radio monopoly case at Seattle, Wash., on September 27. The testimony will be taken later at San Francisco.

NEW LINK IN EAST BEGINS OPERATING

Embraces WNAC, WEAN, WLWL, WRNY and WODA —Toll Programs Object

NEW YORK.—Five prominent Eastern broadcasting stations have hooked up for chain broadcasting service beginning this month, according to an official statement issued by the Commercial Broadcasting corporation from their offices here.

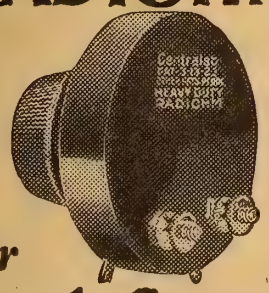
The participating stations are WLWL and WRNY of New York city, WNAC of Boston, WEAN of Providence, R. I., and WODA of Paterson, N. J. Negotiations are now under way to secure additional tie ups with stations in Philadelphia, Baltimore and Pittsburgh; while two Chicago stations have expressed a desire to join the chain as soon as wire facilities have been extended that far west. A two-way land wire system permits a complete interchange of programs originating at any station of the chain and rebroadcast by all other member stations.

Richard E. O'Dea, president and program director of the Commercial Broadcasting corporation, has owned and operated Station WODA for more than two years. William F. Hart, vice-president in charge of the contract department, has been connected with Stations WHN and WGCP as commercial manager for the past three years.

New "Big Brother" at KPO

SAN FRANCISCO.—A group of additions and changes in the staff of KPO have been announced. John Ames Keough becomes "Big Brother," succeeding L. R. Tucker, who will leave KPO. Keough is well known to the followers of "Big Brother," having conducted the hour for several months about a year ago. Albert J. Hodges, Radio engineer of many years' experience, has been named chief technician and Robert A. Lilly has been appointed special representative. Clair E. Morrison, announcer, has been given the additional duties of studio manager.

Heavy-Duty RADIOHM



for

Simple Control of B-Battery Eliminator

A SINGLE turn of the knob gives full resistance variation to control the output voltages of your "B" Battery Eliminator. Resistance remains as adjusted no matter how often knob is set. Insulated for 1,500 volts.

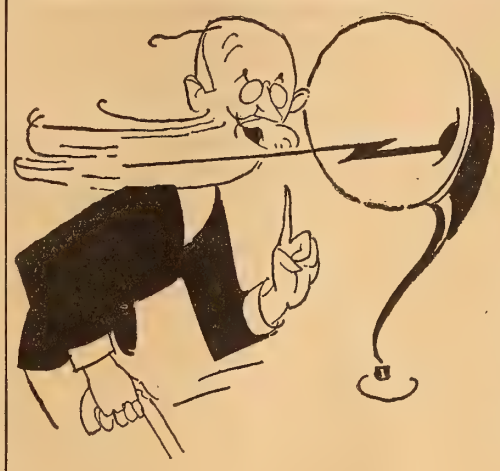
This high quality Centralab Heavy-Duty Radiohm, approved by Raytheon Laboratories, will remain smooth and noiseless, outlasting your eliminator and giving you full efficiency from it.

$2.00 at your dealer's, or mailed direct on receipt of price.

CENTRAL RADIO LABORATORIES
12 Keefe Ave., Milwaukee, Wis.

Makers of a full line of variable resistances for 69 manufacturers of leading standard sets.

Centralab



There's sound sense in quiet charging—

Clear, full, volume in your reception is the only way in which your Rectigon "makes itself heard." All because of the wealth of pep it packs into your batteries. But you'll never hear a peep from a Rectigon, itself, while it's doing its charging job. Not a murmur—not a bit of fuss. It's so quiet it wouldn't disturb the snooze of the lightest sleeper. Rectigons are popular for home charging because they do away with even the slightest annoyance and bother.

when you keep batteries lively with

The Westinghouse Rectigon Battery Charger

©, 1926, W. E. & M. Co.

No acids, no chemicals—no moving parts—nothing to spill or burn. No muss, no worry. You'll have no spoiled rugs, no ruined clothing.

Saves its cost in short order—Count the dollars spent in a few trips to the service station and you'll hotfoot it for a Rectigon, for the good it does your pocketbook as well as your batteries.

Snaps on in an instant—Just plug into the light socket, snap on the terminals. Saves service station bother. Spares interruptions caused by absent batteries.

Charges both "A" and "B" batteries—Keeps both packed with power. Bulb is used for "B" battery charging and it is enclosed, like all other parts, in metal, safe from accident. (Rectigon charges automobile batteries, too.)

Perfect safety for your set—If you tune in while you're charging there'll be no harm either to set or batteries. Nor will batteries be discharged if anything happens to the current while your Rectigon's attached.

No Storage Battery Radio is Complete Without a Rectigon

THE RECTIGON'S a superb Westinghouse product. Things you *can't* see, like extra heavy insulation, things you *can* see, like the durably enameled case—all are of highest quality. Westinghouse also manufactures a complete line of radio instruments, and Micarta panels and tubes.

SHORT WAVES

By Marcella

(Continued from page 2)

Margot: Can I tell you a whole lot about J. T. S., the announcer for WHB? I did last June, but will repeat briefly. John T. Schilling, the likeable blond voice of WHB, is 5 feet 10 inches tall, weighs 165 pounds without contours, is 29 years old, has blue eyes to go with his straw blond hair, looks nice in a dress suit, likes musical instruments in tune, good cigars and his wife, and dislikes artistic temperaments. Yes, he was married last fall. He met her in the Sweeney school studio. . . . all of that sort of thing.

* *

"Two Radio Nuts": I don't think Eddie Ellingson of KFAB and the "Harmony" Boys" team of Eddie and Gloomy is really "hard-boiled." He is really quite a sheik, and "Gloomy Gus" Gayle Grubb claims that he has to watch Eddie very closely when he takes him out among the ladies. Eddie is about 24 years old, stands 5 feet 10 inches high, has gray eyes and dark brown, wavy hair, and is still among the unmarried. Gloomy proclaims that his eyes are blue except when his wife hits them, and then they are black. What hair remains is mahogany brown, after a heavy meal his weight is 150 pounds, and on a crowded street car his height is 5 feet 11 inches. Gloomy's age is 30, and he has one child, a girl, who will probably be a Pi Phi (if you know what that means). Mr. Grubb's forte, besides selling Buicks and GMC trucks for the Nebraska Buick company, is composing songs. Ref. "I Don't Think So" and "Etiquette."

* *

Sally and Susanne: So you want to know all about Peter MacArthur of WOC, and whether or not he happens, also, to be "Tom Thumb"? Well, what do you think—here's his own answer:

"I was born in Greenock, Scotland, 39 years ago. As to personal appearance, my hair is a matter of controversy, I insisting that it is dark brown, and some of my friends (me, too, Marcella) holding out for black. The eyes, however, I believe are mates and dark brown. The question of height I am not so sure about, but should judge it is somewhere in the neighborhood of 5 feet 8 or 9 inches. Matrimonial state, hm-m-m-m! Now that is a sticker for such maids as Sally and Susanne! My photographs all show me wearing a smile, genuine or otherwise, so use your own judgment. On second thought, if you are sure it won't be too

(Continued on page 23)

BRITISH WILL TRAIN MIKE DRAMA ACTOR

ORDINARY ACTORS FAIL TO ENUNCIATE PRECISELY

Royal Academy to Teach Special Class Beginning in October—Hope to Develop Art

LONDON, England.—The British Broadcasting company is hunting vigorously, but so far fruitlessly, for a voice. It is a very elusive voice, as clear as a bell and yet full of personality, and very few people apparently possess it.

Even the best actors and actresses have to admit that they have not got the ideal broadcasting voice, and fresh blood has to be found to take parts in the rapidly developing field of Radio drama.

R. E. Jeffrey, production director of the B. B. C., and Kenneth Barnes, director of studies of the Royal Academy of Dramatic Art, the leading British dramatic academy, have hit upon a bright idea for training the future actors and actresses for the ether.

Must Train Differently

Students at the Royal Academy will undergo a special course of training so that any talent they may have for speaking into the microphone may be properly fostered.

"Now that Radio broadcasting has become a permanent institution," said Mr. Barnes, "I feel that two kinds of actors will have to be trained in the future, one for the ordinary stage and one for the Radio. In many cases experience has shown that ordinary actors are not a success before the mike.

"No matter how clear and good one's voice may be, some vowels and consonants may be slurred over in ordinary speech.

"Twenty-five students will be the first to take the course, and we shall start in October. We shall reproduce a small studio in the building by which microphones will be connected to loud speakers in another room. In this way both the examiners and the other students will be able to judge the results."

"Happy Harry's Party" New Saturday Night WQJ Stunt

CHICAGO.—Each Saturday night beginning at midnight "Happy Harry" turns WQJ's studio here into a veritable throng of imaginary visitors with a new and novel little originality he calls "Happy Harry's Party."

Listeners sending in telegrams are the supposed visitors to the studio and Harry's imagination in introducing the visitors leads the listeners to actually believe he has a studio full of out-of-towners, when in reality there are none.

Epworth League Rally To Be on Air, Sept. 19

KDKA and KYW Will Participate in Broadcast

CHICAGO.—The Rally Day services of the Epworth league, an organization of young people of the Methodist Episcopal church throughout the country, will be given on Sunday, September 19. The services in Pittsburgh will be broadcast by Westinghouse Station KDKA and those in Chicago will go on the air from the Evening American studio of Westinghouse Station KYW.

KDKA will go on the air at 4 p. m., Eastern Standard time, and will broadcast one hour's program made up of special music furnished by the Epworth leaguers of the Pittsburgh conference.

The program from Chicago will immediately follow the one hour of music from the studio of the Evening American, which will put the Epworth league broadcast on the air at 4 p. m., Central Standard time, or 5 p. m., Chicago daylight saving time. Music will be furnished by solosists and quartets.

America First to Send Voice on Ether Waves

Foreigner Claims Honor But Is Predated Four Years

NEW YORK.—Raymond Braillard, president of the technical commission of the Union Internationale de Radiophonie, claims to have been the world's first broadcaster of entertainment by wireless telephony, according to a letter recently received here by Eric Palmer. But this is not true.

Mr. Braillard sent voice and music on what was then known as an "arc humide" in 1913. On the other hand, arc transmission of voice and music as a regular proposition was a feature of an American station at San Jose, Calif., as early as 1909, thus predating Mr. Braillard.

Tube transmitters such as are used today for carrying sound or telephony were just being developed about that time. Dr. Lee DeForest, the American who invented the three electrode vacuum tube, is probably the first man in the world to have broadcast voice or music by means of a tube transmitter.

Tempting 1927 Models

INDIAN Summer is here, and with it has come a marvelous array of beautiful, simple to operate, pleasing to anticipate, tonally perfect receivers. Of course, most of us have receivers, bought this year, last or several years before. But the 1927 models are tempting!

Having conquered the technical obstacles of previous years, most manufacturers have now turned their energies to the equally necessary problem of designing their sets mechanically perfect, artistically things of beauty, fool and trouble proof, and so simple to operate that even a two-year old can be taught to do so.

That the manufacturers have succeeded admirably in their program is proved by the receivers on display. Several pages of this issue of Radio Digest are devoted to the new models. The dealers are exhibiting them in their windows and the receivers may also be seen at many Radio shows and fairs. They are attractive, aren't they?

Even to an oldtimer who is well enough educated in the dial twisting art to handle the most complicated of the antique and complex receivers, the new sets present a most alluring appeal. Of course, friend wife has a lot to say about how much nicer the new ones appear in the parlor—and, besides, the Jones' have one!

Darned if we are going to wait until all the Joneses and Browns get theirs. Guess we'll have to sell our old set to the janitor, or say, Mr. Dealer, what will you allow me for this one on a trade-in on that new one over there?

Good "Broadcasting Business"

TO ENTER the "Broadcasting Business" for purely commercial motives without thought for the kind of transmission sent out, is the object of entirely too many business concerns, churches and schools. Too few broadcasters make a conscientious effort to keep their stations strictly on their announced wave lengths. The slight variation from their wave lengths or frequencies may not seem great at the station transmitters, but when these variations mix with one another, the poor listener can only "stand by" and suffer from the "heterodyne" interference created.

The bureau of standards recently issued a list of twenty-nine broadcasters who adhere to their wave lengths with high accuracy. The bureau modifies its list by saying that there might be more stations thereon if there were bureau experts enough to place in various parts of the country and measure all the transmitters. But, anyway, we will publish the list, as follows, so that listeners will know that at least these stations are interested in good transmission:

WOC, Davenport; WTIC, Hartford; WMAQ, Chicago; WCCO, Minneapolis; WWJ, Detroit; WLS, Chicago; KFAB, Lincoln, Nebr.; WJJD, Chicago; WEAO, Columbus, Ohio; KFKA, Greeley, Colo.; KFH, Wichita; WENR, Chicago; WCAD, Canton, N. Y.; WAAM, Newark, N. J.; WSKC, Bay City, Mich.; WOWO, Fort Wayne, Ind.; WBBM, Chicago; WEBQ, Harrisburg, Ill.; KFVS, Cape Girardeau, Mo.; WOK, Chicago; WPDQ, Buffalo, N. Y.; WEAF, New York; WCAP (now combined with WRC), Washington; WRC, Washington; WJZ, New York; NAA, Arlington, Va.; WGY, Schenectady, N. Y.; WBZ, Springfield, Mass.; KDKA, Pittsburgh.

The 60 Per Cent Service Pests

THE SAD life of the Radio dealer's service man is convincingly described in this number. At the conclusion of the interview with the service manager, the latter classifies sixty per cent of the average trouble calls as coming from people who don't know about Radio, but who think they do, and cause trouble in the sets. Then the service man is called, and the dealer or the service man is blamed for causing the trouble.

We have the solution for this "pesty" sixty per cent. If we were a Radio dealer we would double our service charge for calls from such people.

RADIO INDI-GEST

Wonder What a Radio Thinks About?

(With apologies to Briggs, the cartoonist)

"Last night you cussed me black and blue—
Used every name you could.
It wasn't me—I did my best—
The weather was no good."

"And now tonight you're all upset,
Because your friends are here,
And I dont work just like I should—
Stop poking me, you hear?"

"There's nothing wrong with me at all,
Your batteries are low;
What if your friends are going home?
I'm glad to see them go."

"Quit fooling with my wires, gee whiz,
You've got them all so sore;
If you don't stop your foolishness,
I won't play any more."

"You brute! Go on and curse some more—
You don't hurt me a bit;
I hope you go to bed again
And leave my tubes all lit."

CHARLES ALLEN BRANHAM

SHORT SHAVES

By Barbara

"Old King Tutt, Hiz-self" writes a most chaw-ming letter, which I, being modest, must quote from an answer herewith:

"Why pull your 'Short Shaves' out of print so soon? Don't you know it fills a long-felt want? The newly-weds can learn how to cook from Betty and the flappers and drug store cowboys get the dope they crave from 'Marcella,' so why not put 'Short Shaves' back into commission and give us the low-down on the distinguished contributors of your column?"

* *

Well, King, your highness, it's like this. I've been baiting up at Paul Smiths for Cal Coolidge. Y'see Marcella went fishing on Lake Vermilion, so I went her one better and went baiting for Cal. That's why he caught the fish. You shoulda seen the ones that got away.

* *

Please tell you, "Does the Third Trombone Player really make music on a trombone, or does he just blow on it and make a noise, or perhaps he has plugged the lower end of it for a stein?"

Answer: The Third Trombone Player was kicked out of the Milwaukee Symphony orchestra for blowing a sour note. It is rumored that this was caused by stale beer clogging the mouthpiece. He is married to a wife and his hobby is reading "Condensed," by Dielectric.

* *

No, George isn't the George that everybody lets do it. His contributions give me no evidence as to whether or not he wears socks. I have strong suspicions that he does not. I also understand that he is a poet.

* *

Sorry I must close now, as a great big whale just snapped the minnow off "Prexie's" hook, and I must bait it again for him. Good night, kid-deeeeeesssss.

Silent Night

Of all the sad surprises
With this none can compare,
To try to get a station
That isn't on the air.

"That Red Head Gal," BOBETTE W.

Always and Always

Dear Indi: The great contralto arranged her Lady Duff Gordon gown with infinite care. She touched her hair daintily so that each strand was meticulously in place. She bowed her lips and powdered her nose with more infinite care. . . . The great audience was waiting—

"Ladies and gentlemen," spoke the Radio announcer, "Madame Jupre will now sing 'Always'."

ARTHUR LARSON

Our Anagram Department

For such it must be labelled, since George has forsaken the gentle art of poesy and devotes all his spare time to finding more words and pharses utilizing the same letters as are contained in the title, "The Radio Digest." Here they are:

The air tides God.	O, I'd edit the rags.
The Air tides dog.	The idiots raged.
Editor hides gat.	Airs the tied dog.
God edits the air.	It's a tired he dog.
Dodge, it's the air!	It's a dirte he dog.
It dodges the air.	Dogs the air tide.
The editor sighed.	Dave tie this dog.
Editor is the dog.	This dog are tied.

Intermission Idiosyncrasies

A. C. S. Announcing

"At 10:45 this evening, we will broadcast a vocal selection, Over the Bills and Far Away, which will be rendered by Jimmy Whitmore Valentine, an industrious man about town—when the police are not watching him too closely. What made this a sad world for Jimmy was an account in a local paper of how he had overlooked fifty thousand dollars in brand new ten-dollar bills when he had called recently on a local banking institution."

ARTHUR C. STOWELL

FRANQUE'S FILOSOFEE

Spare the batteries and spoil the concert. *INDI*

The Big "Noise"

Condensed

BY DIELECTRIC

The bicycle playing card sextet that entertains from the studio of Station WSAI, Cincinnati, is deserving of a following, which it, no doubt, enjoys. There work is well done, adding a splendid feature to the station's programs. We are gradually finding an increased number of quartets, trios and sextets, vocal and instrumental, which serve to expand the field of musical entertainment. More real good instrumental quartets would not glut the market. This is one of the stations utilizing the programs originating in New York and transmitted from the captain station, WEAF.

There must be at least one reference to a dance program this issue or it won't seem complete. Well, that one terpsichorean star performance came from Atlanta—Station WSB. The musicians played their selections wonderfully well, feeling the rhythm of each number in a manner to enthuse half-hearted dancers to "step out." The announcements which came between the numbers were given briefly, entirely without intent to put the announcer in the limelight, and clearly named the selections to follow, all without losing several precious minutes in trying to find something facetious to say.

Station KDKA, Pittsburgh, has entertained quite satisfactorily with programs from the Grand theater in that city, municipal concerts of varied attractions and in presenting some soloists with more than ordinary attainment. Your reviewer was particularly pleased with the playing of a 'cellist in a quartet appearing before their mike. Such a statement might imply that the four players were not evenly balanced, allowing the 'cellist to predominate, which would be untrue. They were very well balanced; but so well did this one artist perform it was impossible to ignore his accomplishment.

It must be admitted that a straight piano concert is not a feature to draw the multitude, even when rendering by a celebrated artist. We heard from Station WAIU, Columbus, Ohio, a group of compositions played by a not unusual performer and remained until the last selection had been played. If the execution of these numbers was not all one could desire, the fact of its being an "all American" program made one wish to review that portion of our masterpieces as presented. We too often forget the size of our own library of good music—having real gems fashioned by American composers.

There is another musical organization to which attention should be directed at this time, although to some located where Station WHO, Des Moines, cannot reach at this season there may be less of interest. Mention has been made in these columns of the Banker's Life trio at times when their music carried to many states and nearly always brought comment of a favorable nature. You will find these players just as worthy of a hearing now as in months past and their programs are attractive in the main.

Finally, I wish to record a personal debt of gratitude to one of the artists appearing in the studio of Station WHT, Chicago. The 'cello has an appeal (when capably played) to displace that of most other instruments and, as Ann Slack played her selections the other evening, it seemed as though a whole evening would not be too long a time to listen. Miss Slack possesses a charm to her playing which, when coupled with a most ingratiating tone, makes you close your eyes and revel in the opportunity at hand. Please encore.

LADIES, HERE'S HOW TO HALT ACID SPOTS

AFTER "TELLING" HUBBY TRY THESE REMEDIES

Storage Battery Solution and Domestic Furnishings Don't Mix—How to Save Fabrics Is Told

DENVER.—What to do if Radio battery acid is spilled on fabric floor coverings or clothing," was the subject of a recent microphone chat by Paul H. Bonham of the National Association of Dyers and Cleaners, appearing over Station KOA, Denver, in a bimonthly series of home economics programs.

He warned that liquid in a storage battery is diluted sulphuric acid and will burn a hole in fabrics if not washed out immediately.

"Do not carry a storage battery across rugs or carpets," he urged, "nor should it be permitted to touch curtains and draperies.

"It is important that the following instructions be observed should some of the liquid be spilled on clothing, or in fact, fabric of any kind:

After Spilling—What to Do

"Mix household ammonia with cold water in equal parts. Place white blotter under spot where liquid soiled the garment, if it is clothing. Use medicine dropper to saturate portion covered with battery acid. The blotter beneath the spot will attract ammonia water through the fabric, washing out the acid. Tamp the spot with cheesecloth to absorb liquid from cloth. Continue until certain the threads have been thoroughly washed clean of acid. Blot as dry as possible then hold before an electric fan until completely dry.

"Battery acid is treacherous in its damage to fabric. A heavy acid stain may go unnoticed until the garment is laundered or dry cleaned and ready for pressing. When heat of the iron or moisture from steam in pressing penetrates the cloth, a corrosive action causes immediate destruction of the fibers. If this happens, it is too late for laundering or dry cleaning —the cloth is ruined.

Acid Changes Color of Dyes

"Where color of the rug, carpet or garment may be black or blue, don't conclude that a stain will not show because the shade is dark. Stains from battery acid will change blue or black to red.

"Dry cleaning may restore 'changed colors' by an alkali treatment if dry cleaned immediately. But tell your cleaner what caused the color to change. Just say, 'Battery acid was spilled on it.' Then he well know how to counteract the change."

Mr. Bonham's talks over the General Electric broadcasting station are slated the second and fourth Tuesday afternoons of every month at 3:45 o'clock mountain time.

CORONATE CHAMPION LADY FANS

John Ruskin never dreamed of these two when he wrote "Queen of the Air," but here they are as selected at the Radio World's Fair, New York. Mrs. Lotta Harrauff (left), Princeton, Ill., winner, and Mrs. Flossie E. Erickson, silver cup award for DX record. Mrs. Erickson lives in Bloomington, Ill.

SHORT WAVES

By Marcella

(Continued from page 20)

much for the girls, you might tell them that I am married, at that. As for 'Tom Thumb,' I am afraid if he saw your letter he'd be peeved, for he is pretty fond of his own identity, and does so hate to be confused with me, or anybody else."

* *

Miss Sweet: I am briefly informed that Jerome or "Happy Homer" at KFEQ, Oaks, Neb., has a wife and two children and is serenely satisfied. His full name is Jerome H. DeBoro, eyes are blue and hair brown.

* *

"Lollee Popp" writes to ask if it is really true that Little Jack Little is the proud papa of a baby girl, or if it is just another rumor. I don't know, but then Jack or Mrs. Jack will see this in the column and will drop me a note. Watch for the answer.

* *

"Inquisitive" liked H. Dean Fitzer's recent sketch, and wonders when we are going to give a big feature page about WDAF. Soon, my dear friend, soon, but you must await its announcement under "Looking Ahead" on page two. And she asks further, "When is Gene Rouse going to divulge his hiding place?" To which I must answer that I don't know when, and that it really doesn't matter because nearly everyone already knows where he is and when he may be heard. Gene will kill me for this. Yes, Russell Wildey and "Bill" Shean are the right names of the Ray-O-Vac Twins, unless they are but noms de Radio. At least they publish their songs under these names. And the name of the announcer at KFKX, you ask. That is rather complicated. The man you have in mind is probably Harry F. Russell, although Monday night programs are handled by Dean E. Shaffer, and Dr. Archie Hopper comes in with special announcing on some evening programs. Best log him with the hour and date, and then inquire direct of KFKX which one you heard at the time.

* *

Wm. S.: WOAW has two hostesses, Goldie Funk during the day and Marie Kieny, the evening. Former is about 25, 5 feet 1 inch tall, and has blonde hair, blue eyes and a wonderful smile. She won't talk about matrimony but I think she is married. The latter, or Marie, is a charming brunette with soulful, appealing brown eyes; 22 years young, 5 feet 2 inches tall, unmarried but very eligible. Marie is an accomplished pianist.

* *

"Hank" and Friends: Thanks for "them kind woids." So you really like Doug Richardson, the popular soloist heard over KJR, Seattle? Doug is versatile and so busy that he only finds time for one hobby—golf. His game is in the late 80's, although his partner in the foursome of musicians with whom he generally plays insists he is of no great help. Car mechanic is another of his avocations of necessity, incidentally, because he owns and drives a car which no one but a competent mechanic could possibly keep running. Doug is 23 years young, with all the bouyancy you might expect of a young Irishman. He is a nephew of Arnold Daly, the famous actor, and two of Doug's older brothers are professional singers. It was in combination with one of them, Fred, that he first broadcast. Besides his Radio work as director for the Olympic Merrymakers, he leads his own seven-piece dance orchestra and also acts as trap drummer and vocal soloist with the 42-piece Coliseum theater orchestra in Seattle. Doug has gray-blue eyes, hair that just missed being red, and feet that can't keep still when dance music is being played. Married? The best answer is to tell you there is a Doug, Jr., who has all the deviltry of his father.

* *

What deep secret would you like to know about your favorite broadcast star? Drop me a note, girls and boys, and I'll do my best to answer here. MARCELLA.

WOMANS' PROGRAM INDEX

Monday

Atlantic	Eastern	Central	Mountain	Pacific	
10:30 a.m.	9:30	8:30	7:30	6:30	WWJ (352.7m-850kc), Tonight's dinner.

LARGEST TIE-UP IN HISTORY BROA

HIGH LIGHTS OF THE AIR

THIRTY-THREE stations, one of the largest tie-ups ever attempted in Radio history, will broadcast part or all of the program of the Third Annual Radio Industries banquet, to be held at the Hotel Astor, New York, on September 15. An extensive program starting at 7:30 p. m. Eastern daylight saving time and lasting until 1:45 a. m. will feature many famous speakers and musical favorites. Mary Lewis and Reinald Werrenrath are expected to sing the "Barcarolle" together. Vice President Charles G. Dawes will be the speaker.

The Ararat Shrine Temple chanters, under the direction of Clarence D. Sears, will return to WDAF on Wednesday night, September 15, at 9 o'clock. This will be the chanters' first appearance before the microphone of WDAF since last May. Mr. Sears has promised programs that should please the most critical audience and, judging from the mail received by the chanters last year, the listeners of WDAF were well pleased. The chanters are scheduled for one concert each month up to and including April, 1927.

How many laughs to the wavelength is a poser to be determined in a microphone experiment conducted by Stanley Hall over KOA, Denver. Can the voice, unaided by acrobatic antics, in itself produce streams of chuckles and side-aching laughs? Formerly of the Keith and Orpheum circuits, and known coast to coast as "the man of a million stories," Mr. Hall is chalked up for a thirty minute novelty program, "Wit and Humor of the Age," every Tuesday evening at 8:30 p. m. Mountain time.

The Rally Day services of the Epworth league, an organization of young people of the Methodist Episcopal church throughout the country, will be given on Sunday, September 19. The services to be given in Pittsburgh will be broadcast by Westinghouse Station KDKA and those to be held in Chicago will go on the air from KYW. KDKA will go on the air at 4 p. m. Eastern standard time. The program from Chicago will be broadcast at 4 p. m. Central standard time.

A Radio style show where the models clothed in their fur cloaks and beautiful gowns will depend upon the brilliant descriptions of the announcer will be the feature for the ladies in the WLIT broadcast, Wednesday, September 22. This feature is under the auspices of the National Association of Retail Clothiers and Furnishers.

The great Dempsey-Tunney fight is scheduled for September 23 and will go out upon the ether from all stations connected with the Associated Press. The time has not been definitely set, but the fight will probably take place between 4 and 5 o'clock Eastern standard time.

Voices never before heard over the Radio will interest listeners Thursday, September 30, from KFI, Los Angeles. A short playlet will be given, the cast of which will be composed of screen artists. Tune in and see if you would know your favorites by voice.

RESPONSIBLE millions wil bers, above committee for t Industries Banqu cast by thirty-thr ture are Frank Stacy, Eveready WJZ; Maj. J. An of Wolfsohn Mu Hart Plotz, left, cently made he WMCA and is r on their program tion of having Machado of Cub Walter Damrosch Franz Proschowsk to appear before Marie Branton, whose solos hav to WGHB, Clear

LARGEST TIE-UP IN HISTORY BROADCASTS RADIO INDUSTRIES BANQUET

HIGH LIGHTS OF THE AIR

THIRTY-THREE stations, one of the largest tie-ups ever attempted in Radio history, will broadcast part or all of the program of the Third Annual Radio Industries banquet, to be held at the Hotel Astor, New York, on September 15. An extensive program starting at 7:30 p. m. Eastern daylight saving time and lasting until 1:45 a. m. will feature many famous speakers and musical favorites. Mary Lewis and Reinald Werrenrath are expected to sing the "Barcarolle" together. Vice President Charles G. Dawes will be the speaker.

The Ararat Shrine Temple chanters, under the direction of Clarence D. Sears, will return to WDAF on Wednesday night, September 15, at 9 o'clock. This will be the chanters' first appearance before the microphone of WDAF since last May. Mr. Sears has promised programs that should please the most critical audience and, judging from the mail received by the chanters last year, the listeners of WDAF were well pleased. The chanters are scheduled for one concert each month up to and including April, 1927.

How many laughs to the wavelength is a poser to be determined in a microphone experiment conducted by Stanley Hall over KOA, Denver. Can the voice, unaided by acrobatic antics, in itself produce streams of chuckles and side-aching laughs? Formerly of the Keith and Orpheum circuits, and known coast to coast as "the man of a million stories," Mr. Hall is chalked up for a thirty minute novelty program, "Wit and Humor of the Age," every Tuesday evening at 8:30 p. m. Mountain time.

The Rally Day services of the Epworth league, an organization of young people of the Methodist Episcopal church throughout the country, will be given on Sunday, September 19. The services to be given in Pittsburgh will be broadcast by Westinghouse Station KDKA and those to be held in Chicago will go on the air from KYW. KDKA will go on the air at 4 p. m. Eastern standard time. The program from Chicago will be broadcast at 4 p. m. Central standard time.

A Radio style show where the models clothed in their fur cloaks and beautiful gowns will depend upon the brilliant descriptions of the announcer will be the feature for the ladies in the WLIT broadcast, Wednesday, September 22. This feature is under the auspices of the National Association of Retail Clothiers and Furnishers.

The great Dempsey-Tunney fight is scheduled for September 23 and will go out upon the ether from all stations connected with the Associated Press. The time has not been definitely set, but the fight will probably take place between 4 and 5 o'clock Eastern standard time.

Voices never before heard over the Radio will interest listeners Thursday, September 30, from KFI, Los Angeles. A short playlet will be given, the cast of which will be composed of screen artists. Tune in and see if you would know your favorites by voice.

RESPONSIBLE for a program which millions will listen to are the members, above, of the entertainment committee for the Third Annual Radio Industries Banquet which is to be broadcast by thirty-three stations. In the picture are Frank Spring, WEAF; Paul Stacy, Eveready hour; C. P. Popenoe, WJZ; Maj. J. Andrew White, Jack Adams of Wolfsohn Musical bureau. Jeanette Hart Plotz, left, is a soprano who recently made her debut from Station WMCA and is now appearing regularly on their programs. She has the distinction of having sung before President Machado of Cuba. Her training under Walter Damrosch, Allexandre Bonce and Franz Proschowsky has well-equipped her to appear before large Radio audiences. Marie Branton, right, is the pianist whose solos have pleased fans listening to WGHB, Clearwater.

FARMERS' PROGRAM INDEX

Farmer Dinner Concerts

Daily Except Sunday

CENTRAL TIME
KFNF, 12:15-1:35 p. m.
KMA, 11:30-12:30
KSO, 12:30-1:30 p. m.

Sunday

Senorita Raquel Nieto, formerly of the Mexican Grand Opera, and now a resident of Los Angeles, is heard weekly over Station KFWB. She has one of those uncommonly rare soprano voices that broadcast well. For the past few months the audience of WBZ has been listening to a new voice, that of Aidan Redmond, left, conducting the programs of that station from the Hotel Brunswick studio. Although only twenty-two, the rich strength and refinement of his voice give an impression of older years.

KTHS, Hot Springs National Park, Ark. (374.8m-800kc), 11 a. m.-12:15 p. m., First Presbyterian church; 9:10-10, classic hour, Lon Chassy and his Meyer Davis ensemble.
WBAP, Ft. Worth, Tex. (475.9m-630kc), 11 a. m.-12:30 p. m., First Methodist church; 9:30-11:30, Sorin White Top O' Texas orchestra.
WCCO, Minneapolis-St. Paul, Minn. (416.4m-720kc), 10:50 a. m., Plymouth Congregational church; 4:10 p. m., House of Hope Presbyterian church; 7:15, WEAF; 9:30, Hugo Philler Goodwin, organist.
WEMC, Berrien Springs, Mich. (285.5m-1050kc), 8:15 p. m., Emmanuel college school of music.
WDAF, Kansas City, Mo. (365.6m-820kc), 3-3:30 p. m., classical musical program; 4-4:45, services.
WFAA, Dallas, Texas (475.9m-630kc), 6-7 p. m., Bible class, gospel songs; 8-9, First Presbyterian church; 11-12, Harry F. Hassall and his symphony orchestra.
WHAS, Louisville, Ky. (399.8m-750kc), 9:57 a. m., organ prelude; 10, Fourth Avenue Presbyterian church; 4:30-5:30 p. m., choral evensong service, Christ church cathedral.
WHB, Kansas City, Mo. (365.6m-820kc), 9:40 a. m., Linwood Blvd. Christian church; 8-9:15 p. m., church services; 11:15-1, Linwood Radio feature, Morrill Moore, organist.
WHO, Des Moines, Ia. (526m-570kc), 11 a. m., service; 5-6 p. m., Bankers Life Little symphony; 7:30-8:30, Hotel Fort Des Moines orchestra; 11-12, musical program.
WOAI, San Antonio, Tex. (394.5m-760kc), 11 a. m., First Presbyterian church; 7:45 p. m., Central Christian church.
WOAW, Omaha, Nebr. (526m-570kc), 9 a. m., chapel service; 1:30 p. m., Father Flanagan's Boys' home period; 2:30, old time songs for shut-ins; 9, chapel service.
WSB, Altanta, Ga. (428.3m-700kc), 5 p. m., sacred concert; 8, North Avenue Presbyterian church.
WSM, Nashville, Tenn. (282.8m-1060kc), 10:30 a. m., First Presbyterian church.

Mountain Standard Time Stations

KOA, Denver, Colo. (322.4m-930kc), 10:55 a. m., church; 4:30 p. m., Karl O. Staps, organist; 6:30, Lamont School of Music; 7:45, St. John's Episcopal cathedral.

Pacific Standard Time Stations

KFI, Los Angeles, Calif. (467m-642kc), 7-8 p. m., Jim, Jack and Jean trio; 8-9, Aeolian organ; 9-10, Lake Arrowhead dance orchestra; 10-11, Packard Six dance orchestra, Dolly MacDonald, soloist.
KFWB, Hollywood, Calif. (252m-1190kc), 9-11 p. m., Warner Brothers Sunday night movie frolic.
KGW, Portland, Ore. (491.5m-610kc), 10:25-12 noon, church; 7:30-9 p. m., church; 9-10, concert, Little symphony orchestra.

Kingston

B BATTERY ELIMINATOR

DO AWAY with troublesome, expensive, bulky batteries, with acid, with stained carpets, with a dead radio just when you want it most. Install the KINGSTON B Battery Eliminator, and forget your battery troubles forever.

The Kingston Eliminator is compact, trim, handsomely finished in black and nickel, and guaranteed not only to remove the battery nuisance, but to deliver clearer tone and increased volume. A trial will convince you.

With the Kingston three different voltages are obtainable at the same time, each tap adjustable over a wide range making any desired voltage from 5 to 150 possible and harmonizing perfectly with your own set. The Raytheon tube is used as a rectifier. The Eliminator operates without noise or vibration and will not heat, contains no acid or solution, is no trouble to operate and the operation cost is so low as to be negligible. It will not get out of order.

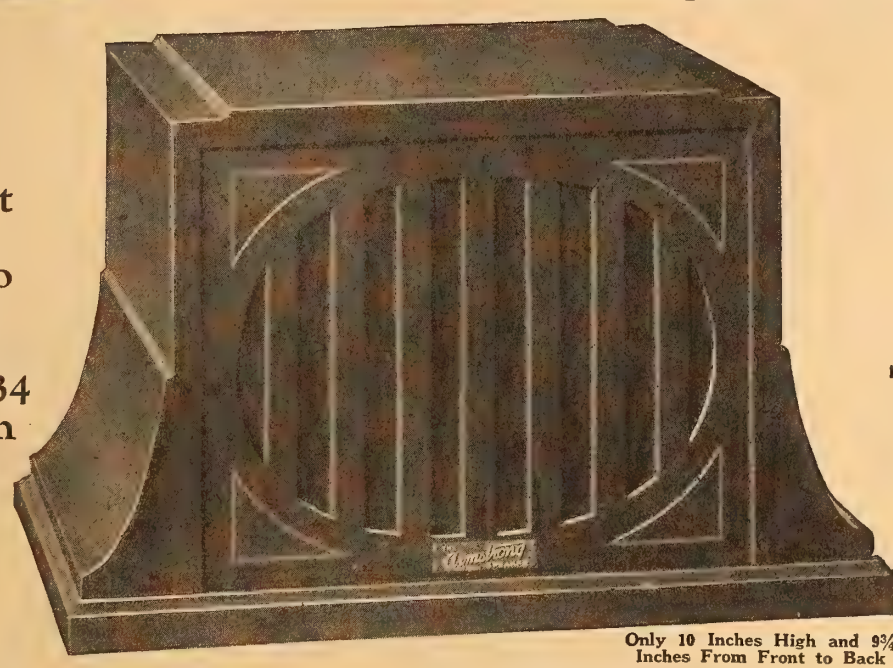
Awarded the Silver Cup for superiority, in the New Inventions Division of the Third Chicago Radio Show

The ARMSTRONG Tone Reproducer

It is NOT a cone! It is NOT a horn! It IS a loud speaker!
A MUSICAL INSTRUMENT

There isn't anything like it! Others may look like it—but none performs like it

See it at the Chicago Radio Show Booth 34 Section HH



Shaped Like a Singer's Mouth

Only 10 Inches High and 9¾ Inches From Front to Back

The Only Speaker Which Qualifies, Naturalizes and Intensifies the Tone

The ARMSTRONG misses nothing that's on the air. The most surprising thing about it is that you will forget you are "listening in" and will imagine that the singers and musicians are there in the flesh—right in your own home—so clear and natural is the tone. You will marvel not only because there are no barrel sounds, no hollow or metallic noises or distortions, but also because the ARMSTRONG brings to your ears the whole range of melody in perfect harmony, giving to each note its real tonal value.

The Range of Melody

From the delicate shading of the violin, the sweet notes of the flute, and the shrill piercing thrill of the piccolo to the deep rumbling bass of the organ, and the lowest note of the bass viol; from the martial strains of the cornet, the sharp crack of the drum to the grand ensemble of the complete orchestra and band—the ARMSTRONG assures perfect radio reception and full clear, mellow tones and perfect harmony.

Beauty of the Voice

It has remained for the ARMSTRONG to overcome the difficulty of properly reproducing the Human Voice. It is the only loud speaker which actually qualifies and naturalizes the tones—and at the same time intensifies every note from the highest treble to the lowest bass.

This is accomplished by the use of a specially constructed tone chamber—"SHAPED LIKE A SINGER'S MOUTH"—and a scientifically built sounding board, made of resilient spruce. These distinctive features are not found in any other loud speaker and they are fully protected and patented. They are the result of years of study and research. It is this special construction which makes the ARMSTRONG superior as well as different. It makes possible the perfect reproduction of the living voice with all its mellowness and harmony just as it comes from the mouth of the living singer.

The ARMSTRONG is more than a megaphone. It is distinctively a musical instrument which assures ample volume with perfect harmony and balance.

Jos. Calcaterra says: "I have heard a loud speaker that DOES deliver head phone quality audibly. It is the ARMSTRONG."

THE ARMSTRONG COMPANY

Your radio set cannot perform at its best without a perfect ground connection

The Ekko Ground Clamp solves this difficulty by insuring perfect contact at all times. It eliminates the high percentage of radio troubles due to imperfect ground contacts that prevent the free flow of current. It is provided with hardened steel points that bite through the paint, dirt, rust or corrosion that nearly always covers the pipe used for a ground. These steel points insure a free flow of current and full signal strength.

The Ekko Ground Clamp can be attached to the nearest pipe. The ground wire is screwed to the clamp. Then a turn of the screw gives positive contact. Being non-corrosive the clamp maintains perfect contact permanently. It is neatly finished in white nickel.

At your dealer's

25c

To Dealers:

The Ekko Ground Clamp is supplied in lots of ten packed in the carton shown in cut. This carton forms an attractive counter display that helps you sell this most popular of all ground clamps.

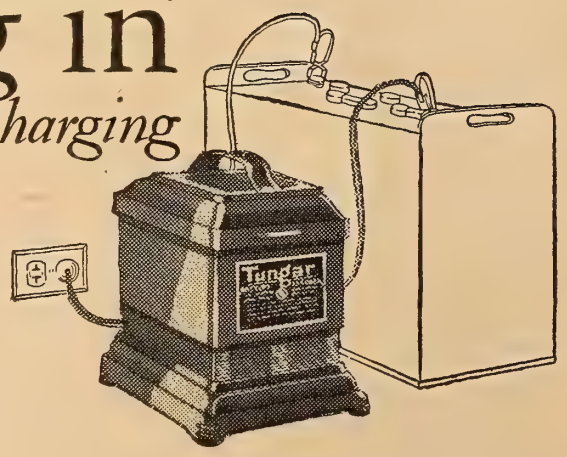
Chicago, Ill.

So easy . . . .
plug in
. . battery charging



Plug in the Tungar and your "A" or "B" battery is charging. Yes, it's as simple as that—with a Tungar.

An easy installation connects your Tungar permanently. Then you can conceal batteries in a cabinet, or down cellar—and just have a convenient switch to close when you sign off for the night.

In the morning your batteries are at their best, and you've only used about a dime's worth of current.

Tungar is the original bulb charger. It is a G-E product developed in the Research Laboratories of General Electric.

It charges 2, 4 and 6 volt "A" batteries, 24 to 96 volt "B" batteries, in series: and auto batteries, too. No extra attachments needed.

It causes no radio interference.

It will not blow out Radiotrons.

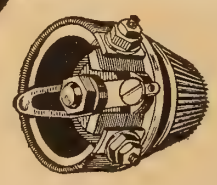
The Heart of the Circuit

VICTOREEN *Transformers* and VICTOREEN *Master Control Unit*



R. F. Transformers

Made with air core construction. They are not merely "matched" but are actually tuned to a guaranteed precision of within ⅓ of 1%.

Victoreen Super sets are free from oscillations, howls or squeals—no matching of tubes is necessary.

The "B" Battery consumption is exceptionally low—8 to 10 milliamps with potentiometer at negative side—less than some 3 tube sets.

Build a Victoreen Super and use these parts:
4 Victoreen No. 170 R. F. Transformers, each..... **$7.00**
(No. 171 Transformers when dry cells are used.)
1 Victoreen No. 150 Coupling Unit, each..... **$5.50**
Should the use of aerial be preferred to loop, Victoreen No. 160 antenna coupler is required, each..... **$3.50**

Victoreen Manganin Rheostats

Zero temperature coefficient-resistance remains absolutely constant; double the number of turns of wire used on ordinary rheostats. Three terminals simplify wiring.

Five resistances—2, 6, 10, 20, 30 ohms, each..... **$1.20**
Victoreen Potentiometers—200 and 400-ohms resistances, each..... **1.50**

Victoreen Master Control Unit

A completely assembled, convenient, single control unit for use on circuits employing two or more condensers of the same capacity. Easy to mount—no change of wiring necessary.

Victoreen Master Control Unit Type VS **$19.50**
Extra Condenser, each..... **4.50**

Get a complete list of parts from your dealer or write us direct.

Free Victoreen Folder and Hookup answers all questions about Victoreen circuit.

THE GEORGE W. WALKER CO.

6528 Carnegie Ave. Dept. F Cleveland, O.

BRANCHES IN PRINCIPAL CITIES

Important

little gateways of reception

CONDENSERS are the entrances that make or mar a good performance. A good condenser stores up tone impulses, to be released at the instant they reach full-rounded perfection. An inaccurate condenser lets only a distorted part of the tone trickle through, and cuts down the receiving range of your set by putting it out of electrical balance. You'll realize the importance of *accurate* condensers the day you equip your set with Sangamo Mica Condensers. They will improve tone, range and volume.

SANGAMO
MICA CONDENSERS

Being solidly molded in bakelite, Sangamo Condensers are accurate forever. All edges are sealed tight against moisture, the worst enemy of condenser accuracy. Ribs of bakelite give mechanical strength and prevent a change in pressure on the delicate mica inside, which would also change the condenser capacity. All edges are rounded to prevent chipping. Rough treatment and exposure to heat, salt air or acid fumes will not hurt Sangamo Condensers—*they stay accurate.* Even a hot soldering iron will do no harm.

Put Sangamo Condensers in any new or old set-and notice the difference. A range of 34 capacities makes it possible to get exactly the right capacity for your circuit.

Sangamo By-pass Condensers are now available in 1/10, ¼, ½ and 1 mfd. capacities.

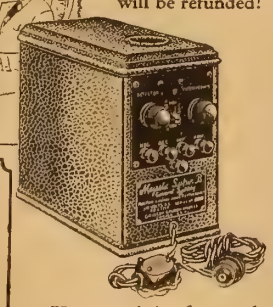
Exquisite beauty of cabinet design is excelled only by superior performance on all wave lengths

"All You Can Ask of a RADIO"

You be the judge of its value"

Dealers who sell the Majestic "B" Current Supply are confident that it improves reception. So confident, they make you this unusual offer: Buy a Majestic today. Attach it to your set and use it for one week right in your own home. If, at the end of this time, you are not fully convinced that it gives you better radio performance —*more dependable power at less cost*—your money will be refunded!



Economical to Operate

You couldn't want a better proposition than this. The Majestic "B" Current supply, because of its unvarying constant voltage, gives you improved tone, greater volume—all at the low cost of about one-tenth cent an hour. So you can appreciate that here is a *practical* radio investment.

Your original purchase price will be returned through operating economy alone.

No Filament to Burn Out
All the Majestic "B" Current Supply units are manufactured complete in our factory and are equipped with the famous Raytheon Tube. (Endorsed by numerous radio engineers and editors) which is a non-filament tube with full wave rectification, no acids or back surge. Tests of the Majestic "B" on the oscillograph demonstrate that all A-C hum is eliminated.

Majestic Standard-B
Especially adapted for sets having not more than seven 201-A tubes, or six 201-A plus one 135-150 volt power tube. Popularly priced for the average set. Improves tone—betters reception.
Price $32.50
West of Rocky Mts. . . $35.00

Majestic Super-B
Capacity 1 to 12 tubes, including the use of 135-150 volt power tubes. Complete with switch to control current from light socket.
Price $35.00
West of Rocky Mts. . . $37.50

Majestic Master-B
Rating 60 mils at 150 volts. Particularly adapted for Radiola 25, 28 and 30 and Super heterodynes. Will operate all power tubes, also the new super-power tube UX-171 (180 volts). Unequalled for sets having a very heavy current draw.
Price $42.50
West of Rocky Mts. . . $45.00

Majestic "B" Current Supply

delivers pure direct current-From your light socket

Give that set of yours the power it needs—power for any variation in tone. Then you'll have a new appreciation of radio. You will have one delightful program after another—summer evenings—winter evenings —*ALL the time!*

That's when your set is equipped with Majestic "B" Current Supply. Your set seems *Alive* with marvelous energy. You sense a new joy in radio.

You at last forget its mechanics, for a simple switch releases all the power you need for any program. Power—*clean—constant—abundant!* Power that instantly responds to high soprano, and as easily brings you the full resonance of an orchestration! Easily attached to your light socket saving you constant bother and attention.

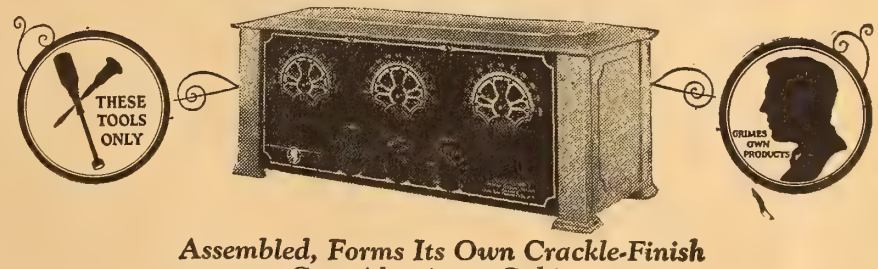
A Kit Built With a Longing for PERFECTION



Assembled, Forms Its Own Crackle-Finish Cast Aluminum Cabinet

HOW often have *you* wanted to build the most perfect set possible? What a real thrill it would be to put it together and then enjoy with others the very best quality in reception!

You know as well as anyone the way to go about it. You start with the best parts obtainable. You select, if possible, some radio engineer who is also striving for perfection, as your guide as to circuit and assembly. Then you go to it and get "laboratory results."

The Grimes Own Kit satisfies your longing for Perfection. There are no "nearly as good" parts. Every part is of the highest quality.

It is more! More than the most modern embodiment of Inverse Duplex, incorporating the latest improvements in the art. More than 100% shielded and equipped with the new "Greco" control. *It is the first kit to form its own artistic crackle-finish cast aluminum cabinet!*

Built to last a lifetime—complete including even the tools—no soldering—each wire already attached at one end! A few connections, a few screws to insert, and it's built. Built with its every phase as near perfect as the Grimes Laboratory knows how. Here is your privilege to "carry on"—to put it together—to strive shoulder-to-shoulder for PERFECTION.

Startling Innovations

Entirely new radio-frequency circuit—assuring equal amplification and super-selectivity over the wave-length band.
Entirely new audio circuit —designed for high quality reproduction, including those base notes.
Cast aluminum cabinet —when assembled the Grimes Own forms its own artistic crackle-finish cabinet.
New "Greco" Control —tuned by using either a single control or by special adjusting of all three controls—convenience, plus precision!
The First Inverse Duplex Kit ever made —two stages of radio, tube detector, and three stages of audio for power tube operation and new 200A detector.

Study These Parts With Care

Samson Audio Transformers
DeJur resistance coupling
Benjamin non-microphonic UX sockets
Semi-straight line Lind vernier tuning condensers and coils.
Grimes RF Choke Coil to equalize all wave lengths.
DeJur Rheostat
Electrad Potentiometer
Drilled artistically etched black and gold metal panel
Grimes complete aluminum shielding cabinet.
Grimes antenna switch
Sangamo fixed condensers
Acme flexible spaghetti wire in five colors.
Battery Cable
Blueprints and instructions

SHEETS TUBES RODS

Formica has a Complete Service on Insulating Material and Parts for Radio Manufacturers

The CHELSEA *Truphonic Six*

Easily one of the real sensations of the year, the Chelsea Truphonic Six must be seen and heard to be appreciated. Built by one of the oldest radio manufacturers, noted the world over for its reliable products, this Chelsea receiver incorporates the new truphonic circuit, called the greatest radio contribution of the season. The circuit is fully shielded. Since a power tube may be used in the last stage, tremendous amplification and a tone stability wholly new is now obtained.

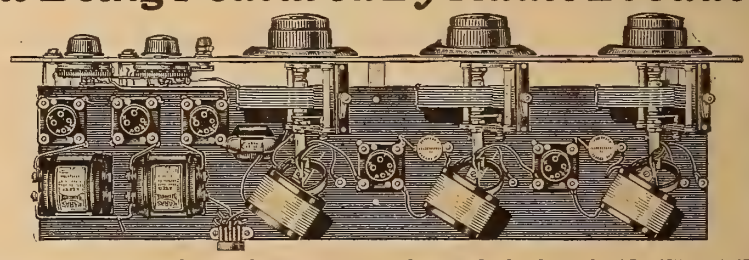
CHELSEA RADIO CO., CHELSEA, MASS.

Other Chelsea Sets $26.00 and $50.00—each a leader in its class. Send for details.

New Karas Equamatic Five Tube Sensation

Now Being Featured By Radio Broadcast



FULFILS in an extremely simple manner a very desirable and HIGHLY IMPORTANT FUNCTION that our foremost radio engineers have been striving to accomplish ever since the advent of radio broadcasting.
THE EQUAMATIC SYSTEM AUTOMATICALLY provides a CONTINUOUS MAXIMUM and an absolutely EQUAL TRANSFER OF ENERGY between primary and secondary inductances at all wave lengths by a coupling system unique to radio engineering practice—it also ELIMINATES the overlapping of electro-static and electro-magnetic fields with their harmful, boadening and distorting effects.

Pure Tone—Great Volume

The result of the EQUAMATIC SYSTEM from five tubes is a clean, clear, pure and powerful signal—equal in VOLUME to the usual six and seven tube sets—sharpness and SELECTIVITY equal to the superheterodyne—SENSITIVITY equal to a regenerative circuit—and a PURITY of tone equal to a crystal detector.
In the EQUAMATIC SYSTEM the primary coils are attached to the shafts of the condensers—and are adjustable in their relation to both the condenser shafts and the secondary coils. The primaries are also ENTIRELY SEPARATED from the secondaries. The secondaries are adjustable to any angle in relation to the primaries and also as to their degree of coupling with the primaries. The primaries are AUTOMATICALLY, constantly and CONTINUOUSLY varied—at a definite, everchanging rate of variation—with the turning of the condenser dials.
This POSITIVE, AUTOMATIC action provides the ABSOLUTELY EXACT amount to coupling—at every wave length setting—necessary to deliver to the secondary coils EXACTLY the amount of energy required to cause the tubes to constantly operate at their HIGHEST EFFICIENCY.

Easy to Build

A manual of complete diagrams and instructions for building this five tube KARAS EQUAMATIC receiver in complete detail is included with each set of KARAS EQUAMATIC coils. (This manual will be sent separately upon receipt of 10c to anyone interested.)

Order Through Dealer or Direct on This Coupon

The Karas apparatus essential to the construction of the five tube EQUAMATIC receiver is carried by nearly every good radio parts dealer in most cities. Secure the parts from your dealer. If he is out of them order direct from us using this coupon. Send no money. Just hand the postman the purchase price plus a few cents postage.

CHICAGO

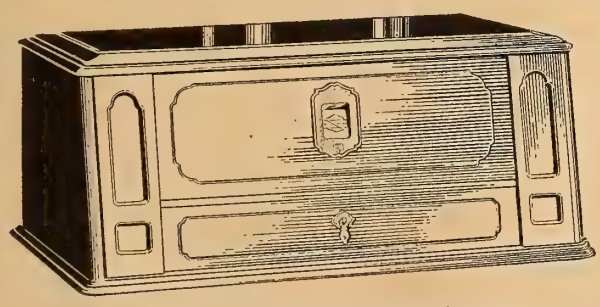
Counterphase Eight

A year ago at the various Radio Shows, interested spectators looked askance at the Counterphase Six—"I doubt if you can beat the Nameless," they said.

But we did!



COUNTERPHASE EIGHT

Now we offer the Counterphase Eight and we say—

"It's the most selective receiver we ever built, has greater range and power and it is easier to operate."

Just see it—hear it—that's all we ask.

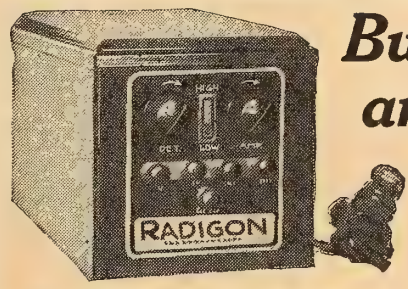
Special circulars sent on request.

See Our Exhibit at the

Third Annual Radio World's Fair — New Madison Square Garden—New York, Sept. 13th to 18th, inclusive

Fifth Annual Chicago Radio Show—Coliseum, Chicago—October 11th to 17th, inclusive

Bremer-Tully Mfg. Co. 520 S. Canal St. CHICAGO



Capacity, 50 Mills 210 Volts
Will operate any Radio set up to 12 tubes
Beautiful Dark Green Duco Finish Case

Buy Direct and Save 60%

You can own the efficient RADIGON B Eliminator embodying the famous Raytheon tube principal at the unheard of price of $18.95. This is only possible by your direct purchase from our Laboratories.

Radigon can do this because the middleman's profits are cut out and you save 60 per cent. From manufacturer to you with raytheon tube.....

$18.95 F.O.B. Chicago

Send in Your Order Now

and we will ship you a B current supply unit fully guaranteed to operate any set up to 12 tubes with absolutely NO HUM and always at 100 per cent efficiency. Lasting B current units can only be made in a factory having adequate laboratory facilities. Research is necessary and in RADIGON laboratories RADIGONS are made with clock like precision. The current output is constant and the reception is strong and clear.

GUARANTEE Every Radigon B is guaranteed to give constant service and satisfaction. Give the RADIGON five days' time to convince you that you have the best eliminator money can buy. If you are not satisfied after this time, return it to us at our expense and your money will be refunded immediately.
Send in your order now, enclosing full amount of $18.95, or one-half of this, and pay balance on delivery.

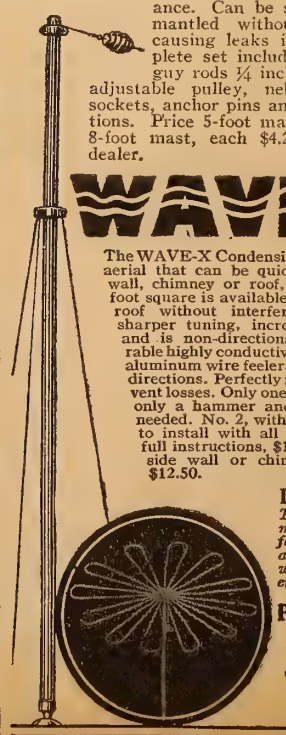
IMPROVE!

Your Radio Reception by Using

The REDI-MAST FOR AERIALS — FITS ANY ROOF INSTANTLY

A strong hand-turned rock maple pole which gives a quick, convenient method of erecting a dependable antenna. 5 or 8 foot lengths, will fit any roof—single or multiple wire antennas. Will carry the heaviest sleet covered antenna in strong wind without weakening. Neat in appearance. Can be set up or dismantled without danger of causing leaks in roof. Complete set includes three steel guy rods ¼ inch in diameter, adjustable pulley, neb irons, roof sockets, anchor pins and full instructions. Price 5-foot mast, each $3.50; 8-foot mast, each $4.25. Ask your dealer.



WAVE-X

The WAVE-X Condensing Antenna is an aerial that can be quickly erected on wall, chimney or roof, anywhere five foot square is available. Several on one roof without interference. Provides sharper tuning, increases selectivity and is non-directional. Twelve durable highly conductive, non-corrosive aluminum wire feelers reach out in all directions. Perfectly insulated to prevent losses. Only one upright to erect, only a hammer and a screwdriver needed. No. 2, with 8-ft. pole ready to install with all accessories and full instructions, $12.50. No. 3, for side wall or chimney mounting, $12.50.

DEALERS:

Organize Radio Man Hunt

LONDON.—A Radio man, or voice, hunt is a novelty recently introduced on British programs. The hunted man participates in the programs at all sorts of places, and at all sorts of times. He makes announcements, or reads some particular item, and listeners are then asked to give a full description of his movements from station to station. Prizes are offered for correct records of the mystery man's movements.

"GOODY GOODY GIRL"

(Continued from page 18)

She smiled reassuringly. "No; no one knew where I was bound. Grace Hughes herself doesn't expect me. So you're not to worry a moment longer. When we get to the first stop in Illinois, I'll get off, take a train back and—I suppose a little less than sixty dollars will see me through."

"You're a thoroughbred," he exclaimed fervently. "Most girls would have been in a state of hysterics, if not complete collapse, by now and you haven't even turned a hair."

SHE SHRUGGED dainty shoulders deprecatingly. "I can take care of myself, so why get upset?"

"That's right," he agreed, "but I do think you should know that our first stop on the other side of the state line—I questioned the porter pretty closely—will be sometime after midnight, at a lonely little flag-station of a place—"

"I'll not be afraid."

"But I'll be afraid for you. You're entirely too pretty a girl, too tempting by far—"

She laughed and shook a finger warningly. "You mustn't say such things. First thing you know, I'll be believing them—"

"I want you to believe me." His voice was almost a shout again. "I mean every word of it. You've got me winging. My head's in a whirl—"

"Hush!" She rose to her feet, alarmed by his vehemence.

"I won't hush." He, too, got up and she backed away when he made as if to take her into his arms. "I love you. Every minute I see you I get more and more in love with you. You shan't get off this train alone and in the middle of the night. You're coming on to Chicago with me."

"To Chicago? Are you mad? I couldn't think of it."

"Yes, I'm mad. Mad about you and—"

He broke off sharply and whirled away from her.

Someone was rapping peremptorily upon the drawing-room door.

Lois! Lois! What is to become of you? The silken threads of the city spiders are beginning to wind about you. You do not know. But soon you will suspect and then what will you do, friendless and not knowing whom to trust? We are going to watch and hope for you as your story unfolds in succeeding issues of Radio Digest.

Yale GROUND HOG DOUBLES POWER AND DISTANCE

"The Perfect Ground"

AT KYW AIR CARNIVAL

(Continued from page 5)

menced kicking WTAS off his Purple Grackle antenna he got Eddie to man the mike with his announcing and Fannie skidded the ivories as staff pianist. They worked up a big audience for their own parts. Now we have them regular for this carnival feature and they certainly are getting the postman's goat.

"Art Linick is announcer for us. Art is 'der Dutchman vot somedimes geds der vires of der vireless all tvisted togedder mitt vrom egzidemondt behind der migrofone.'

"His 'Bed Time Stories' are in the same class with the 'Bad Time Stories' of the Western station except that he uses the Jewish dialect. His 'kiddies' wear high heel slippers and short bobs."

Just before this symposium was compiled for the composing room Mr. Mattson brought over a picture of Z. Earl Meeker in the clown costume. He had not been on the air yet in Chicago but he was announced as an "exclusive KYW artist" who probably would be another scintillation of this riotous hour, although Mr. Meeker has a wider fame as a baritone of the opera.

"But he is a wonder, very versatile," said Mr. Mattson. "He comes East after a distinguished record at KFI and KHJ in Los Angeles. He also was director of the Temple Baptist Church choir of one hundred voices at Los Angeles."

Another regular singer on the KYW carnival program is Miss Grace Wilson. Her personal beauty and feminine charm would possibly surprise many a carnival listener because her voice often is mistaken for that of a man and she sings the regular tenor parts with perfect ease and technique.

Each week finds the carnival audience spreading in wider circles. The applause cards of listeners in the country and smaller towns seem especially appreciative. To them it is a vivid introduction to the gaiety and rollicking life of the big city. It is their theater, their dance, their big day at the "carnival fair."

New WPG Transmitter First Of Improved 5,000-Watters

ATLANTIC CITY, N. J.—The new 5,000-watt superstation of the "World's Play Ground," Station WPG here, is new in every sense of the word. It embodies a new circuit and all the latest improvements made on the basis of experiments of the past three years by Western Electric engineers.

This set, first of a new type, has a master oscillator and frequency stabilizer. Carrier wave distortion is cut out entirely, it is claimed.

300-Foot WJZ Towers Are Guide for Air Mail Flyers

NEW YORK.—The three hundred foot antenna towers of Station WJZ's transmission plant at Bound Brook are doubly useful. In addition to supporting the six-wire "T" type cage-antenna used in broadcasting from this station, they also serve as towers of light to guide the United States air mail flyers to their landing field which is only a few miles distant from the transmitter.

RADIO SET DON'T WORK

(Continued from page 9)

call where a service man is required to visit the house. The cost of new tubes, batteries or set parts is additional. We have found this plan to be very satisfactory."

"Summing up your experiences as a professional 'trouble shooter' what would you have to say concerning the general public?" I asked the service manager.

"It is divided into three classes. The first comprises that group of people who don't know, know they don't know and don't want to know, but yet are willing to pay for service. I should say 20 per cent of the set owners fall in this classification.

"The second group is the boring majority. It embraces about 60 per cent of the listeners. We call it the 'reader' class, because these persons usually 'fix' their own sets and ruin them, then call for service, and close the deal by blaming the service men or their receivers. It is because of this group that we must school our service men in keeping cool and never losing their tempers.

"The third class, embracing the remaining 20 per cent, contains those people who know or practically know what they are doing, but when they get stuck, they send for the service man, listen to him intelligently, and willingly pay for the lesson."

I closed my notebook and addressed the service manager.

"I think my readers will get something worth while from your interview," I said. "I hope the article makes it a little easier on the downtrodden service man, and stops many of the foolish calls."

So I conclude by saying, don't be insulted, but take this information to heart for what it is worth. It is just a lot of common sense every listener should have.

BATTERIES $7.98

6 V. 100 Amp. One piece, solid rubber cases.

Radiophone Broadcasting Stations

Corrected Every Issue—Part IV—Sept. 15, 1926

ONE DOLLAR will be paid to the Radio fan reader of Radio Digest submitting the most errors in any one station's listing in the Directory of Radiophone Stations, which appears in six parts, serially continuously on the next to last page. Letters must reach Radio Digest's office not later than one week from date of issue corrected. Readers are not limited to correcting one station, but such corrections must be verified by the stations themselves, and NOT by comparison to other so-called accurate Radio directories or lists. Verifications must accompany corrections. Turn in corrections for as many stations as you can find—if you can find errors! Use separate sheet of paper for each station submitted and place name and address on each sheet. In case of tie, duplicate awards will be made. Until wave lengths become stable again, we will not be able to count these in the challenge.

United States (Cont'd)

NOTE.—The fourth part of the schedule list appears below. Part five appears next issue.

WMAQ, Chicago, Ill. 447.5m-670kc. 1,000 watts. The Chicago Daily News. Announcer, Roberty Whitney. Daily ex Sun, 11-12 n, WQJ program; 12-1:45 pm, 2:45-7, 7-8, 8-10. Central daylight.

TOUCHDOWN SHOUTS SOON TO FILL ETHER

IMPORTANT GRIDIRON CONTESTS ON MANY MIKES

Big Three, Army-Navy and Big Ten Games Take Limelight as October 2 Dawns

Gridiron contests of importance will fill to capacity the appetites of "touchdown" listeners beginning Saturday, October 2, when the 1926 football season gets under way at most colleges and universities.

In the East J. E. "Jim" Murley, former sports writer and present press representative of WBZ, who handled the games last year, will again broadcast all games picked up by WBZ. These include five Harvard games played at the famous Harvard bowl, and the Dartmouth-Yale, Yale-Army and Holy Cross-Boston College contests. WBZ will also tie in with WJZ and WGY for the Yale-Harvard game, which, however, will not be announced by Murley.

FOOTBALL BROADCASTS

Saturday, October 2

Chicago-Florida at Chicago, WMAQ (447.5m-670kc).
Harvard-Geneva at Cambridge, WBZ (333.1m-900kc).
Mississippi-Arkansas at Fayetteville, KUOA (299.8m-1000kc).
Northwestern-South Dakota at Evanston, WGN (302.8m-990kc).
Princeton-Amherst at Princeton, WJZ (454.3m-660kc).

Saturday, October 9

Chicago-Maryland at Chicago, WMAQ (447.5m-670kc).
El Paso Junior-New Mexico at State College, KOB (348.6m-860kc).
Harvard-Holy Cross at Cambridge, WBZ (333.1m-900kc).
Iowa State-Okla. Aggies at Ames, WOI (270m-1110kc).
Yale-Georgia at New Haven, WJZ (454.3m-660kc).

(Oct. 16, 23 and 30 Games Next Issue.)

Big Three Well Broadcast

From WJZ will emanate seven of the Big Three games beginning October 2. Two other contests, between the Navy and Michigan and Pennsylvania and Cornell, will come through WJZ. WGY, Schenectady, will be tied in with WJZ for six of the games, WBZ two, and WRC one.

The Harvard-Princeton clash at Cambridge will be the most broadcast game on either the WJZ or WBZ schedules. Four stations, WJZ, WBZ, WGY and WRC, will handle it. Jim Murley will announce.

Although definite announcement has not been made who the football announcer for the WJZ pickups will be, Major J. Andrew White, through his long experience as sports announcer, will more than likely be the announcer chosen.

Midwestern Games on Air

"Harry and Hal," Beardsley and Totten respectively, the famous team of WMAQ sports announcers, will handle the Chicago Daily News' participation in football broadcasting, which opens October 2 with the Florida-Chicago game at Chicago. In addition to all University of Chicago home games and the Army-Navy contest at Soldiers' Field, Chicago, Harry and Hal will travel to Philadelphia for the Chicago-Pennsylvania game October 16.

WGN has announced tentatively five games on its microphone calendar, with the promise that seven very important Big Ten and other contests will be listed very soon. The season will be opened by the Northwestern-South Dakota game October 2. Quinn Ryan will announce.

KYW, pioneer sport reporting station of Chicago, with its versatile and famous gridiron announcer, "Shorty" H. A. Fall, at the mike, will give all University of Chicago games played in Chicago, beginning with the Florida contest October 2. On November 27 KYW will pick up the Army-Navy game, the Eastern football classic that is being played this year in Chicago for the first time in history.

HAPPY MARY LEWIS IS ON FRONT COVER

SEE her smile, broadly, beautifully, exposing a great big dimple? You would too, if you had just finished doing what she did. She has just entertained fifteen million Radio listeners tuned to the Radio Industries banquet at New York City and broadcast by forty leading stations.

Who is she, you ask? Why this cover girl is our own famous American soprano, Mary Lewis, Metropolitan Opera star, maker of Victor records and known internationally.

Despite all her laurels, Mary is just herself—a beautiful, happy, "glad-to-meet-you" American girl without a trace of snobbishness or meanness in her character.

Important Fall and Winter Features Are Booked by Leading Broadcasters

Atwater Kent Hour Full Again—Famous Boston Symphony to Be Heard in Twenty-Four Saturday Night Concerts from WBZ—WMAQ Announces Talks by Prominent Governors

GREAT symphony, opera and concert celebrities are booked for the greatest and most cultural season Radio broadcasting has ever known, according to announcements now being received by Radio Digest from broadcast stations throughout the United States.

A. Atwater Kent, whose concerts by famous stars over the WEAF chain, brought so many converts to Radio last year announces the new fall series to begin next Sunday night, 9:15 to 10:15 E. S. T. Among the artists already scheduled for an early appearance are Frances Alda, Lucrezia Bori, Madame Schumann-Heink, Frieda Hempel, Josef Hofmann, Edward Johnson, Albert Spalding, Maria Kurenko, Louise Homer, Reinald Werrenrath, Margaret Matzenauer, Mary Lewis, Rosa Ponselle and Charles Hackett. Mr. Kent has established an unprecedented arrangement with the Metropolitan Grand Opera company whereby their artists, including many never before available, will be on call for his broadcasting concerts.

WBZ Gives Boston Symphony

Another artistic triumph is announced by WBZ, the Westinghouse station at Boston, which states that it has captured the world-renowned Boston Symphony Orchestra for its entire series of twenty-four Saturday night (not consecutive) concerts. The first will be a grand broadcast for the entire Atlantic seaboard and comes October 9. This initial concert will be rebroadcast through WGY, Schenectady, WJZ, New York and WRC, Washington, D. C. The other concerts via WBZ will follow on October 16, 23, 30; November 13, 20; December 4, 11, 18, 25; January 1, 15, 22, 29; February 12, 19, 26; March 5, 19, 26; April 2, 16, 23 and 30. W. S. Quinby is credited for bringing the Boston Symphony to the air audiences.

The Aleppo Drum Corps, internationally famous 218-piece Shriner's band, returned to WBZ for its third season of broadcasting with a concert Monday evening, September 20. The band is under the leadership of Louis and Lewis A. Harlow, father and son. The instruments for this unique organization were especially designed by their leader.

Famous Governors on Mike at WMAQ

WMAQ of the Chicago Daily News will make a bid for national attention with a series of governor's talks each Saturday night from October until June. Governor Alfred W. Smith will be the first speaker and is scheduled to open the series tomorrow (October 2) night. He will be followed by Governor Pinchot of Pennsylvania. Governors of Maryland, South Dakota, Wisconsin, North Dakota, Massachussets, Main, New Jersey, Washington, Iowa, Florida, Arkansas and Minnesota already have accepted invitations to speak.

Looking Ahead

Remember "A Step on the Stairs?" Well, you're going to hear about the great broadcast game of **"WHOZIT"** in our next issue. Radio Digest is sponsor again—and it's going to be a hit.

Honorable Mention Awards for the Fifteen Winning Announcers in the big championship Gold Cup contest, just concluded by Radio Digest, will be published in the issue of October 15. See their pictures and how they ran in this great national classic.

Little Jack Little, Claimed by Many to Be the Most Popular Troubadour on the Air, is off for his swing around the South and far West stations. Just before he packed away his music roll and his vest pocket piano he was visited by a Radio Digest writer. Watch for and read what happened. Coming soon.

Don't Miss the Parade of the Loud Speakers! It's going to be conducted by pictures and descriptions in our next issue. See the latest models and the improvements that are making Radio the most enjoyable ever. The parade of B eliminators is now passing by on page seven.

One of the Newest and Most Distinguished Dixie Broadcasters Is WRVA, of Richmond, Va. This station is a beehive of enthusiasm, and the story of its success has been prepared for Radio Digest. Meet WRVA in a forthcoming issue.

Special articles about broadcasting stations and artists, with photographs, and NON-RADIO fiction 5,000, 10,000 and 30,000 words in length are desired. No manuscripts accepted unless typewritten and prepaid, or returned without return postage being inclosed. All manuscripts are sent at owner's risk.

SHORT WAVES

By Marcella

How to Be Announcer or Studio Director; Ray-O-Vac Twins' Route; Hired Hand and Sunflower Girl; Address of Gene Rouse; "Hal" Totten; Ralph Waldo Emerson; Lee Sims Argument; Jack Little News; Coon Sanders at WGN; Sallie Menkes, Kay Ronayne and Autos; Jack Nelson, Jr.; Marriage of Glenn Rice; Earl Haubrich and George Getsey; Louis J. Johnen; Ralph Patt, Jr.; Wilfred Glenn Abroad; Lewis Reid.

HERE it is, the Springtime of Radio again, and serenaders are dusting off their banjo-mandolins, popular and classical pianists are practicing new numbers, songsters and songstresses are making ready to capture the multitudes with increased repertoires and the mail man is taking an unusual interest in Marcella.

The first letter I pick up is one from a gentleman in Iowa who desires to know the requisites of a Radio announcer and studio director. From my experience, I should say that he should be single and handsome, have captivating mannerisms, a pleasant baritone voice, and a personality that fairly exudes through the microphone. Or, of course, he might keep his marriage a secret. Then he is qualified to be an announcer. To be a studio director he should have knowledge of showmanship and the simple technicalities of good broadcasting arrangement, such as placing the microphone, much tact in handling people, a willingness to submerge his own ability in order not to star himself above his artists, and a large number of friends among the performer and artist group from which he can draw when necessary to build programs. The latter requisite is not really so important, for it falls within the requirements of the program director, and, besides, paid artists are becoming more and more the rule.

* *

The Ray-O-Vac Twins are at it again, and traveling the Radio shows for the moment. Having appeared at South Bend, Kansas City, Cleveland and Milwaukee during September, their October schedule is as follows:

September 30 to October 3 at Dayton, Ohio, Radio show; October 4 to 9 at Cincinnati Radio show; October 11 to 17 at Chicago Radio show; October 18 to 23 at St. Louis Radio show; October 25 to 30 at Indianapolis Radio show.

Of course, they will be on the air from stations at these points. I'll try to keep you informed as to their future itinerary.

* *

"Madam Zita": If you think the Hired Hand is married to the Sunflower Girl, you've been misinformed. He is married and she is married, but not to him. They are related by marriage but not by blood. Now, figure that out. She made records in Chicago this spring, but don't know that she has done any recording in New York.

No, Gene Rouse is not at KOIL—someone has a voice like Gene's, I suppose. If you really want to correspond with Gene, write care of me and I promise to see that he gets your mail, and that "Little Bum-Bum" receives your gifts.

* *

Mrs. M. F. M.: So you like Harold or "Hal" Totten, sports announcer for WMAQ. I do too. He's about 28 years old, plain but wholesome looking, short of stature, of medium weight, has a dimple on his chin, parts his hair 'way over on one side, and wears glasses with frames specified by opticians as "military." He is a graduate of Northwestern university and has had lots of experience in newspaper work with the attendant thrilling tales. When not announcing sports he is either rewriting for the Chicago Daily News, writing or rehearsing a new play, or making fervid love to his very charming brunette wife. Yes, they are very happy and have been married for about two years. They have known and loved one another since childhood.

More about Ralph Waldo Emerson, the hard-working WLS organist? All right, here goes. Ralph is about 30 years old and single. His weight is 185 pounds, height 5 feet 9½ inches, eyes blue, hair light brown. The reason for his irregularity in broadcasting is that he is just starting a new organ school in the Masonic Temple building, Chicago, composed of fourteen organs, and at the same time he is teaching an extension course in organ playing by way of correspondence. These projects keep him so busy, and will for some time to come, that his broadcasting has to be secondary, unfortunately, for the present. His hobby is his school work, and he claims sincerely that he would rather give a lesson than eat a meal. In moments of relaxation he enjoys swimming, and he confesses that he swims "fluently" the year 'round. I certainly shall use my good offices with Radio Digest to see that you are given Ralph's picture.

* *

R. E. W.: You are right—go collect the money. Lee Sims has never been a member of the Coon Sanders orchestra. Since

(Continued on page 15)

EARL MAY WINS GOLD CUP AWARD

FARMER TO BENEFIT BY U.S. AIR PROGRAM

AGR. DEPT. SIGNS 100 KEY STATIONS FOR FEATURES

Farm School, Homemakers' Chats and Noonday Flashes Only Three of Twenty Helpful Broadcasts

WASHINGTON. — Approximately one hundred major broadcasting stations, representing every section of the country, will lend their facilities regularly to the United States Department of Agriculture, starting October 4. The new government farm programs, which cover a wide scope of interest, are to be brief digests of the most timely, pertinent facts woven into story form and carefully adapted to Radio presentation.

The fall and winter broadcasting schedule of the Agricultural Radio service includes twenty special program features each week, covering the full range of interests reached by all bureaus of the department.

Farm School at 25 Stations

The United States Radio Farm school, which has already brought requests for a half million enrollment cards, will be conducted from twenty-five stations. Lessons take the form of experience talks and imaginary inspection tours. Radio "schoolmasters" at the respective stations will conduct classes. Material furnished by the Department of Agriculture will be dramatized in such form as to attract and maintain interest through the courses. Printed lessons are to be mailed to all enrolled students.

Another outstanding service to be released from forty stations is the noonday flashes. This program will enable a million farmers to listen in daily to both sides of an intelligent, interesting, telephone conversation between a county agent and farmer who will discuss timely problems.

"Aunt Sammy" Aids Homemakers

"Aunt Sammy," a new Radio friend and neighbor, will be heard from thirty stations starting October 4. Uncle Sam's sister, who is the official Radio representative of the bureau of home economics of the department of agriculture, has a sense of humor and is the friendly sort. She knows all the new wrinkles and fine points in housekeeping and will tell about them in a style all her own.

Special farm features to be scheduled this fall and winter from fifty stations include "A Weekly Letter to Dad," which the son at college writes home telling the folks the high spots in his studies of agriculture which he believes might well be put into practice on the home place; "Autobiographies of Infamous Bugs and Rodents," a ten-minutes specialty about "Pests That Are Bothering Now," as told by the insects and rodents themselves; "Chats by the Weather Man"; "Primer for Town Farmers"; "An Interview With the Agricultural Economist," and a weekly "Farm News Digest."

Broadcaster Lifesaver When Storm Hits South

WSMB Warns Fishermen and Trappers of Hurricane

NEW ORLEANS.—The first demonstration here of the practicability of broadcasting for other than entertainment took place during the recent tropical hurricane which struck the south central coast of Louisiana and later hitting Florida, when Station WSMB remained on the air over forty hours straight broadcasting advisory bulletins on the progress of the storm.

Because of this service, the tropical hurricane did not come sweeping down unheralded as heretofore on unprotected, lonely fishing craft anchored in secluded covers off the Gulf coast; on trappers miles deep in the almost impenetrable fastness of marshlands and isolated communities and villages. Hundreds of lives were saved.

National Broadcasting Co. Takes Over WEAF Goodwill

NEW YORK.—The formation of the National Broadcasting Company, Inc., was announced by Owen D. Young and James G. Harbord, chairman of the board and president, respectively, of the Radio Corporation of America, in a formal statement here recently.

M. H. Aylesworth, formerly chairman of the Colorado public utilities commission, and more recently managing director of the National Electric Light association, has been named as the president of the new company which will make the station WEAF, formerly owned by the American Telephone and Telegraph company, as the nucleus of a national broadcasting service.

INJURY CAN'T STOP RADIO LOVE MAKER

SCHENECTADY, N. Y.—The actor in the Radio drama may have broken bones or even be minus a leg or two, but, providing he has retained his voice, the audience will enjoy his work quite as much. Ten Eyck Clay, director of the WGY Players, recently tried to start his car by cranking after the battery had become exhausted. The car started at the price of a broken wrist.

In the Radio play that night he made passionate love to the heroine despite his injury.

"PAT" BARNES, WITHIN 12,000 OF BIG PRIZE, PLACES SECOND

KMA Owner Is First with Record Breaking Vote in His Favor—WHT Announcer Wins Silver Cup as Runner-Up—Lillian Shaw of CKY Wins Canadian Trophy

NEW ROYALTY OF ANNOUNCERDOM

Earl E. May, top left; "Pat" Barnes, right; Lillian Shaw, lower left.

LOYAL tall corn farmers of the Middle West are responsible for the victory of Earl E. May, owner and operator of KMA. When once asked how his station had built up such a following, Mr. May answered:

"First of importance, I believe, has been our definite, aggressive and broadminded policy. Second, comes the personality of the announcers and our staff. Third, I would list clear and successful transmission. We have striven to give our audience just a little better than they wanted."

Mr. May is president of the May Seed and Nursery company and also of the American Association of Nurserymen. He is a vigorous personality who personally directs programs and the imparting of information to listeners. The latter he always strives to keep accurate, reliable and trustworthy.

The farmers believe in KMA and its owner. They rely upon his agricultural and horticultural tips. They know, too, that Mr. May understands the farm. He was raised on a cattle ranch in western Nebraska, forty miles from the main line of the railroad, and besides his practical farming experience, he is an efficient judge of human nature and the public mind. He is appreciative of meritorious comments but proof against praise, and he accepts censure in the spirit in which it is given.

Although Shenandoah, Iowa, is a town of but 5,000 people, the interest of the public in KMA was shown this past summer by visits to the station from over 50,000 people.

PATRICK HENRY BARNES, winner of silver cup as runner-up in the 1926 Radio Digest Gold Cup Award, is a likeable figure in Radio. As director and chief announcer of WHT, he and his first lieutenants, Jean Sargent and Al Carney, have made the Wrigley building studio one of the best known in the city of Chicago, the Midwest and the entire country, for that matter. While from point of service, he is still a youth in Radio, Pat has a strong following and may be considered as 1927's most feared gold cup contender.

Mr. Barnes's presentations or continuity sketches and his "Your Hour League" have hundreds of thousands of followers. He is ranked as a leading showman in the present and future art of Radio entertainment.

Last June he was married to Eleanor Gilmour, a singer whose voice is still remembered by the invisible audience. Pat is still young—not over 33—and he is as good looking as his voice and its mannerisms are pleasing. During the world war Pat was overseas with the A. E. F., and while there he achieved fame with his own play, "A Buck on Leave," which many world war vets will remember as a ray of sunshine upon a murky field of mud and blood.

The programs emanating from WHT never seem to be commercial in any sense of the word, yet WHT is a strictly toll station. As such it is the most prominent toll broadcaster west of New York where WEAF holds forth. Because the Wrigley building has been so pleasingly entertaining as a commercial station, we cannot help but admire the ability of its staff.

(Copyright 1926 by Radio Digest)

With 452,901 votes to his credit to mark him indisputably as the world's most popular announcer for 1926, Earl E. May, owner of and announcer for KMA, the May Seed and Nursery company station at Shenandoah, Iowa, went over the top and won the 1926 Radio Digest Gold Cup Award, bringing honor to a little town in Iowa in the midst of the Corn Belt.

But his margin was not great. Close behind him trailed Patrick H. Barnes, director and announcer of WHT, the Radiophone Broadcasting Corporation station, Chicago. Mr. Barnes, at the end of a week's tabulation of votes on the part of the judges, showed a count of 441,379—a matter of but 11,522 less than Mr. May, the champion.

To the victor will be awarded the solid gold cup, shaped like a microphone and valued at $5,000. To the runner-up will be presented the sterling silver cup, identical in design and size with the gold cup that marks second place. Complete final standings for all contestants will appear in the next issue of Radio Digest.

Heavy Vote Breaks Records

The presentations of both cups will be made at the Chicago Radio Show, to be held October 11 to 18 at the Coliseum, Chicago. Although the night of the ceremony has not been set, the event will be broadcast by a chain of stations.

The unusually heavy voting this year was remarkable. Each of the winners polled well over twice as many votes as it took to elect Graham McNamee in 1925 or George Hay in 1924 to the honored position. Perhaps the interest in the contest would not have been so great had not Messrs. Hay and McNamee insisted upon withdrawing this year, both claiming that one gold cup was enough for anyone, and thus establishing a "single term" precedent for world's champions.

But the 1926 race was hot, and almost to the end of the counting not a judge would predict the outcome.

Woman Takes Canadian Cup

A young woman announcer for CKY, Miss Lillian Shaw, took the special silver loving cup offered by Radio Digest for the most popular Canadian announcer this year. This marks the second successive year that a member of the staff of CKY has taken the Canadian cup, last year's having been won by D. R. P. Coats, chief announcer for the Manitoba Telephone System station. Joining with McNamee and Hay, Mr. Coats refused to run again this year, and instead became campaign manager for Miss Shaw.

Complete final standings for all entrants in the Gold Cup Award, together with pictures of the fifteen announcers next in order following May and Barnes, will appear in the next issue of Radio Digest. The fifteen whose pictures will be given will be presented with certificates of honorable mention. Final tabulations and recounts are now being made by the Gold Cup Award Editor and a corps of busy assistants.

LILLIAN SHAW, who now rates as Canada's most popular announcer for 1926, Mr. D. R. P. Coats, 1925 Canadian champion, permitting (by his refusal to run in 1926), is a native Canadian. She was born of English parents in Winnipeg just twenty years ago, and her education consisted of attending the Winnipeg public and high schools. In 1922 she left school to take a business course, and in November, 1923, she joined the staff of CKY as stenographer and daytime program announcer.

She may be said to have grown up with CKY as this was her first business appointment. Miss Shaw is a "preferred" blonde of slight build. She is the daughter of Mrs. A. H. Shaw, one of Winnipeg's best known soprano soloists and winner last year of the prize for operatic singing in the Manitoba Musical Festival.

WAAM Caters to Entire Family

Ira Nelson (top) founder of I. R. Nelson Co. and father of WAAM. At right is Ray Nichols and his golfish looking Four Towers Orchestra ready to tee off from the WAAM microphone. Below is Thomas F. Burley, secretary-manager of the Chamber of Commerce of the Oranges and Maplewood who will direct their new studio, broadcasting through the Nelson station at Newark.

HOME—a family fireside with father, mother, children and perhaps a grandparent or two gathered about the home receiving set listening to the offerings of the air. This is the picture constantly visualized by Ira R. Nelson, Jr., manager of Radio Station WAAM of Newark, N. J.

That is why this pioneer with beginnings back in the first year of general broadcasting calls itself the "home" station. It aims to provide something for every member of the family. There is music to stir the feet of the younger generation and music to stir the hearts of those who are older and more serious.

There is more than music, too. Studios have been established in a number of public centers so that matters of community interest are communicated directly into the homes of those who are unable to be present at the source. Educational subjects are also provided for those who wish to expand their intellectual attainments.

WAAM belongs to I. R. Nelson and began broadcasting in 1922 when it was the second most powerful station in the East. It was superceded only by WJZ which generated 250 watts. It was established by Mr. Nelson and his sons who own and operate a large electrical repair shop.

For a short time, from December 1925 until April of this year the station was operated from the Warner Brothers theater at Fifty-second street and Broadway, New York City under the call letters WBIP. However, it has since resumed under the old name and at the old stand, 1 Bond st., with D. Franklin Scott as chief announcer and Agnes Dentlinger, program director.

"We believe the chief use of the broadcast Radio is for the folks in the home," said Mr. Nelson, Jr. "We believe in the home, home life and the strengthening of home ties. With a good receiving set in congenial home surroundings there is nothing better to keep the family together of an evening. Dance music by the best of orchestras may now be brought into the parlor with sufficient volume and purity of tone to permit dancing by a dozen, a score or more of guests."

Religious faith, affording the sanctity of marriage, the hope of life and consolation in the hour of death also is considered as a vital factor of the home and WAAM endeavors to serve by bringing religious devotions into the homes from the various churches in Newark. It is interdenominational in this service. The Rev. Merril T. MacPherson of Brooklyn has charge of the daily Happy Hour at which a different minister is engaged each day to talk on some aspect of daily living. Miss Cora Morris, soprano, and John Scott, evangelistic singer conduct the music.

"There are only three kinds of entertainment that can be put on the air," continued Mr. Nelson in the course of an interview with the Radio Digest correspondent, "and they are the voice of speech, the voice of song and instrumental music. Due mostly to the fact that the Radio listener doesn't care much for speeches educational programs are often sadly lacking. We believe that so long as a program is nothing but music

(*Contin'd on page 30*)

Did you ever see an official city hostess? No? Then meet Miss Mildred Huntoon, above and at the right, who is officially delegated as hostess of the New Jersey towns of "the Oranges and Maplewood." She will function especially at their Radio studio in the Chamber of Commerce. Miss Irene Hess is program director and Miss Ann Mittleday, accompanist. D. Franklin Scott (right) is WAAM's chief announcer—handsome, as announcers should be.

"Miss America" Is on the Air

LISTENERS FROM Torrid to Frigid Zones Tune in WPG at Atlantic City for Famous Annual Bathing Beauty Pageant

ONLY a few days ago all America was listening in for an important announcement from Atlantic City, N. J.

Newspapers held their presses for the flash, Radio broadcasters stood by to interrupt their programs, and everybody—especially the flowering youth of the nation—was tuned and eagerly waiting.

Then, like a blaze of lightning, it came crackling through the air. WPG had it first:

"Miss Tulsa of Tulsa, Okla., has won the great national beauty title, 'Miss America.' Miss Norma Smallwood is the young lady representing Tulsa. Miss Washington, D. C., was second choice."

The two Venetian maids at the left are Miss Virginia Curtis (left) and Miss Margaret Suacusa who have won the love of WPG listeners with quaint Italian folk songs.

Hearts were beating once more. Music resumed and the world went back to normal—except at WPG, the municipal broadcasting station of Atlantic City. Listeners to this station were privileged to hear the glorious beauty queen crowned and hear her voice over the new 5,000-watt transmitter just placed in commission in time for Atlantic City's great annual event.

Carlo Ferretti (above), of the opera whose rich baritone voice thrills WPG listeners. He sang the gates open at the Sesquicentennial and is identified with Capt. Pat Conway's Concert Band. Miss Norma Smallwood (right) as "Miss Tulsa" is crowned "Miss America" in the presence of WPG "mike."

It is one of the most important functions of the year for WPG—the "World's Playground." And as the hour for the great pageant draws near the station hums with activity. The reigning queen is the center of attention until the time comes to surrender her scepter and become an ex-queen. "Oh to be there and strolling, strolling along the sands," sigh those who must stay at home. But WPG answers, "Tune us in and we will take Atlantic City to you through the air."

* * *

Close your eyes and there you are in the station, pressed close to the big plate glass window opening into the Marine studio. Who is the exquisite young maiden at the microphone? You must know her from the pictures—her fluffy hair blowing in the salty breeze from the sea, her luminous eyes glacing around from time to time and red lips smiling as she speaks in a modulate voice through the microphone. She is clothed in immaculate white, the sun-tinted skin of her throat revealed by the loose drape of her sailor collar. Quite right, you are. She is Miss America, the Miss America of 1925, identified in the public record of births as Miss Fay Lamphier and she is in Atlantic City to welcome to the Royal Ranks the queen of 1926.

At the announcer's desk sits Mr. Edwin M. Spence, director of the station. Presently he will escort you to a balcony at the American Beauty Ball and there describe to you the most exquisite assembly of regal grace ever encompassed by four walls. He will also picture for you the Miss America parade as it passes before the judge's stand in glorious review.

Delightful Mr. Spence—his eyes are ever alert to picture for us the gorgeous scenes that intrigue our eyes of the mind. Follow Mr. Spence with your ears and you will see the cooing infants in their gaily bedecked perambulators as they pass in the famous Baby Parade; you will find yourself rolling along in a chair while a gentle voice whispers in your ear the names of the celebrities you meet rolling from the opposite direction and the chances are you will discern details in their raiment that would have escaped you if you had been using your own eyes.

In the center of the stage, befitting the place of a master of ceremonies, is Director Edwin M. House, public spirited citizen and chief announcer for WPG. Maestro Franko Goldman (above) and his band have been transmitting the glory of the Steel Pier to Radio audiences.

Thus WPG brings to you Atlantic City and, even though you may be engrossed today over the congress of American beauty, tomorrow you will be charmed by a program of music from artists of world renown. You have but to glance at the register book in the solarium as you step from the window of the Marine studio. Names of celebrities are enscribed and they are giving of their art to WPG.

High class dance music is contributed by the orchestras from the leading hotels, including the Morton, Traymore, Ambassador and Chalfonte Haddon Hall. Others are Frank Elliot's Steel Pier Minstrels and Emmet Welsh's Minstrels on the Million Dollar Pier, Victor Recording Syncopators, Wheeler Wadsworth's Hotel Shelburne Dance Orchestra, George Olson's Garden Pier Melody Boys, Seattle Harmony Kings, Fry's Dance Orchestra and the Steeplechase Pier Dance Orchestra.

Among the singers who have achieved great popularity over WPG this summer are Marie Tiffany, soprano; Mme. Julia Claussen, mezzo soprano; Henri Scott, bass baritone, and Paul Althouse, tenor, all of the Metropolitan Opera company; Jules Falk, star pupil of Ysaye; Estelle Wentworth, prima donna of the San Carlo Opera company; Greta (*Continued on page 30*)

Announcing!

A PIONEER IN A PIONEER PROFESSION

Norman Brokenshire Announces

I am glad to announce that arrangements have been completed whereby my services will no longer be confined to any one radio station.

Under this new arrangement, my associates and myself will devote our entire time to creating and producing happy radio hours.

I am now arranging my itinerary for a tour, during which I hope to become personally acquainted with you and your favorite station.

I do not leave my friends—but serve them better.

Norman Brokenshire

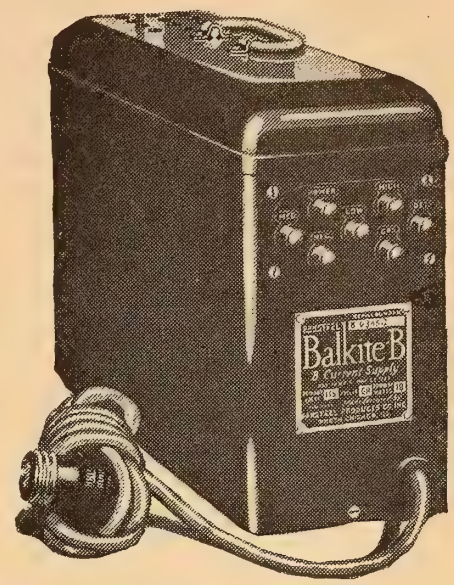
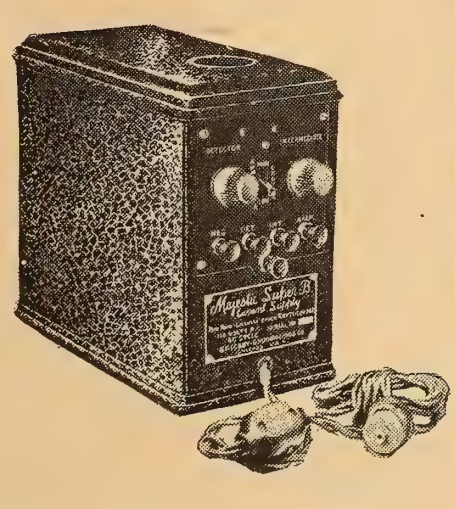
The Parade of B Eliminators

LAST ISSUE we displayed the season's latest offerings in receivers. Next issue loud speakers will be featured, but here we have "The Parade of B Eliminators." And a big parade it is, too, for manufacturers upon manufacturers have taken up the popular problem of lighting current B supply. In apportioning these pages, the problem of classifying A eliminators with B substitutes was discussed, but it was decided to feature trickle chargers and A eliminators in a later issue. So we have below, paraded before you, ten of the 1927 B eliminators which should enjoy a good sale. Their specifications are given insofar as data is available, and their prices may be learned by interested parties merely by writing a letter to RADIO DIGEST. *Nowadays, the "A.C." or power hum has been practically done away with by most eliminator makers. This has been accomplished by careful design and addition of improved filter systems. This year's B eliminators also will be observed to have provided for heavier voltages for power tube operation. Grid bias or C taps have been added, too.*

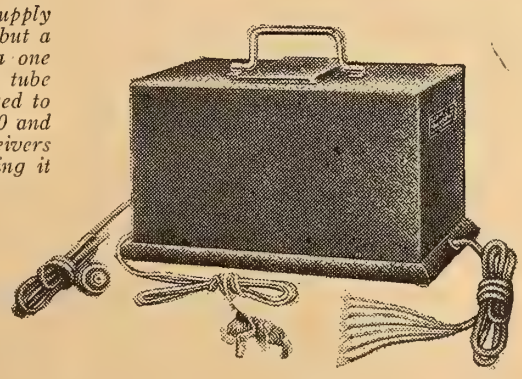


Three new models of Majestic B current supply units are being offered. The model at the right is known as the Majestic Super-B and supplies a maximum of 45 mils at 150 volts, or sufficient to operate sets up to 12 tubes, including power type tubes. Detector and intermediate voltages are variable, and a switch is so arranged that the lighting current can be cut off. Standard-B, less expensive, is designed to operate seven tubes and Master-B, the largest of the Majestic family, handles anything up to 60 mils draw. All use Raytheon tubes.



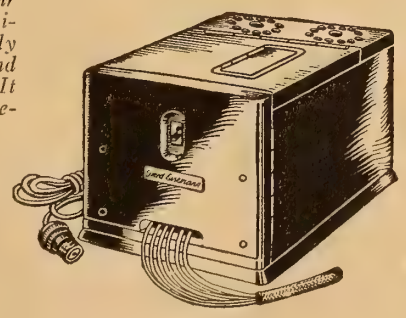
Top left and top right corners of the page show two new members of the Balkite B eliminator family. They are chemical, of course. Top left is model W, low-priced and made to supply sets of 5 tubes or less requiring 67 to 90 volts. Has separate tap for detector tube. Top right is model Y, and it is designed to supply any set, including the largest now on the market. Power tubes are its "dish" and it has enough volume to fill a hall. Intermediate taps for smaller sets are provided. Output, 40 mils at 150 volts. Model X, which comes between the two described, is for sets of from 5 to 8 tubes where 90 to 135 volts are required. Output, 30 mils at 135 volts. Balkite "Combination," another new device, combines Model X with a trickle charger.

And here's the brand new Freshman A-B-C Power Supply (at the right) which leaves nothing to be required but a storage battery. The Freshman device embodies a one ampere Tungar trickle charger with a UV-213 type tube full-wave rectifying B supply. The latter is arranged to give a C voltage of 9, and B voltages of 22½, 45, 90 and 135. The builders of Freshman Masterpiece receivers designed this A-B-C unit for the purpose of building it into their cabinet model sets, but there is no reason why the A-B-C Power Supply should not be used by anyone having a set with from 5 to 8 tubes.

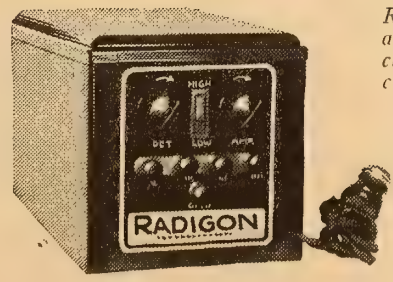


Directly above, in the second row and proudly displaying the "B-T" trademark, is the new Bremer-Tully B-power unit. It is a Raytheon type rectifier, and is designed very evidently with the idea foremost in mind of making it foolproof. Its output voltages may be varied by changing cartridge resistances within the case, but for the standard set these are set at 22½, 45, 90 and 135 volts. A little adjustment plug on the front controls the output current, which can be adjusted even as high as 60 mils at 155 volts.

Even Freed-Eisemann are in the B eliminator business, but just to keep their line complete. The eliminator they make is really a B and C substitute, and is shown at the right. It will operate all Freed-Eisemann 5 to 8-tube receivers, or others having the same power requirements. The unit yields C voltages of 27 (for special power tubes), 9 and 4½, and B voltages of 45, 90 and 135. Another feature is that the unit is shockproof.

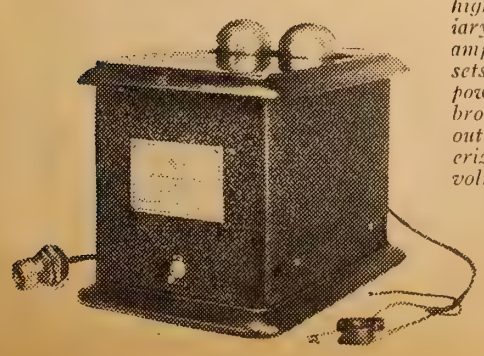


The Kingston, below, sells complete with Raytheon tube. Three voltage taps are provided, and these are variable over a wide range of from 5 to 150 volts. Sufficient plate current is provided to operate any receiver up to ten 201A tubes or equivalent. The case is finished in black and nickel.

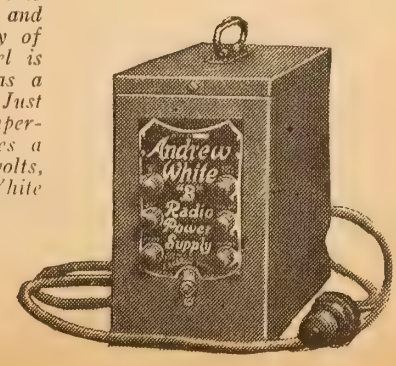


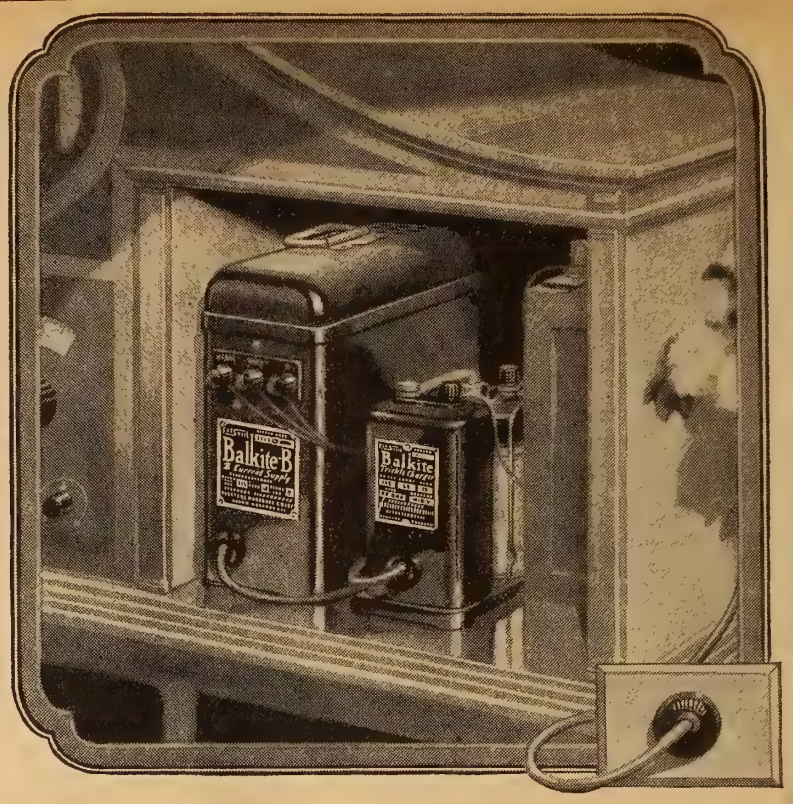
Radigon, left, will operate any set up to 12 tubes, including power tubes, and is compactly assembled in a case finished in green Duco. Three voltage taps are provided and the detector and intermediate are adjustable. A high and low switch is also on the panel. Rectification is accomplished by a gas-filled full-wave type tube sold with the Radigon.

The Powerizer, left, is something new in that it combines B eliminator of high order with an auxiliary stage of super-power amplification, so that older sets lacking the new style power amplifier may be brought up to date without any rewiring. Powerizer supplies up to 170 volts of B power for the set, 350 for the power tube, and A and C power for the power tube.

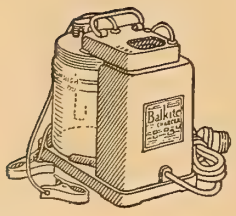


Neat, compact, and powerful, the B eliminators made and sold by J. Andrew White, famous sports announcer, supply smooth and even B current in a variety of voltages. The smaller model is shown at the right and has a maximum voltage of 135. Just introduced, however, is his Super-power model, which provides a maximum voltage of 200 volts, with variable taps. The White eliminators are of the electrolytic type, and use double the usual number of rectifying cells.

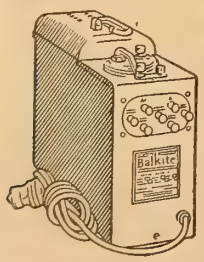




The new Balkite "B" at $27.50 and the Balkite Trickle Charger *furnish all radio power from the light socket*



The New Balkite Charger
MODEL J. Has two charging rates. A low trickle charge rate and a high rate for rapid charging and heavy duty use. Can thus be used either as a trickle or as a high rate charger and combines their advantages. Noiseless. Large water capacity. Visible electrolyte level. Rates: with 6-volt battery, 2.5 and .5 amperes with 4-volt battery, .8 and .2 amperes. Special model for 25-40 cycles. Price $19.50. West of Rockies $20. (In Canada $27.50.)



Balkite Combination
When connected to the "A" battery this new Balkite Combination Radio Unit supplies automatic power to both "A" and "B" circuits. Controlled by the filament switch on your set. Entirely automatic in operation. Can be put either near the set or in a remote location. Will serve any set now using either 4 or 6-volt "A" batteries and requiring not more than 30 milliamperes at 135 volts of "B" current—practically all sets of up to 8 tubes. Price $59.50. (In Canada $83.)

All Balkite Radio Power Units operate from 110-120 volts AC current with models for both 60 and 50 cycles. The new Balkite Charger is also made in a special model for 25-40 cycles.

The light socket is your most convenient source of radio power. Use it by adding the new Balkite "B" and the Balkite Trickle Charger to your radio set.

Balkite "B"—the unique "B" power supply—eliminates "B" batteries entirely and supplies "B" current from the light socket. The new Balkite "B"-W at $27.50* serves any set of 5 tubes or less requiring 67 to 90 volts. Balkite "B"-X at $42* serves sets of up to 135 volts and 8 tubes. Balkite "B"-Y at $69 serves any standard set.

The Balkite Trickle Charger at $10* is probably the most popular of all chargers. Over 200,000 were purchased during one season and are now in service. Instead of operating intermittently at a high rate, it operates continuously at a low rate, thus automatically keeping the battery at full charge. In effect it converts your "A" battery into a light socket "A" power supply. With 4-volt batteries it can be used as an intermittent charger, or as a trickle charger if a resistance is added.

Both Balkite "B" and the Balkite Trickle Charger are noiseless in operation. Both are permanent pieces of equipment, with nothing to renew or replace. Other than a slight consumption of household current, their first cost is the last. Both are built to conform with standards set by the Underwriters' Laboratories.

Over 650,000 radio sets are already Balkite equipped. Make yours a light socket receiver too by adding these Balkite Units. Enjoy the pleasure of owning a radio set always ready to operate at its best.

*Balkite Trickle Charger $10.50 west of Rockies. In Canada: Trickle Charger $15; "B"-W $39; "B"-X $59.50; "B"-Y $96. *Fansteel Products Co., Inc., North Chicago, Illinois.*

The Balkite
Radio Symphony Concerts with WALTER DAMROSCH *and the New York Symphony*

These concerts will be broadcast every other Saturday Evening, beginning with October 23d. On intervening Saturdays Mr. Damrosch will give a piano lecture recital alone. At 9 P.M. Eastern Standard Time, over a group of 12 stations: WEAF, WEEI, WGR, WFI, WCAE, WSAI, WTAM, WWJ, WGN, KSD, WDAF.

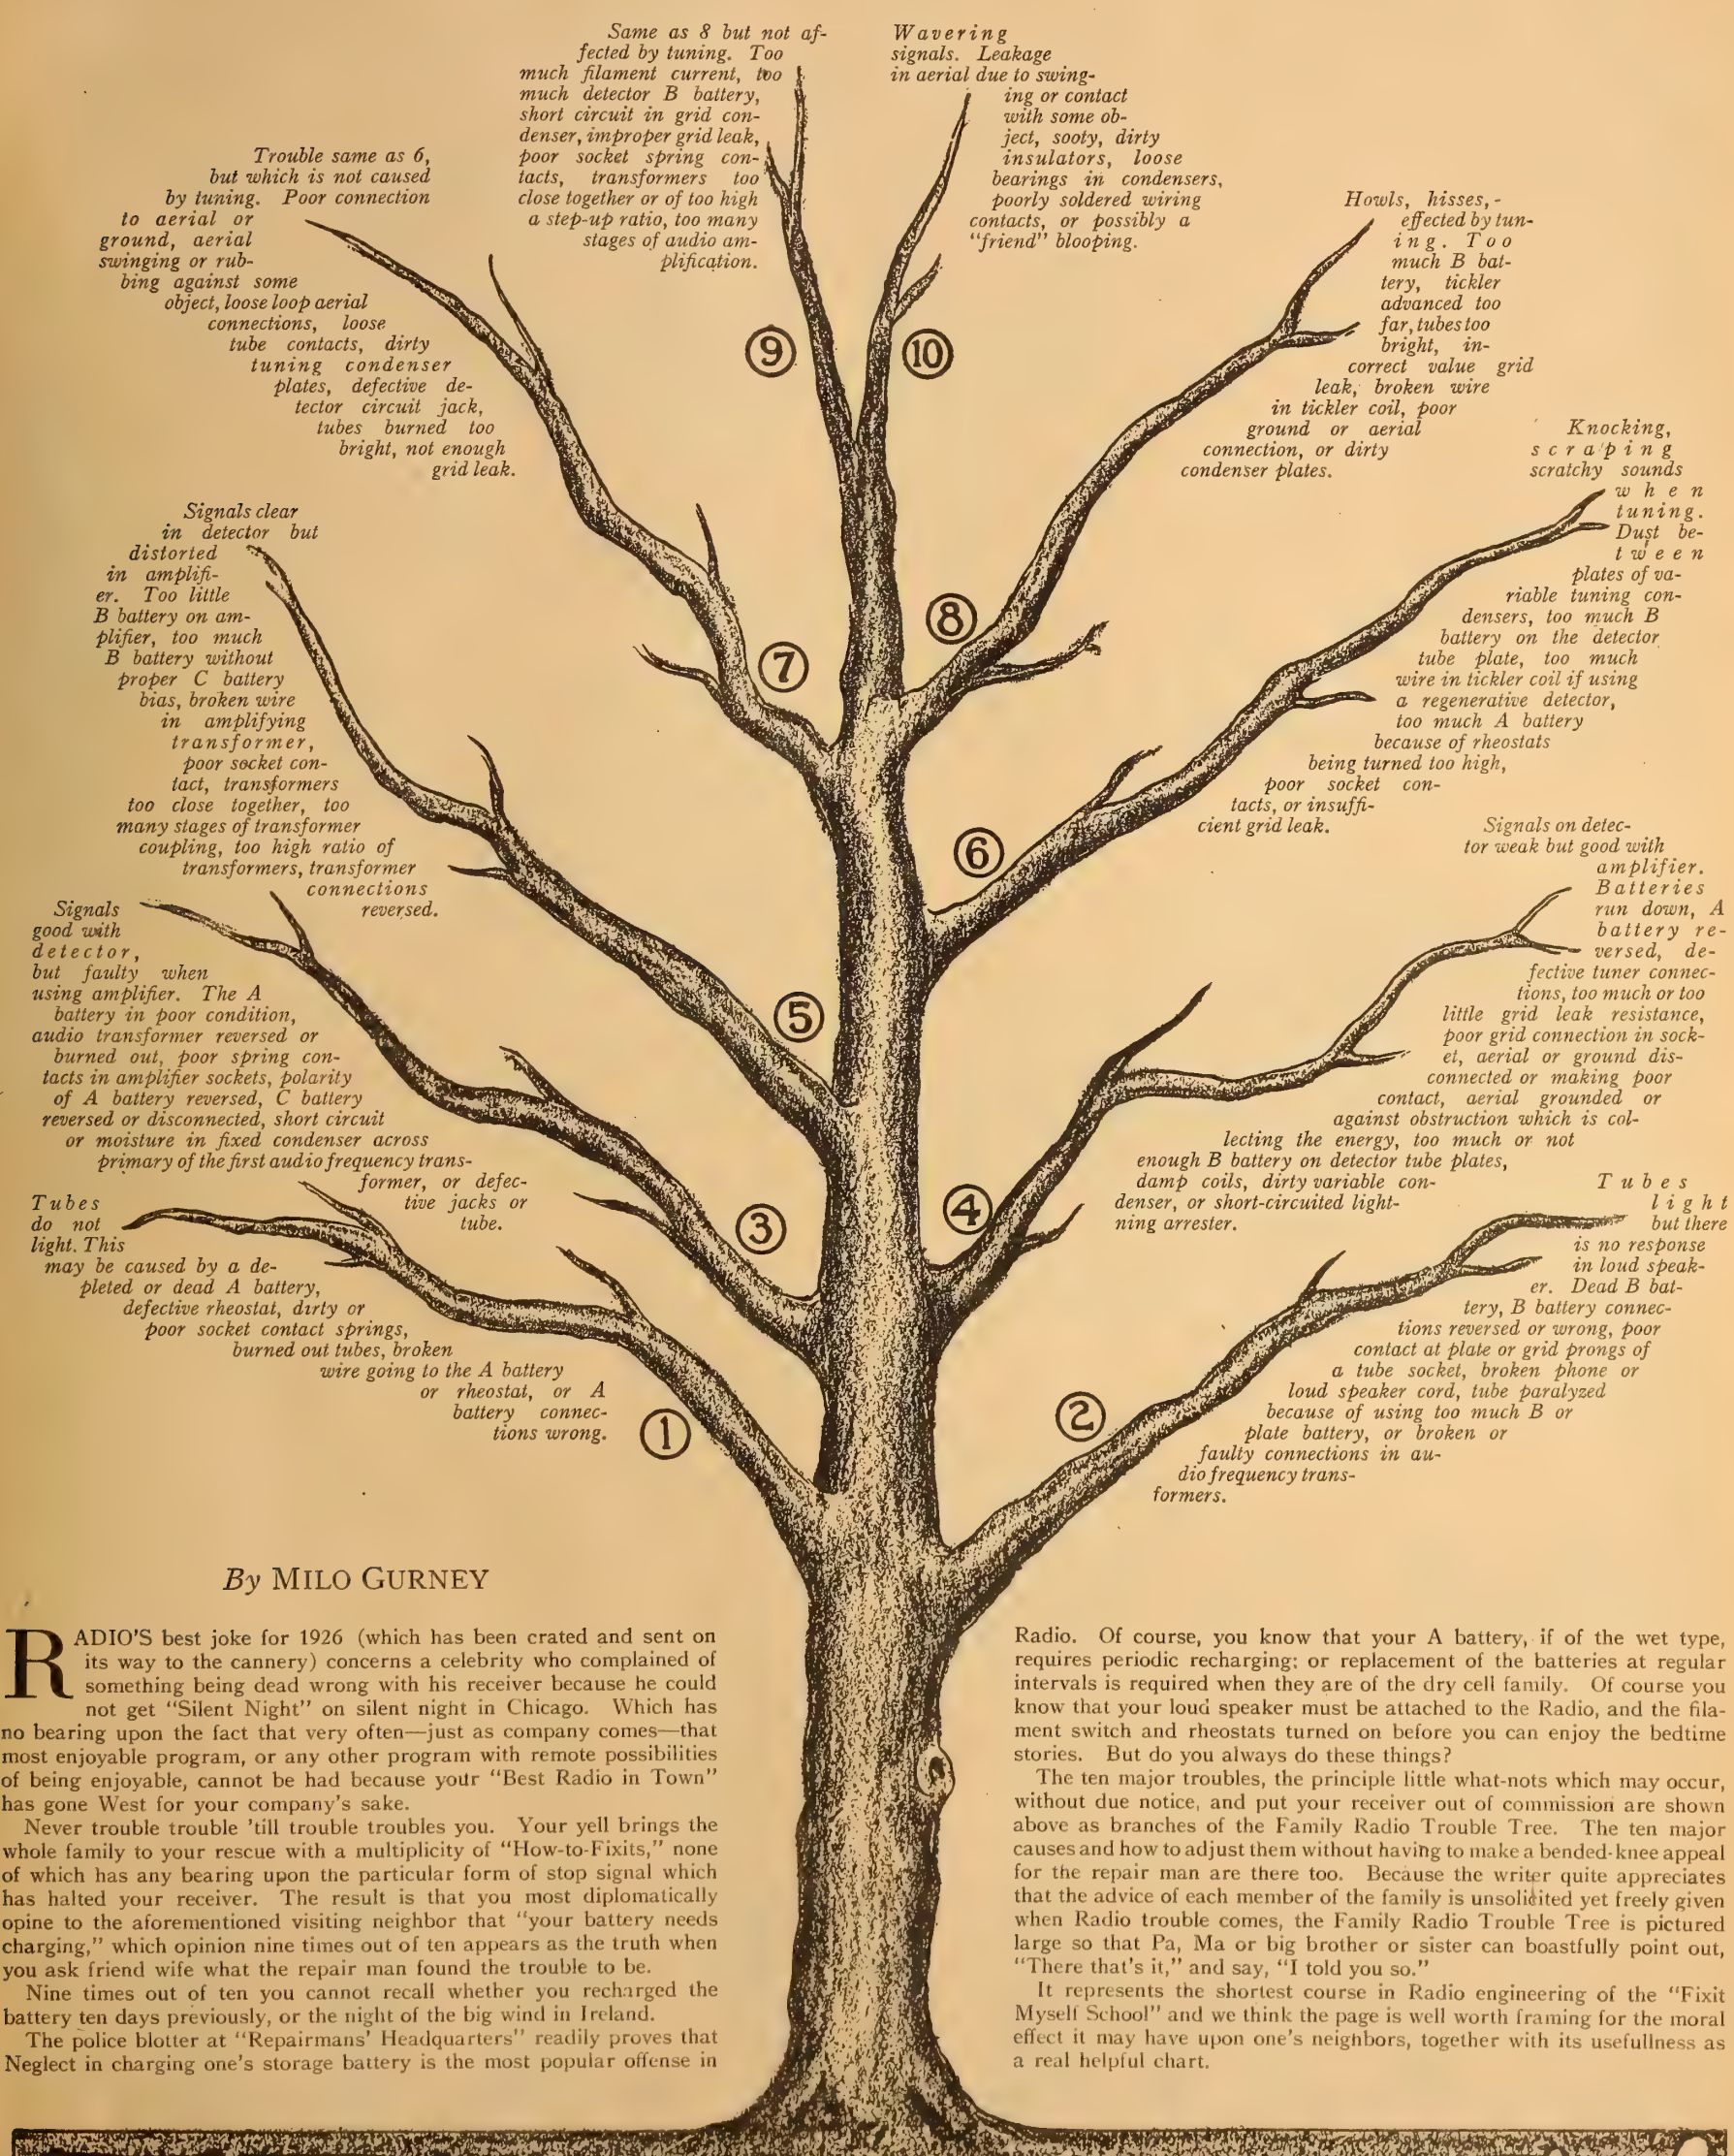
Balkite *Radio Power Units*

Family Radio Trouble Tree



By MILO GURNEY

RADIO'S best joke for 1926 (which has been crated and sent on its way to the cannery) concerns a celebrity who complained of something being dead wrong with his receiver because he could not get "Silent Night" on silent night in Chicago. Which has no bearing upon the fact that very often—just as company comes—that most enjoyable program, or any other program with remote possibilities of being enjoyable, cannot be had because your "Best Radio in Town" has gone West for your company's sake.

Never trouble trouble 'till trouble troubles you. Your yell brings the whole family to your rescue with a multiplicity of "How-to-Fixits," none of which has any bearing upon the particular form of stop signal which has halted your receiver. The result is that you most diplomatically opine to the aforementioned visiting neighbor that "your battery needs charging," which opinion nine times out of ten appears as the truth when you ask friend wife what the repair man found the trouble to be.

Nine times out of ten you cannot recall whether you recharged the battery ten days previously, or the night of the big wind in Ireland.

The police blotter at "Repairmans' Headquarters" readily proves that Neglect in charging one's storage battery is the most popular offense in Radio. Of course, you know that your A battery, if of the wet type, requires periodic recharging; or replacement of the batteries at regular intervals is required when they are of the dry cell family. Of course you know that your loud speaker must be attached to the Radio, and the filament switch and rheostats turned on before you can enjoy the bedtime stories. But do you always do these things?

The ten major troubles, the principle little what-nots which may occur, without due notice, and put your receiver out of commission are shown above as branches of the Family Radio Trouble Tree. The ten major causes and how to adjust them without having to make a bended-knee appeal for the repair man are there too. Because the writer quite appreciates that the advice of each member of the family is unsolicited yet freely given when Radio trouble comes, the Family Radio Trouble Tree is pictured large so that Pa, Ma or big brother or sister can boastfully point out, "There that's it," and say, "I told you so."

It represents the shortest course in Radio engineering of the "Fixit Myself School" and we think the page is well worth framing for the moral effect it may have upon one's neighbors, together with its usefullness as a real helpful chart.

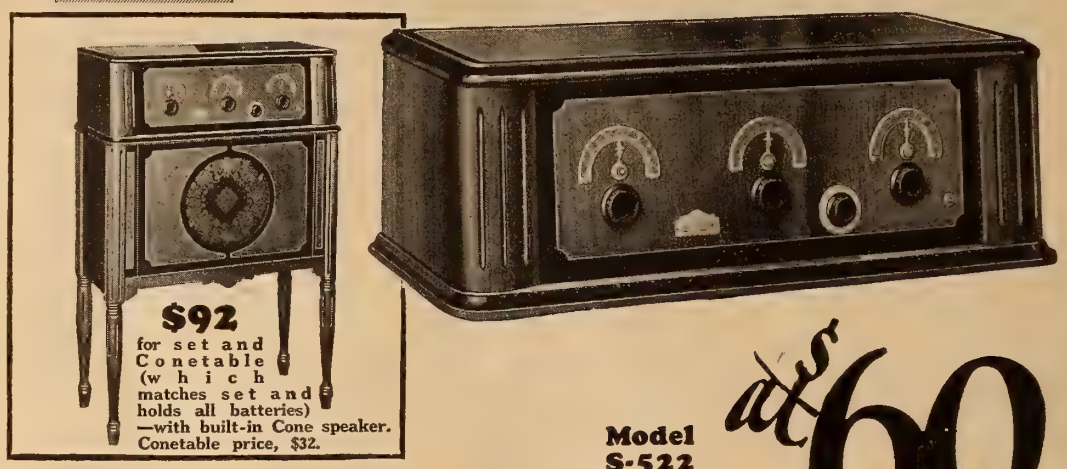
The AMRAD Battery Type

5 TUBE NEUTRODYNE

Powel Crosley, Jr., has so definitely applied his successful methods of mass production to Amrad developments that thousands of radio buyers will be able this season to purchase the superlative Amrad Neutrodynes at prices most unexpectedly low.

From an engineering point of view Amrad has few equals, in experience, equipment and in skill.

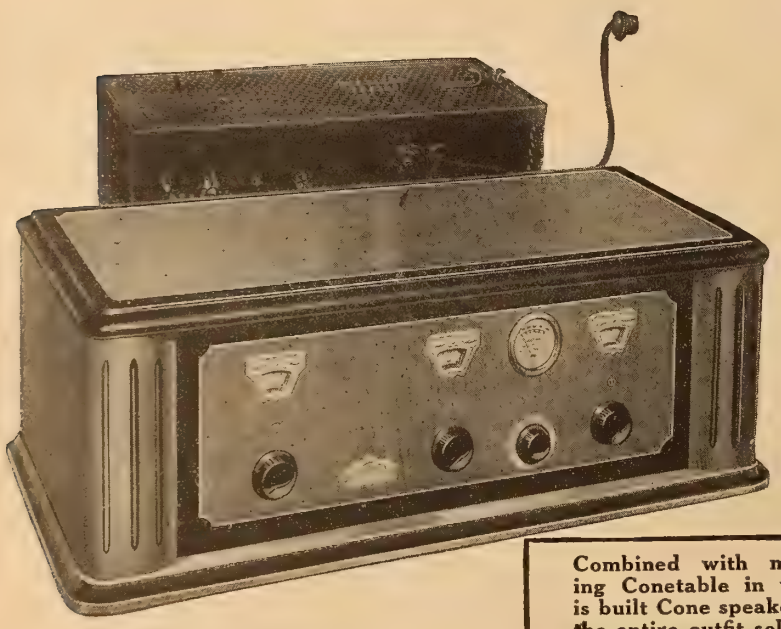
This beautifully two tone finished Battery Type set performs uncannily. Selectivity, tone and volume are all that can be desired. Crosley production has eliminated non-essentials. Vital parts are the finest. It has already proven a great success.



$92 for set and Conetable (which matches set and holds all batteries) —with built-in Cone speaker. Conetable price, $32.

Model S-522 at $60.

The AMRAD AC LAMP SOCKET with ELECTRIC POWER UNIT NEUTRODYNE



Model AC-5

at $150.

This is one of radios GREAT achievements. All power for this set is taken from an electric lamp socket. Do not confuse with battery eliminators. Exclusive patented developments enable Amrad to present a batteryless radio at least one hundred dollars or more under the prices of sets in which the replacement of batteries has been eliminated. This set operates from a special power unit which gives unprecedented tone reproduction.

The Amrad Power Unit operates only as the set is being used. Voltages are always correct values. Exclusive Mershon condensers of 90 mfd capacity produce smooth, clear, lucid tones.

The set uses four UX-199 tubes and one UX-112 power tube. Operates on 60 cycle 100-120 volt ac current. Power unit uses two UX-216-B Rectron rectifier tubes to supply plate current at maximum B voltage of 135 as well as filament current for tubes.

With the powerful, constant, never failing energy this apparatus supplies, a new radio appreciation is acquired by many critics. The set delivers the utmost in radio enjoyment at an almost unbelievable price.

Combined with matching Conetable in which is built Cone speaker the the entire outfit sells for

$182

Conetable price, $32.

Dealers: Full details of Amrad proposition upon application to us or direct to your jobber. Please mention Radio Digest when writing.

AMRAD CORPORATION, Medford Hillside, Mass.

GOODY GOODY GIRL

Shyness and diffidence no longer claimed her, she felt light and dreamy, floating off in a cloud somewhere, eyes half-closed.

WHEREIN the Little Girl from Paradise Sees the Bright Lights and Tastes Champagne for the First Time

By MERLIN MOORE TAYLOR

Illustrations by W. H. WISNER

BRIMMING in the confidence of her mature 18 years, Lois Sylvester took her life in her own hands, defied her stern step-father and started out in the middle of the night to meet the world and conquer it.

Always her own individuality had been suppressed by the narrow, uncompromising Yankee parent who had married her weak-willed Southern mother. Then came the crisis where she had told a little lie, almost inadvertently. She wanted to make the lie good by gaining old Phineas Blair's consent for a visit to her friend's home in Kaneville. This, Blair promptly denied. Lois waited until he was asleep, packed her suitcase, and started out.

It was a dreary trudge with her heavy baggage to the next town to meet the train. She was overtaken by a neighbor lad who almost forced her to enter his car. He demanded pay. The price was a kiss. Lois refused to pay, slapped Herbie Cole a resounding whack, escaped from his embraces and continued her way on foot.

Morning light was breaking when she straggled into the town. She had a little money with which she purchased a meager breakfast and then proceeded to the railroad station. Blair was waiting on the platform, but missed seeing her as she dodged around the train that had just pulled in and was assisted aboard from the opposite side of the track by a young man who had observed her obvious efforts to escape.

He suggested that she enter his compartment where she washed. Her new friend introduced himself as Raymond Lancaster of Chicago. She rather liked him. He advised her to take a nap and left her alone. In a few minutes she was fast asleep. She was awakened almost immediately, it seemed. Lancaster was trying to arouse her. She had been asleep for hours and had passed her junction! The train was now quarantined and she found it would be necessary for her to continue to Chicago.

As she tried to adjust herself to her predicament, Raymond attempted to take her in his arms.

"I love you," he exclaimed fervently. She pushed him backward. . . He seemed sincere.

They were both startled by someone wrapping on the compartment door.

CHAPTER IV

"Men Are Wolves"

LOIS felt herself going weak. She dropped back upon the lounge and flashed Lancaster a frightened look while her lips formed a soundless "Who?"

He shrugged and turned his palms up in a gesture that answered, "I don't know." Then he bent over, bringing his mouth close to her ear and asked in a tense whisper: "Want me to stall, pretend I'm asleep, or out?"

Her scattered wits rallied. She lifted her head and thrust out a determined chin. "No. Open the door."

He obeyed, squaring his shoulders to meet whatever was coming. Then he fell back with an ejaculated "Mrs. Gayton!" that seemed to hold both embarassment and relief.

The tall, well-dressed, sophisticated-looking woman who stood in the swaying aisle beyond the door greeted his surprise with a little laugh. "'Lo, Raymond. Saw you pacing the train like one distracted and thought perhaps a little drink—Oh!" Her jade-colored eyes had gone past him to Lois. "I do beg your pardon . . . I didn't suspect . . . I'm intruding—" She broke off, apparently in deep confusion, and turned as if to go.

Lancaster stretched out a detaining hand. "You're not intruding; you're the answer to prayer. Please come in. May I introduce Miss Lois Sylvester. This, Miss Sylvester, is Mrs. Mildred Gayton."

"The fact is," he hurried on as the newcomer permitted herself to be led into the drawing room, "I've succeeded in getting Miss Sylvester into a bit of a pickle and—"

MRS. GAYTON extended a well-manicured hand to the girl. "I'm sure we shall find a way out of whatever brine this naughty boy has been getting you into, Miss Sylvester."

"It's really the other way around, I'm afraid." Lois found her tenseness vanishing, the blood flowing back into her cheeks. Mrs. Gayton's smile, for all it was a trifle hard-lipped, was reassuring, her handclasp friendly. "It's my fault. I—"

"Nothing of the kind," Lancaster protested gallantly. "I—"

Mrs. Gayton covered her ears with tapering fingers. "Stop it! I can't listen to you both at once. I think I'll let you tell me, Miss Sylvester. First, though—" She produced a small flask of chased silver from her handbag and unscrewed the cap. "Mind the door, Raymond. Here you are, Miss Sylvester."

Lois took the flask. "What is it?"

"Passable Scotch. You needn't be afraid of it."

"Oh! Liquor? I never tasted any. You'll excuse me, but—" Lois handed the flask back to her.

"I don't think I care for any, either," said Mrs. Gayton. "Raymond?"

"You bet! I feel the need of a shot. Well," he held the flask aloft, rendered them an exaggerated bow, "happy days."

"Down the dusty alley with it," retorted Mrs. Gayton and turned back to the girl: "Go ahead with the story, my dear."

Lois gave her the details of their predicament. "Mr. Lancaster was just urging me to come on to Chicago with him," she concluded.

"I see." Mrs. Gayton turned her jade eyes on Lancaster, who had turned brick-red. "Fast worker, aren't you?"

"YOU DON'T see at all," he protested. "I know what you are thinking and it isn't so. I didn't like the idea of Miss Sylvester getting off alone in the night at a wayside station and—"

"We'll let it go at that," Mrs. Gayton ended his explanations. "Now run along somewhere while I talk it over with Miss Sylvester. There are some people you know back in the observation car, Neil Becker among them."

"Becker, eh?" A slight frown crossed Lancaster's face, but vanished almost instantly. "Oh, all right. See you later."

For a moment after he had departed, closing the door behind him, there was silence, then: "I do hope it was all right for me to break in on you that way, Miss Sylvester. I thought it was the right thing to do." (*Continued on page 27*)

IMPORTANT FEATURES

(Continued from page 2)

This station also is planning a series of educational talks by well-known authorities for school children of the primary grades. Offices where large forces of clerical help are employed will be given an opportunity to give them ten minutes-a-day exercises to freshen them up and make them more efficient. Charts are furnished and physical director of the Central Y. M. C. A. will conduct the "kink eliminators."

WLS Prominent Pastor Series

Religious services of the University of Chicago broadcast through the WLS, the Sears-Roebuck Agricultural Foundation station, will include sermons by the following prominent pastors: Rev. M. H. Krumbein, Parkside Evangelical church, Buffalo, October 10 and 17; Rev. Harold E. B. Speight, Kings Chapel, Boston, October 24 and 31; Rev. Lynn Harold Hough, Central Methodist Episcopal, Detroit, November 7 and 14; Rev. C. Wallace Petty, First Baptist, Pittsburgh, November 21 and 28; Rev. David Bryn-Jones, Trinity Baptist, Minneapolis, December 5 and 12, and President Bernard Iddings Bell, St. Stephens College, convocation, December 19.

Arrangements have been made for a series of "Little Journeys with Noted Authors" with John M. Stahl as the WLS guide. About twenty authors have been listed to broadcast something of their experiences and their works.

Other New Programs Announced

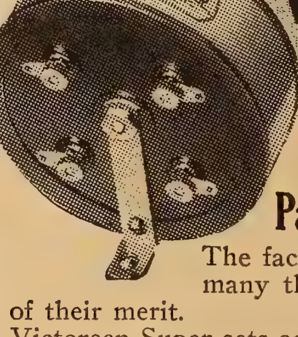
The WBCN Ensemble has arranged a special feature series of poetical readings with musical accompaniments for the Chicago listener's circle. They are scheduled for alternate Thursdays between 10 and 11 p. m.

WOOD of Grand Rapids, Mich., will inaugurate its new station with an "Air Mail Hour." This is a new idea in conjunction with the request program between 11 and 12 p. m. All letters received by the new air mail service will be answered by air mail. The air mail route is between Detroit and Grand Rapids.

Several new orchestras from four of the most popular cafes in Pittsburgh have been added to the WCAE programs. Dr. Cadman of Brooklyn will conduct one of the various Sunday services each week. He is on the WCAE wave at 4 p. m.

Neumiller Directs WIBO Music

CHICAGO.—The audience that nightly listens to the programs from WIBO will be pleased to know that Howard Neumiller, well-known concert accompanist and pianist, has recently been made general musical director of WIBO.



VICTOREEN SUPER COILS

Dependable Standardized Parts With a World Wide Reputation

The fact that Victoreen Super parts are used in many thousand sets all over the world is proof of their merit.

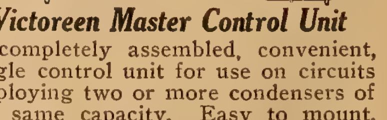
Victoreen Super sets are free from oscillation, howls or squeals. Their "B" Battery consumption is exceptionally low—less than some three tube sets.

Victoreen R. F. Transformers are made with air core construction. They are not merely "matched" but are actually tuned to a guaranteed precision within 1/3 of 1%.

Victoreen Coupling Unit and Victoreen Antenna Coupler are made for use with R. F. Transformers.

Use These Parts

4—Victoreen 170 R. F. Transformers, each..............**$7.00**
1—Victoreen 150 Coupling Unit, each.................. **5.50**
1—Victoreen 160 Antenna Coupler, each................ **3.50**



Victoreen Master Control Unit

A completely assembled, convenient, single control unit for use on circuits employing two or more condensers of the same capacity. Easy to mount. Simplifies tuning.

Victoreen Master Control Unit
Type V. S...................**$19.50**
Extra condenser, each........... **4.50**

Victoreen Rheostats

Zero temperature coefficient. Double the number of turns of wiring used on ordinary rheostats. Three terminals simplify wiring.

Five resistances, 2, 6, 10, 20 30 ohms, each.............**$1.20**

Potentiometers, 200 and 400 ohms, each......... **1.50**

The Geo. W. Walker Company
6528 Carnegie Ave., Dept. F. Cleveland, Ohio
Branches in principal cities.

BROKENSHIRE QUITS TO BUILD PROGRAMS

LEAVES WJZ TO START RADIO PRODUCTION WORK

Sees Present Day Announcer Handicapped—Forms Arrow Amusement Corporation to Do Bigger Things

NEW YORK.—Norman Brokenshire has resigned from the announcing profession at the height of his career at WJZ and has betaken himself to the development of an innovation in the field of commercial Radio broadcasting.

He has announced that he is about to sever his connections with the Radio Corporation of America as an employed announcer, because as such his scope of activities is necessarily limited. In telling of his decision to embark upon a decidedly new and original venture in broadcasting, Mr. Brokenshire made a number of pointed remarks. He said:

"The rules governing the present day announcer are a hindrance to his development in an art that is progressing daily by leaps and bounds."

He feels that the announcer role is becoming less and less important, and that the big presentations will soon be created, produced and managed by a specialist in this line.

Predicts Great Radio Production

Mr. Brokenshire visualizes a great future for broadcasting. He declares that broadcasting, as an art, must follow the footsteps of the two other great public amusements, the stage and the motion picture. He asserts that leading stations are leading the way in these radical changes today.

"By this," Mr. Brokenshire said when interviewed, "I mean that there must eventually be 'Radio Productions.' In the successful broadcasts of the future there will be involved time, patience, showmanship and the guiding hand of a producer who, through years of experience and immediate contact with Radio and the Radio audience, knows the possibilities and limitations of the microphone.

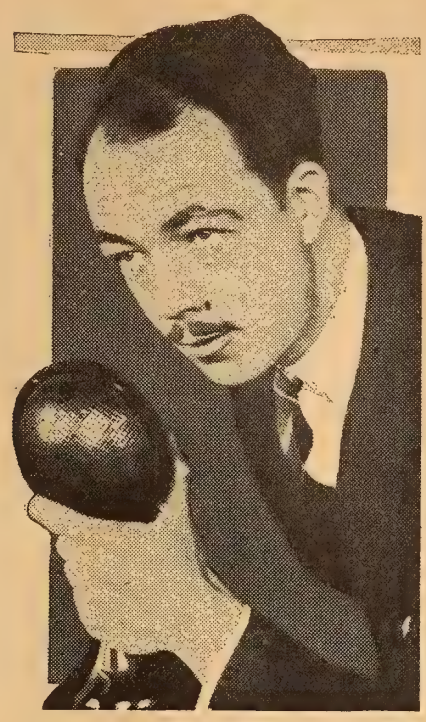
Assures Fans His Better Service

"In taking this step, I feel that I will be of more service to the Radio public by surrounding myself with well-known men in the theatrical and musical worlds and devoting my entire time to the creation of valuable Radio productions.

"It is not my intention to forsake the invisible audience that has shown such great appreciation for my endeavors, but rather to serve this audience better and in a much larger way. It is with regret that I leave the intimate everyday life of the idolized announcer, but with a compensating feeling that by this move I will do my share in the development of an art which in the future will undoubtedly be one of the greatest of world factors."

Mr. Brokenshire's producing company will be known as the Arrow Amusement corporation. A number of accounts are being given consideration.

FAMOUS ANNOUNCER STARTS ENTERPRISE



Norman Brokenshire

AROUND THE BROADCAST STUDIOS

KDKA Steps Out or the Light That Failed; WEAO's New Studio; Sopranos and Drapes; A Tube's Life at KNX.

By MIKE

WISH I could get the Editor to let me print the whole funny story sent out in the KDKA publicity describing their girlish transmitter all togged out in mosquito netting drapes. But no, "got no space," he says. Anyway here's part of it condensed:

"During the contralto solo Landon saw a happy white moth winging her carefree way into the power room door. 'Oh, see!' Her little eyes glittered as she sailed straight for the glowing oscillator. For a moment she fluttered, undecided where to light. Then she settled down to the variable tank condenser her little body aquiver with curiosity. Adventurously she approached the plates to explore their space when— Zowie! Flash! Cinders! A tiny wisp of smoke—broken transmission, distracted singer and agonized listeners! Alas! The Tragedy of a Bug; That's why KDKA boasts the best dressed transmitter in the world."

* * *

These university studios are stepping out from the cold classic walls. F'rinstance, WEAO of Ohio State has just opened a modish, sepia velveted studio in the smart Neil House in Columbus. Below the windows is a vista of the Scioto river and the new civic center development. "Service to all the people," is the watchword of Ohio State.

* * *

It's not the receiving end that mutilates the voice of the soprano for the meticulous listener, declares Frank Reichman, inventor of the Thorophone and Thorola. The trouble in the past has been in the overstuffed studio. Upholstered walls, floors and ceilings have killed the natural resonance to which one always is accustomed in hearing certain high-pitched voices and sounds. Adjustable drapes are preferable, says Mr. Reichman, so that the director who is an expert at appraising the quality of vibration, may deaden the echo to the correct degree of naturalness. He pointed to the violin as an instrument that remains unchanged in its general structure through the years. But the artists who use the violin are always finding new ways to get more out of it. He does not anticipate much change in the future receivers and loud speakers until there are improvements in the transmission.

* * *

KNX, the Los Angeles Evening Express station, bears the distinction of having established what is considered a world's record for the use of a No. 212-A tube in transmitting hours. This tube was used for 8,175 hours. Do your receiving tubes last that long?

NORTHWEST SHOW IS BAROMETER OF TRADE

Indications Point to Good Year for Radio Sales

MINNEAPOLIS.—The Northwest Radio show in the Kenwood armory here, September 27 to October 2, will serve as a barometer for midwestern Radio activities during the coming season in the opinion of Eastern Radio manufacturers, according to H. H. Cory, secretary of the Northwest Radio Trade association which is in charge of the show.

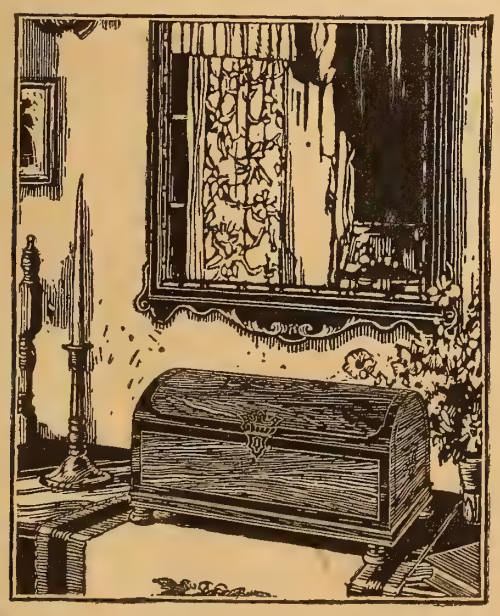
Coming two weeks after the New York fair and two weeks prior to the Chicago show, the Northwest Radio exposition is attracting nation-wide interest.

All indications, Mr. Cory said, point to a record-breaking year for the Radio industry in the Northwest.

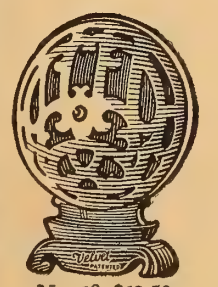
Atlanta Will Hold Second Big Radio Show Oct. 18-23

ATLANTA, Ga.—Atlanta's great Radio electrical exposition, October 18-23, is already definitely assured double the number of exhibits displayed last year at what was considered the South's most successful show.

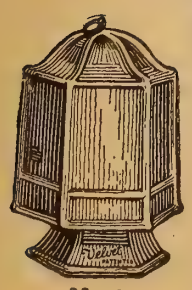
With two weeks remaining the huge civic auditorium armory is sold out to exhibitors, and the combined Radio and electrical bodies backing the enterprise are now devoting their efforts toward giving the public spectacular entertainment features, as well as the most brilliant and comprehensive symposium of modern appliances ever known in Dixie.



No. 21
"The Jewel Case"
$45.00
A Masterpiece of Design—
New Acoustic Principles



No. 18 $12.50
"The Chinese Cone-Flex"
Full Orchestral range—low bass of the cone—high notes of the horn.



No. 9
"The Lantern"
$12.50
Exceptional beauty, true recreations, surprisingly low price.

No. 12 — $16.00
No. 15 — $23.50
Borkmanite Horn—Velvet Double Stylus Unit.

The Ultimate in Radio Recreation!

THE trappings of the Laboratory are gone. In its rich, quiet beauty, the Velvet "Jewel Case" Speaker is at peace in company with your richest furnishings—a rarely precious possession for any home.

For it is not merely beautiful. It is living Radio Recreation itself when it brings in the full rounded tones of the whole orchestration. Tonal beauty that matches its outward delightful dignity. You must hear it—see it—to fully appreciate the long step ahead which Velvet brings to Radio.

Delightful Innovations in Speaker Design

Beauty of tone—greater range—beauty of design, beauty of wood, and finish. Soft pleasing creations that harmonize with the most tasteful surroundings. And yet built scientifically to make each varying type bring splendid entertainment into your home. And priced surprisingly low!

Those Interfering Stations

WE STARTED something when we said the talk about chaos was overrated; that a little something was being magnified into an omnipresent bugaboo. At the time the editorial was written we were right—almost right. Of course, there was interference between stations in some sections of the country. We did not mean that there was none. But—

With the range of all stations increasing nightly as a result of the colder weather provided by nature, the evil of interstation heterodyning and interference is approaching a very sorry state of affairs. Something must be done.

Congress has seen fit to leave Radio legislation in the lurch until the fall session. There will be much trouble from the "open door" license policy before the federal lawmakers get together on suitable remedial laws. What have we to look forward to?

There is one ray of sunshine. It is the recent joint meeting of the six leading associations of the industry, the National Association of Broadcasters, American Radio Relay League, Radio Manufacturers' association, Federated Radio Trade association, Radio Committee of the American Newspaper Publishers' association and the Associated Manufacturers of Electrical Supplies.

The combined strength and influence of the six important and powerful bodies has been pledged to keep the broadcast wave length free from interference. A committee of one representative from each body, and headed by Paul B. Klugh, has begun work with whatever weapons necessary to deal with such broadcasters as have inadvertently taken broadcast wave lengths already in use and caused interference with the programs of such stations as were operating with a government license prior to the breakdown of the licensing law.

There is ample law to deal with these miscreants, whether their interference be intentional or accidental. If accidental, one formal notice of such interference will cause their second offense to rate as "malicious." Malicious interference by any station is still considered as a violation of the law—what is left of the 1912 instrument—and is punishable by cancellation of license.

Radio Digest pledges its unbiased support to the elimination of interstation interference. Watch for a surprising announcement next issue. The public is to have a chance to help!

Well Worth Hearing

WONDERFUL programs and plans for fall broadcasting are budding forth. October sees the resumption of many proven features and the inauguration of others that have excellent possibilities. Worth while stations are catering to the public interest with the most valuable assortment of entertaining, educating and serviceable programs that broadcasting has ever known.

Atwater Kent full hours start. The Boston Symphony is on the air anew and with more concerts. Damrosch is to entertain millions. A hundred stations are adding special farm programs of the best kind, furnished by the department of agriculture. Football will soon be on the air with all its thrills.

Tell this to your ancient, Radio-skeptical friends. Let them know that they are missing. Invite them to your home and help them along the way to becoming a faithful member of our great family of broadcast listeners.

The Better Mouse Trap

A THIRD gold cup is awarded by Radio Digest. This time a representative of the farmer, from a small town but with a well-known station, is made the hero of the moment.

We are glad to see Earl E. May win the honor. We sincerely congratulate him. Last year Henry Field, from the same little loyal community of Shenandoah, Iowa, almost kept Graham McNamee from winning. This year Mr. Field shunned votes himself but cast his support to Mr. May. Henry Field's spirit is commendable.

The world has beaten a path to Shenandoah.

THE RADIO PROGRAM

By Joseph Payne, Jr.

8:00 pm. A piano solo by Dodge D. Blowout, playing "You May Not Like Our Kellys, But You'll Always Like Our Tires."

8:10 pm. A saxophone duet, by I. Chewem and G. U. M. Parker, playing "The Song of the Juicy Fruit," from Wrigley's musical comedy, "Peppermint Kisses."

8:20 pm. A piano duet by the Gold Dust Twins, playing the following selections from popular operas: "Old Dutch Cleanser," from Arbuckle Brothers' "Coffee Land," and "Yuban," from "Cleanser, Cleanser."

8:40 pm. The Kellog Quartette will sing two of Father John's latest song hits: "Little Flakes of Corn" and "Crumbled Leaves."

8:50 pm. Procter and Gamble, those two popular and "clean" singers will give "A Skin You Love to Touch," that famous old ballad by Woodbury.

9:00 pm. Al. Listerine's famous "Log Cabin Orchestra" will play two new fox trots, Swansdown's "Crust, Crust," and Liggett and Myers new camel walk, "I'd Walk a Mile," and will conclude with the popular waltz "Bon Ami."

9:20 pm. This will be the last number on our programme, and will be Heinze's famous 57-piece orchestra playing Heinze's "Varieties of 1926," and will encore with that famous march "Soup," by Campbell, Zip and Jello.

Quoth the RCA Publicity Man, in referring to the Radio movie of "The Dutchess of Buffalo," broadcast recently from WJZ:

"The story tells of Marian Duncan, a successful dancer who becomes the financee of a dashing Russian army officer. . . ."

Whereupon we turned to Mr. Webster and decided that the word he had intended to use was "financier."

Hoover Kayoes Radio

'Twas not a distant date, as I recall,
That the wise man shook his head
And quite solemnly said,
"That darn contraption will not work at all.
Just think of filling up the atmosphere
With sounds that never tire
Till they locate a wire
And then come in with music sweet and clear!"

But soon, you know, we got the Radio.
And after several trials
We need but twist the dials
To make the ether music come and go.
And now comes Herbie Hoover with a shout,
"There is chaos in the air,
We surely should despair
There ain't a way to keep the d—— stuff out."

THE NIGHT HERD

As you have probably guessed, the reason we printed the above in such small type was to keep you from reading it. However, if you have, then we retreat—the secret of the chaos is out. But just wait, the Editor of the great publication surrounding Radio Indi-Gest has tipped me off that the wave jumpers and newly licensed stations in a little while are going to look sick, roll their eyes to the whites, and turn over in their graves. The judgment day is coming!

WHAT? We Shall Strike at Once't!

Dear Indi: Why does Radio make some people so careless with the truth? A new feminine BCL was was telling me some DX tales. I asked her if she had any luck with Chicago last Monday night. She gave me seven Chicago calls "that came in just bee-autifully."

PUSHOMETER

The Reason

The reason I can't write poetry—
I've got seventeen dogs to raise;
I don't have time to be dreaming,
'Cause the pups are the latest craze.

The reason I can't write stories—
The wire-haired pups in the way;
And my! but they are the cutest
Little rough neck divils at play.

The reason I don't write music—
Is the pups make all the noise;
I can't even collect my thots
Nor ever get mental poise!

I'll steal just a minute for Indi—
A line to the Radio;
But now I must stop and get ready
Six pups for the next dog show.

RHEA SHELDON

Stop Press, Add Anagrams!

Dear Indi: George, the cheery commissary clerk, forgot something when he went a-journeying in the realm of Anagramnatizing in the past few issues of Radio Digest which regularly brightens my sick room.

Inasmuch as every page of Radio Digest teems with, and is engirdled by, valuable information and pleasure for readers, the anagram maker ought to find inevitably that Radio Digest yields, "Ideas do girt." Moreover, The Radio Digest becomes, "I do get this read," while Radio Indi-Gest transposes into my slogan, "'Do read it,' I sing."

J. E. R.

P. S. I might add that if I'm half asleep when the postman comes, I awaken promptly, aroused by interest. Then, no longer "Dosing, I read it" eagerly. J. E. R.

Indi wishes to add, in reply to J. E. R.'s question regarding the tresses of Lotta Harrauff, 1926 Queen of Radio, that the English equivalent, "lot o' hair off," is not true, but the German translation, "lot o' Harr (hair) auff (upon)" applies more faithfully to the lady's cranium.

FRANQUE'S FILOSOFEE

A bad station always returns. ***INDI***

The "Circuit" Rider

Condensed

BY DIELECTRIC

Now that the cup trials are over and the honor (or Onus) of maintaining a nearly 100 per cent perfection in announcing has fallen from the shoulders of Graham, we may proceed to groom our favorites for the next heat, next year. To that end I'm going to put in the race a pair of announcers known pretty much everywhere. They should receive careful consideration by voters, not alone for the brevity of their announcements, but for a refreshing change of key from the much used middle register. The Happiness Boys, Billy Jones and Ernest Hare, should have a chance at holding the cup, and are my favorites.

We are getting back to the nights of classical music performances, now a delight to many who at first scorned to listen to this "high brow" entertainment. Incidentally, no past season will compare with this one in wealth of offering of that character, and the Saturday evenings, with their paucity of varied programs to date, will henceforth be important dates to mark up for future listening. While near the subject, I wish to compliment once more the work of the Formica orchestra, broadcasting through Station WLW, Cincinnati, whose evening of semi-classical music was entirely enjoyable as this reviewer listened to it early last month.

Studio recitals have the usual features to present in the majority of instances, which means talent of more or less mediocrity, yet at times we hear a voice of delightful quality or instrumentalist with marked ability and go after more of them. Station WTAM, in Cleveland, had the good fortune to bring to their studio recital one evening a baritone with a robust voice, if poorly placed, whose rendition of a familiar song, "Swing Low," had much of intelligent expression and commendable phrasing. The familiar songs, particularly when not among the classics, require more than slight attention from the singer to make them free of monotony.

A feature coming from the City of Chicago, via the broadcasting apparatus of Station WLS, is the Silvertone concert employing the excellent service of the Chicago little symphony orchestra. This orchestra is winning a well-deserved popularity. Its playing is spirited and the numbers chosen are from the lighter works with their broad appeal.

From the shores of the Atlantic where the "World's Play Ground" is said to be by the announcers of Station WPG, Atlantic City, there came a concert of real worth recently. Two artists of high attainment and widely known among opera and concert audiences, Julia Claussen and Henri Scott, presented a joint recital before a responsive visible audience and a delighted Radio audience. Their numbers were all engaging and delivered as such artists are capable of doing. Among the songs were two especially interesting: "Danny Deever"—so closely linked in memory with that great American baritone, David Bispham—sung by Mr. Scott, and the famous aria for contralto from the opera "Samson and Dalilah," exquisitely rendered by Miss Claussen.

If you missed hearing from Station KYW, Chicago, an entertainment of instrumental and vocal numbers, which included those to be mentioned, your loss was considerable. Violin selections came through with good tone and execution, "Ave Maria," from the opera of Othello and sung by a soprano with opulence of tone, combined with a trombone solo of "The Lost Chord," made one wish the classical hour might have extended through the balance of the evening. What more can be said?

SHORT WAVES

By Marcella

(Continued from page 2)

leaving KYW and barnstorming a bit, Lee has signed exclusively with the Stewart-Warner Air theater, WBBM. There you will hear him every night.

Eddie Borroff announces the KYW midnight program.

Ford and Glenn are still at WLS. However, they spend a great deal of their time making appearances at Illinois theaters.

Jack Little's itinerary is not definite, at least not so definite that I can predict it before going to press and still have it accurate as you read the item. He bid Chicago farewell September 16 and then took to the road for the various studios. However, before departing he promised to write me more this winter. Correction; he was not born in Waterloo, Iowa, but removed there from England with his parents when but a little tot, and I might add, "which he still is."

* *

"Sally": More about the Coon Sanders outfit? They are back on the air after their summer tour. Started September 25 at the Blackhawk cafe, Chicago, where WGN is picking up their music. Your poetical form of questioning, Sally, is quite a relief during a drab day's work.

* *

News Notes: "Our Sallie" Menkes, pioneer Chicago Radio artist and staff accompanist for the Edison studio of KYW, is winding up a vacation automobile tour 'way down south. Along the way, of course, she has stopped at several stations, "just to see how they are doing it." Her southernmost point was New Orleans, which she learned how to mispronounce correctly—N'aw-lins.

And Kay Ronayne, WBBM blues singer, bought an automobile last Friday the thirteenth. Her record since includes three collisions, one stolen motometer and three smashed fenders. Optimistically viewing the incidents, she claims that now she can sing "bluer" than ever.

* *

Births: October 2 marks the fifteenth-week birthday for Jack Nelson, Jr., future director-announcer of Loyal Order of Moose Station WJJD. Madelyn, charming wife of Jack Senior, is now kept busy singing all of hubby's compositions for the critical benefit of Junior.

* *

A. M., V. M. and "Elizabeth Ann": Earl Haubrich, known as "Chicago's Radio Baritone," represents the Ted Browne Music company of Chicago, and therefore you will often find him in the company of Eddie Stewart, Lew Farris and Mac Ohman. Sad but true, Mrs. Haubrich accompanies Earl. His looks, age, number of children if any, and other points of information will be answered as soon as I can corner him.

George Getsey, the popular tenor you have heard at the Woodmen of the World station, travels for Leo Feist Music Publishers, Inc., Chicago. He is a very likeable chap with hair combed back slick, a corpulent tendency, and the subdued air of a married man, which he isn't.

* *

Marriages: Abigail Roach to Glenn Rice, assistant manager of KNX, Los Angeles Evening Express station. Mr. Rice does the evening announcing from KNX under the title of G. R.

* *

"WHT Admirer": No, Al and Jean are not related. Stuart Dawson, of the WHT announcing corps, is the affianced of Helen Rauh, also with WHT. Don't think Al or Pat go to any church, although both have a very wholesome respect for right living. What difference does it make what church they attend, if any? Why not be broad-minded?

* *

"Indiana": Yes, Louis John Johnen of Crosley WLW is still single—and, in fact, the only "eligible" Cincinnati announcer. Age? I don't know for sure, but would judge him to be between 30 and 35. His looks? You'd fall in love with him. Don't know where he was born, but I presume Cincinnati. He is a Phi Beta Kappa, graduate of U. of Cincy and the Cincinnati Conservatory of Music. Stands 5 feet 9 with a good carriage and square shoulders, weighs 170 pounds, has brown eyes and light brown hair.

* *

"Blue Eyes": Well, I should say you have a good chance with Ralph H. Patt, Jr., of WDAF, for he has just turned 19 and hasn't thought seriously about matrimony yet. To be exact, he was born July 29, 1907, at Kansas City, Mo. He's a tall stripling, six feet in altitude, and weighs 135 pounds. Has very dark skin, brown eyes, and black, straight hair. No, he doesn't play the piano or sing, but he does do the markets and "School of the Air" program for the Kansas City Star outfit when he is not engaged in regular newspaper work.

* *

Eveready Hour listeners are missing Wilfred Glenn now, for he is in London, England, at the fashionable Princess theater for a six weeks' engagement. Other members of the party with the Eveready basso are Franklin Bauer, Lewis James, Elliott Shaw and Eddie Smalley—all well known to listeners. Glenn and the party will return soon with an entirely new repertoire of English music hall ballads.

* *

Mrs. Gertrude S., Sunbury, Pa., I think if you will dial around a bit on the New York stations you will find your favorite announcer, Mr. Lewis Reid, formerly of WJZ. Herbert Glover says he thinks Mr. Reid is with WFBH, at the Hotel Majestic and sends a picture of the handsome announcer with his young daughter at the microphone. A biographical sketch states that he was born in Brooklyn, 1897, and gaduated from New York University in 1920; was formerly editor of Theater Magazine, was founder of the first school of playwriting in America and studied voice culture under Mme. Von Fielitzsch. He spent two years on the stage in musical comedy such as "Elsie Janis and Her Gang." During the World war he played trombone in 23rd Regiment Band of New York. Was also in movies. Likes Radio best. He stands 5 feet, 11 inches, weighs 160 pounds, has brown eyes, brown hair, a wife and two children. And the picture shows him with horns—(with glasses in them.).

* *

"Jealous": The lady announcer at KMA is Jessie Shohonka Young, a black-haired Bohemian girl with rosy cheeks, blue eyes, a sweet disposition and a splendid voice with which she often sings Bohemian songs. She also directs programs, but unfortunately—for the invisible romancers—she is married.

* *

Roy: Sorry, but Billy Allan Huff, KYW pianist and songstress, is married. It happened long ago. Indeed, she has a child eight years old, but she married young. Billy is a petite, pretty, young blonde.

* *

Surprise soon! Watch Marcella's future efforts for the big event. No, I won't tell you what it is. Just have to wait.

* *

What deep secret would you like to know about your favorite broadcast star? Drop me a note, girls and boys, and I'll do my best to answer here. MARCELLA.

YES, THIS IS LOUISE ANNOUNCING

Farmers, elevator men, millers and others interested in the grain market get their daily thrill when the pleasant voice of Miss Louise Avey comes on the air from KFH, the Hotel Lassen at Wichita, Kan. Beginning with the opening cables of the Liverpool market at 8:45 a. m. and then every hour until 2:00 p. m., Louise gives one of the best liked market broadcasts in the West. The reports which KFH receives indicate that she has won a place in listeners' hearts that any other announcer would have a hard time in filling.

WOMAN'S PROGRAM INDEX

Monday

Eastern	Central	Mountain	Pacific
9:30 a.m.	8:30	7:30	6:30

WWJ (352.7m-850kc), Tonight's dinner.

10:50	9:50	8:50	7:50

WMC (499.7m-600kc), Home economics discussion, Miss Kitty.

11:35	10:35	9:35	8:35

KYW (535.4m-560kc), Table talk.

12 n.	11	10	9

WQJ (447.5m-670kc), Home economics.
WMAQ (447.5m-670kc), Home economics. Oct. 4, "Gardening Fad," "Chicago's Day Nurseries."
WHT (399.8m-750kc), Women's club, Jean Sargent.

12:15 p.m.	11:15	10:15	9:15

KMOX (280.2m-1070kc), Time saving cooking.

1	12 n.	11	10

KGW (491.5m-610kc), Household helps.
WSOE (245.8m-1220kc), Ladies' hour.

1:15	12:15	11:15	10:15

WGN (302.8m-990kc), Home Management period.

1:20	12:20	11:20	10:20

WGBF (236.1m-1270kc), Garden talk.

2:15	1:15	12:15	11:15

KOIL (305.9m-980kc), Shopper's aid.

2:30	1:30	12:30	11:30

KFNF (461.3m-650kc), Mother's hour.

2:45	1:45	12:45	11:45

WQJ (447.5m-670kc), Oct. 4, "Menus for Two-Year-Old Children," "Health Habits."

3	2	1	12 n.

WCCO (416.4m-720kc), Women's hour.
WSOE (246m-1220kc), Cooking chats.
WHB (365.6m-820kc), Ladies' hour.
WIP (508.2m-500kc), Market hints for housewives.
WJZ (454.3m-660kc), "Your Daily Menu."

3:45	2:45	1:45	12:45

KFNF (461.3m-650kc), Ladies' hour.

4	3	2	1

WOC (483.6m-620kc), Home management schedule, Aunt Jane.

4:30	3:30	2:30	1:30

KMOX (280.2m-1070kc), Housewives' hour.

5	4	3	2

KMOX (280.2m-1070kc), Housewives' hour.

5:15	4:15	3:15	2:15

KYW (535.4m-560kc), Meat talk, John Cutting.

Tuesday

Eastern	Central	Mountain	Pacific
9:30 a.m.	8:30	7:30	6:30

WWJ (352.7m-850kc), Tonight's dinner.

10	9	8	7

KDKA (309.m-970kc), Domestic Science. Arts for the Housewife.
WMCA (340.7m-880kc), Home Makers' club.
WOI (270m-1110kc), Home Makers' hour.

11:35	10:35	9:35	8:35

KYW (535.4m-560kc), Table talk.

12 n.	11	10	9

WQJ (446.5m-670kc), Home economics. Oct. 5, "Prevention of Contagious Disease Among Children," "Swimming."

11	10	9	8

WHT (399.8m-750kc), Women's club, Jean Sargent.
WMAQ (447.5m-670kc), Home economics.

12:15	11:15	10:15	9:15

KMOX (280.2m-1070kc), Fashion talk.

1 p.m.	12 n.	11	10

KGW (491.5m-610kc), Household helps, shopping guide.
WGBF (236.1m-1270kc), Garden talk.

Eastern	Central	Mountain	Pacific
1:45	12:45	11:45	10:45

WQJ (447.5m-670kc), Sept. 21, "The Good Health Habit," "Quickly Served Breakfasts."
WGBF (236.1m-1270kc), Garden talk.

2:15	1:15	12:15	11:15

KOIL (305.9m-980kc), Shopper's aid.

2:30	1:30	12:30	11:30

KFNF (461.3m-650kc), Half hour on cooking.

2:45	1:45	12:45	11:45

WQJ (447.5m-670kc), Oct. 5, "More Meals That Have to Wait," "Harmony and Health," "School Luncheons."

3	2	1	12 n.

WIP (508.2m-590kc), Menu talk.
WJZ (454.3m-660kc), "Your Daily Menu," Mrs. J. Heath.

3:15	2:15	1:15	12:15

WHO (526m-570kc), Recipes, household hints.

3:45	2:45	1:45	12:45

KFNF (461.3m-650kc), Ladies' hour.

4	3	2	1

WOC (483.6m-620kc), Home management schedule.

4:30	3:30	2:30	1:30

WLS (344.6m-870kc), Home Makers.

5	4	3	2

KMOX (280.2m-1070kc), Housewives' hour.

5:30	4:30	3:30	2:30

KOA (322.4m-930kc), Housewives' matinee.

6	5	4	3

KOA (322.4m-930kc), Culinary hints, Clara Hoover. Fashion hints.

6:45	5:45	4:45	3:45

WPG (299.8m-1000kc), Fashion flashes.

Wednesday

Eastern	Central	Mountain	Pacific
9:30	8:30	7:30	6:30

WWJ (352.7m-850kc), Tonight's dinner.

11	10	9	8

WEAO (293.9m-1020kc), Housekeepers' half hour.

11:30	10:30	9:30	8:30

WGN (302.8m-990kc), Household management period.

11:35	10:35	9:35	8:35

KYW (535.4m-560kc), Table talk.

12 n.	11	10	9

WQJ (447.5m-670kc), Home economics. Oct. 6, "Blood Pressure and Hardened Arteries."
WHT (399.8m-750kc), Women's club, Jean Sargent.
WMAQ (447.5m-670kc), Home economics.

12:15 p.m.	11:15	10:15	9:15

KMOX (280.2m-1070kc), Cookery, Gladys Kimbrough.

1	12 n.	11	10

KGW (491.5m-610kc), Household helps, shopping guide.

1:20	12:20	11:20	10:20

WGBF (236.1m-1270kc), Garden talk.

2:15	1:15	12:15	11:15

KOIL (305.9m-980kc), Shopper's aid.

2:30	1:30	12:30	11:30

KFNF (461.3m-650kc), Half hour on cooking.

WJZ (454.3m-660kc), "Your Daily Menu."

3:45	2:45	1:45	12:45

KFNF (461.3m-650kc), Ladies' hour.

Eastern	Central	Mountain	Pacific
4:30	3:30	2:30	1:30

WLW (422.3m-710kc), Cooking school.

4	3	2	1

WOC (483.6m-620kc), Home management schedule, Aunt Jane.

4:30	3:30	2:30	1:30

KFNF (461.3m-650kc), Flower talk.
WLS (344.6m-870kc), Home Makers' hour.

5	4	3	2

KMOX (280.2m-1070kc), Housewives' hour.

6	5	4	3

KGO (361.2m-830kc), "Hints for Housekeeper."

7	6	5	4

KLX (508.2m-590kc), Woman's hour.
KMA (461.3m-650kc), Domestic science talk.

Thursday

Eastern	Central	Mountain	Pacific
9:30 a.m	8:30	7:30	6:30

WWJ (352.7m-850kc), Tonight's dinner.

10	9	8	7

WEAF (491.5m-610kc), Talks, cookery lecture.

10:50	9:50	8:50	7:50

WMC (499.7m-600kc), Home economics discussion, Miss Kitty.

11	10	9	8

WEAO (293.9m-1020kc), Housekeepers' half hour.
WEAR (389.4m-770kc), Home service talk.
WMCA (340.7m-880kc), Food bureau program.
WOI (270m-1110kc), Home Makers' hour.

11:30	10:30	9:30	8:30

WGN (302.8m-990kc), Home management period.

11:35	10:35	9:35	8:35

KYW (535.4m-560kc), Table talks.

11:45	10:45	9:45	8:45

WOI (270.1m-1110kc), Home Makers' period.

12 n.	11	10	9

WQJ (447.5m-670kc), Oct. 7, "Inexpensive Dishes That Appeal to All," "Your Home."
WHT (399.4m-750kc), Women's club, Jean Sargent.
WMAQ (447.5m-670kc), Home economics.

12:15	11:15	10:15	9:15

KMOX (280.2m-1070kc), Recipes.

1	12 n.	11	10

KGW (491.5m-610kc), Household helps.

1:20	12:20	11:20	10:20

WGBF (236.1m-1270kc), Garden talk.

2:15	1:15	12:15	11:15

KOIL (305.9m-980kc), Shopper's aid.

2:30	1:30	12:30	11:30

KFNF (461.3m-650kc), Half hour on cooking.

2:45	1:45	12:45	11:45

WQJ (447.5m-670kc), Oct. 7, "A Paper Wedding Anniversary."

3	2	1	12 n.

WJZ (454.3m-660kc), Your Daily Menu.

3:45	2:45	1:45	12:45

KFNF (461.3m-650kc), Ladies' hour.

4	3	2	1

WOC (483.6m-620kc), Home management schedule, Aunt Jane.

5	4	3	2

KMA (461.3m-650kc), Woman's hour.
KMOX (280.2m-1070kc), Housewives' hour.

5:30	4:30	3:30	2:30

KOA (322.4m-930kc), Housewives' matinee.
WCCO (416.4m-720kc), Women's club program.

6	5	4	3

KOA (322.4m-930kc), Culinary hints, Clara Hoover.

9	8	7	6

KUOA (299.8m-100kc), Oct. 7, "Personality in Dress," Oct. 14, "The Adolescent Boy and Girl in the Home," "The Great American Ailment."

Friday

Eastern	Central	Mountain	Pacific
9:30 a.m.	8:30	7:30	6:30

WWJ (352.7m-850kc), Tonight's dinner.

10	9	8	7

KDKA (309.1m-970kc), Domestic science and arts for the housewife.

11	10	9	8

WEAO (293.9m-1020kc), Housekeepers' half hour.

11:35	10:35	9:35	8:35

KYW (535.4m-560kc), Table talk.

12 n.	11	10	9

WHT (399.8m-750kc), Women's hour, Jean Sargent.
WMAQ (447.5m-670kc), Home economics.
WQJ (447.5m-670kc), Sunday dinner.

11:15	10:15	9:15	8:15

KYW (535.4m-560kc), Meat talk.
WMCA (340.7m-880kc), Food bureau.

11:30	10:30	9:30	8:30

WGN (302.8m-990kc), Home management period.

ANNA CASE, ALBERT SPALDING BRO

HIGH LIGHTS OF THE AIR

FOOTBALL opens again this year for the Radio fans. Not only will the big New York and Chicago stations broadcast famous games but college stations will broadcast home games. In addition to this all stations connected with newspapers which are members of the Associated Press will give special football returns. Well known sport announcers again preside over the broadcasting.

This month Radio programs resume their regular winter features. Listeners to the Sunday Evening club programs through KYW will tune in Sunday, October 3, for the opening meeting of this club. Fans who enjoyed the classical concerts sponsored by Atwater Kent last year will also tune in this same evening to the WEAF chain. Anna Case, soprano of the Metropolitan opera, and Albert Spalding, concert violinist, will give the first concert of the season.

Who does not remember Clara Kurtz and her Chocolate Cake-Eater, popular last year at KOIL, Council Bluffs? They are back on the air with new ideas and new stunts and if you did not laugh at them last year, you will this.

WLS has a new harmony team and this time the team is composed of two pretty girls. In fact, one girl is so pretty she made our front cover last week. Juanita Rae and Harriet Lee are the names of the pair, but they will be known as Rae and Lee.

Tuesday, October 5, is the first anniversary of WSM and the Solemn Old Judge himself, who is in charge of this station, plans a regular gala evening with special announcing, music and all the rest.

"Give Me Life or Give Me Death!" Tune in for WRVA, Richmond, Wednesday, October 6, and see whether the organ recital scheduled for this evening at 9:30 p. m. makes you think of this famous saying. If it does not it should because this recital will be broadcast from the famous St. John's Episcopal church where Patrick Henry made this famous speech.

The Veiled Prophets' ball, an annual party famous in St. Louis for its mirth and fun and which resembles to some extent the Mardi Gras of New Orleans, goes on the air for the third year from KMOX, St. Louis. Last year and the year before the broadcasting was done by KSD.

Kfwa, Wgn, Wmca, Wreo, Wcco; 10:45, Kfwb, Who, Kfoa; Kgo, Wjaz.

ANNA CASE, ALBERT SPALDING BROADCAST SUNDAY OVER WEAF CHAIN

HIGH LIGHTS OF THE AIR

FOOTBALL opens again this year for the Radio fans. Not only will the big New York and Chicago stations broadcast famous games but college stations will broadcast home games. In addition to this all stations connected with newspapers which are members of the Associated Press will give special football returns. Well known sport announcers again preside over the broadcasting.

This month Radio programs resume their regular winter features. Listeners to the Sunday Evening club programs through KYW will tune in Sunday, October 3, for the opening meeting of this club. Fans who enjoyed the classical concerts sponsored by Atwater Kent last year will also tune in this same evening to the WEAF chain. Anna Case, soprano of the Metropolitan opera, and Albert Spalding, concert violinist, will give the first concert of the season.

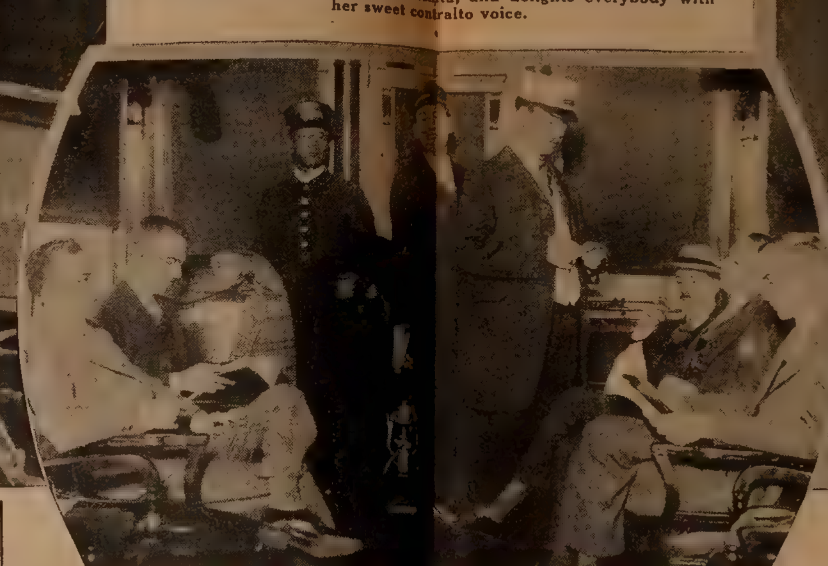
Who does not remember Clara Kurtz and her Chocolate Cake-Eater, popular last year at KOIL, Council Bluffs? They are back on the air with new ideas and new stunts and if you did not laugh at them last year, you will this.

WLS has a new harmony team and this time the team is composed of two pretty girls. In fact, one girl is so pretty she made our front cover last week. Juanita Rae and Harriet Lee are the names of the pair, but they will be known as Rae and Lee.

Tuesday, October 5, is the first anniversary of WSM and the Solemn Old Judge himself, who is in charge of this station, plans a regular gala evening with special announcing, music and all the rest.

"Give Me Life or Give Me Death!" Tune in for WRVA, Richmond, Wednesday, October 6, and see whether the organ recital scheduled for this evening at 9:30 p. m. makes you think of this famous saying. If it does not it should because this recital will be broadcast from the famous St. John's Episcopal church where Patrick Henry made this famous speech.

The Veiled Prophets' ball, an annual party famous in St. Louis for its mirth and fun and which resembles to some extent the Mardi Gras of New Orleans, goes on the air for the third year from KMOX, St. Louis. Last year and the year before the broadcasting was done by KSD.



RIDING the ether track this train crew takes along a big bell, the sound of the wheels on this etherial track and the sound of the steam in the throttle. The only thing the listener does not hear is the smoke. These Pennsylvania Railroad hour programs which are on from 8 to 9 p. m., Eastern time, every Tuesday evening over WJZ, WGY, and WRC have been under the charge of Conductor Norman Brokenshire. He is shown admitting one of the passengers who is probably Eddie Smalle, Wilfred Glenn or one of the other talented artists aboard. To the left is a real fireman who when not firing the locomotive from Glendive, Montana, to Minneapolis and St. Paul, sings from WCCO. His name is Howard J. Melany and he sings so well that people often take him for John McCormack. Sue Fulton, right, is not a passenger on either one of these lines; she sails away blithely on the wave length of KFH, Wichita, and delights everybody with her sweet contralto voice.

Friday, October 1

RAE AND LEE NEW FEATURE AT WLS

Biggest little band in Radioland is the name given to Len Nash and his Country Boys, above, of KNX. The four boys play nearly twenty different instruments. Doubling in brass is an inadequate description of what the chap at the left of the picture does. Barbara Fones Neely, left, is a much admired artist at WLW. She is a gold medalist from the Cincinnati College of Music and the wife of Uberto Neely of the faculty of that institution.

WLS, Chicago, Ill. (344.6m-870kc), 6-7:55 p. m., WLS Little Brown church.
WMBB, Chicago, Ill. (250m-1200kc), 3-5 p. m., Trianon orchestra; John Stamford; 7:40-9, service; 9-12, Trianon orchestra; Lombards, Harry and Leila; Bob Smith; Eddie Wallace; Monte Blunn; Bob Bennett.
WMC, Memphis, Tenn. (499.7m-600kc), 11 a. m., First Baptist church.
WOAI, San Antonio, Texas (394.5m-760kc), 11 a. m., First Presbyterian church; 7:45, Central Christian church.
WOAW, Omaha, Neb. (526m-570kc), 9 a. m., chapel service, Christian and Missionary alliance; 1:30 p. m., Father Flanagan's Boys' home period; 2:30, old time songs; 9, services.
WOK, Chicago, Ill. (217.3m-1380kc), 6-8 p. m., Tip Top Inn string ensemble concert; 8-12 m., Capitol theater organ; orchestras, studio program.
WORD, Batavia, Ill. (275m-1090kc), 7 p. m., Webster hotel duo orchestra; 9, I. B. S. A. choral singers.
WQJ, Chicago, Ill. (447.5m-670kc), 3-4 p. m., song cycle, "Persian Garden"; Charles F. Champlain, bass; North Shore quartet; 8-10, Rainbo Gardens orchestra; Frederick Mueller, tenor; Fontello trio.
WSB, Atlanta, Ga. (428.3m-700kc), 8 p. m., First Methodist church.
WSM, Nashville, Tenn. (282.8m-1060kc), 10:30 a. m., First Presbyterian Church.

Mountain Time Stations

KOA, Denver, Colo. (322.4m-930kc), 11 a. m., Augustana Lutheran church; 5:30 p. m., Mrs. S. Clarence Trued, organist; Arthur Knott, violinist; 7:30, Augustana Lutheran church.

Pacific Time Stations

KFI, Los Angeles, Calif. (467m-642kc), 7-8 p. m., Solomon's orchestra; 8-9, Aeolian organ; 9-10, Bob Bottger's Venetians; 10-11, Packard Six dance orchestra.
KFWB, Hollywood, Calif. (252m-1190kc), 9-11 p. m., late news, Warner Brothers Sunday night movie frolic.
KGO, Oakland, Calif. (361.2m-830kc), 11 a. m., First Methodist Episcopal church; 4 p. m., vesper service; 6:30-7:30, Stanislas Bem's Little symphony; 7:35, First Methodist Episcopal church; 9-10, Stanislas Bem's Little symphony orchestra.
KGW, Portland, Ore. (491.5m-610kc), 10:25-12 noon, services; 7:30-9, Hinson Memorial Baptist church; 9:30, Little symphony orchestra.
KHJ, Los Angeles, Calif. (405.2m-740kc), 7-8 p. m., services, First M. E. church of Los Angeles; 8-10, Orpheus Four male quartet; Frederick MacMurray, viola.
KNX, Hollywood, Calif. (336.9m-890kc), 6:30-7 p. m., Unitarian church service; 7-8, service, First Presbyterian church of Hollywood; 8-9, Circle theater organ and orchestra; 9-10:30, program, Beverly Hills nurseries.
KPO, San Francisco, Calif. (423.3m-700kc), 9:45-10:45 a. m., Undenominational and Nonsectarian church; 5-6 p. m., organ recital, Marshall Giselman; 6-6:30, States Restaurant orchestra; 6:35-8:35, Palace hotel concert orchestra; 8:35-10, Rudy Seiger's Fairmont hotel orchestra.

New!!

Highest Voltage at Heaviest Current Drains— Operates the New Power Tubes!

A New Model
Andrew White Super Power "B" Radio Unit

It can be used with all types of radio receivers.
It supplies plate current up to 200 volts.
Plugged into the electric light socket it delivers current equal to four large 45-volt blocks of batteries, steady and strong, operating perfectly at all times at a cost of less than 10 cents per month for average use.

FOR ORDINARY A. C. HOUSE CURRENT

The current used in the majority of homes operates the Andrew White Super Power "B" Radio Unit perfectly. It is designed for alternating current (A.C.) 110 to 125 volts, 50 or 60 cycles.

MADE BY THE VETERAN BROADCASTER

All the experience of fifteen years leadership in radio is represented in the Andrew White Super Power "B" Radio Unit, which bears the name of its sponsor as a guaranty that the assembly has been worked out by long research in the laboratory and the factory production carefully supervised to set the highest possible standard in manufacture.

UNCONDITIONALLY GUARANTEED

Andrew White Super Power "B" Radio Unit is unconditionally guaranteed for six months. It is sealed at the factory and is certified to be in perfect operating condition; it is fully guaranteed not to hum and to be free from all defects in material and workmanship.

Just Like Having Brand New Batteries Every Day

$49.50 **J. ANDREW WHITE** **$49.50**
37 West 43rd Street New York

Manufacturer also of the Andrew White "B" Radio Power Supply for sets requiring up to 135 volts—$38

Have You Heard It?

UNTIL you hear the Synchrophase you will not realize how perfect radio reception can be.

Your dealer will demonstrate the several very definite reasons for the superior reception of the Synchrophase: *—Colortone, Binocular Coils, S-L-F Condensers, Low-wave Extension Circuits, etc.*

Or send for Booklet RD.

A. H. Grebe & Company, Inc.
109 West 57th Street New York, N.Y.
***Western Branch*: 443 So. San Pedro St., Los Angeles, Calif.**
***Factory*: Richmond Hill, N. Y.**

This Company owns and operates stations WAHG and WBOQ; also low-wave rebroadcasting stations, Mobile WGMU and Marine WRMU.

"Do not take merit to yourself; then it will never be taken from you."

The makers of the Synchrophase endowed it with its virtues; its users conferred on it the praise it enjoys.

Doctor Tilly

Console with Cone Loudspeaker Ready for Your Set and Batteries

(West of the Rockies $35)

Rear view showing large compartment providing ample space for all batteries, battery charger or battery eliminator. These are entirely concealed from view. The back is open for ventilation of batteries.

MODEL 200 *with 22-inch Cone*

MODEL 200 *with 22-inch Cone*

The Cone Loudspeaker, with its Spruce sounding board, is quickly and easily removable, allowing instant access to all batteries, battery eliminator or other equipment and wiring.

A Revelation in *Radio Reproduction*

AT LAST—a cone loudspeaker that reproduces *all* the tones as they are broadcast. From the deep voiced tuba of an orchestra to the softest note of a vocal solo—*every* tone—*every* sound is reproduced in all its beauty, just as it entered the microphone.

* *

This 22-inch Windsor Cone Loudspeaker, with its *spruce* sounding board, will reproduce the sofest crooning lullaby in a softly lighted room, or the full throated march music of a band in an auditorium—both with perfect fidelity of sound and tone.

* *

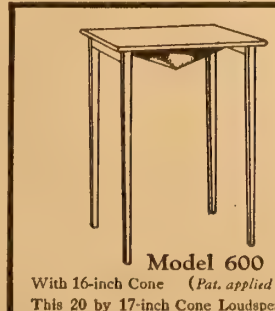
The Windsor Cone Loudspeaker Console is the greatest value in the world of radio. When compared with the average cost of cone-type loudspeakers of even smaller size, the cost of the complete Windsor—cone loudspeaker, spruce sounding board, and console—is amazingly low.

* *

As a piece of furniture, the Windsor Cone Loudspeaker Console is of such manifest high quality and attractive design as to be a welcome addition to any home. Finished in Mahogany or Walnut.

* *

The Windsor Cone and Horn Loudspeakers, combined with attractive pieces of furniture in many models, are being demonstrated by recognized dealers everywhere.



Model 600
With 16-inch Cone (*Pat. applied for*)
This 20 by 17-inch Cone Loudspeaker Table has suspended from the underside of the top a 16-inch Windsor Cone Loudspeaker. Placed in any part of a room, it fills the room with music just as an inverted electric lamp floods the room with light. Finished in Mahogany or Walnut. Price..... $19
(West of Rockies, $23.00)

Go to your dealer today and examine this astonishing new Cone Loudspeaker Console. If he happens not to have one, write to us and we will tell you the name of the nearest store at which you can see and hear one.

"They last twice as long as the smaller batteries of equal voltage"

"THAT'S a pretty broad statement, Tom. Won't you have to make it conditional on the number of tubes in the set or the use of the new power tubes?"

"No, sir! Under the same operating conditions—whether you use four, five tubes or more, whether you use a power tube that uses up to 135 volts, the Eveready Heavy-Duty No. 770 or the even longer-lived Eveready Layerbilt No. 486 will last twice as long as the smaller sized 45-volt batteries."

"Well, they ought to, they cost more."

"Yes, about a third more—but lasting twice as long, they cost much less."

"Your arithmetic is good, Tom, but if that's so, when I bought my set why did the dealer equip it with the smaller Eveready 772's? Why didn't he put in the Eveready Heavy-Duty Batteries?"

"He probably thought he was doing you a favor—making your first investment cost you a little less. That little difference looks like a lot to a good many folks who are buying their first set, equipped with tubes, loud speaker, 'A' and 'B' batteries and everything."

Heavy-duty batteries last twice as long as the smaller batteries of equal voltage. Eveready Heavy-Duty Batteries are the great contribution that the world's foremost electro-chemical laboratory has made in "B" battery economy, dependability and satisfaction.

Dry "B" batteries give a noiseless current, pure D. C. (direct current), the essential kind if you prize pure tone.

Send for booklet, "Choosing and Using the Right Radio Batteries," which we will be glad to send you upon request. This booklet also tells about the proper battery equipment for use with the new power tubes. There's an Eveready dealer nearby.

Manufactured and guaranteed by
NATIONAL CARBON CO., Inc.
New York San Francisco
Canadian National Carbon Co., Limited
Toronto, Ontario

NOTE: A "C" battery gives a quality of reception unobtainable without it and greatly increases the life of your "B" batteries.

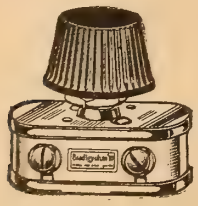
Bradleyohm-E
PERFECT VARIABLE RESISTOR
for B-ELIMINATORS



Bradleyohm-E is a new and enlarged Bradleyohm designed especially for B-Eliminator Voltage Control. The extra long columns of scientifically-treated graphite discs insure perfect voltage control over a wide range. It is made in several ranges for various B-Eliminator circuits.

Bradleyunit-A
PERFECT FIXED RESISTOR

Bradleyunit-A is a solid molded resistor for radio circuits. It is molded and heat-treated under high pressure, making it impervious to moisture. The silver-capped ends can be soldered without affecting the calibration of the Bradleyunit.

Are You Building a B-Eliminator?

IF so, follow the example of leading radio engineers and use the Bradleyohm-E and Bradleyunit-A for your voltage control.

Most of the well-known factory built B-Eliminators are equipped with Bradleyohms as standard equipment. Surely, no better recommendation of the reliability and stability of the Bradleyohm can be asked.

Build permanent performance and high efficiency into your B-Eliminator by asking your dealer for Bradleyohm-E and Bradleyunit-A for your circuit.

Allen-Bradley Co.
290 Greenfield Avenue, Milwaukee, Wis.

Reports from users everywhere leave little for us to add. These are only a few of the many in our files and which we receive daily. Send coupon for plenty of additional proof, testimony of nearby users and SPECIAL OFFER

"UNITUNE" SEPARATES CHICAGO LOCALS. Chicago. With 4 stations broadcasting less than a mile away, one after another I cantune and keep separated as high as 15 Chicago stations on your "Unitune-5". Even during the summer I frequently get stations clear and loud on speaker as far away as Colo., New Jersey, New Orleans and many others. With the single dial I switch from one to another station in an instant. The selectivity is amazing, the set is a beauty and the tone is perfect. W. H. Schaeffer.

COAST TO COAST THROUGH LOCALS Omaha, Nebraska. Miracois a wonder for distance, volume, tone. We have 5 local broadcasting stations here and she goes right thru and brings them from coast to coast. No trouble at all. H. N. Eller.

BEATS OTHERS FOR SELECTIVITY. Cleveland, O. Have been up against some pretty good radio men with other sets and this receiver has them guessing. In selectivity, volume and range it has outdone several. We were able to cut out WTAM (powerful local station) in 3 points, to bring in other stations. W. C. Pike.

HONOLULU TO LONDON FROM IOWA. Anthon, Iowa. Here are some of the stations we picked up on the Miraco 5 Sunday Jan. 24 between 10 and 11 P. M.: 2LO London, KVOO Honolulu, Hiawaii; WKAQ San Juan, P. R. and a station in Ireland; could not get call letter. John Kuhn.

NEW YORK LOGS 183 STATIONS Buffalo, N. Y. I received 2LO London, 11:05 on Monday night but there was so much interference it was not very plain. I also logged 163 stations in U. S. and Canada. Satisfied user of Miraco. Norman W. Ives.

NEBRASKA HEARS PORTO RICO ON SPEAKER. Spencer, Nebraska. Using the Miraco 5 we have often heard Mexico City, Porto Rico, Miami, Florida, Ottawa, Canada and Vancouver, B. C. Canada and all along the Pacific Coast. All the above stations on the speaker. Have also heard Lima, Peru, South America. H. J. Schmidt.

TONE, VOLUME, DISTANCE. Elbing, Kans. We like our Miraco fine especially because of its volume, tone and its freedom from howling. Although I do not try much for distance we received programs from Oakland, Cal.; Los Angeles, New York, Miami and Havana. In my opinion it's the best ever. Mrs. E. A. Regier.

MIRACO EQUALS $240 SET. Onaka, S. D. Miraco works fine. Selective and plenty of volume. Stations logged include Winnipeg, Canada; PWX, Havana, Cuba; and CYL, Mexico City, Mexico. Have heard quite a few sets, one costing as much as $240, but can't see where it is any better. Clarence Rusch.

NO HOWLS---SUPERIOR TO COSTLY SETS. Modoc, Ind. We certainly enjoy our Miraco-5. Results equal to any radio I ever heard and far superior to most radios costing a great deal more. All stations come in loud and clear on the loud speaker. James Tullis

OUTPERFORMS 6 AND 8 TUBE SETS. Duncansville, Pa. I don't think there is a better receiving set made than a Miraco-5. Stations received—all on the loud speaker—include KFI, Los Angeles, California—distance, 2,250 miles. I got this on loud-speaker plain, when others couldn't get it with 6 and 8 tube sets. Also have heard Can., Colo., Fla., Cuba, Neb. and many other states. S. D. Fowkes.

CALIFORNIA HEARS PENNA. ON THE SPEAKER. San Rafael, Calif. I have purchased three of your sets and will give you an idea of what the Miraco-5 does out here. I have logged 86 stations, which I can get nearly any time I try. Mexico City on the South to CFCN, Calgary, Canada, on the North, with Honolulu to the West and E. Pitts., Pa., to the East. All on loud speaker, clear and plain. Roy I. Sharer.

"B" BATTERY ELIMINATOR

Only $7.95

MONEY-BACK GUARANTEE

Stop being a slave to the "B" Battery nuisance! Throw the old-fashioned cells in the ash can! Hook up a new Roll-O "B" Battery Eliminator in 30 seconds and forget battery troubles forever. This wonderful device means better reception. Sharper tuning. Ends that annoying hum. More real pleasure from your set.

Completely Equipped—No "Extras" to Buy

Operates perfectly on direct or alternating current, giving up to 90 volts current, and using the full wave of the power supply. Simple directions enclosed—anyone can plug it in to any kind of set up to six tubes. Constant voltage gives set more power without danger of burning out tubes. Costs no more than set of good "B" batteries. Solidly built in beautifully finished metal case.

Send $1.00

Send Your Order NOW!

Don't blame your set because run down "B" Batteries won't let it work right. Order your Eliminator NOW. Former price $12.95. Now cut to $7.95. Write name and address on a piece of paper, pin a dollar bill to it, and mail it TODAY. Pay postman balance ($6.95 plus a few cents postage) when he delivers your Eliminator. Use it ten days. If not more than satisfied, return it and get your money back.

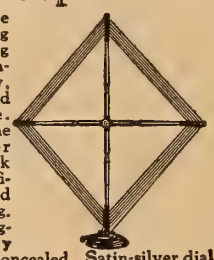
Beautiful to See Delightful to Hear

If you have not seen the Bodine DeLuxe Loop, you have a new thrill in store. The perfect symmetry and exquisite proportions of this beautiful loop harmonize with the most attractive home surroundings. Its remarkable efficiency combined with an overall size of but 12 x 26" is a pleasant surprise. The Bodine DeLuxe Loop is a decided aid to tuning in congested areas. By tuning out interfering stations and reducing static it improves tone quality. Ideal for loop sets.

Write for circular telling how to secure the closer tuning and better tone quality provided by the Bodine DeLuxe Loop with aerial sets.

See a Bodine DeLuxe Loop at your nearest radio store.

Bodine Folding Loop



The basket weave method of winding the Bodine Folding Loop provides unusual selectivity, longer distance and greater volume. The winding of fine stranded copper wires inside a silk braid is very efficient and designed to avoid stretching. Hinges of the English Mahogany frame are neatly concealed. Satin-silver dial makes logging easy. Bodine Folding Loop is 24" square, but when folded fits box 3½x6x18". Ideal for camping. Very attractive for home use. See a Bodine Folding Loop at your dealer's store.

Bodine Twin-Eight R. F. Transformers

This specially designed coil has been widely adopted by set manufacturers because of its unusual efficiency. The Bodine Twin-Eight method of winding provides greater amplification than is possible with any type of toroidal or doughnut coil with less interference with other parts of the set. Very compact, making assembly of set easy. Improves any tuned radio frequency hookup. Price $2.00 each. Set of 3 matched coils $6.00.

Write for free wiring diagram of the Bodine Twin-Eight Receiver which utilizes these unusual coils.

Make Money Evenings

IF you want more money, why not put your spare time to work? We have shown 4,364 men how they can demonstrate radio instruments during the evening and without any past experience either in radio or salesmanship make

$25.00 to $75.00 Weekly

There is no reason why you cannot do the same. Radio is in demand—sell what the public wants. A demonstration in the home is the only way to sell radio. You can do this without, in any way, interfering with your present work.

12 Sales Lessons Free

You need not be a saleman. Let me show you how our sales lessons teach you all you need know about selling. These lessons will be given without charge to any man who is really desirous of making more money.

10 Service Lessons Free

You may not know radio but if you are willing to learn, we are willing to teach you and without expense. With this knowledge you need not have any fear of meeting any competition from any radio. The sooner you get started the sooner you'll be making money.

4,364 Men Are Doing It

Within the past four years 4,364 men have started under this plan—it is a proven success. Many have been so successful that they have been able to give up their positions and devote their entire time to selling radio under this plan. What they have done, you can do.

5 Tube Radio $25.00

You will have 5 tube instruments to retail as low as $25.00—others as high as $235.00. You will have price and quality that no competitor can touch, and if you can prove what you can do, you will secure

Exclusive Territory

and put other men to work for you. But now is the time to investigate. Territory is being taken rapidly, so do not delay. This plan can only be taken by one man in each community if he can produce the sales. Send today for—

100 Page Book Free

describing the most interesting moneymaking plan you ever read. A copy will be sent immediately unless we already have a representative operating on an exclusive franchise in your territory. If you really want more money, don't delay a single day.

"GOODY GOODY GIRL"

(Continued from page 11)

"You knew I was here all the time?"

"I suspected it. I was looking out the window when Raymond helped you on the train. Later when I saw him so distracted—once he bumped into me without recognizing me—I associated it with you at once. I looked through the train without finding you and knowing this was Raymond's drawing room, I stopped. Just at the right time, wasn't it?"

"You were listening?"

"Not intentionally. Please don't believe that. But he was talking pretty loud . . . I couldn't help but hear in spite of the closed door and the racket of the train . . . I thought I'd best deal myself a hand—"

Lois took pity on her. "No apology is required. I'm really grateful to you, Mrs. Gayton. Just the same, I'm sure I could have taken care of myself—"

"OH, WHY does every girl think that?" There was a hint of exasperation in the older woman's voice. "That's the reason so many of them end up in trouble—when they find they can't take care of themselves after all."

"I can't believe Mr. Lancaster meant me any harm. He had lost his head for a moment, that's all. Up to then he'd been so nice, so chivalrous—"

Mrs. Gayton made an impatient gesture. "There's no such thing as chivalry when a man is strongly enough tempted, my dear little unsophisticated girl. The best of them will pounce on a woman then."

"Pounce?" Lois made a little grimace of distaste. "You make it out like men were wolves or—"

"Most of them are just that. Wolves. A woman is fair prey, they think. They'll do just what I said—pounce, if they have an opportunity. Of course some are worse. Jackals. They wait until she drops exhausted from battling the wolves."

"How horrible you make it. I don't believe Mr. Lancaster is either a wolf or a jackal."

"I suspect he isn't called 'Wild Oats' Lancaster for nothing."

"'Wild Oats.' That sounds worse even than calling him a wolf. Why is he called that, Mrs. Gayton?"

"Nicknames usually explain themselves. I really don't know him so very well. I see him here, there and the other place; usually where men of money are to be found. I imagine he has quite a bit of his own. Has something to do with some house in La Salle Street, I understand. Stocks and bonds or something like that."

"HE'S NOT—not—married, is he?" Mrs Gayton shrugged. "One never knows. I think not, though. He doesn't seem to be. You're quite taken by him, aren't you? Don't let yourself in for anything because of him—and don't resent my telling you this, will you?"

"Of course not. Anyhow, I don't expect to see him again. Some time tonight I'll be getting off this train and taking another one back."

"You say that as if it were something dreadful that was waiting for you. Want to tell me about it? Perhaps I can help."

Almost before she knew it, Lois found herself pouring out the story. It was nice, she reflected, to have someone interested in your troubles, your hopes and your plans. Mrs. Gayton seemed interested and to understand, too. She seemed to understand even about Primus, Quintus and Octavus, for all she found it amusing.

Suddenly she threw an impulsive arm about Lois' shoulders. "How can you go back to it all?"

"How can I help myself?"

"Look here, Lois—you don't mind my calling you that?—come on to Chicago with me. Be my guest for two weeks, three, as long as you like. Something might turn up. Who knows? You might find a way of putting that horrible little misnamed Paradise behind you forever. You at least can find out definitely whether you have a voice or not. I can arrange for some good teacher to hear you. What do you say?"

Lois clasped her hands enthusiastically. "Oh, I'd love to do it, but—" her elation vanished, "I can't afford it."

"I'VE GOT plenty of money."

"But I couldn't borrow from you."

"I didn't mean to lend it to you, but give it. What's a few dollars between friends? Besides, it would please me, give me a chance to regain some of the enthusiasm I had at your age. I just won't have you refuse. There, it's decided for you. Just press the button and I'll have the porter bring that ogre of a conductor. I'll fix him."

When, however, someone tapped upon the door a moment later it was not the porter. It was a man, middle-aged, tall and rangy, whose lean, saturnine face ended in a pointed, close-shaven chin of the same blue-white as a plucked fowl. He proved to be the Neil Becker whose name had brought a frown to Raymond Lancaster's face when Mrs. Gayton mentioned it. Lancaster, he said, had told him where Mrs. Gayton was and he had come to ask when she would be ready for dinner.

"Fifteen minutes," she told him. "Sit down and amuse Miss Sylvester while I attend to a few things."

She hurried out and Lois spoke to Becker. "I think she's a darling. I'm going to be her guest in Chicago for a while. Isn't that great?"

The news appeared to startle him. For just a second Lois saw his black eyes widen in surprise and a look that might have been displeasure came into them. Then the lids dropped again and he was suavely agreeing with her that it was great.

"We must throw a party for you right off the bat," he said, and was still making plans for it when Mrs. Gayton reappeared.

With her came Lancaster, who, it seemed, was to be turned out of his drawing room, which would be occupied by Lois and Mrs. Gayton. He would take the section in another car which Mrs. Gayton would vacate. The conductor, it appeared, had not proved difficult after all.

LOIS had an uneasy feeling that Becker did not approve of all this. What had he to do with it? she wondered, watching his smoldering black eyes which, in turn, were fastened upon Mrs. Gayton. She seemed ill at ease all of a sudden. Lancaster, too, appeared somewhat upset. All together the air was tense, electric. Lois was glad when Lancaster, recalling she had eaten no lunch, carried her off for the thrill of her first meal in a railroad diner.

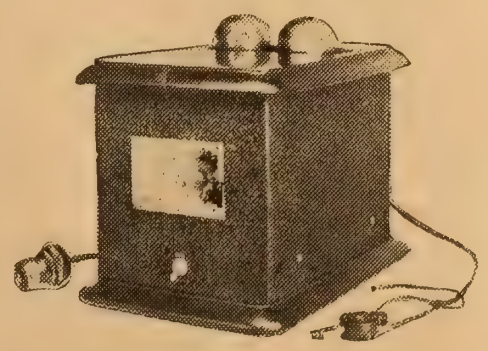
"I was afraid they'd ask us to get a table for four and save places for them," he confided as they made their way through the train. "Now we can be by ourselves."

She was glad of that, too, specially when quite a little bit later Mrs. Gayton and Becker came in. There was a sullen, grim look on his face, a defiant one on hers, and Lois could see that they had little

"B" ELIMINATOR PLUS POWER AMPLIFIER— THAT'S POWERIZER REG.

Make your present set equal to the newest power sets costing from $300 to $1,000. You can do it with the Powerizer. Costs no more than a good "B" eliminator. Uses new power tubes without rewiring. The Powerizer is a combined "B" eliminator and power amplifier. Attach it to your set and you will get the two greatest developments in radio during the past five years—a tone quality beyond belief with a volume you have never had before. Go to the nearest Powerizer dealer TODAY and HEAR it. Its performance will amaze you! Descriptive leaflet gladly mailed on request.

Supplies up to 170 volts "B" power for set, 350 volts for power tube, proper bias eliminating "C" batteries and "A" voltage for last tube at a current cost that is practically negligible.



$49.50
Without Tubes

RADIO RECEPTOR Co.
106 Seventh Ave., New York

None other *than high quality radio products can give good steady results—*

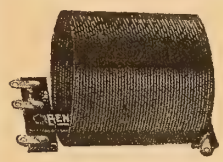
All Benjamin Radio Products are of the same high standard as the far-famed Cle-Ra-Tone Sockets—

The most beautiful or the largest radio set it is possible to produce is helpless with just a little technical flaw in its interior. Thus if you would have clear and consistent radio reception you can not afford to use "bargain" radio parts.

There are just three characteristics which have gained popularity for Benjamin Radio Parts; the best possible quality in material; the highest perfection in technical construction; and absolute permanence in cooperating with other radio parts to give perfect radio reception.

Improved Tuned Radio Frequency Transformers

Proved through exhaustive and comparative tests to be the most efficient coil for modern radio sets. Better in all important features and characteristics. Space wound. Basket weave. Cylindrical. Highest practical air dielectric. Gives wonderful sharpness in tuning, better volume and purer tone quality.



2¼" Diameter Transformer

Compact. Especially desirable for crowded assembly. Eliminates interfering "pickup." Set of three, $5.75; Single transformers, $2.10.

3" Diameter Transformer

Capacity coupling reduced to lowest degree. For use with .00035 Mfd. Condensers. Set of three, $6.00; Single Transformers, $2.25.

Push Type Cle-Ra-Tone Sockets

Spring Supported, Shock Absorbing. Stop Tube Noises. Greatest aid to non-noisy operation. Contacts always clean. 75 cents each.

Battery Switch

Quick, positive, clean-cut make and break. When it's "in" it's "off," eliminating danger of wasteful use of battery. 30 cents each.

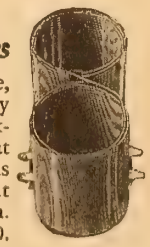
Straight Line Frequency Condensers

No crowding of stations. The broadcast range is spread evenly over the complete dial. Stations come in without interference, and tuning is much easier. Adjustable turning tension. Low loss characteristics give a definite and distinct radio reception. Beautiful in appearance—a credit to the looks and efficiency of any set. Finished in dull silver. Made in three sizes:

.00025 Mfd., $5.00
.00035 Mfd., $5.25
.0005 Mfd., $5.50

"Lekeless" Transformers

Uniform high inductance, low distributed capacity and low resistance. The external field is so slight that it permits placing coils close together without appreciable interaction. Single transformers, $2.50.



Brackets

An aid to simplification in set construction. Supports sub-panel, with room underneath for accessories and wiring. Plain and adjustable. Plain 70 cents per pair; adjustable, $1.25 per pair.

PRIZES FOR RADIO HOOKUPS

(Continued from page 27)

to say to each other while they ate. Had they been quarelling and had it anything to do with her? She forbore asking questions of Lancaster, however, and later when all four of them went to the observation car together things seemed to have cleared and she forgot everything else in the delight of knowing that she was going to Chicago.

CHAPTER V

Chicago

THE FOLLOWING morning brought Chicago.

Lois, following Mrs. Gayton out of the dingy old Illinois Central station at Twelfth street, was held spellbound by her view of the imposing skyline of Michigan boulevard on the far side of the treeless spaces of Grant Park.

Then a sleek, purring limousine slid up under the arch of the driveway and Mrs. Gayton motioned her to get in. The liveried chauffeur tipped the visor of his cap, but his face held an unmistakable sneer. Lois flushed uncomfortably. The sneer, she knew, must be for her, the salute for her hostess.

Then she forgot it in the absorption of watching the kaleidoscope constantly changing before her eyes as they rolled north. Presently she turned those same wide and shining eyes upon the smiling, amused woman beside her.

"Oh, I love it," she cried. "I never dreamed a big city would be like this. I thought it would be harsh, forbidding, cruel—and it's not. It's wonderful!"

Mrs. Gayton patted her hand understandingly. "Don't let the rose-colored spectacles deceive you, dear. Chicago is all that you say, but it has the other side, the harsh, cruel side, just as you imagined. Let's hope you won't see that. This is Lincoln Park." She spoke to the driver through the tube at her side. "Take the outside drive along the lake."

A QUARTER of an hour later the car turned right off Sheridan road toward the lake and drew up in front of one of the hundreds of huge apartment buildings which dot the Wilson avenue district. A uniformed bellboy came running out for their luggage, an obsequious doorman in blue and gold lace bowed them through into an ornate lobby, another uniformed youth shot them skyward in a fast elevator. Lois was quite breathless with the speed of it all when, many stories up, they got off in a long hallway whose twin walls were studded with a score of doors identically alike.

Mrs. Gayton pressed a button in the wall beside one of these doors and it was thrown open by a trim, pleasant-faced girl of about Lois' own age, neat in the black and white of a maid.

"Welcome home, madame," she said with a curtsy for her mistress.

Mrs. Gayton nodded. "Thanks, Susette. This is Miss Sylvester, who is to be my guest. See that the—the—spare bedroom is made ready for her."

The maid with another curtsy closed the door and departed. Mrs. Gayton drew off her gloves and sank into an easy chair. "Heavens, it's good to be back."

Lois still stood, entranced by her surroundings. The big apartment with its heavy upholstered furniture, its thick rugs, its expensive hangings was something she had known existed but never had seen. Its cool comfort and beauty had struck her all of a heap. Inside her something cried out that this was the kind of thing she wanted for herself.

She still was in the grip of enchantment when Susette came to say her room was ready. It persisted as she followed the girl down the hall and passed through an open door which the other indicated. Then, just like that, the spell was shattered.

IT WAS a sight of her own few pitiful belongings that did the trick. Susette had taken them from the battered suitcase and laid them out. How cheap, how shabby, how out of place they seemed in this magnificent setting!

Lois felt herself seized by embarassment. She felt the scarlet creeping up along her neck into her cheeks. She did not dare glance at Susette lest on her face she might see that same look of contempt with which the chauffeur had regarded her at the station. Or it might be pity she would see there and that would be worse.

"Can I help you any, miss?" the girl asked."

"No!" Lois' voice sounded strained, harsh, in her own ears. "No! I'll do for myself." She almost pushed the girl from the room and quickly closed the door. Then she threw herself into a chair, buried her burning face in her hands and let the tears of humiliation trickle through her fingers.

"Oh, what a little fool I was to let myself in for this," she murmured. "I shouldn't have come. I should have known—"

Suddenly pride dashed in to the rescue. She jerked up her head and dashed the tears away with a handkerchief. "I just won't let a thing like this get me," she said fiercely. "I'm as good as anyone else. I won't be crushed. I won't! I won't! I won't!"

She went back to the living room after a bit and her resolution was taxed at once. The simple, little house dress she wore was in striking contrast to the soft, clinging negligee Mrs. Gayton had donned. She searched her hostess' face, was relieved to find no patronizing or condescending look there and managed to relax when presently she found herself stretched out on a padded settee.

SUSETTE came to say the telephone was ringing and Mrs. Gayton went to answer it from the extension in her bedroom. She came back with a bit of an angry glint in her jade eyes.

"Neil Becker, insisting upon dinner and a cabaret or something of the kind afterwards. I tried to beg off. No use. The man's a mule when he gets his head set. You're included in the invitation."

"But, Mrs. Gayton, I—I—I—"

"I know. Haven't anything to wear. Don't let it worry you, darling. Between my clothes closet and Susette's skill with a needle we'll have you rigged out in no time. Tomorrow we'll get you things of your own. No, not a word out of you. I'm running this show. I think we'd best have the woman from the hair-dresser's up right away."

Hours later Lois stood before a full-length mirror and gazed in wonder at the girl who gazed back at her. From the top of her recently shampooed and waved brown hair with its shimmer of bronze to the tip of her neatly-shod little feet she was the picture of what Lois had fondly imagined only a princess could look like. She made little surreptitious motions so that they would be instantly duplicated in the mirror to convince her it was herself at whom she looked.

"You're a very pretty child in a very pretty dress," Mrs. Gayton told her. "Some kind fairy must have guided me when I picked that green thing in spite of the fact I knew it was not my color. You needn't feel embarrassed that someone will recognize it. I've never worn it."

"I think I must be dreaming," murmured Lois.

SHE STILL was thinking it when that evening she found herself one of a gay crowd in the night club which had been Neil Becker's choice. The three of them had come alone from the Congress hotel, where they had met Becker in glittering Peacock Alley, and his saturnine face had lighted up and his black eyes widened when he had caught sight of her in the green dress. On the way over in the car he had told her she looked wonderful and praised Mrs. Gayton for having done what he called a good job on her.

At the club a gala night of some kind seemed to be in progress. A mildly boisterous party at a big table promptly annexed them, shoving their own chairs closer so that three more might be squeezed in for them. Becker seated them, himself in the middle. On her other side Lois found a solidly built individual who might have been any age from forty-five up. Taking in his rather fatuous, pink, oval, smooth shaven face surmounted by a pink, oval, bald head, Lois might have wished for one of the younger, more handsome men around the table to have been in his place, but did not. Until the strange, out-of-place feeling of one to whom all this was new had worn off it was just as well.

The pink, bald one turned away after one or two banal remarks and she let her eyes rove around the table. The dozen or so she could see without craning her neck to glance past her immediate neighbors were the usual sort of well-dressed men and women one saw in the society scenes of the movies. Men in tuxedos,

Unique for Cones

There is no other material like Alhambra FONOTEX—no other with practically no grain so that it has no resonance point of its own, and that gives such depth and roundness to all tones. Used for cones by the leading speaker makers. For home constructors in 38"x38" sheets at dealers. The SEYMOUR Company, 325 W. 16th Street, New York City.

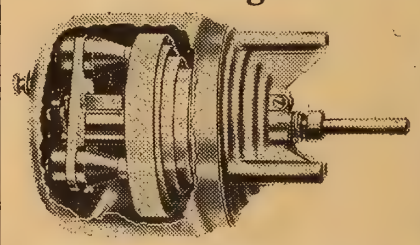
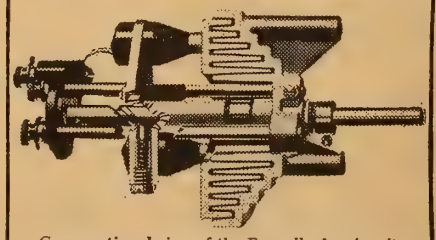
FURNELL

Conceded to Be the Most Practical Straight Line Frequency Condenser Ever Designed!



Illustrating the application of the aluminum electrostatic shield provided for preventing the emanation of stray currents therefrom.



Cross sectional view of the Furnell, showing its mechanical construction, also the tapered concentric rings.

The Furnell spaces the stations equally over 360 degrees of shaft movement, a complete rotation of the dial. No crowding of low wave length stations. No need for a vernier dial.

Radio experts praise the Furnell because it represents the finest condenser workmanship available today. Because it gives to radio reception a degree of tuning perfection heretofore unattainable.

DUST PROOF. DAMAGE PROOF. ELECTRO-STATIC PROOF.

The smooth operation of the shaft and slider affords a degree of accuracy and precision unattainable with the ordinary type of plate condenser.

(Continued from page 28)

women in gowns, sleeveless, low-cut; bare shoulders gleaming under the crystal lights, jewels sparkling on their fingers and bosoms and in their hair. All were talking animatedly, calling across the table, laughing a great deal, flinging little snatches of song at each other.

LOIS' eyes went past them to the rest of the huge room. More of the same kind of people, the same kind of activity. In one corner on a balcony a jazz orchestra, featured mostly by braying saxophones, was blaring and in a cleared space in the center far too many couples tried to dance at the same time.

A black-sleeved arm reached over her shoulder, poured into the glass before her a bubbling, light-colored liquid out of a napkin-covered bottle. She lifted the slender-stemmed glass to her lips. The little bubbles broke against her nose. She sipped at the liquid, found it agreeable and nice, drained the glass. The waiter filled it again immediately, but the pink one was talking to her now and she let it set.

"Time we were getting acquainted, little one. I don't think I've seen you before, have I? My name's Jermin, Victor Jermin. You're to call me 'Victor,' though. Understand? I don't answer to Mister—Jermin or anything else. What am I to call you?"

"Miss Sylvester," she told him.

"Now is that nice? Miss Sylvester? That don't go. What's your first name?"

She told him. "But I don't think we've known each other long enough for you to call me by that," she added.

That seemed to amuse him immensely. "It's a fast age we're living in, little one. It seems like an awful waste of time and breath to be using 'mister' and 'miss' and 'mistress' all the time. Just as you like, though, until we're better acquainted."

The lady on the other side claimed him again. Neil Becker was bent forward to speak across Mrs. Gayton to the man beyond her. Lois emptied the thin-necked glass again. The orchestra had gone into action and she began to sway slightly in tune with the music. Suddenly Becker turned to her.

"DANCE?" he asked, pushing back his chair.

"I never have, at least not the way they do," she said with a nod toward the struggling couples on the floor.

"Come try it, anyhow. You don't have to know how. Just let yourself go and follow where I lead. Why, you're keeping time to the orchestra with your shoulders right now. That's all that's needed. Come on."

Impulsively she got up and they threaded their way through the tables toward the dance floor. She was suddenly conscious of the fact that eyes were being turned in her direction, eyes of both men and women. She could not avoid them all and became aware that it was not what she feared, that they had recognized her for the little country girl that she was, that had drawn their attention. It was admiration; open, approving admiration by the men; unwilling, a bit tinged by jealousy, admiration by the women.

They were out upon the floor now, Becker whispering instructions in her ears, then "one, two" and they were off through the maze of others. She got the hang of it after a minute, let herself go as he had said, felt her feet young and eager for the music. Shyness and diffidence no longer claimed her, she felt

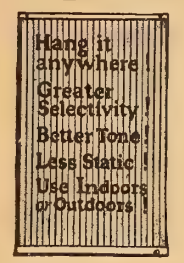
50% BETTER Reception with EFFARSEE Antennae or Your Money Back!



That guarantee shows how certain we are that the wonderful new EFFARSEE Antennae will increase the power, range and selectivity of your set. The scientific design of this marvelous device, built on an entirely new principle with two specially made condensers, practically eliminates static and interference.

Don't Imperil Your Life

Why clutter up your home with ugly outside wires or masts? Why take a chance of death by a fall when erecting or repairing an outside aerial? Why deliberately attract the deadly lightning that may kill your whole family and burn your home? Just buy your EFFARSEE Antennae, shove it under a rug or put it in the attic, and enjoy perfect safety and get 50% better reception. No trouble—installed in 30 seconds—lasts forever. Radio manufacturers find it ideal for testing sets. Approved by Radio News, Popular Science, Popular Radio and other prominent Radio Magazines. Thousands of enthusiastic users.

SEND NO MONEY

Order your EFFARSEE Antennae today, at the special price of $4.00. If it does not improve the performance of your set at least 50 per cent, return it and we will refund your payment in full. *Send no money*—just your name and address. We'll send your EFFARSEE Antennae at once, and you can pay $4.00 to the postman on delivery. Remember, you take **Absolutely No Risk.**

FISHWICK RADIO CO., Dept. 8, Cincinnati, Ohio

A&B Battery Charger ONLY $2

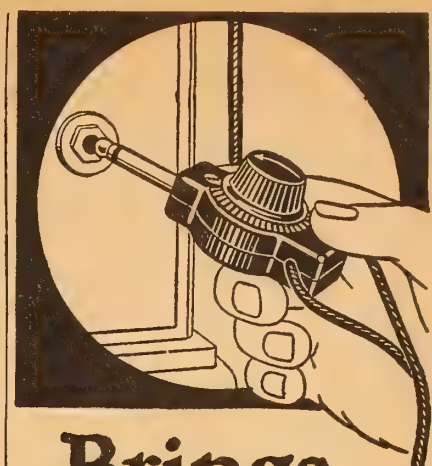
SATISFACTION GUARANTEED

Charges any type of storage A or B battery, using a few cents worth of ordinary house current, either alternating or direct. Cannot injure battery. Complete directions enclosed. Anyone can operate. No expensive "extras" to buy.

Why pay $10.00 to $15.00 for a charger when you can get this splendid GUARANTEED R.B. Charger by mailing us two dollars (bills, money-order, check or stamps) plus ten cents in stamps or coin to pay mailing costs. Charger will be sent postpaid. If not satisfied return within five days and we will refund your money. Order at once—TODAY.

R. B. SPECIALTY COMPANY

Dept. Y-7 — 308 East Third Street — CINCINNATI, OHIO



Brings Your Set Up To Date

THE only real advance claimed by the makers of this year's best sets is improvement in tone performance. This improvement can be made in your present set by simply adding the **Centralab Modu-Plug** This modernizing device makes your reception equal in tone performance to that of the latest high-priced receivers.

Modu-Plug is warranted by Central Radio Laboratories, makers of variable resistances for sixty-nine manufacturers of leading standard sets.

Centralab Modu-Plug replaces the loud speaker plug. Gives any degree of tone volume from a whisper to maximum by simply turning the small knob on the plug, without adjustments of other controls. Modu-Plug matches the speaker impedance to the output impedance of the set. Reduces interfering noises. Clarity and faithful reproduction equal the latest developments in perfected performance.

$2.50 at your dealer's, or mailed direct on receipt of price

(Continued from page 29)

light and dreamy, floating off in a cloud somewhere, eyes half-closed.

Abruptly things seemed to change, for no reason at all. Becker had drawn her very close to him, so close that her movements no longer were free and untrammeled. His lean face was thrust almost against hers, his black eyes seemed to sear her.

"Sweetheart!" he said in a hoarse whisper. "Sweetheart!"

SHE twisted free from his arms, pushing him away from her with both hands against his chest, and stared at him out of outraged eyes. There was a bit of fear in them, too, for in the moment when he had caught her off guard the cold, unemotional mask that was his face had dropped and something very terrible had leered out at her from behind it.

Their stopping in the middle of the floor was causing confusion. Other couples, forced to dance shoulder to shoulder by the jam on the restricted floor, were bumping into them and caroming off to throw still others out of rhythm.

"It is too crowded," Becker was saying to her as if echoing something she herself had said. He spoke rather loudly, too loudly she fancied, and his face was once more calm, inscrutable, his eyes clear—the mask once more in place. "Let's get out of it."

His strong fingers gripped her by the elbow, propelling her ahead of him through the dancers and so back to their table. He smiled and made her a little bow as he pulled out her chair, again the polished gentleman who had led her away.

The thin-necked, flat-bowled glass was in front of her. Lois reached for it, became aware that her hand was trembling and emptied it quickly before her agitation should become apparent to everyone.

She glanced up as she set it down again and saw Raymond Lancaster gazing fixedly at her from an adjoining table.

IT was the champagne, Lois—and the evening is not half gone. You are learning. What will Raymond say? We will be interested to watch you through your next experience in the October 15 Radio Digest.

WAAM FAMILY STATION

(Continued from page 4)

it falls short of its mission. There should be more educational subjects on all Radio programs."

The Newark Technical College provides the mental pabulum for WAAM listeners through short Radio talks by members of its faculty. Among the subjects broadcast serially were The Human Machine and Trees. Miss Ada Bessie Swann, of the Public Service Corporation has conducted a Radio cooking school, said to be the oldest in the country. Through the Busy Beavers feature children have been entertainingly instructed in natural history and geography. Municipal Nights have provided city and state government information through talks by public officials. Miss Mildred Huntoon, city hostess, conducts a Chamber of Commerce feature for the Oranges and Maplewood in a specially established studio.

Despite the more sober features that have been described WAAM does not slack in its musical programs. Among the long list of musical organizations that are heard regularly are: Wallie Osborne and his Chateau Baltusrol Orchestra, Ray Nichols and his Four Towers Orchestra, Joe Brown's Orchestra, Bill Stanley and his East Orange Orchestra, Ernie Krickett and His Men, Red Naught and His Collegians, Frank Dailey and his Meadow Brook Orchestra, the Montroyal Orchestra, Tom Cooper and his Country Club Orchestra, and the Dorn-Bauer Orchestra.

A new device has recently been put into use by WAAM whereby "fade in" and "fade out" effects are produced in a manner corresponding to the fading effects in motions pictures. It seems especially useful where an illusion is desired such as the approach of an orchestra on a motor car. As the car is supposed to approach the volume of the music increases and as it recedes it dims away into the distance.

In a similar manner the bells of the Old First Church are "faded" into the program throughout the evening. At the opening of the program the bells ring out the hour, while music from the opening feature is heard faintly, gradually growing louder until the last clap of the bell.

There are seven remote controls broadcasting through WAAM; Four Towers in Cedar Grove, Chateau Baltusrol, Newark Y. M. C. A., Second Presbyterian Church, Orange Y. M. C. A. and the Public Service Bureau.

MISS AMERICA AT WPG

(Continued from page 5)

Torpadie, concert soprano; Judson House, operatic tenor; Arthur Kraft, concert tenor; Irene Williams, soprano star of Hinshaw's Opera; May Luka, soprano of the Royal Opera company of Prague, and Milo Luka, baritone of the Chicago Civic Opera company.

Coming from so many various sources WPG programs are operated through sixteen distinct controls. That the entertainment reaches far territory is indicated by messages received almost daily from the West Indies, Canal Zone, South America, Pacific Coast and as far north as Spotted Island Hospital, Labrador.

The Masterpiece of Masterpieces

Quality with 100% Reserve Power

Distinctively Beautiful

The World's Greatest Radio

New and Improved FRESHMAN MASTERPIECE

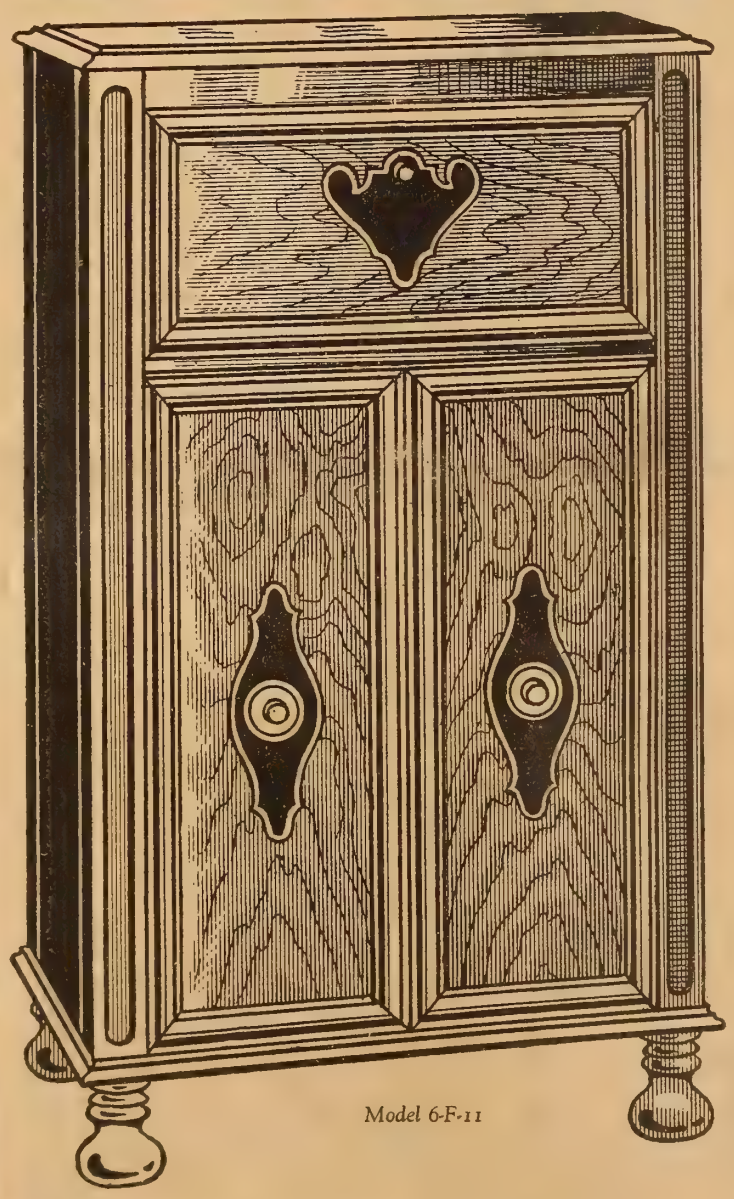
In every great industry one company eventually brings forth one product which stands far ahead of all competition.

In Radio, the Freshman Co. has always surprised the field with its remarkably efficient radio sets, the standard of comparison in the entire industry.

But now

this "Masterpiece of Masterpieces" startles and surpasses all expectations.

It is the most perfect radio that has ever been designed. It is massive—it is beautiful. It is just what you want for your home. For no matter how exquisite your furnishings are, this artistic genuine mahogany upright console will lend additional beauty. And yet, it is priced so moderately that almost every family can easily afford to own one.



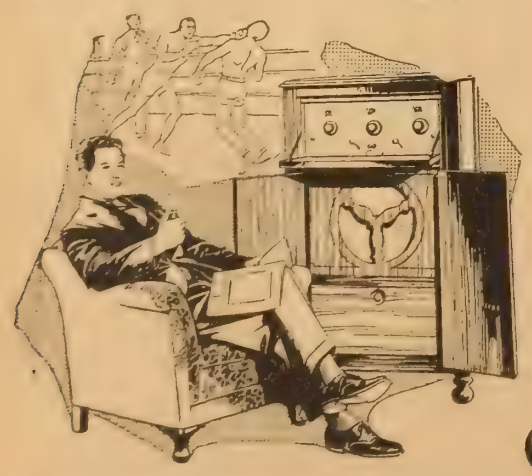
Model 6-F-11

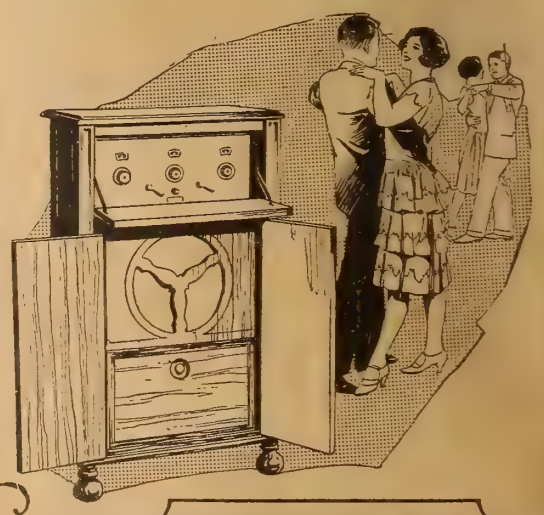
—the thing that makes it wonderful is its tone quality. The large cone speaker has been designed to exactly match Freshman's new QUALITY radio receiver. This special cone speaker easily handles the full power that this new set delivers.

Yet, in spite of its ability to handle great volume, when the power is reduced the softest and mellowest tones come forth in a manner never before achieved by any sound producing device.

Simplicity

Its ease of operation, with its three distinct controls allows any novice to tune in the station wanted day after day at the same points on the dials. This efficient means of operation eliminates the overlapping of wave lengths, which assures distinct separation of one broadcasting station from the others. It truly is the world's greatest radio.





$119.50

Sold on Convenient Terms

by Authorized Freshman Dealers—who also install and service them

CHAS. FRESHMAN CO., INC. FRESHMAN BLDG., NEW YORK 2626 W. WASHINGTON BLVD., CHICAGO

Operates by Electricity if you prefer

This new QUALITY set is so designed to operate from your light socket by installing the new Freshman "ABC" Power Supply.

Genuine R.C.A. Radiotrons

are recommended for use with Freshman Masterpiece Receivers.

A special package containing—1UX 112 power tube, 1UX 200A detector tube and 3 UX 201A amplifying tubes—matched and tested for the set in which they are shipped, is sold by Authorized Freshman Dealers.

The Most Perfectly Toned Radio Ever Produced
